(Interim TAC amounts have been rounded.)

¹ Amounts apply to the entire Bering Sea and Aleutian Islands management area (BSAI), Bering Sea (BS), or Aleutian Islands (AI), as indicated. With the exception of pollock, and for purposes of these specifications, the BS includes the Bogoslof District (BogDist).

² Zero amounts of groundfish are proposed for Joint Venture Processing and Total Allowable Level of Foreign Fishing and are not shown in this table.

³ After subtraction of reserves, the ITAC amounts of pollock for each subarea or district are divided into roe and non-roo seasonal allowances. (See § 675.20(a)(7)(i).) For the BS subarea, the roe and non-roo seasonal allowances are 45 and 55 percent of the pollock ITAC amounts, respectively. The AI subarea and the Bogoslof District receive 100 percent of their respective ITAC seasonal allowance during the roe-season with the remainder of the respective ITAC seasonal allowance during the non-roo season.

⁴ Inshore and offshore component allocations are 35 and 65 percent of the ITAC amounts, respectively. (See § 675.20(a)(2)(iii).)
