remarks in writing. All written submissions and summaries should be received in the Metric Program Office by February 27, 1995.

DATES: The Metric Town Meeting will be held on Monday, March 27, 1995, and may extend into Tuesday, March 28, to accommodate additional responses and speakers.

ADDRESSES: The meeting will be held at the National Institute of Standards and Technology in Gaithersburg, Maryland.

FOR FURTHER INFORMATION CONTACT: Organizations and individuals interested in participating should contract the Director, Metric Program, U.S. Department of Commerce, National Institute of Standards and Technology, Gaithersburg, MD 20899 as early as possible but before February 27, 1995. Phone (301–975–3690) and FAX (301–948–1416) messages are welcomed.

SUPPLEMENTARY INFORMATION: World trade is geared toward to metric system of measurement. Industry in the united States is often at a competitive disadvantage when dealing in international markets if its designs or production measurement units differ from those used by the rest of the work. U.S. companies can be excluded from international markets when unable to deliver goods which are built to metric specifications. The Nation can not ignore these globalization pressures.

The North American Free Trade Agreement (NAFTA) and the newly ratified General Agreement on Tariffs and Trade (GATT) have expanded the opportunities for international trade and commerce. To take advantage of those opportunities and to enhance the acceptability of U.S. products, U.S. business must expedite the adoption of

the metric system

Under the provisions of the Omnibus Trade and Competitiveness Act of 1988, which establishes the metric system as the preferred system of measurement for trade and commerce, the Federal government is required to assist industry, especially small business, in converting to the metric system. Pursuant to Executive Order 12770, the U.S. Department of Commerce and the Interagency Council on Metric Policy have been charged to explore ways to bring together the government, the private sector and the public to discuss the nest steps in decision-making about metric conversion.

The Department of Commerce and the Interagency Council on Metric Policy will hold a Metric Town Meeting to listen to the concerns and ideas of the private sector for accelerating the transition to the metric system including actions that the Government

can take to make it easier for industry to convert to metric system use. Accordingly, the Town Meeting will seek views from businesses, trade and professional groups, educators, and state and local government entities on topics such as:

- How using the metric system contributes to key national goals such as U.S. global competitiveness, technology development and commercialization, enhanced labor skills, and U.S. education reform;
- How the effective implementation of trade agreements (e.g., NAFTA and GATT) will be influenced by industry's use or non-use of metric measures;
- What plans the Federal government and individual agencies should undertake to complete a smooth conversion to the metric system in U.S. trade and commerce;
- How industry and Federal, state, and local governments should inform small and midsized companies and their workers about how their economic prosperity may be tied, even if indirectly, to global markets, and involve them in more positive discussions on metrication;
- Identifying or eliminating Federal regulatory barriers to metrication;
- Identifying outdated Federal standards that may contribute to continued use of non-metric measures;
- How Federal procurement practices should support metrication efforts;
- What public education or awareness strategies government or industry should initiate to accelerate public understanding and acceptance of the transition to the metric system.
