

Room M-1500, 1st Floor, 401 M Street, SW., Washington, DC 20460. Telephone (202) 260-7548. FAX (202) 260-4400.

The proposed regulatory text, proposed test Method 311 and other materials related to this rulemaking are available for review in the docket. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT:

For information concerning the proposed standards, contact Dr. Madeleine Strum at (919) 541-2383, Coatings and Consumer Products Group, Emission Standards Division (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711. For further information concerning the proposed test Method 311, contact Mr. Gary McAlister at (919) 541-1062, Source Categorization Group B, Emissions Monitoring and Analysis Division (MD-19), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION: On December 6, 1994, EPA published proposed standards to limit emissions of hazardous air pollutants (HAP) from existing and new wood furniture manufacturing operations located at major sources. The proposed standards implement section 112(d) of the Clean Air Act as amended, which require the Administrator to regulate emissions of HAP listed in section 112(b) of the Act. The EPA also proposed Method 311, to be used to assist in demonstrating compliance with the proposed emission limitations.

The comment period was scheduled to close on February 21, 1995. Industry has requested a 60-day extension of the comment period to complete testing of the proposed test Method 311. In response to this request, the Agency is extending the comment period for the proposed Method 311 to April 24, 1995. The comment period for the proposed rule, however, will be extended by only 30 days, and is thus extended to March 23, 1995. All interested parties are encouraged to submit comments prior to that date.

Dated: February 16, 1995.

Mary D. Nichols,

Assistant Administrator for Air and Radiation.

Effluent Limitations Guidelines, Pretreatment Standards, and New Source Performance Standards: Pulp, Paper, and Paperboard Category; National Emission Standards for Hazardous Air Pollutants for Source Category: Pulp and Paper Production

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of data availability.

SUMMARY: On December 17, 1993, EPA proposed standards to reduce the discharge of water pollutants and emissions of hazardous air pollutants from the pulp, paper, and paperboard industry (58 FR 66078). This action announces the availability of additional data that EPA will consider for the promulgation of hazardous air pollutant emission standards for this industry.

DATES: Comments are not solicited at this time.

ADDRESSES: The data being announced today has been placed in Air Docket A-92-40. The docket is available for public inspection and copying between 8 a.m. and 4 p.m., Monday through Friday, at the EPA Air Docket Section, Waterside Mall, room M1500, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Najarian, Waste and Chemical Processes Group, Emission Standards Division (MD-13), U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina, 27711, telephone number (919) 541-5393.

SUPPLEMENTARY INFORMATION: On December 17, 1993 (58 FR 66078), EPA proposed standards to reduce the discharge of water pollutants and emissions of hazardous air pollutants from the pulp, paper, and paperboard industry. The period for receiving public comments on the proposed rule ended on April 18, 1994; however, EPA stated in the preamble to the proposed rule that various industry groups were collecting air emissions data that would not be available until after the comment period and that the Agency would still consider that data for the promulgation of the air emission standards.

The additional data being announced today includes the following items located in Air Docket A-92-40: (1) A 16-mill study conducted by the National Council of the Paper Industry for Air

and Stream Improvement (NCASI), items II-I-77 through II-I-79, IV-D-8, IV-D1-20 through IV-D1-22, IV-J-1 through IV-J-4, IV-J-6 through IV-J-14, and IV-J-16; (2) a 10-mill study conducted by International Paper, items IV-J-18 through IV-J-27; (3) a 5-mill study conducted by the Texas Paper Industry Environmental Committee, items II-I-13 to II-I-18; (4) a condensate study, items IV-D1-16 and IV-D1-18. NCASI prepared summaries of their testing program in NCASI technical bulletins, items IV-D1-29, IV-D1-29A, IV-D1-31, IV-D1-33 through IV-D1-35, IV-D1-38, IV-D1-39, IV-D1-41, and IV-D1-42. EPA has also prepared draft summaries of the NCASI and Texas studies, items IV-A-2 and IV-A-3, respectively.

EPA is not soliciting comment on the new data at this time so that the public will have an expanded opportunity to review the data. The reports added to the Air Docket consist of multi-volume test reports from numerous testing programs and summaries of two of the testing programs. The Agency will solicit comment on these data in a subsequent notice.

EPA also anticipates that additional data regarding both air emissions and effluent discharges will be published after today's notice. An additional announcement will be posted at a later date presenting further data and soliciting comments of all announced data.

Dated: February 13, 1995.

Richard D. Wilson,

Acting Assistant Administrator for Air and Radiation.

Clean Air Act Promulgation of Extension of Attainment Date for Ozone Nonattainment Area; Maine

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to extend by one year the attainment date for the Hancock and Waldo Counties, Maine ozone nonattainment area, a marginal nonattainment area. This proposal is based in part on monitored air quality readings for the national ambient air quality standard for ozone during 1993.

DATES: Comments on this proposal must be received by March 24, 1995.
