Subject : Brief DEA meeting in Colombia
Attachments :

Hello guys,

We met with Michael Casey, the DEA person in charge of the system here in Colombia. He told us he would need our technical support because they bought another interception tool (something that will receive all the traffic for Colombian's ISPs) and they will place it in the current room where RCS is. So they are moving RCS to another location inside the Embassy. Also he would need to upgrade it to latest version. I already asked him for a first visit here so I can site survey and get all their requirements.

Other than that, Marco, Daniel and I, met some other DEA agents in Cartagena, assigned to Bangladesh, Spain, Italy, Latin America and other countries and they feel that a good recommendation from a current system working in DEA will make their life easier for budget assignation.

Thank you,

--
