amounts, and specifications for prohibited species bycatch allowances for the groundfish fishery of the Bering Sea and Aleutian Islands management area (BSAI). NMFS is closing certain fisheries as specified in the interim 1996 groundfish specifications. The intended effect is to conserve and manage the groundfish resources in the BSAI.

**EFFECTIVE DATE:** 0001 hours, Alaska local time (A.L.T.), January 1, 1996, until the effective date of the Final 1996 Initial Harvest Specifications for Groundfish, which will be published in the Federal Register.

**ADDRESSES:** The preliminary 1996 Stock Assessment and Fishery Evaluation (SAFE) Report, dated September 1995, is available from the North Pacific Fishery Management Council, 605 W. 4th Avenue, Suite 306, Anchorage, AK 99501-2252, 907-271-2809.

**FOR FURTHER INFORMATION CONTACT:** Ellen R. Varosi, 907-586-7228.

#### **SUPPLEMENTARY INFORMATION:**

##### **Background**

The domestic and foreign groundfish fisheries in the exclusive economic zone of the BSAI are managed by NMFS according to the Fishery Management Plan for Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP). The FMP was prepared by the North Pacific Fishery Management Council (Council) and approved by NMFS under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). The FMP is implemented by regulations for the foreign fishery at 50 CFR part 611 and for the U.S. fisheries at 50 CFR parts 675, 676, and 677. General regulations that also pertain to the U.S. fisheries appear at 50 CFR part 620.

The Council met September 27 through October 2, 1995, to review scientific information concerning groundfish stocks. The Council adopted for public review, the preliminary SAFE Report for the 1996 BSAI groundfish fisheries. The preliminary SAFE Report, dated September 1995, provides an update on the status of stocks. Copies of the SAFE Report are available from the Council (see **ADDRESSES**). The preliminary TAC amounts for each species are based on the best available biological and socioeconomic information. The Council recommended preliminary total TAC amounts of 2,000,000 metric tons (mt) and preliminary total acceptable biological catch (ABC) amounts of 2,929,885 mt for the 1996 fishing year.

Under § 675.20(a)(7), NMFS is publishing in the Proposed Rules section of this issue of the Federal
