

rulemaking process and the functions of the notice of intent have either already been met or are provided for in this notice. Moreover, the Negotiated Rulemaking Act specifically provides that its provisions are not mandatory.

The Negotiated Rulemaking Act does anticipate an outreach to ensure that people who were not contacted during the convening process can come forward to explain why they believe they would be significantly affected and yet not represented on the Committee or to argue why they believe the rule should not be negotiated. The MMS believes that the interests who would be significantly affected by this rule will be represented when representatives from Conoco Inc., Meridian Oil Inc., Mid-Continent Oil and Gas Association, and as attorney with clients from the oil and gas industry join the informal study group already in place which includes representatives from the Indian tribes, allottee associations, BIA, and MMS. If anyone believes that their interests will not be adequately represented by these organizations, they must demonstrate and document that assertion through an application submitted no later than 10 calendar days following publication of this notice. You may fax your documentation to (303) 231-3194.

Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Planning Purposes; Commonwealth of Kentucky

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to approve the State implementation plan (SIP) revision submitted by the Commonwealth of Kentucky through the Natural Resources and Environmental Protection Cabinet approving the redesignation to attainment and maintenance plan of the Paducah area because it meets the maintenance plan and redesignation requirements. EPA also proposes to approve the 1990 baseline emissions inventory of the area. In the final rules section of this **Federal Register**, the EPA is approving the Commonwealth's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule

based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

DATES: To be considered, comments must be received by March 9, 1995.
