#### 14 CFR Part 39

[Docket No. 94-NM-239-AD]

Airworthiness Directives; Bombardier Model CL–600–1A11 (CL–600), –2A12 (CL–601), –2B16 (CL–601–3A, –3R), and –2B19 (Regional Jet Series 100) Series Airplanes, Equipped with Sundstrand Air Driven Generator (ADG) Uplock Assembly

AGENCY: Federal Aviation Administration, DOT. ACTION: Notice of proposed rulemaking (NPRM).

**SUMMARY:** This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Bombardier Model CL–600–1A11, –2A12, –2B16, and –2B19 series airplanes. This proposal would require

an inspection to verify the proper operation of the uplock latch of the air driven generator (ADG), and replacement of the uplock latch with a serviceable part, if necessary. This proposal would also require replacing the uplock assembly with a modified uplock assembly, and performing a rigging inspection. This proposal is prompted by a report indicating that, upon operation of the manual release system, the ADG did not deploy due to failure of the shaft pin. The actions specified by the proposed AD are intended to prevent failure of the shaft pin, which could lead to the inability of the pilot to manually deploy the ADG when necessary (i.e., when an airplane's primary electrical power sources are lost and the ADG fails to deploy automatically).

**DATES:** Comments must be received by March 31, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM– 239–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.
