FAO: James Garnett

Dear Mr Garnett,

## Planning noise issues and assessment – Omega phase 2

This letter sets out the proposed acoustic assessment for Omega phase 2, considering construction noise and noise in use.

### Construction noise:

Noise from construction activities is expected to be subject to the normal constraints of operational hours on site, and limiting the noise impact at the nearest noise sensitive locations in accordance with the normal practices of BS 5228.

### Noise in use:

We would propose to assess the noise from the proposed building services plant and equipment according to BS 4142: 1997. We will endeavour to ensure that the rating level of all plant and equipment does not exceed the background,  $L_{A90}$ , level, at the nearest noise sensitive locations.

Please do not hesitate to contact us if you have any queries, or wish to discuss any matter.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Jack Harvie-Clark'.

Jack Harvie-Clark MA MIOA
