Why Choose EventLog Analyzer?

Unlock the Business Value of your Logs

- Supports an extensive array of machine generated logs which includes system logs, device logs, and application logs

- Provides a wide range of reports for external threat monitoring, change management and regulatory compliance

Attractive TCO and rapid ROI

- No additional hardware required, minimal IT overhead, ease-of-deployment and ease-of-use ensures a low TCO and rapid ROI

- Competitively priced. Quick deployment, instant results, reduced IT overhead ensures rapid ROI

Meet dynamic business needs quickly

- Rapidly transforms machine generated logs into actionable information

- Receive reports in user friendly formats (PDF and CSV) and meet regulatory business requirements

Productivity improvement for IT / MSSP

- From product deployment to report generation in minutes!

- Real-time alerts to network events enable IT to respond instantaneously to security threats

Customer Speaks

We chose Manage Engine EventLog Analyzer over other solutions because it was the only solution that provide us with predefined report templates for Sarbanes-Oxley (SOX) Act which help us meet our audit requirements.

Devank Kumar,
Manager Enterprise Systems & Network Security,TRC Companies, Inc.
