

they do not regard the exemption as a missed opportunity for them to exercise their emergency plan. The State and local governments within the Point Beach EPZ participated in the October 11, 1995, exercise at the nearby Kewaunee Nuclear Power Plant. The licensee's next emergency preparedness exercise is scheduled for August 1996 and will include the participation of State and local government emergency response organizations.

The licensee states that the 1995 exercise, as planned, is anticipated to have a negative impact on the licensee's oversight of the storage of spent fuel in an independent spent fuel storage installation at the Point Beach Nuclear Plant. The licensee had hoped to load their first dry storage container prior to mid-September. However, due to various reasons, they are now planning to load the first container in early December following the Point Beach Unit 2 refueling outage which is scheduled to be completed by the end of November. The licensee states that it is prudent to load a dry storage container as soon as possible in order to minimize the time that Point Beach will not have the capacity for a full-core offload. In addition, the licensee states that emergency response personnel who would be involved in the emergency exercise will be involved in oversight of the process for loading the storage containers.

IV.

Based on a review of the licensee's request for an exemption for the requirement to conduct an exercise of the Point Beach Nuclear Plant Emergency Plan in 1995, the NRC staff finds that performance of the 1995 utility-only annual exercise is not needed to achieve the underlying purpose of the regulation, that is, to demonstrate that the state of emergency preparedness provides reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency. The licensee has demonstrated excellent performance in the emergency preparedness area. The integrated emergency preparedness drill in August of 1995 provided a good test of the emergency preparedness program. The licensee performed a thorough critique of the drill and no deficiencies were identified during the drill. The licensee plans to correct weaknesses which were identified during the drill prior to the 1996 full-participation exercise.

The Commission has determined, pursuant to 10 CFR Part 50.12, that this exemption as described in Section II above is authorized by law, will not

present an undue risk to the public health and safety, and is consistent with the common defense and security. Furthermore, the Commission has determined that special circumstances as provided in 10 CFR 50.12(a)(2)(ii) are present in that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule.

The Commission hereby grants a one-time exemption from the requirements of 10 CFR Part 50, Appendix E, Section IV.F.2.b, for annually exercising the onsite Emergency Plan at the Point Beach Nuclear Plant in the year 1995.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will have no significant impact on the quality of the human environment (60 FR 58685).

This exemption is effective upon issuance.
