

of cotton which have been compressed to high density are not deliverable on the contract. The existing terms of Section 5.06(c) of the By-laws specify that deliverable cotton bales must weigh no less than 325 pounds or no more than 675 pounds.

Under the proposed amendments, Section 6.03(o) will be modified to specify that GUD compressed bales shall be the only bales permitted for delivery, thereby eliminating the delivery of cotton bales that have been standard compressed or universal compressed. The proposed amendments also will revise Section 5.06(c) of the By-laws to the extent that the deliverable weight range for individual bales will be reduced to 400 to 650 pounds from the existing range of 325 to 675 pounds. In addition, the proposed amendments will establish a new requirement that the number of bales in a delivery unit be no less than 92 or more than 108.<sup>1</sup>

The Exchange intends to implement the proposed amendments for all newly certificated cotton on and after August 1, 1995.

Copies of the proposed amendments will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW, Washington, D.C. 20581.
