

Teledyne Continental Motors Model O-470-K, -L, -R reciprocating engines. These engines are installed on but not limited to Cessna 182 series aircraft.

**Compliance:** Required as indicated, unless accomplished previously.

To prevent piston failure, which can result in engine power loss, engine failure and loss of the aircraft, accomplish the following:

(a) At the next access to the piston, top overhaul, or major overhaul after the effective date of this airworthiness directive, whichever occurs first, remove from service pistons, P/N SA626992, and replace with a serviceable part.

**Note:** The affected pistons can be identified by either a stamped-in P/N on the piston dome (SA626992 or SA626992P15) or, by a raised number (SA632932) along one of the piston pin bosses on the underside of the piston.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Fort Worth Special Certification Office. The request should be forwarded through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Fort Worth Special Certification Office.

**Note:** Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Fort Worth Special Certification Office.

Issued in Burlington, Massachusetts, on February 14, 1995.
