dollars per acre, your prevented planting amount of insurance would be 40 dollars per acre (200 dollars multiplied by 0.20). You may elect to exclude prevented planting coverage when a substitute crop is planted for harvest and receive a reduction in the applicable premium rate. If you wish to exclude this coverage, you must so indicate, on or before the sales closing date, on your application or on a form approved by us. Your election to exclude this coverage will remain in effect from year to year unless you notify us in writing on our form by the applicable sales closing date for the crop year for which you wish to include this coverage. All acreage of the crop insured under this policy will be subject to this exclusion.

(2) Proof may be required that you had the inputs available to plant and produce the intended crop with the expectation of at least producing the yield upon which your

amount of insurance is based.

(3) In addition to the provisions of section 7 (Insurance Period), the insurance period for prevented planting coverage begins:

(i) On the sales closing date contained in the Special Provisions for the insured crop in the county for the crop year the application

for insurance is accepted; or

- (ii) For any subsequent crop year, on the sales closing date for the insured crop in the county for the previous crop year, provided continuous coverage has been in effect since that date. For example: If you make application and purchase a hybrid seed crop insurance policy for the 1996 crop year, prevented planting coverage will begin on the 1996 sales closing date for the insured crop in the county. If the hybrid seed coverage remains in effect for the 1997 crop year (is not terminated or canceled during or after the 1996 crop year, except the policy may have been canceled to transfer the policy to a different insurance provider, if there is no lapse in coverage), prevented planting coverage for the 1997 crop year began on the 1996 sales closing date.
- (4) The acreage to which prevented planting coverage applies will not exceed the total eligible acreage on all Farm Service Agency (FSA) Farm Serial Numbers in which you have a share, adjusted for any reconstitution that may have occurred on or before the sales closing date. Eligible acreage for each FSA Farm Serial Number is determined as follows:
- (i) Eligible acreage will not exceed the number of acres required to be grown in the current crop year under a contract executed with a seed company prior to the acreage reporting date.
- (ii) Acreage intended to be planted under an irrigated practice will be limited to the number of acres for which you had adequate irrigation facilities prior to the insured cause of loss which prevented you from planting.

(iii) Prevented planting coverage will not

be provided for any acreage:

(A) That does not constitute at least 20 acres or 20 percent (20%) of the acreage in the unit, whichever is less (Acreage that is less than 20 acres or 20 percent of the acreage in the unit will be presumed to have been intended to be planted to the insured crop planted in the unit, unless you can show that you had the inputs available before the final

planting date to plant and produce another insured crop on the acreage);

(B) For which the actuarial table does not designate a premium rate unless a written agreement designates such premium rate;

(C) Used for conservation purposes or intended to be left unplanted under any program administered by the United States Department of Agriculture;

- (D) On which another crop is prevented from being planted, if you have already received a prevented planting indemnity, guarantee or amount of insurance for the same acreage in the same crop year, unless you provide adequate records of acreage and production showing that the acreage has a history of double-cropping in each of the last four years:
- (E) On which the insured crop is prevented from being planted, if any other crop is planted and fails, or is planted and harvested, hayed or grazed on the same acreage in the same crop year, (other than a cover crop as specified in paragraph (a)(3)(i) of this section, or a substitute crop allowed in paragraph (a)(3)(ii) of this section) unless you provide adequate records of acreage and production showing that the acreage has a history of double-cropping in each of the last four years;
- (F) When coverage is provided under the Catastrophic Risk Protection Endorsement if you plant another crop for harvest on any acreage you were prevented from planting in the same crop year, even if you have a history of double cropping. If you have a Catastrophic Risk Protection Endorsement and receive a prevented planting indemnity, guarantee, or amount of insurance for a crop and are prevented from planting another crop on the same acreage, you may only receive the prevented planting indemnity, guarantee, or amount of insurance for the crop on which the prevented planting indemnity, guarantee, or amount of insurance is received; or
- (G) For which planting history or conservation plans indicate that the acreage would have remained fallow for crop rotation purposes.
- (iv) For the purpose of determining eligible acreage for prevented planting coverage, acreage for all units will be combined and be reduced by the number of acres of the insured crop timely planted and late planted. For example, assume you have 100 acres eligible for prevented planting coverage in which you have a 100 percent (100%) share. The acreage is located in a single FSA Farm Serial Number which you insure as two separate optional units consisting of 50 acres each. If you planted 60 acres of the insured crop on one optional unit and 40 acres of the insured crop on the second optional unit, your prevented planting eligible acreage would be reduced to zero (i.e., 100 acres eligible for prevented planting coverage minus 100 acres planted equals zero).

(5) In accordance with the provisions of section 3 (Report of Acreage, Share, Type and Practice), you must report by unit any insurable acreage that you were prevented from planting. This report must be submitted on or before the acreage reporting date. For the purpose of determining acreage eligible for a prevented planting amount of insurance the total amount of prevented planting and

planted acres cannot exceed the maximum number of acres eligible for prevented planting coverage. Any acreage you report in excess of the number of acres eligible for prevented planting coverage, or that exceeds the number of eligible acres physically located in a unit, will be deleted from your acreage report.

(6) If the amount of premium you are required to pay (gross premium less our subsidy) for the prevented planting acreage exceeds the prevented planting liability on a unit, prevented planting coverage will not be provided for that unit (no premium will be due and no indemnity will be paid for such acreage).

8. Section 443.7(d) is amended by revising paragraph 18(w) to read as follows:

18. Meaning of Terms

(w) Prevented planting—Inability to plant the insured crop with proper equipment by the final planting date designated in the Special Provisions for the insured crop in the county or the end of the late planting period. You must have been unable to plant the insured crop due to an insured cause of loss that has prevented the majority of producers in the surrounding area from planting the same crop.

PART 457—[AMENDED]

9. The authority citation for 7 CFR part 457 is revised to read as follows:

Authority: 7 U.S.C. 1506(l), 1506(p).

10. Section 457.101 is amended by revising paragraph l(p) of the Small Grains Crop Provisions to read as follows:

§ 457.101 Small Grains Crop Insurance.

* 1. Definitions

- (p) Prevented planting-Inability to plant the insured crop with proper equipment by the latest final planting date designated in the Special Provisions for the insured crop in the county or the end of the late planting period. You must have been unable to plant the insured crop due to an insured cause of loss that has prevented the majority of producers in the surrounding area from planting the same crop.
- 11. Section 457.101 is amended by revising paragraphs 12(a)(3), 12(b), and 12(d) to read as follows:

12. Late Planting and Prevented Planting

(3) For prevented planting acreage, multiply the per acre production guarantee for timely planted acreage by:

(i) Fifty percent (0.50) and multiply the result by the 50 acres you were prevented
