MSWLF unit also may receive other types of RCRA subtitle D wastes, such as commercial solid waste, nonhazardous sludge, small quantity generator waste and industrial solid waste. Such a landfill may be publicly or privately owned.

a. Provide the official or legal name of the MSWLF. Do not use a colloquial name.

b. Provide the name, title, and work telephone number of a person who is thoroughly familiar with the operation of the MSWLF, and who can be contacted by the permitting authority if necessary.

c. Provide the complete mailing address for the MSWLF where correspondence should be sent. This may differ from the MSWLF location given below.

d. Provide the physical location (street address) of the MSWLF. If the MSWLF lacks a street address or route number, provide the most accurate alternative geographic information (e.g., township and range, section or quarter section number, nearby highway intersection).

e. Provide the total dry metric tons per 365-day period that is sent from your facility to this MSWLF. Do not include sewage sludge sent to the MSWLF by other facilities.

f. Provide the number and type of any relevant Federal, State, or local environmental permits or construction approvals received or applied for by the MSWLF.

g. Submit information to determine whether the sewage sludge placed on this MSWLF meets applicable requirements for disposal of sewage sludge on a MSWLF.

Sewage sludge placed on a MSWLF must meet requirements in Part 258 concerning the quality of materials placed on a MSWLF unit. In particular:

• Placement on a MSWLF of bulk or noncontainerized liquid waste, as determined using the Paint Filter Liquids Test (Method 9095 in "Test Methods for Evaluating Solid Wastes, Physical/Chemical Methods—EPA Pub. No. SW–846.), is prohibited.

• Placement on a MSWLF of a regulated hazardous waste, as defined in 40 CFR 261.3, is prohibited.

• If sewage sludge is used as a cover at a MSWLF, the MSWLF owner/ operator must demonstrate that the sewage sludge is suitable for use as a cover, and that it provides sufficient control of disease vectors, fires, odors, blowing litter, and scavenging and does not present a threat to human health and the environment. h. Indicate whether the MSWLF complies with criteria set forth in 40 CFR Part 258.

Part 258 specifies minimum Federal criteria for MSWLFs, including landfills that accept sewage sludge along with household waste. Among these requirements are location restrictions, facility design and operating criteria, ground-water monitoring, and corrective action, closure and post-closure care, along with financial assurance requirements. In contrast to Part 503, Part 258 controls sewage sludge placed on MSWLFs through a facility design and management practice approach. In Part 503, EPA has adopted the Part 258 criteria as the appropriate standard for sewage sludge disposed of with municipal waste. EPA concluded that if sewage sludge is disposed of in a MSWLF complying with Part 258 criteria, public health and the environment are protected.

Note that the POTW is legally responsible for knowing whether a MSWLF is in compliance with Part 258 and may be liable if it sends its sludge to an MSWLF that is not in compliance with Part 258.

## Section C: Land Application of Bulk Sewage Sludge

Complete this section if you completed Section B.7 (Land Application of Bulk Sewage Sludge). Unless the permitting authority specifically requires you to complete this section, you may *skip* this section for sewage sludge that is covered in any of the following sections of this application:

• Section B.4 (the sewage sludge meets the ceiling concentrations in Table 1 of § 503.13(b)(1), the pollutant concentrations in Table 3 of §503.13(b)(3), the Class A pathogen reduction requirements in § 503.32(a), and one of the vector attraction reduction options in  $\S$  503.33(b) (1)–(8)). Such sewage sludges are exempt from the general requirements and management practices of Part 503 when they are land applied (unless the permitting authority requires otherwise), and thus the site information in Section C is not required for permitting.

• Section B.5 (the sewage sludge is placed in a bag or other container for sale or give-away for application to the land). Section C does not cover the sale or give-away of sewage sludge in a bag or other container for application to the land because EPA typically will not control the users of such sewage sludge (typically, home gardeners or other small-scale users), or the land on which

the sludge is applied, through the generator's permit.

• Section B.6 (the sewage sludge is sent to another facility for treatment or for blending). Section C does not apply to a generator that sends sewage sludge to another facility for treatment or for blending, because the Part 503 requirements addressed by Section C will largely be the responsibility of the receiving facility.

Bulk sewage sludge is defined as sewage sludge that is not sold or given away in a bag or other container for application to the land. (A bag or other container includes an open or closed receptacle such as a bucket, box, carton, or vehicle or trailer with a load capacity of one metric ton or less.)

Provide the information in this section for *each* land application site that has been identified at the time of permit application. Attach additional pages as necessary. In cases where the sewage sludge is applied to numerous sites with similar characteristics, you may combine the information for several sites under a single response (the name and address of each site must still be provided, however).

C.1. Identification of Land Application Site.

a. Provide the site name or number. The name or number is any designation commonly used to refer to the site. If the site has been previously designated in another permit, use that designation.

b. Answer either question 1 or question 2.

1. Provide the physical location (street address) of the land application site. If the site lacks a street address or route number, provide the most accurate alternative geographic information (e.g., township and range, section or quarter section number, nearby highway intersection).

2. Provide the latitude and longitude of the facility. If a map was used to obtain latitude and longitude, provide map datum (e.g., NAD 27, NAD 83) and map scale (e.g., 1:24000, 1:100000).

C.2. Owner Information.

a. Indicate whether you are the owner of this land application site. For purposes of this form, the owner is the person that owns a part of or the entire land application site.

b. If you are not the owner of this land application site, provide the name, telephone number, and complete mailing address for the site owner.

C.3. Applier Information.

a. Indicate whether you are the person who applies sewage sludge to this land application site.

b. If you are not the person who applies sewage sludge to this land application site, provide the name,
