#### § 437.33 Effluent limitations representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT).

Except as provided in 40 CFR 125.30 through 125.32, any existing point source subject to this subpart must achieve the following effluent limitations representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology (BCT). The limitations for BOD<sub>5</sub>. TSS, and Oil and Grease shall be the same as those specified in § 437.32 of this subpart for the best practicable control technology currently available (BPT).

# § 437.34 Effluent limitations representing the degree of effluent reduction attainable by the application of best available technology economically achievable (BAT).

Except as provided in 40 CFR 125.30 through 125.32, any existing point

source subject to this subpart must achieve limitations representing the degree of effluent reduction attainable by the application of the best available technology economically achievable (BAT). The limitations shall be the same as those specified in § 437.32 for the best practicable control technology currently available (BPT) for the priority and non-conventional pollutants listed.

#### § 437.35 New source performance standards (NSPS).

Any new source subject to this subpart must achieve the following new source performance standards (NSPS). These limitations apply to the organics treatment effluent. The limitations shall be the same as those specified in § 437.32 for the best practicable control technology currently available (BPT).

## § 437.36 Pretreatment standards for existing sources (PSES).

Except as provided in 40 CFR 403.7 and 403.13, any existing source subject to this subpart that introduces pollutants into a publicly-owned treatment works (or any source that introduces hazardous or non-hazardous waste into a POTW from off-site by tanker truck, trailer/roll-off bins, drums, barge or other form of shipment) must: comply with 40 CFR part 403; and achieve the following pretreatment standards for existing sources (PSES).

#### PRETREATMENT STANDARDS— ORGANICS SUBCATEGORY (mg/l)

Pollutant or pollutant parameter	Maxi- mum for any one day	Monthly average
1,1,1,2- Tetrachloroethane 1,1,1-Trichloroethane 1,1,2-Trichloroethane 1,1-Dichloroethene 1,2,3-Trichloropropane 1,2-Dibromoethane 1,2-Dichloroethane 2,3-Dichloroaniline	0.013 0.021 0.21 0.037 0.016 0.014 0.031 0.17	0.011 0.018 0.17 0.027 0.014 0.011 0.025 0.14

# PRETREATMENT STANDARDS— ORGANICS SUBCATEGORY (mg/l)— Continued

## § 437.37 Pretreatment standards for new sources (PSNS).

Except as provided in 40 CFR 403.7, any new source subject to this subpart that introduces pollutants into a publicly-owned treatment works (or any new source that introduces hazardous or non-hazardous waste into a POTW from off-site by tanker truck, trailer/roll-off bins, drums, barge or other form of shipment) must: comply with 40 CFR part 403; and achieve pretreatment standards for new sources (PSNS). The limitations shall be the same as those specified in § 437.36 for the pretreatment standards for existing sources (PSES).
