cover page of the form, certain applicants will also need to complete one or more parts of the Supplemental Application Information packet.

The Supplemental Application Information packet is divided into the following parts:

- Part A Expanded Effluent Testing Data
- Part B Toxicity Testing Data Part C Industrial User Discharges, Pretreatment, and RCRA/CERCLA Wastes
- Part D Combined Sewer Systems Refer to the Application Overview

section to determine which part(s) of the Supplemental Application Information packet you must complete.

Part A: Expanded Effluent Testing Data

Paperwork Reduction Act Notice: The public reporting and recordkeeping burden for this collection of information (Part A:

Expanded Effluent Data) is estimated to average 5.7 hours per response. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information; search existing data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Chief, OPPE Regulatory Information Division, U.S.

Environmental Protection Agency (2136), 401 M St., SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th St., NW., Washington, DC 20503, Attention: Desk Officer for EPA. Include the OMB control number in any correspondence. Do not send the completed application form to these addresses.

Note: All applicants that discharge effluent to waters of the United States must complete question 18 of the Basic Application Information packet. Refer to the Application Overview section to determine if you must also complete the Effluent Testing Information in Part A of the Supplemental Application Information packet.

Refer to the following table to determine which effluent testing information questions you must complete and to determine the number of pollutant scans on which to base your data.

Treatment works characteristics	Form 2A requirements	Minimum No. of scans (see appendix A)
 Design flow rate less than 1 mgd, and Not required to have (or does not have) a pretreatment program 	Question 18	3
Design flow rate greater than or equal to 1 mgd, or	Question 18 <i>and</i> Part A of Supplemental Application Information Packet.	3
 Required to have a pretreatment program (or has one in place) or Otherwise required by the permitting authority to provide the date 		

The following instructions apply only to treatment works completing Part A of the Supplemental Application Information packet. Note that the permitting authority may require additional testing on a case-by-case basis.

Complete Part A once for each outfall through which effluent is discharged to waters of the United States. Indicate on each page the outfall number (as assigned in questions 15–17 of the Basic Application Information packet) for which the data are provided. Using the blank rows provided on the form, submit any data the facility may have for pollutants not specifically listed in Part A.

For specific instructions on completing the pollutant tables in Part A, refer to Appendix A of these instructions.

Note: After completing Part A, refer to the Application Overview section to determine which other sections of Form 2A you must complete. If you have completed all other required sections of Form 2A, you may proceed to the Certification Statement in question 19 of the Basic Application Information packet.

Part B. Toxicity Testing Data

Paperwork Reduction Act Notice: The public reporting and recordkeeping burden for this collection of information (Part B: Toxicity Testing Data) is estimated to average 4.5 hours per response. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information; search existing data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Chief, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (2136), 401 M St., S.W., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th St., N.W., Washington, DC 20503, Attention: Desk Officer for EPA. Include the OMB control number in any correspondence.

Do not send the completed application form to these addresses.

Treatment works meeting one or more of the following criteria must submit the results of whole effluent toxicity testing:

1. Treatment works with a design influent flow rate greater than or equal to one mgd; or

2. Treatment works with an approved pretreatment program (as well as those required to have one); or

3. Treatment works otherwise required by the permitting authority to submit the results of whole effluent toxicity testing.

Applicants completing Part B must submit the results from any whole effluent toxicity test conducted during the past three years that have not been reported or submitted to the permitting authority for each outfall discharging effluent to the waters of the United States. Do not include information on combined sewer overflows in this section. If the applicant conducted a whole effluent toxicity test during the past three years that revealed toxicity, then provide any information available on the cause of the toxicity or any results of a toxicity reduction evaluation, if one was conducted.

Test results provided in Part B must be based on multiple species being
