

228 acres. Forest Service review of the project is required to minimize impacts to natural resources, to develop an approved plan of operations pursuant to regulations at 36 CFR 228, and to coordinate permitting with other state and federal agencies. Alpine County will review the proposal for a Conditional Use Permit consistent with planning and zoning and for consistency with California's Surface Mining and Reclamation Act. Alpine County and Forest Service will act as joint lead agencies for the project review. Scoping of interested agencies began with a meeting on January 24, 1995. Public comments will be requested through notices published in the Reno Gazette-Journal, Douglas County Record-Courier, Alpine Enterprise, Nevada Appeal, and Tahoe Daily Tribune, through direct mailings, and through a public meeting to be held at Turtle Rock Park, Alpine County on February 22, 1995. Copies of the proposed operating plan may be viewed at the Carson and Bridgeport Ranger District offices (Carson City, NV and Bridgeport, CA), and at the Forest Supervisor's office (Sparks, NV). Forest Service and Alpine County evaluated a similar project at the same location in 1982. An environmental assessment/ environmental (EA/EIR) impact report was written, and the project approved but never implemented. Copies of the 1982 EA/EIR are available for review at the Forest Supervisor's office, and at the Carson and Bridgeport Ranger Districts. Preliminary issues associated with the project are water quality in Monitor Creek and the East Fork of the Carson River, impacts to wetlands, reclamation of disturbed areas, public safety, and socioeconomic impacts. Alternatives will be formulated which address these and any other issues generated by scoping; the no action alternative will also be analyzed. A draft EIS/EIR is anticipated for release in January of 1996.

Several government agencies will be invited to participate in this project as cooperating or participating agencies. These agencies include, but are not limited to, U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, U.S. Environmental Protection Agency, California Regional Water Quality Control Board, California Dept. of Fish and Game and California Dept. of Transportation. Additional federal, state, and local permits and licenses may be required to implement the proposed action. These may include, but are not limited to, a Section 404 permit, Water Pollution Control Permit, Reclamation Permit for Mining

Operations, and a General Discharge Permit for Stormwater.

The Forest Service is the lead federal agency for this project and R.M. "Jim" Nelson, Forest Supervisor of the Toiyabe National Forest is the responsible official. The Draft EIS is expected to be filed with the U.S. Environmental Protection Agency (EPA) and be available for review in January of 1996. At that time, EPA will publish a Notice of Availability of the Draft EIS in the **Federal Register**. The comment period on the Draft EIS will be at least 45 days from the date the EPA's notice of availability appears in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement. To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated or discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Dated: January 31, 1995.

Gary Sayer,

Deputy Forest Supervisor, Toiyabe National Forest.

Notice of Amended Preliminary Determinations of Sales at Less Than Fair Value: Antidumping Duty Investigations of Pure and Alloy Magnesium From the Russian Federation and Pure Magnesium From Ukraine

AGENCY: Import Administration, International Trade Administration, Commerce Department.

EFFECTIVE DATE: February 8, 1995.

FOR FURTHER INFORMATION CONTACT: Dorothy Tomaszewski, Mark Wells, or Erik Warga, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C., 20230; telephone (202) 482-0631, 482-3003 or 482-0922.

Scopes of Investigations

These investigations cover pure and alloy primary magnesium. The scopes are fully described in the preliminary determinations (*see Notice of Preliminary Determinations of Sales at Less Than Fair Value: Pure and Alloy Magnesium from the Russian Federation* (59 FR 55427, November 7, 1994) and *Notice of Preliminary Determination of Sales at Less Than Fair Value: Pure Magnesium from Ukraine* (59 FR 55420, November 7, 1994)).

Case History

On October 27, 1994, the Department of Commerce ("the Department") made its affirmative preliminary determinations of sales at less than fair value in the above-cited investigations concerning subject merchandise from Russia and Ukraine. The petitioners, on November 14, 1994, alleged that the Department made several ministerial errors in those preliminary determinations and requested that the Department correct these ministerial errors accordingly.

On December 22, 1994, the Department found that the petitioners' allegations relating to the use of the initiation margins, as recalculated by the Department, as best information
