SUPPLEMENTARY INFORMATION: The East Fork Poplar Creek Remedial Action Project was initiated under the Resource Conservation and Recovery Act's (RCRA) off-site release provisions. The project was later incorporated into the CERCLA program when the Oak Ridge Reservation was determined to be a National Priorities List site in December 1989.

This project involves an operable unit consisting of 14.2 miles of the lower portion of East Fork Poplar Creek (i.e., the portion of the creek from the point it exits the Y–12 Plant until its confluence with Poplar Creek). The operable unit includes the creek, creek sediments, the soils in the 100-year floodplain surrounding the creek, and the Oak Ridge Sewerline Beltway.

On November 18, 1988, the Department of Energy published in the Federal Register a Notice of Intent to prepare an Environmental Impact Statement for the East Fork Poplar Creek Remedial Action Project. At the time of the Notice, it was the Department's policy to integrate the CERCLA and NEPA processes, whenever practicable. Under that policy, the Department intended to prepare an integrated CERCLA/NEPA Remedial Investigation/ Feasibility Study-Environmental Impact Statement for the project. As stated in the Secretary of Energy's June 13, 1994, Policy Statement on NEPA, however, it is now the Department's policy to generally rely on the CERCLA process for the review of actions to be taken under CERCLA, and to incorporate NEPA values (e.g., analysis of cumulative, off-site, ecological, and socioeconomic impacts) in the Department's CERCLA documents to the extent practicable.

To date, the public has been extensively involved in the East Fork Poplar Creek Remedial Action Project. Numerous meetings have been held with private property owners and interested citizens. A property owner workshop and a general public workshop were held on the Remedial Investigation report, and a volunteer 30-person Citizens Working Group formed in June 1993, continues to meet monthly and provides input and suggestions into the decision-making process.

Discussions have been held with the Army Corps of Engineers, the Fish and Wildlife Service, the Environmental Protection Agency, the Tennessee Department of Environment and Conservation, the Citizens Working

Group, and other interested parties regarding the Department's intent to rely on the CERCLA process to document its environmental review of actions for this project. In addition, a notice was placed in a local newspaper and letters were sent to approximately 300 stakeholders soliciting input on the proposed withdrawal of the Notice of Intent; no objections were received. Thus, the Department of Energy has decided to rely on the CERCLA process to document its environmental review of actions to be taken under CERCLA for the East Fork Poplar Creek Remedial Action Project, with NEPA values incorporated into the CERCLA process to the extent practicable. Public involvement has been and will continue to be an integral part of the decisionmaking process for the project.

Copies of documents related to the East Fork Poplar Creek Remedial Action project are on file at, and may be obtained from, the Information Resource Center, 105 Broadway, Oak Ridge, Tennessee 37830.

Issued in Washington, DC, on January 23, 1995.
