

to the needs of victims of domestic violence.

WomanKind strives to: (1) Increase health care providers' capacity and motivation to identify and refer battered women to WomanKind advocates from several hospital departments, (2) facilitate clients' decisions to alter their circumstances, and (3) work with clients to identify and access existing community services that provide practical support in developing and implementing a plan for change.

The evaluation is being conducted to determine the extent to which the objectives listed above are achieved and to identify the integration and level of contribution made by each specific program element. If proven effective, this program could be used with other domestic violence prevention strategies to reduce the incidence of domestic violence.
