

a. Format of supplemental product-specific labeling.—Supplemental labeling can be presented in two formats:

1. Single-product supplement that contains labeling information for only the specific product the end-user is buying. This labeling must display the (1) full text of current product labeling, or (2) partial text that includes complete WPS-complying labeling (as EPA accepted or registrant-verified). An example of a single-product supplement follows the supplemental labeling specification discussion in Unit IV.F.2.b. of this document.

2. Multi-product supplement that contains labeling information for all products for a specific registrant. WPS information required to appear on all product labels may appear in the brochure only once, along with product-specific WPS information presented for each product covered by the brochure. This option is *not* available for fumigant products because of the specialized nature of the fumigant label. An example of a brochure follows the supplemental labeling specification discussion in Unit IV.F.2.b. of this document.

b. Supplemental product-specific labeling specifications.—Supplemental replacement labeling must meet the following specifications:

- Title. The supplemental labeling must prominently bear the words “SUPPLEMENTAL LABELING WITH WORKER PROTECTION REQUIREMENTS” at the top of the first page or be in a pouch prominently displaying the words “SUPPLEMENTAL LABELING WITH WORKER PROTECTION REQUIREMENTS,” attached to the container.

- Content. Supplemental labeling can be presented in a single product supplement or a multi-product brochure.

*Single-product supplements* include labeling information for only the product the end-user is buying. These supplements will contain either: (1) The full text of current product labeling, or (2) the partial text that includes only the complete WPS product labeling information, a contact phone number for the registrant, and no information unrelated to the products’ labeling. An example of a single-product supplement follows:

SINGLE-PRODUCT, PRODUCT-SPECIFIC

(Example)

#### “Supplemental Labeling With Worker Protection Requirements”

Product Name, Company Name, EPA Reg. No.

For compliance with the Worker Protection Standard (40 CFR Part 170). Important: This supplemental labeling does not apply (1) to soil or space fumigant products, (2) to products containing ethyl parathion, or (3) if elsewhere on the product labeling an Agricultural Use Requirements box requires compliance with the Worker Protection Standard (40 CFR Part 170). When this product is used on an agricultural establishment (farm, forest, nursery, or greenhouse) for the commercial or research production of agricultural plants, users must comply with the instructions in this supplemental labeling. Users who must comply with these instructions include owners/operators of the agricultural establishment and owners/operators of commercial businesses that are hired to apply pesticides on the agricultural establishment or to perform crop-advising tasks on such establishments. Failure to comply with the requirements on this supplemental labeling and with the Worker Protection Standard (40 CFR Part 170) is a violation of Federal law, since it is illegal to use a pesticide product in a manner inconsistent with its labeling.
