Supplier Quality Portal

"Our mission is **100% of materials and services used by Intel and its suppliers are expected at the lowest total cost.** Clear and high quality communication is one of the key items to achieve this mission."

- Anand P. Shah, Director, Materials Quality and Reliability

This Supplier Quality Portal is the home for Intel supplier quality applications and related information. Its purpose is to increase and improve quality-related communications with our suppliers.

Supplier Continuous Quality Improvement (SCQI) Program

The SCQI Program (Supplier Continuous Quality Improvement) is a process. It is an organized proven program for achieving extraordinary supplier performance. Suppliers continuously improve their products and services provided to Intel. The program rewards suppliers for quality results and behaviors.

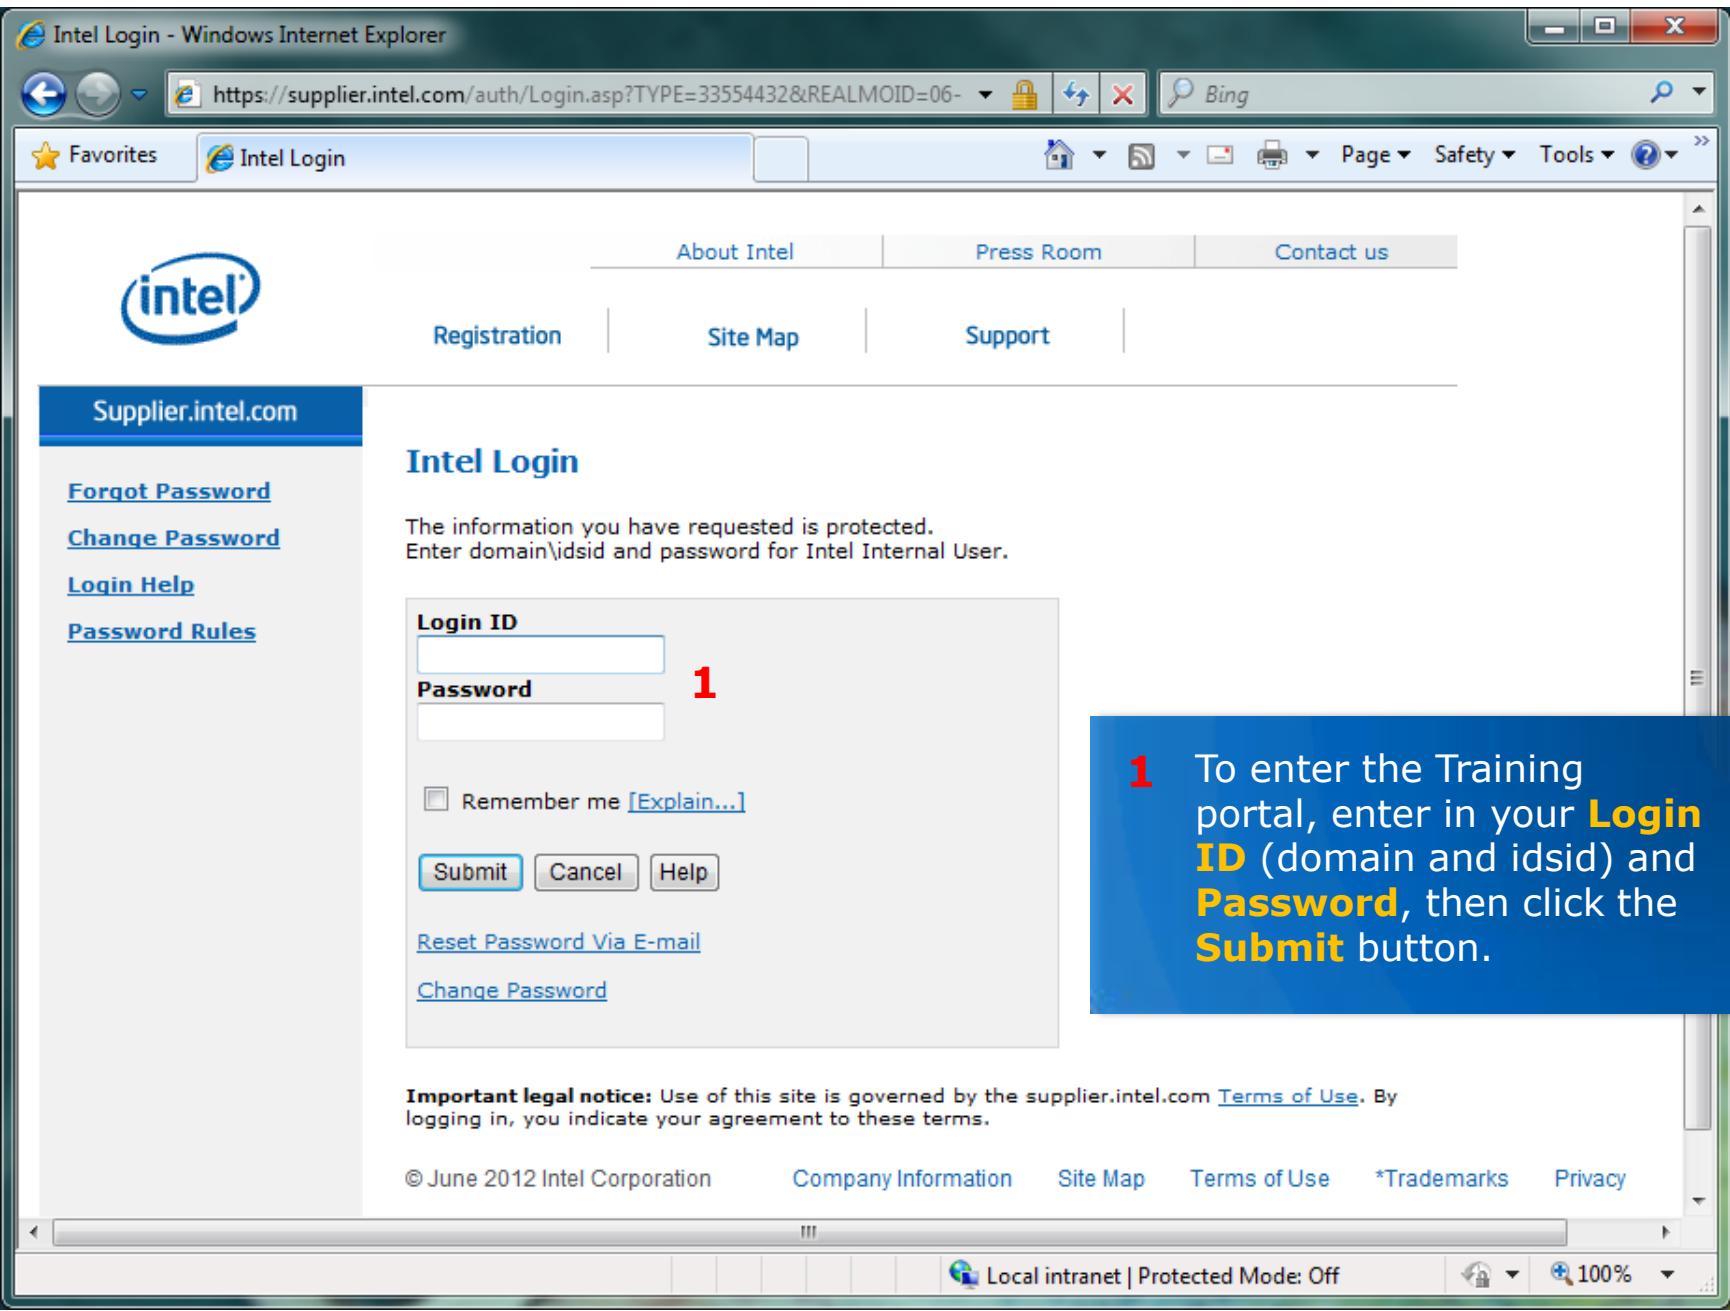

QOS Health Assessment

The QOS HA is used to assess a supplier's quality systems against a pre-established set of scoring

1 Access the Supplier Quality Portal at:
<http://supplier.intel.com/quality>

2 Click on the navigation link for MQ&R Supplier Training.

Intel Login
