Atlantic Striped Bass Fishery; 1993 Survey of Atlantic Striped Bass Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Summary and notice of availability of survey results.

SUMMARY: NMFS announces the availability and summarizes the results of a survey of the Atlantic coast striped bass fisheries for 1993. The Atlantic Striped Bass Conservation Act (the Act), requires NMFS to provide information on the status of the fisheries.

ADDRESSES: Copies of the survey results are available from William T. Hogarth, NOAA/NMFS/FCM3, 1315 East-West Highway, Room 14837 Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: William T. Hogarth, (301) 713-2347.

SUPPLEMENTARY INFORMATION:

The Act requires the Secretary of Commerce and the Secretary of the Interior to conduct a comprehensive annual survey of the Atlantic striped bass fisheries. The following is a summary of the survey for 1993. Management measures restricting the harvest of striped bass by commercial and recreational fisheries remained in place during 1993, as the stocks continue to rebuild.

The 1993 commercial harvest of striped bass was 1,695,000 lb (769.5 mt), an increase of 0.2 percent above the landings of 1,692,000 lb in 1992. The Chesapeake Bay area (Maryland, Virginia, and the Potomac River) accounted for 72 percent of the 1993 commercial landings. The recreational catch in 1993 was an estimated 5.6 million striped bass, of which 561,000 were harvested; the remaining 5.1 million, were released alive. The estimated weight of the recreational harvest was 6.7 million lb (2,986.1 mt), about four times that of the commercial harvest.

Juvenile production in 1993 was above the long-term averages for Maryland, North Carolina, Virginia, and

Delaware. Information from sampling the population of striped bass shows an increased relative abundance from recent year classes. Copies of the survey are available upon request (see ADDRESSES).
