

emission limitations and compliance plan requirements were set forth in part 76.

On November 29, 1994, the U.S. Court of Appeals for the District of Columbia Circuit determined that, in promulgating part 76, the Agency had exceeded its statutory authority. The Court vacated part 76. Consequently, those NO_x compliance plans that the Agency had approved prior to November 29, 1994 are no longer in effect. The Court decision has no effect on any other provisions of the permits, including the SO₂ compliance plans. The permits containing the NO_x compliance plans are listed below. Upon reissuance of NO_x regulations, EPA will again address the status of these NO_x compliance plans.

EPA notes that there are some NO_x compliance plans that were submitted, but not acted on before November 29, 1994 or were submitted after November 29, 1994. In light of the Court's decision, the Agency has deferred action on any NO_x compliance plans that had not already been acted on by that date.

Permits for the following sources contain previously approved NO_x compliance plans for all Phase I units with Group 1 boilers located at the sources. These plans are not in effect at this time:
