500,000 gallons/day of generated wastes covered by this extension (i.e., those wastes currently mixed with the leachates) to meet BDAT standards without further treatment. As such, the planned treatment system is expected to have sufficient treatment capacity. Thus, EPA believes that Great Lakes has adequately demonstrated that the treatment unit to be constructed will provide the necessary treatment capacity to treat the entire quantity of these leachates for which Great Lakes is requesting a case-by-case extension.

Section 268.5(a)(5). The applicant provides a detailed schedule for obtaining operating and construction permits or an outline of how and when alternative capacity will be available.

Great Lakes has provided EPA with a detailed schedule for the construction and permitting of the treatment system to be constructed at its El Dorado, Arkansas facility. Although Great Lakes had planned to begin construction of the treatment system in March 1994, final approval of required State permits has not yet been received. Great Lakes continues to believe that the leachate treatment unit will achieve full operational status by June 30, 1995. EPA believes that Great Lakes has provided the necessary construction and permitting milestones for bringing its treatment system on-line and therefore meets the requirements of this demonstration.

Section 268.5(a)(6). The applicant has arranged for adequate capacity to manage its waste during an extension, and has documented the location of all sites at which the waste will be managed.

During the approved extension period, Great Lakes will inject these wastes into its on-site Class I wells it has been using for this purpose. Great Lakes has shown that these wells will have the necessary capacity available to manage these wastes during the approved extension. EPA believes that Great Lakes has met the requirements of this demonstration.

Section 268.5(a)(7). Any waste managed in a surface impoundment or landfill during the extension period will meet the requirements of 40 CFR 268.5(h)(2).

Great Lakes will not be using any surface impoundments or landfills to manage this waste during the extension period.

II. Response to Comments

Only one public comment was submitted in response to EPA's notice to propose approval of the case-by-case application submitted by Great Lakes. This sole comment was submitted by the applicant, Great Lakes. Where appropriate in this notice, EPA has noted and addressed those issues raised by the applicant in its comments.

III. Consultation With State

In accordance with 40 CFR 268.5(e), EPA consulted with the State of Arkansas (Arkansas Department of Pollution Control and Ecology) to determine if the State had any permitting, enforcement, or other concerns regarding this respective facility that EPA should take into consideration in deciding to grant or deny Great Lakes' application for a case-by-case extension of the LDR effective date. The State of Arkansas encouraged EPA to approve the case-by-case application submitted by Great Lakes.

IV. EPA's Action

EPA believes that Great Lakes has made and is continuing to make a goodfaith effort towards providing sufficient and appropriate treatment capacity for the K117, K118, K131, K132, and F039 wastes that are the subject of its case-bycase application. Therefore, EPA is approving an extension of the applicable LDR effective date for these wastes generated at the El Dorado, Arkansas facility, until June 30, 1995. As such, these wastes may be managed by underground injection until June 30, 1995 (unless the extension is renewed for up to one additional year, in which case the extension would expire no later than June 30, 1996), which the proposed treatment system is being constructed. This extension remains in effect unless the facility fails to make a good-faith effort to meet the schedule for completion, the Agency denies or revokes any required permit, conditions certified in the application change, or the facility violates any law or regulations implemented by EPA.

Having been granted this case-by-case extension of the LDR effective date, Great Lakes must immediately notify EPA of any change in the demonstrations made in the petition (40 CFR 268.5(f)). Great Lakes must also submit monthly progress reports that describe the progress being made towards obtaining adequate alternative capacity, identify any delay or possible delay in developing the capacity, and describe the mitigating actions being taken in response to the event (40 CFR 268.5(g)). (Sections 1006, 2002(a), 3001, and 3004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921, and 6924)).

Dated: January 31, 1995

O. Thomas Love,

Acting Director, Water Management Division. [FR Doc. 95–3116 Filed 2–7–95; 8:45 am] BILLING CODE 6560–50–P

FIFRA Scientific Advisory Panel; Open Meeting; Change of Agenda

AGENCY: Environmental Protection

Agency (EPA).

ACTION: Notice of open meeting.

SUMMARY: In the **Federal Register** of January 25, 1995, EPA announced a 1day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel (SAP) Subpanel on Plant Pesticides to review a set of scientific issues being considered by the Agency in connection with Monsanto's application for registration of a transgenic plant pesticide. This notice announces an agenda modification to the meeting. The Agency's original agenda focussed on the plant pesticide containing the active ingredient Bacillus thuringiensis subsp. tenebrionis delta endotoxin protein as produced by the CryIIIA gene and its controlling sequences in potatoes. The discussion will now include risk issues associated with the production of Bacillus thuringiensis tenebrionis delta endotoxin in other plants.

DATES: The meeting will be held on Wednesday, March 1, 1995, from 8:30 a.m. to 4:30 p.m.

ADDRESSES: The meeting will be held at: Crystal Mall #2, 11th Floor Conference Room (Fish Bowl), 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: By mail: Robert B. Jaeger, Designated Federal Official, FIFRA Scientific Advisory Panel (7509C), Office of Pesticide Programs, Environmental Protection Agency, 40l M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 819B, CM #2, 192l Jefferson Davis Highway, Arlington, VA, (703) 305–5369 or 7351.

Copies of documents may be obtained by contacting: By mail: Public Docket and Freedom of Information Section, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 40l M St., SW., Washington, DC 20460. Office location and telephone number: Rm. ll28 Bay, CM #2, l92l Jefferson Davis Highway, Arlington, VA, (703) 305–5805 or 5454.
