Notes: Comparable coverage was priced in the allowance and in the reference area, and the premiums were compared to derive indexes for each type of coverage. With two exceptions, these indexes were used to adjust reference area premiums by type of coverage to estimate the cost of equivalent coverage in allowance area. The exceptions are Uninsured Motorist premiums, which were adjusted using the relative total cost of premiums (less Medical coverage where applicable), and Medical premiums, which were not adjusted because they were not part of the reference area normal coverage.

*Less Medical

**Including Medical
