August 8, 1994 and USDA, NASS,

'Agricultural Statistics,' 1993).

Due to current APHIS restrictions, the United States does not import any uncooked meat or meat products from Switzerland. Total meat production in the United States in 1992 was just under 18.587 million metric tons, while Swiss meat production in 1992 reached approximately 429,000 metric tons, about 2.3 percent of the United States total (USDA, National Agricultural Statistics Service, "Agricultural Statistics," 1993). Therefore, even if Switzerland exported a significant portion of its meat production exclusively to the United States, which is unlikely, the effect of those exports on United States domestic prices or supplies would be negligible.

As with the ruminants and meat products discussed above, the Department does not anticipate a major increase in exports of milk and milk products from Switzerland into the United States as a result of this proposed rule. The importation into the United States of all dairy products, except for casein and other caseinates, is restricted by quotas. Although the importation of casein into the United States is not regulated by quotas, world prices of casein are competitively set. The United States does not produce casein, but does import more than half of the casein produced in the world. The regulations currently allow casein and other caseinates to be imported into the United States from countries where rinderpest or FMD exists if the importer has applied for and obtained written permission from the Administrator. The United States did not import any casein from Switzerland in 1993 (USDA, Economic Research Service (ERS), "Foreign Agricultural Trade of the United States: Calendar Year 1993 Supplement," 1993). Declaring Switzerland free of rinderpest and FMD, thus removing the requirement for written permission from the Administrator, is not expected to have any effect on the amount of casein imported into the United States from Switzerland because the current restrictions do not substantially impede imports.

Imports of poultry and poultry products into the United States from Switzerland in 1992 and 1993 fell into two categories: live poultry and feathers and down. Total live poultry imports into the United States were valued at \$14.4 million and \$14.5 million in 1992 and 1993, respectively. United States live poultry imports from Switzerland were valued at \$67 thousand and \$74 thousand in 1992 and 1993, respectively, about 0.5 percent of the

total imports. Total United States imports of feathers and down were valued at \$84 million and \$60.1 million in 1992 and 1993, respectively. United States imports of feathers and down from Switzerland were valued at \$1.2 million and \$0.41 million in 1992 and 1993, respectively, less than 1.5 percent of the total imports (USDA, ERS, "Foreign Agricultural Trade of the United States: Calendar Year 1993 Supplement," 1993). Also, Switzerland is dependent on imports for over 50 percent of domestic poultry consumption. Consequently, proposed changes in current regulations concerning VVND are not expected to result in increased exports to the United

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

### **Executive Order 12778**

[Docket No. NM-105, Notice No. SC-95-1-

**Special Conditions: Saab Aircraft AB** Model Saab 2000 Series Airplanes

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Notice of proposed special conditions.

**SUMMARY:** This notice proposes special conditions for the Saab Aircraft AB Model Saab 2000 airplane. This airplane will have novel and unusual design features, relating to its electronic flight control system, when compared to the state of technology envisioned in the airworthiness standards of part 25 of the Federal Aviation Regulations (FAR). This notice contains the additional safety standards which the Administrator considers necessary to establish a level of safety equivalent to that provided by the airworthiness standards of part 25
