

from planting, if the acreage is eligible for prevented planting coverage, and if the acreage is left idle for the crop year, or if a cover crop is planted not for harvest. Prevented planting compensation hereunder will not be denied because the cover crop is hayed or grazed; or

(ii) Twenty-five percent (0.25) and multiply the result by the 50 acres you were prevented from planting, if the acreage is eligible for prevented planting coverage, and if you elect to plant a substitute crop for harvest after the 10th day following the latest final planting date for the insured crop. (This subparagraph (ii) is not applicable, and prevented planting coverage is not available hereunder, if you elected the Catastrophic Risk Protection Endorsement or you elected to exclude prevented planting coverage when a substitute crop is planted (see subparagraph 12(d)(1)(iii))).

The total of the three calculations will be the production guarantee for the unit. Your premium will be based on the result of multiplying the per acre production guarantee for timely planted acreage by the 150 acres in the unit.

(b) If you were prevented from planting, you must provide written notice to us not later than the acreage reporting date.

(d) Prevented Planting (Including Planting After the Late Planting Period).

(1) If you were prevented from planting the insured crop (see subsection 1(p)), you may elect:

(i) To plant the insured crop during the late planting period. The production guarantee for such acreage will be determined in accordance with paragraph 12(c)(1);

(ii) Not to plant this acreage to any crop except a cover crop not for harvest. You may also elect to plant the insured crop after the late planting period. In either case, the production guarantee for such acreage will be 50 percent (50%) of the production guarantee for timely planted acres. In counties for which the Special Provisions designate a spring final planting date, the prevented planting guarantee will be based on your approved yield for spring-planted acreage of the insured crop. For example, if your production guarantee for timely planted acreage is 30 bushels per acre, your prevented planting production guarantee would be 15 bushels per acre (30 bushels multiplied by 0.50). If you elect to plant the insured crop after the late planting period, production to count for such acreage will be determined in accordance with subsections 11(c) through (e); or

(iii) Not to plant the intended crop but plant a substitute crop for harvest, in which case:

(A) No prevented planting production guarantee will be provided for such acreage if the substitute crop is planted on or before the tenth day following the latest final planting date for the insured crop; or

(B) A production guarantee equal to twenty-five percent (25%) of the production guarantee for timely planted acres will be provided for such acreage, if the substitute crop is planted after the tenth day following the latest final planting date for the insured crop. If you elected the Catastrophic Risk

Protection Endorsement or excluded this coverage, and plant a substitute crop, no prevented planting coverage will be provided. For example, if your production guarantee for timely planted acreage is 30 bushels per acre, your prevented planting production guarantee would be 7.5 bushels per acre (30 bushels multiplied by 0.25). You may elect to exclude prevented planting coverage when a substitute crop is planted for harvest and receive a reduction in the applicable premium rate. If you wish to exclude this coverage, you must so indicate, on or before the sales closing date, on your application or on a form approved by us. Your election to exclude this coverage will remain in effect from year to year unless you notify us in writing on our form by the applicable sales closing date for the crop year for which you wish to include this coverage. All acreage of the crop insured under this policy will be subject to this exclusion.

(2) Proof may be required that you had the inputs available to plant and produce the intended crop with the expectation of at least producing the production guarantee.

(3) In addition to the provisions of section 11 (Insurance Period) of the Common Crop Insurance Policy (§ 457.8), the insurance period for prevented planting coverage begins:

(i) On the sales closing date contained in the Special Provisions for the insured crop in the county for the crop year the application for insurance is accepted; or

(ii) For any subsequent crop year, on the sales closing date for the insured crop in the county for the previous crop year, provided continuous coverage has been in effect since that date. For example: If you make application and purchase insurance for wheat for the 1996 crop year, prevented planting coverage will begin on the 1996 sales closing date for the insured crop in the county. If the wheat coverage remains in effect for the 1997 crop year (is not terminated or cancelled during or after the 1996 crop year, except the policy may have been cancelled to transfer the policy to a different insurance provider, if there is no lapse in coverage), prevented planting coverage for the 1997 crop year began on the 1996 sales closing date.

(4) The acreage to which prevented planting coverage applies will not exceed the total eligible acreage on all Farm Service Agency (FSA) Farm Serial Numbers in which you have a share, adjusted for any reconstitution that may have occurred on or before the sales closing date. Eligible acreage for each FSA Farm Serial Number is determined as follows:

(i) If you participate in any program administered by the United States Department of Agriculture that limits the number of acres that may be planted for the crop year, the acreage eligible for prevented planting coverage will not exceed the total acreage permitted to be planted to the insured crop.

(ii) If you do not participate in any program administered by the United States Department of Agriculture that limits the number of acres that may be planted, and unless we agree in writing on or before the sales closing date, eligible acreage will not exceed the greater of:

(A) The FSA base acreage for the insured crop, including acres that could be flexed from another crop, if applicable;

(B) The number of acres planted to the insured crop on the FSA Farm Serial Number during the previous crop year; or

(C) One hundred percent (100%) of the simple average of the number of acres planted to the insured crop during the crop years that you certified to determine your yield.

(iii) Acreage intended to be planted under an irrigated practice will be limited to the number of acres for which you had adequate irrigation facilities prior to the insured cause of loss which prevented you from planting.

(iv) Prevented planting coverage will not be provided for any acreage:

(A) That does not constitute at least 20 acres or 20 percent (20%) of the acreage in the unit, whichever is less (Acreage that is less than 20 acres or 20 percent of the acreage in the unit will be presumed to have been intended to be planted to the insured crop planted in the unit, unless you can show that you had the inputs available before the final planting date to plant and produce another insured crop on the acreage);

(B) For which the actuarial table does not designate a premium rate unless a written agreement designates such premium rate;

(C) Used for conservation purposes or intended to be left unplanted under any program administered by the United States Department of Agriculture;

(D) On which another crop is prevented from being planted, if you have already received a prevented planting indemnity, guarantee or amount of insurance for the same acreage in the same crop year, unless you provide adequate records of acreage and production showing that the acreage has a history of double-cropping in each of the last four years;

(E) On which the insured crop is prevented from being planted, if any other crop is planted and fails, or is planted and harvested, hayed or grazed on the same acreage in the same crop year, (other than a cover crop as specified in paragraph (a)(3)(i) of this section, or a substitute crop allowed in paragraph (a)(3)(ii) of this section) unless you provide adequate records of acreage and production showing that the acreage has a history of double-cropping in each of the last four years;

(F) When coverage is provided under the Catastrophic Risk Protection Endorsement if you plant another crop for harvest on any acreage you were prevented from planting in the same crop year, even if you have a history of double cropping. If you have a Catastrophic Risk Protection Endorsement and receive a prevented planting indemnity, guarantee, or amount of insurance for a crop and are prevented from planting another crop on the same acreage, you may only receive the prevented planting indemnity, guarantee, or amount of insurance for the crop on which the prevented planting indemnity, guarantee, or amount of insurance is received; or

(G) For which planting history or conservation plans indicate that the acreage would have remained fallow for crop rotation purposes.

(v) For the purpose of determining eligible acreage for prevented planting coverage,
