## PARTS CHECKLIST

Remember to save your sales receipt in case you ever need warranty service, and make sure this telephone package includes the items shown below:

1

## INSTALLATION

#### **Dial Mode Switch Selection**

Set the Dial Mode switch on the side of the set to TONE (touch tone) or PULSE (dial pulse/rotary) telephone service. Make sure you choose the correct dialing method; touch tone dialing will not work if you have dial pulse service.

The temporary tone dialing is activated by pressing *#TONE*] while in pulse mode.

#### Table

- **1. Remove the base** by sliding it sideways as indicated by the "REMOVE" arrow.
- **2.** Connect long line cord to telephone. Plug the line cord into the LINE jack on the bottom of the phone.
- **3.** Reinstall the base with the wide edge at the back of the telephone.

Insert the base tabs into the slots on the bottom of the telephone and feed the line cord through the hole in the wide end of the base. Turn the telephone right-side up; it should sit flat on your table during use.

4. Set the Dial Mode switch.

The Dial Mode switch is on the side of the phone. Use a ball point pen to set the switch to TONE if you have tone telephone service, or to PULSE if you have dial pulse (rotary) telephone service.

- **5.** Connect line cord to modular wall jack. Plug the free end of the line cord into a modular wall jack. Make sure it snaps firmly in place.
- 6. Connect handset to telephone.

Plug the coiled end into the handset jack on the side of the phone. Plug the other end of the coiled cord into the handset, then hang up.

#### Wall

1. Remove the base.

### **INSTALLATION** (continued)

#### 2. Connect short line cord to telephone.

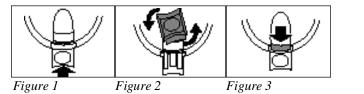

Plug the 5-inch line cord into the LINE jack on the bottom of the phone.

#### 3. Reinstall the base.

Turn the base so that the larger end is toward the bottom of the telephone. Reinstall the base by inserting the top tabs into the phone slots. Then slide sideways in the direction of the "INSTALL" arrow to lock into the phone.

#### 4. Reverse the handset tab.

To mount the telephone on a wall, you must reverse the handset tab. This tab holds the handset when you hang up. Hold down the switchhook, and slide the tab up and out of its slot (Figure 1). Turn the tab so that the end with the "hook" is up (Figure 2). Then insert the tab back into its slot (Figure 3).

## 5. Connect the line cord to the modular jack and mount the phone onto the wall jack.

Plug the free end of the line cord into a modular wall jack. Make sure the cord snaps firmly into place. Place the phone on the wall jack mounting studs and pull down until it is held securely (Figure 4).

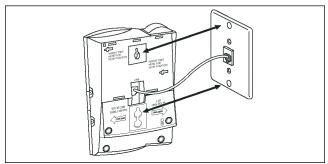

Figure 4

## **OPERATION**

#### Redial

The telephone always stores in memory the last number dialed. To dial the same number again, press *REDIAL*.

The redial memory can accept numbers up to 24 digits long. The number will remain in memory until you change it by dialing another telephone number.

For privacy, you can erase the redial memory. Lift the handset, then press any digit (1-9).

#### Flash

Press  $\boxed{FLASH}$  instead of pressing the switchhook to activate customer calling services such as call waiting or three-way calling. You may have to press other buttons before or after  $\boxed{FLASH}$  as explained in custom calling instructions provided by your local telephone company.

#### **Ringer Volume**

The RINGER volume switch allows you to adjust the loudness of the telephone ringer from OFF to HI. Slide the switch to the desired volume level.

#### **Volume Buttons**

The VOLUME button adjusts the handset during your call. While on a call, press  $\blacktriangle$  to increase volume,  $\bigtriangledown$  to decrease volume.

#### **Dial Mode**

This telephone has a selectable push-button dial and will work with either tone or rotary telephone service. It can be set to work directly with long distance or certain other services that require tone signaling including some tone activated computer systems.

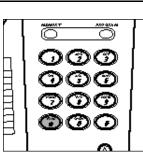

> (Turn over for more Operation, Memory and In Case of Difficulty)

## **OPERATION** (continued)

#### **Temporary Tone Dialing**

Temporary tone dialing is used only when you have rotary service. It allows you access to services that require tone signaling, including some toneactivated computer systems (e.g., telephone banking).

To change from pulse (rotary) to tone dialing during a call:

- 1. Dial a telephone number with the dial mode switch set to PULSE.
- 2. Press **\****TONE*; all buttons pressed after this will send tone signals.
- 3. After you hang up, the phone automatically returns to rotary service.

## MEMORY

#### **Memory Features**

Numbers will remain stored in memory unless you erase or change them by entering other numbers.

**Capacity:** This telephone can store up to 9 different phone numbers, each up to 24 digits long.

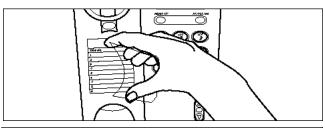

**Speed Dialing:** Nine telephone numbers can be stored in standard speed-dialing locations. You can dial any of these numbers by pressing two buttons.

**NOTE:** You may choose to store emergency numbers in memory locations. This feature is provided only as a convenience and the manufacturer assumes no responsibility for customer reliance upon the memory feature.

5

## **MEMORY** (continued)

**Directory Card:** Remove the directory card. Write your telephone number in the space provided. Also write the telephone numbers (or names) that you want to store in each memory location. Reinstall the card and clear plastic cover.

**NOTE:** Numbers programmed into a memory location might not be retained if the telephone has been unplugged from the line jack for a half hour or more.

#### Speed Dialing

#### To program numbers into memory:

- 1. Press **PROGRAM**.
- 2. Enter telephone number. You will hear a click when each button is pressed.
- 3. Press MEMORY.
- 4. Enter a digit (1-9) for the memory location where the number is to be stored.
- 5. Hang up after the number is entered correctly.

Repeat steps 1-5 to store another number.

#### To dial:

- 1. Listen for dial tone.
- 2. Press MEMORY.
- 3. Press memory location (1-9).

#### Memory Erase

To erase any number from memory, you can enter another number in the same location.

## IN CASE OF DIFFICULTY

If this telephone does not work properly, try the following suggestions before seeking repair assistance.

#### No Dial Tone

- Make sure all plugs are connected properly. Inspect the line cord connections at the modular jack and at the telephone. Also inspect the coiled handset cord connections at both ends.
- Unplug the telephone and connect it to another modular jack. If it still does not work, try another telephone; if neither telephone works, the problem is not in this telephone. The trouble may be caused by local telephone company lines, central office equipment, or the wiring in your home.

#### Calls Cannot Be Dialed, or Are Dialed Slowly

Reset Dial Mode switch. If you have rotary service, you cannot dial numbers with the switch set to TONE. Set the switch to PULSE, then hang up and dial again.

If you have tone dialing service, you can use either tone or dial-pulse mode. If you set the switch to TONE, numbers are dialed much more quickly.

#### **Telephone Does Not Ring**

The Wake sure the Ringer switch is not set to OFF.

If there are several other phones on the same line, try disconnecting some of the other telephones. Having too many telephones can also create problems such as low ringer volume or impaired quality during calls.

#### **Other Problems**

Make sure you have followed all the instructions in this manual. If you continue to have problems, call 1 800 722-9125. If you cannot correct the problem, disconnect the telephone and refer to the warranty information.

Complement this product with accessories that can enhance its usefulness.

If you have any questions about service or products, call 1 800 722-9125.
