## PART D. COMBINED SEWER SYSTEMS

FORM  
2A  
NPDES

If your response here is a combined sewer system, complete Part D.

**D.1. Combined Sewer Overflow (CSO) (Recharge Points).** Provide the number of CSO discharge points in the combined sewer system covered by this application.

**D.2. System Map.** Provide a map indicating the following:

- All CSO discharge points.
- Sensitive use areas potentially affected by CSOs (e.g., beaches, drinking water supplies, shellfish beds, sensitive aquatic ecosystems, and outstanding natural resource waters).
- Waters that support threatened and endangered species potentially affected by CSOs.

**D.3. System Diagram.** Provide a diagram, either in the map provided in D.2. or on a separate drawing, of the combined sewer collection system that includes the following information:

- Locations of major sewer trunk lines, both combined and sanitary.
- Locations of points where separate sanitary sewers feed into the combined sewer system.
- Locations of in-line and off-line storage structures.
- Locations of flow-regulating devices.
- Locations of pump stations.

**D.4. System Evaluation.** List below studies that have been performed since the last permit application on the collection system. Include modeling studies, hydraulic studies, past monitoring efforts, and facility plans.
