

habitats, including wetlands, in connection with dredging for construction, operation, or maintenance of an authorized Federal navigation project.

2. Poplar Island is located on the Eastern Shore of the upper Chesapeake Bay, about one mile northwest of Tilghman Island, in Talbot County, Maryland. The present complex consists of four small remnant islands with a combined area of approximately 5 acres. The island has steadily eroded over time; in 1857 the island covered an area of approximately 1,000 acres; the remaining small islands are in danger of completely eroding within the next few years.

3. The project would restore Poplar Island to the approximate size and footprint of the island in 1857. The proposed project actions include the placement of approximately 10 to 40 million cubic yards of clean dredged material behind dikes at the site. The amount of material to be placed would depend partly on the relative proportions of upland and wetland habitat created. The material would be primarily dredged during maintenance of the southern approach channels to Baltimore Harbor. After placement, the material would be shaped and planted to create both intertidal wetland and upland wildlife habitat. Poplar Island has been identified by the U.S. Fish and Wildlife Service, the Maryland Department of Natural Resources, and other natural Resources management agencies as a valuable nesting and nursery area for many species of wildlife, including bald eagles, osprey, heron, and egret.

4. Expected project benefits include the creation of wetland and upland wildlife habitat, stabilization of the rapidly eroding island remnants, and beneficial use of dredged material from Federal navigation channel maintenance activities. A project pre-feasibility report (similar to a Corps of Engineers Reconnaissance report) was completed by the Maryland Port Administration (MPA) in 1993.

5. Various alternative designs and projects size will be considered including the "no action" alternative. Alternatives to be considered will include variations such as the size and location of the placement area; dike configuration and construction materials; site capacity; and the relative proportions and locations on the island of wetland and upland habitat.

6. The Baltimore District is preparing a DEIS which will describe the impacts of the proposed projects on environmental and cultural resources in the study area and the overall public

interest. The DEIS will also apply guidances issued by the Environmental Protection Agency, under authority of Section 404 of the Clean Water Act of 1977 (Pub. L. 95-217). Potential effects of the project on water quality, fish and wildlife resources, recreation, aesthetics, cultural, and other resources will be investigated.

7. The public involvement program will include meetings and coordination with interested private individuals and organizations, as well as concerned Federal, state, and local agencies. A public notice requesting comments on the proposed project and a coordination letter have been sent to appropriate agencies, organizations, and individuals. Additional public information will be provided through printed media, mailings, and radio or television announcements. Two scoping meetings, identical in format, will be held at 7:00 p.m. on 21 February 1995 at Tilghman Elementary School, Tilghman, Maryland, and on 23 February 1995, at Beach Elementary School, in Chesapeake Beach, Maryland. Two meetings will be held to provide equal opportunities for residents on both the Eastern Shore and the west side of the Chesapeake Bay to take part in the public involvement program.

8. In addition to the Corps and the Maryland Port Administration, current participants in the DEIS process include, but are not limited to, the U.S. Environmental Protection Agency, U.S. Fish and Wildlife Service, National Marine Fisheries Service, Maryland Department of Natural Resources, Maryland Department of the Environment, and the Maryland Port Administration. The Baltimore District invites potentially affected Federal, state and local agencies, and other interested organizations and parties to participate in this study.

AVAILABILITY: The DEIS is tentatively scheduled to be available for public review in September of 1995.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

BILLING CODE 3719-41-M

U.S. Marine Corps

Privacy Act of 1974; Amend Record Systems

AGENCY: Marine Corps, Department of the Navy.

ACTION: Amend record system.

SUMMARY: The U.S. Marine Corps proposes to amend a system of records in its inventory of record systems

subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended. During a recent review, the notice for MJA00009, entitled Marine Corps Command Legal Files, was found to be incorrectly republished in the **Federal Register** on February 22, 1993, at 58 FR 10658. This amendment will correct the notice.

DATES: The amendment will be effective on February 8, 1995.

ADDRESSES: Send comments to the Head, FOIA and Privacy Act Section, Headquarters, U.S. Marine Corps, 2 Navy Annex, Washington, DC 20380-1775.

FOR FURTHER INFORMATION CONTACT: Ms. B. L. Thompson at (703) 614-4008 or DSN 224-4008.

SUPPLEMENTARY INFORMATION: The U.S. Marine Corps record system notices for records systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address above.

The specific changes to the system of records are set forth below followed by the system of records notice published in its entirety, as amended. The amendment is not within the purview of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of new or altered systems reports.

Dated: February 1, 1995.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

MJA00009

SYSTEM NAME:

Marine Corps Command Legal Files
(February 22, 1993, 58 FR 10658).
