Caracas, March 14 2011

Señores
Pro Energy Service
Chacao
Caracas, Distrito Capital
Ciudad

Atc: Jhon Bryant

Project: IPC para la Instalación de dos
Unidades de Generación GE
LM2500 Plus y una Unidad de
Generación GE LM 6000 en el
Centro de Servicios de La
Electricidad de Caracas en
Guarenas-Guatire.

Letter: GUA-DWK-PES-004

Subject: Switchgear Incident

Mr. Bryant,

According to recent events on the Switchgear 123, and the indications of a deficient installation that led to a short circuit between phases; we request the instant removal of the Site of the Electrical Superintendent and the crew responsible of this installation. The results of the lack of responsibilities create a safety hazard to all the employees at the Site, not to mention the financial consequences and the impact on the Project culmination.

We demand immediate actions to resolve this matter.

Best regards,

Ing. Edgar Romero
Project Director
