acreage for all units will be combined and be reduced by the number of acres of the insured crop that are timely planted and late planted, if the late planting period is applicable. For example, assume you have 100 acres eligible for prevented planting coverage in which you have a 100 percent (100%) share. The acreage is located in a single FSA Farm Serial Number which you insure as two separate optional units consisting of 50 acres each. If you planted 60 acres of the insured crop on one optional unit and 40 acres of the insured crop on the second optional unit, your prevented planting eligible acreage would be reduced to zero (i.e., 100 acres eligible for prevented planting coverage minus 100 acres planted equals zero).

(5) In accordance with the provisions of section 6 (Report of Acreage) of the Common Crop Insurance Policy (§ 457.8), you must report by unit any insurable acreage that you were prevented from planting. This report must be submitted on or before the acreage reporting date for spring-planted acreage of the insured crop in counties for which the Special Provisions designates a spring final planting date, or the acreage reporting date for fall-planted acreage of the insured crop in counties for which the Special Provisions designates a fall final planting date only. For the purpose of determining acreage eligible for a prevented planting production guarantee the total amount of prevented planting and planted acres cannot exceed the maximum number of acres eligible for prevented planting coverage. Any acreage you report in excess of the number of acres eligible for prevented planting coverage, or that exceeds the number of eligible acres physically located in a unit, will be deleted from your acreage report.

12. Section 457.104 is amended by revising paragraph 1(n) of the Cotton Crop Provisions to read as follows:

§ 457.104 Cotton crop insurance provisions.

* 1. Definitions

(n) Prevented planting—Inability to plant the insured crop with proper equipment by the final planting date designated in the Special Provisions for the insured crop in the county or the end of the late planting period. You must have been unable to plant the insured crop due to an insured cause of loss that has prevented the majority of producers in the surrounding area from planting the same crop.

13. Section 457.104 is amended by revising paragraphs 12(a)(3), 12(b), and 12(d) to read as follows:

12. Late Planting and Prevented Planting

- (3) For prevented planting acreage, multiply the per acre production guarantee for timely planted acreage by:
- (i) Thirty-five percent (0.35) and multiply the result by the 50 acres you were prevented

from planting, if the acreage is eligible for prevented planting coverage, and if the acreage is left idle for the crop year, or if a cover crop is planted not for harvest. Prevented planting compensation hereunder will not be denied because the cover crop is hayed or grazed; or

(ii) Seventeen and five tenths percent (0.175) and multiply the result by the 50 acres you were prevented from planting, if the acreage is eligible for prevented planting coverage, and if you elect to plant a substitute crop for harvest after the 10th day following the final planting date for the insured crop. (This subparagraph (ii) is not applicable, and prevented planting coverage is not available hereunder, if you elected the Catastrophic Risk Protection Endorsement or you elected to exclude prevented planting coverage when a substitute crop is planted (see subparagraph 12(d)(1)(iii))).

The total of the three calculations will be the production guarantee for the unit. Your premium will be based on the result of multiplying the per acre production guarantee for timely planted acreage by the 150 acres in the unit.

(b) If you were prevented from planting, you must provide written notice to us not later than the acreage reporting date.

(d) Prevented Planting (Including Planting After the Late Planting Period).

(1) If you were prevented from planting cotton (see subsection 1(n)), you may elect:

(i) To plant cotton during the late planting period. The production guarantee for such acreage will be determined in accordance with paragraph 12(c)(1);

(ii) Not to plant this acreage to any crop except a cover crop not for harvest. You may also elect to plant the insured crop after the late planting period. In either case, the production guarantee for such acreage will be thirty-five percent (35%) of the production guarantee for timely planted acres. For example, if your production guarantee for timely planted acreage is 700 pounds per acre, your prevented planting production guarantee would be 245 pounds per acre (700 pounds multiplied by 0.35). If you elect to plant the insured crop after the late planting period, production to count for such acreage will be determined in accordance with subsections 11 (c) and (d); or

(iii) Not to plant the intended crop but plant a substitute crop for harvest, in which

(A) No prevented planting production guarantee will be provided for such acreage if the substitute crop is planted on or before the tenth day following the final planting date for the insured crop; or

(B) A production guarantee equal to seventeen and five tenths percent (17.5%) of the production guarantee for timely planted acres will be provided for such acreage, if the substitute crop is planted after the tenth day following the final planting date for the insured crop. If you elected the Catastrophic Risk Protection Endorsement or excluded this coverage, and plant a substitute crop, no prevented planting coverage will be provided. For example, if your production guarantee for timely planted acreage is 700 pounds per acre, your prevented planting

production guarantee would be 122.5 pounds per acre (700 pounds multiplied by 0.175). You may elect to exclude prevented planting coverage when a substitute crop is planted for harvest and receive a reduction in the applicable premium rate. If you wish to exclude this coverage, you must so indicate, on or before the sales closing date, on your application or on a form approved by us. Your election to exclude this coverage will remain in effect from year to year unless you notify us in writing on our form by the applicable sales closing date for the crop year for which you wish to include this coverage. All acreage of the crop insured under this policy will be subject to this exclusion.

(2) Proof may be required that you had the inputs available to plant and produce the intended crop with the expectation of at least producing the production guarantee.

(3) In addition to the provisions of section 11 (Insurance Period) of the Common Crop Insurance Policy (§ 457.8), the insurance period for prevented planting coverage

(i) On the sales closing date contained in the Special Provisions for the insured crop in the county for the crop year the application

for insurance is accepted; or

- (ii) For any subsequent crop year, on the sales closing date for the insured crop in the county for the previous crop year, provided continuous coverage has been in effect since that date. For example: If you make application and purchase a cotton crop insurance policy for the 1996 crop year, prevented planting coverage will begin on the 1996 sales closing date for the cotton crop in the county. If the cotton coverage remains in effect for the 1997 crop year (is not terminated or cancelled during or after the 1996 crop year, except the policy may have been cancelled to transfer the policy to a different insurance provider, if there is no lapse in coverage), prevented planting coverage for the 1997 crop year began on the 1996 sales closing date.
- (4) The acreage to which prevented planting coverage applies will not exceed the total eligible acreage on all Farm Service Agency (FSA) Farm Serial Numbers in which you have a share, adjusted for any reconstitution that may have occurred on or before the sales closing date. Eligible acreage for each FSA Farm Serial Number is determined as follows:
- (i) If you participate in any program administered by the United States Department of Agriculture that limits the number of acres that may be planted for the crop year, the acreage eligible for prevented planting coverage will not exceed the total acreage permitted to be planted to the insured crop.
- (ii) If you do not participate in any program administered by the United States Department of Agriculture that limits the number of acres that may be planted, and unless we agree in writing on or before the sales closing date, eligible acreage will not exceed the greater of:

(A) The FSA base acreage for the insured crop, including acres that could be flexed from another crop, if applicable;

(B) The number of acres planted to cotton on the FSA Farm Serial Number during the previous crop year; or
