

is a request for extension of a currently approved collection.

Abstract: The Program Development and Approval Guidance implements Section 6217 of the 1990 Coastal Zone Management Act Reauthorization Amendments. The guidance requires 24 coastal States and 5 coastal Territories with approved Coastal Zone Management Programs to submit Coastal Nonpoint Programs to EPA and NOAA for joint review in July 1995. This one-time submittal will be used to determine if States and Territories receiving Clean Water Act Section 319 and Coastal Zone Management Act Section 306 Federal grants will face reductions.

The original Information Collection Request estimated that the reporting burden to develop coastal nonpoint programs under the Program Development and Approval Guidance would average 1,874 hours per response (29 respondents), including the time for reviewing instruction, searching existing data sources, completing and reviewing the information, and preparing the final report. Based on initial reviews of many of the Coastal Nonpoint Programs that have been submitted for review, EPA and NOAA anticipate that many programs are likely to receive conditional approvals. These conditional approvals may require States and Territories to submit additional information at a later date prior to receiving final program approval. The extension for the currently approved ICR will allow States to complete development of their programs and submit their programs to EPA and NOAA for final program approval by fulfilling any conditions that the Federal agencies place on final program approval.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The Federal Register notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 9/27/95 (60 FR 49833).

Burden Statement: Because the coastal States and Territories have completed a substantial majority of their program development at this time, EPA estimates that the remaining reporting burden will be approximately 20 percent of the original burden estimate, or an average of approximately 375 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide

information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Coastal States and Territories.

Estimated Number of Respondents: 29.

Frequency of Response: Once for each affected program element.

Estimated Total Annual Hour Burden: 3,625 hours.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1569.03 and OMB Control No. 2040-0153 in any correspondence.
