(ii) For any subsequent crop year, on the sales closing date for the insured crop in the county for the previous crop year, provided continuous coverage has been in effect since that date. For example: If you make application and purchase a sunflower seed crop insurance policy for the 1996 crop year, prevented planting coverage will begin on the 1996 sales closing date for the insured crop in the county. If the sunflower seed coverage remains in effect for the 1997 crop year (is not terminated or cancelled during or after the 1996 crop year, except the policy may have been cancelled to transfer the policy to a different insurance provider, if there is no lapse in coverage), prevented planting coverage for the 1997 crop year began on the 1996 sales closing date.

(4) The acreage to which prevented planting coverage applies will not exceed the total eligible acreage on all Consolidated Farm Service Agency (CFSA) Farm Serial Numbers in which you have a share, adjusted for any reconstitution that may have occurred before the sales closing date. Eligible acreage for each CFSA Farm Serial Number is

determined as follows:

(i) If you participate in any program administered by the United States Department of Agriculture that limits the number of acres that may be planted for the crop year, the acreage eligible for prevented planting coverage will not exceed the total acreage permitted to be planted to the insured crop.

(ii) If you do not participate in any program administered by the United States Department of Agriculture that limits the number of acres that may be planted, and unless we agree in writing before the sales closing date, eligible acreage will not exceed the greater of:

(Å) The CFSA base acreage for the insured crop, including acres that could be flexed from another crop, if applicable;

(B) The number of acres planted to sunflower seed during the previous crop

(C) One hundred percent (100%) of the simple average of the number of acres planted to sunflower seed during the crop years that you certified to determine your yield.

(iii) Acreage intended to be planted under an irrigated practice will be limited to the number of acres for which you had adequate irrigation facilities prior to the insured cause of loss which prevented you from planting.

(iv) Prevented planting coverage will not be provided for any acreage:

(A) That does not constitute at least 20 acres or 20 percent (20%) of the acreage in the unit, whichever is less (Acreage that is less than 20 acres or 20 percent of the acreage in the unit will be presumed to have been intended to be planted to the insured crop planted in the unit, unless you can show that you had the inputs available before the final planting date to plant and produce another insured crop on the acreage);

(B) For which the actuarial table does not designate a premium rate unless a written agreement designates such premium rate;

(C) Used for conservation purposes or intended to be left unplanted under any program administered by the United States Department of Agriculture;

- (D) On which another crop is prevented from planting, if any crop has already received a prevented planting indemnity, guarantee or amount of insurance on the same acreage in the same crop year, unless you provide adequate records of acreage and production showing that the acreage has a history of double-cropping in each of the last four years;
- (E) On which another crop is prevented from planting, if any crop was planted and failed, or was planted and harvested (including hayed or grazed) on the same acreage in the same crop year, unless you provide adequate records of acreage and production showing that the acreage has a history of double-cropping in each of the last four years;
- (F) When coverage is provided under the Catastrophic Risk Endorsement if you plant another crop for harvest on any acreage you were prevented from planting in the same crop year, even if you have a history of double cropping. If you have a Catastrophic Risk Endorsement and receive a prevented planting indemnity, guarantee, or amount of insurance for a crop and are prevented from planting another crop on the same acreage, you may only receive the prevented planting indemnity, guarantee, or amount of insurance for the crop on which the prevented planting indemnity, guarantee, or amount of insurance is received;
- (G) For which planting history or conservation plans indicate that the acreage would have remained fallow for crop rotation purposes.
- (v) For the purpose of determining eligible acreage for prevented planting coverage, acreage for all units will be combined and be reduced by the number of sunflower acres timely planted and late planted. For example, assume you have 100 acres eligible for prevented planting coverage in which you have a 100 percent (100%) share. The acreage is located in a single CFSA Farm Serial Number which you insure as two separate optional units consisting of 50 acres each. If you planted 60 acres of sunflower seed on one optional unit and 40 acres of sunflower seed on the second optional unit, your prevented planting eligible acreage would be reduced to zero (i.e., 100 acres eligible for prevented planting coverage minus 100 acres planted equals zero).
- (5) In accordance with the provisions of section 6 (Report of Acreage) of the Basic Provisions (§ 457.8), you must report by unit any insurable acreage that you were prevented from planting. This report must be submitted on or before the acreage reporting date. The total amount of prevented planting and planted acres cannot exceed the maximum number of acres eligible for prevented planting coverage. Any acreage you report in excess of the number of acres eligible for prevented planting coverage, or that exceeds the number of eligible acres physically located in a unit, will be deleted from your acreage report.
- 18. Section 457.113 is amended by revising paragraph 1(n) of the Coarse Grains Crop Insurance Provisions to read as follows:

§ 457.113 Coarse Grains Crop Insurance Provisions.

* * * * * *

1. Definitions

* * * * *

(n) Prevented planting—Inability to plant the insured crop with proper equipment by the final planting date designated in the Special Provisions for the insured crop in the county or the end of the late planting period. You must have been unable to plant the insured crop due to an insured cause of loss that has prevented most producers in the surrounding area from planting.

19. Section 457.113 is amended by revising paragraphs 13(a)(3), 13(b), and 13(d) to read as follows:

* * * * *

13. Late Planting and Prevented Planting

(a) * * *

(3) For prevented planting acreage, multiply the per acre production guarantee for timely planted acreage by:

(i) Fifty percent (0.50) and multiply the result by the 50 acres you were prevented from planting, if the acreage is eligible for prevented planting coverage, and if the acreage is left idle for the crop year, or if a cover crop is planted not for harvest. Prevented planting compensation hereunder will not be denied because the cover crop is hayed or grazed; or

(ii) Twenty-five percent (0.25) and multiply the result by the 50 acres you were prevented from planting, if the acreage is eligible for prevented planting coverage, and if you elect to plant a substitute crop for harvest after the intended crop was prevented from being planted. (This subparagraph (ii) is not applicable, and prevented planting coverage is not available hereunder, if you elected the Catastrophic Risk Protection Endorsement or you elected to exclude prevented planting coverage when a substitute crop is planted (see subsection 13(d)(1)(iii))).

The total of the three calculations will be the production guarantee for the unit. Your premium will be based on the result of multiplying the per acre production guarantee for timely planted acreage by the 150 acres in the unit.

(b) If you were prevented from planting, you must provide written notice to us not later than the acreage reporting date.

(d) Prevented Planting (Including Planting After the Late Planting Period).

(1) If you were prevented from planting the insured crop (see subsection 1(n)), you may elect:

(i) To plant the insured crop during the late planting period. The production guarantee for such acreage will be determined in accordance with paragraph 13(c)(1);

(ii) Not to plant this acreage to any crop except a cover crop not for harvest. You may also elect to plant the insured crop after the late planting period. In either case, the production guarantee for such acreage will be fifty percent (50%) of the production guarantee for timely planted acres. For
