(C) One hundred percent (100%) of the simple average of the number of acres planted to cotton during the crop years that you certified to determine your yield.

(iii) Acreage intended to be planted under an irrigated practice will be limited to the number of acres for which you had adequate irrigation facilities prior to the insured cause of loss which prevented you from planting.

(iv) Prevented planting coverage will not

be provided for any acreage:

(A) That does not constitute at least 20 acres or 20 percent (20%) of the acreage in the unit, whichever is less (Acreage that is less than 20 acres or 20 percent of the acreage in the unit will be presumed to have been intended to be planted to the insured crop planted in the unit, unless you can show that you had the inputs available before the final planting date to plant and produce another insured crop on the acreage);

(B) For which the actuarial table does not designate a premium rate unless a written agreement designates such premium rate;

(C) Used for conservation purposes or intended to be left unplanted under any program administered by the United States Department of Agriculture;

(D) On which another crop is prevented from being planted, if you have already received a prevented planting indemnity, guarantee or amount of insurance for the same acreage in the same crop year, unless you provide adequate records of acreage and production showing that the acreage has a history of double-cropping in each of the last four years;

(E) On which the insured crop is prevented from being planted, if any other crop is planted and fails, or is planted and harvested, hayed or grazed on the same acreage in the same crop year, (other than a cover crop as specified in paragraph (a)(3)(i) of this section, or a substitute crop allowed in paragraph (a)(3)(ii) of this section) unless you provide adequate records of acreage and production showing that the acreage has a history of double-cropping in each of the last four years;

(F) When coverage is provided under the Catastrophic Risk Protection Endorsement if you plant another crop for harvest on any acreage you were prevented from planting in the same crop year, even if you have a history of double cropping. If you have a Catastrophic Risk Protection Endorsement and receive a prevented planting indemnity, guarantee, or amount of insurance for a crop and are prevented from planting another crop on the same acreage, you may only receive the prevented planting indemnity, guarantee, or amount of insurance for the crop on which the prevented planting indemnity, guarantee, or amount of insurance is received; or

(G) For which planting history or conservation plans indicate that the acreage would have remained fallow for crop rotation

(v) For the purpose of determining eligible acreage for prevented planting coverage, acreage for all units will be combined and be reduced by the number of cotton acres timely planted and late planted. For example, assume you have 100 acres eligible for prevented planting coverage in which you have a 100 percent (100%) share. The acreage

is located in a single FSA Farm Serial Number which you insure as two separate optional units consisting of 50 acres each. If you planted 60 acres of cotton on one optional unit and 40 acres of cotton on the second optional unit, your prevented planting eligible acreage would be reduced to zero (i.e., 100 acres eligible for prevented planting coverage minus 100 acres planted equals zero).

(5) In accordance with the provisions of section 6 (Report of Acreage) of the Common Crop Insurance Policy (§ 457.8), you must report by unit any insurable acreage that you were prevented from planting. This report must be submitted on or before the acreage reporting date. For the purpose of determining acreage eligible for a prevented planting production guarantee the total amount of prevented planting and planted acres cannot exceed the maximum number of acres eligible for prevented planting coverage. Any acreage you report in excess of the number of acres eligible for prevented planting coverage, or that exceeds the number of eligible acres physically located in a unit, will be deleted from your acreage report.

14. Section 457.105 is amended by revising paragraph 1(l) of the ELS Cotton Crop Provisions to read as follows:

§ 457.105 Extra long staple cotton crop insurance provisions.

1. Definitions

(l) Prevented planting—Inability to plant the insured crop with proper equipment by the final planting date designated in the Special Provisions for the insured crop in the county. You must have been unable to plant the insured crop due to an insured cause of loss that has prevented the majority of producers in the surrounding area from planting the same crop.

15. Section 457.105 is amended by revising paragraphs 12(a)(2) and 12 (b) through (h) to read as follows:

12. Prevented Planting

(a) * * *

(2) For prevented planting acreage, multiply the per acre production guarantee for timely planted acreage by:

(i) Thirty-five percent (0.35) and multiply the result by the 50 acres you were prevented from planting, if the acreage is eligible for prevented planting coverage, and if the acreage is left idle for the crop year, or if a cover crop is planted not for harvest. Prevented planting compensation hereunder will not be denied because the cover crop is hayed or grazed; or

(ii) Seventeen and five tenths percent (0.175) and multiply the result by the 50 acres you were prevented from planting, if the acreage is eligible for prevented planting coverage, and if you elect to plant a substitute crop for harvest after the 10th day

following the final planting date for the insured crop. (This subparagraph (ii) is not applicable, and prevented planting coverage is not available hereunder, if you elected the Catastrophic Risk Protection Endorsement or you elected to exclude prevented planting coverage when a substitute crop is planted (see subsection 12(b)(2))).

The total of the two calculations will be the production guarantee for the unit. Your premium will be based on the result of multiplying the per acre production guarantee for timely planted acreage by the 100 acres in the unit.

(b) If you were prevented from planting ELS cotton (see subsection 1(l)), you may elect:

(1) Not to plant this acreage to any crop except a cover crop not for harvest. You may also elect to plant the insured crop after the final planting date. In either case, the production guarantee for such acreage will be thirty-five percent (35%) of the production guarantee for timely planted acres. For example, if your production guarantee for timely planted acreage is 600 pounds per acre, your prevented planting production guarantee would be 210 pounds per acre (600 pounds multiplied by 0.35). If you elect to plant the insured crop after the final planting date, production to count for such acreage will be determined in accordance with subsections 11(c) through (f); or

(2) Not to plant the intended crop but plant a substitute crop for harvest, in which case:

(A) No prevented planting production guarantee will be provided for such acreage if the substitute crop is planted on or before the tenth day following the final planting date for the insured crop; or

(B) A production guarantee equal to seventeen and five tenths percent (17.5%) of the production guarantee for timely planted acres will be provided for such acreage, if the substitute crop is planted after the tenth day following the final planting date for the insured crop. If you elected the Catastrophic Risk Protection Endorsement or excluded this coverage, and plant a substitute crop, no prevented planting coverage will be provided. For example, if your production guarantee for timely planted acreage is 700 pounds per acre, your prevented planting production guarantee would be 122.5 pounds per acre (700 pounds multiplied by 0.175). You may elect to exclude prevented planting coverage when a substitute crop is planted for harvest and receive a reduction in the applicable premium rate. If you wish to exclude this coverage, you must so indicate, on or before the sales closing date, on your application or on a form approved by us. Your election to exclude this coverage will remain in effect from year to year unless you notify us in writing on our form by the applicable sales closing date for the crop year for which you wish to include this coverage. All acreage of the crop insured under this policy will be subject to this exclusion.

(c) Proof may be required that you had the inputs available to plant and produce the intended crop with the expectation of at least producing the production guarantee.

(d) In addition to the provisions of section 11 (Insurance Period) of the Common Crop Insurance Policy (§ 457.8), the insurance
