VIII. Executive Order 12866

Under Executive Order 12866 Regulatory Planning and Review (58 FR 51735, October 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of \$100 million or more or adversely affects in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interferes with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan

programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive order.

Pursuant to the terms of Executive Order 12866, it has been determined that this rule is a "significant regulatory action" because of policy issues arising out of legal mandates. As such, this action was submitted to OMB for review. Changes made in response to OMB suggestions or recommendations are documented in the public record.

IX. Economic Impact Analysis

This section of the preamble summarizes the costs and the economic impact analysis (EIA) for the carbamate hazardous waste listings. Based upon the EIA, the Agency estimates that the listing of the six carbamate production

wastes discussed above may result in nationwide annualized costs of at least \$900,000. The previous EIA is available in the regulatory docket entitled "Economic Impact Analysis of the Identification and Listing of Carbamate Production Waste," January 27, 1994, (F-94-S0002). The EIA revised in response to comment is available in the regulatory docket and is entitled "Economic Impact Analysis of the Identification and Listing of Carbamate Production Wastes," October 26, 1994.

A. Compliance Costs for Listings

The remainder of this section briefly describes (1) the universe of carbamate production facilities and volumes of carbamate production wastes in the 6 waste groups listed, (2) the methodology for determining incremental cost and economic impacts to regulated entities,
