

notice of proposed rulemaking (59 FR 40319) to revise the natural resource damage assessment regulations. The natural resource damage assessment regulations establish procedures for assessing damages for injury to natural resources resulting from a discharge of oil into navigable waters under the Clean Water Act, or a release of a hazardous substance under the Comprehensive Environmental Response, Compensation, and Liability Act. The August 8, 1994, notice proposed a simplified "type A" procedure for assessing damages from relatively minor discharges or releases in the Great Lakes. The Department is extending the period for comment on the proposed rule and making it coextensive with the comment period for a similar proposed type A procedure for coastal and marine environments.

DATES: Comments will be accepted through July 6, 1995.

ADDRESSES: Comments should be sent in duplicate to the Office of Environmental Policy and Compliance, ATTN: NRDA Rule—GLE, Room 2340, Department of the Interior, 1849 C Street, NW, Washington, DC 20240 (regular business hours 7:45 a.m. to 4:15 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Stephen F. Specht at (202) 208-3301, or SSPECHT@IOS.DOI.GOV on Internet.

SUPPLEMENTARY INFORMATION: The natural resource damage assessment regulations establish procedures that Federal, State, and Tribal natural resource trustees may use to obtain compensation from liable parties for natural resource injuries under the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.) and the Clean Water Act, as amended (33 U.S.C. 1251 et seq.). The regulations provide an administrative process for conducting assessments as well as two types of technical procedures for the actual determination of injuries and damages. "Type A" procedures are standard procedures for simplified assessments requiring minimal field observation in cases of minor discharges or releases in certain environments. "Type B" procedures are site-specific procedures for detailed assessments in other cases.

On August 8, 1994, the Department of the Interior published a proposed rule to amend the regulations to include an additional type A procedure for assessing natural resource damages in Great Lakes environments. 59 FR 40319. The proposed procedure incorporates a computer model called the Natural Resource Damage Assessment Model for

Great Lakes Environments Version 1.31 (NRDAM/GLE). The comment period on the August 8, 1994, proposed rule was originally set to close on November 7, 1994, but was extended through February 6, 1995. 59 FR 54877 (November 2, 1994).

On December 8, 1994, the Department published a proposed rule to revise an existing type A procedure for coastal and marine environments. 59 FR 63300. The proposed revised type A procedure for coastal and marine environments incorporates a computer model, called the Natural Resource Damage Assessment Model for Coastal and Marine Environments Version 2.2 (NRDAM/CME), that uses the same computer modelling approach as the proposed NRDAM/GLE. The comment period on the December 8, 1994, proposed rule was originally set to close on February 6, 1995.

The Department has received numerous requests for additional time to comment on the proposed type A procedure for coastal and marine environments. In a separate notice appearing elsewhere in today's **Federal Register**, the Department is extending the comment period on the proposed type A procedure for coastal and marine environments through July 6, 1995.

A number of commenters have noted the structural similarities between the proposed NRDAM/CME and the proposed NRDAM/GLE and have requested that they be allowed to review the two type A procedures concurrently. Although the proposed NRDAM/CME and the proposed NRDAM/GLE incorporate distinct geographic databases and information, there are substantial similarities between the two proposed rules and computer models. Therefore, the Department has decided to allow for concurrent public review of the two proposed models and consolidated consideration of the comments received on the proposed rules. The Department is extending the comment period for the proposed type A procedure for Great Lakes through July 6, 1995, to make it coextensive with the extended comment period for the proposed type A procedure for coastal and marine environments. Any comment that is submitted on only one of the proposed rules but that is relevant to both rules will be considered in both rulemakings.

Dated: February 2, 1995.

Bonnie R. Cohen,

Assistant Secretary—Policy, Management, and Budget.

Natural Resource Damage Assessments: Type A Procedure for Coastal and Marine Environments

AGENCY: Department of the Interior.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On December 8, 1994, the Department of the Interior issued a notice of proposed rulemaking (59 FR 63300) to revise the natural resource damage assessment regulations. The natural resource damage assessment regulations establish procedures for assessing damages for injury to natural resources resulting from a discharge of oil into navigable waters under the Clean Water Act, or a release of a hazardous substance under the Comprehensive Environmental Response, Compensation, and Liability Act. The December 8, 1994, notice proposed revisions to a simplified "type A" procedure for assessing damages from relatively minor discharges or releases in coastal and marine environments. The Department is extending the period for comment on the proposed rule and making it coextensive with the comment period for a similar proposed type A procedure for Great Lakes environments.

DATES: Comments will be accepted through July 6, 1995.

ADDRESSES: Comments should be sent in duplicate to the Office of Environmental Policy and Compliance, ATTN: NRDA Rule—CME, Room 2340, Department of the Interior, 1849 C Street, NW, Washington, DC 20240 (regular business hours 7:45 a.m. to 4:15 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Stephen F. Specht at (202) 208-3301, or SSPECHT@IOS.DOI.GOV on Internet.

SUPPLEMENTARY INFORMATION: The natural resource damage assessment regulations establish procedures that Federal, State, and Tribal natural resource trustees may use to obtain compensation from liable parties for natural resource injuries under the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.) and the Clean Water Act, as amended (33 U.S.C. 1251 et seq.). The regulations provide an administrative process for conducting assessments as well as two types of technical procedures for the actual determination of injuries and damages. "Type A" procedures are standard procedures for simplified assessments requiring minimal field
