← BREAKDOWN OF SEARCHES AT THE SUB-NATIONAL LEVEL →

COUNTRY PROFILE BY TARGET AUDIENCE

The cantons of Sarajevo and Zenica-Doboj recorded the highest number of searches indicating engagement with jihadist propaganda material and media outlets.

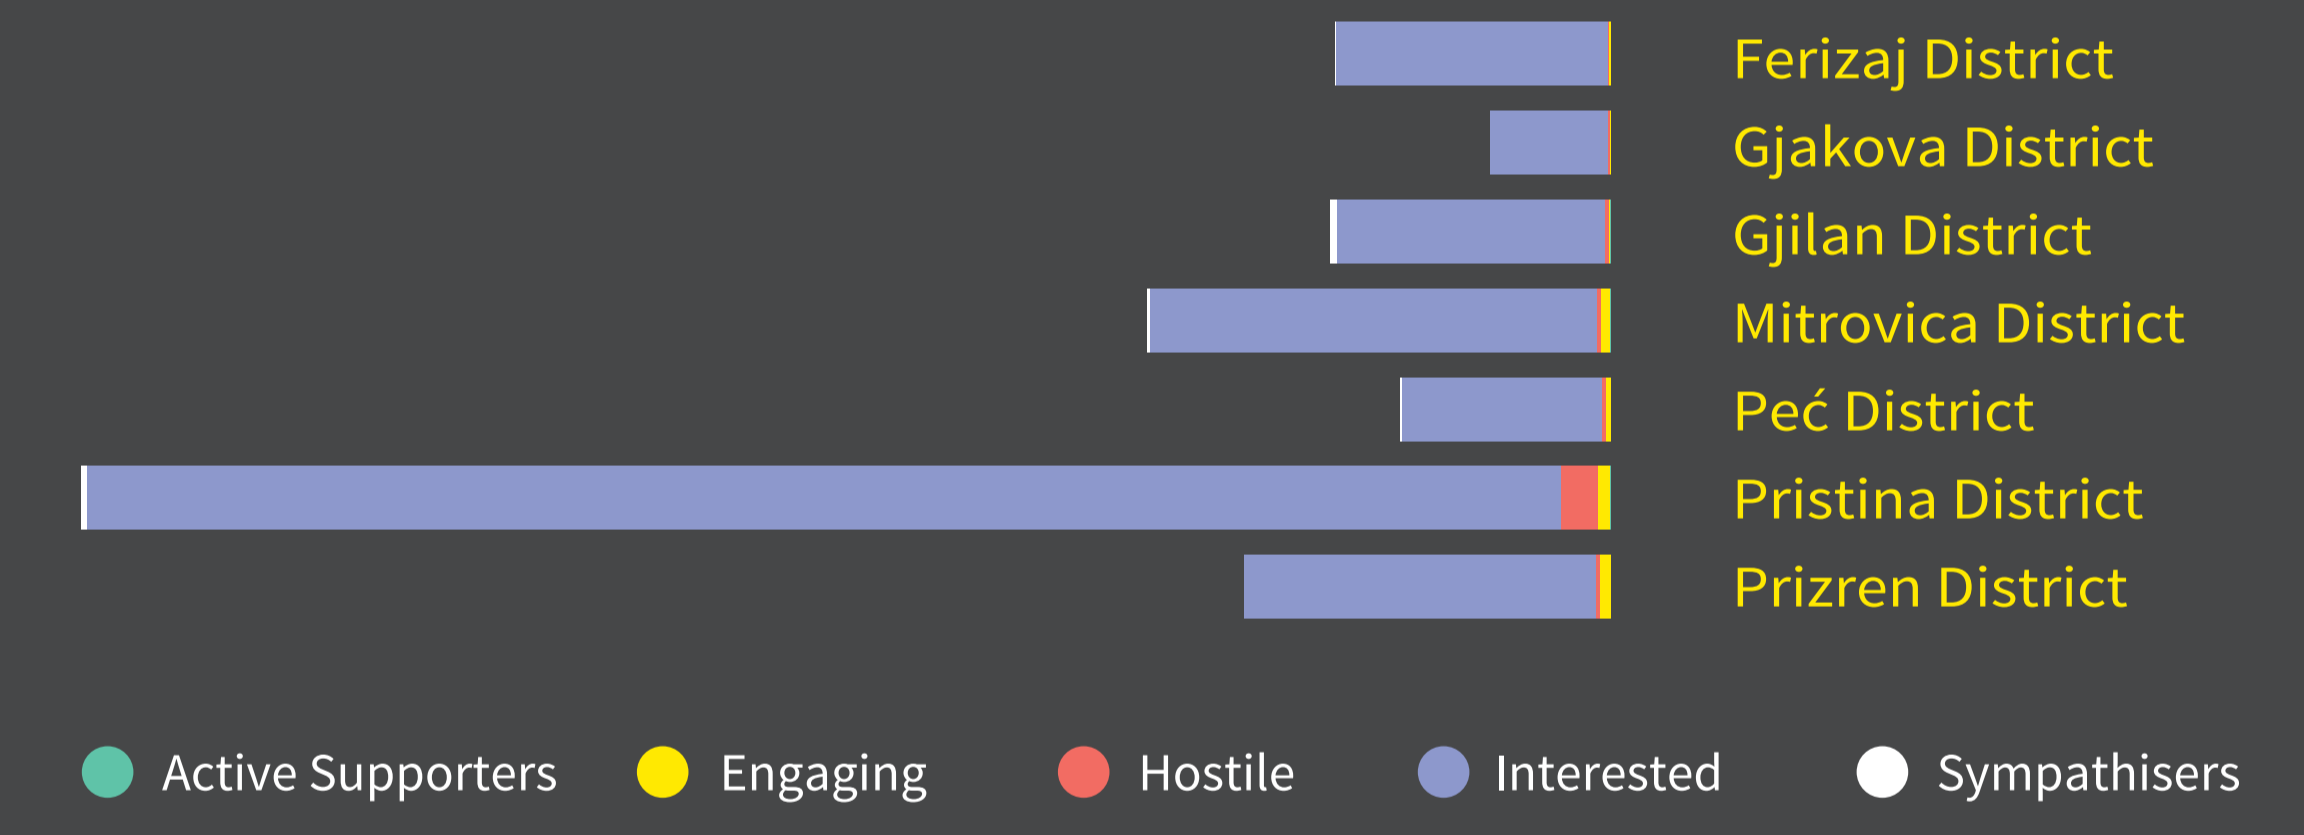

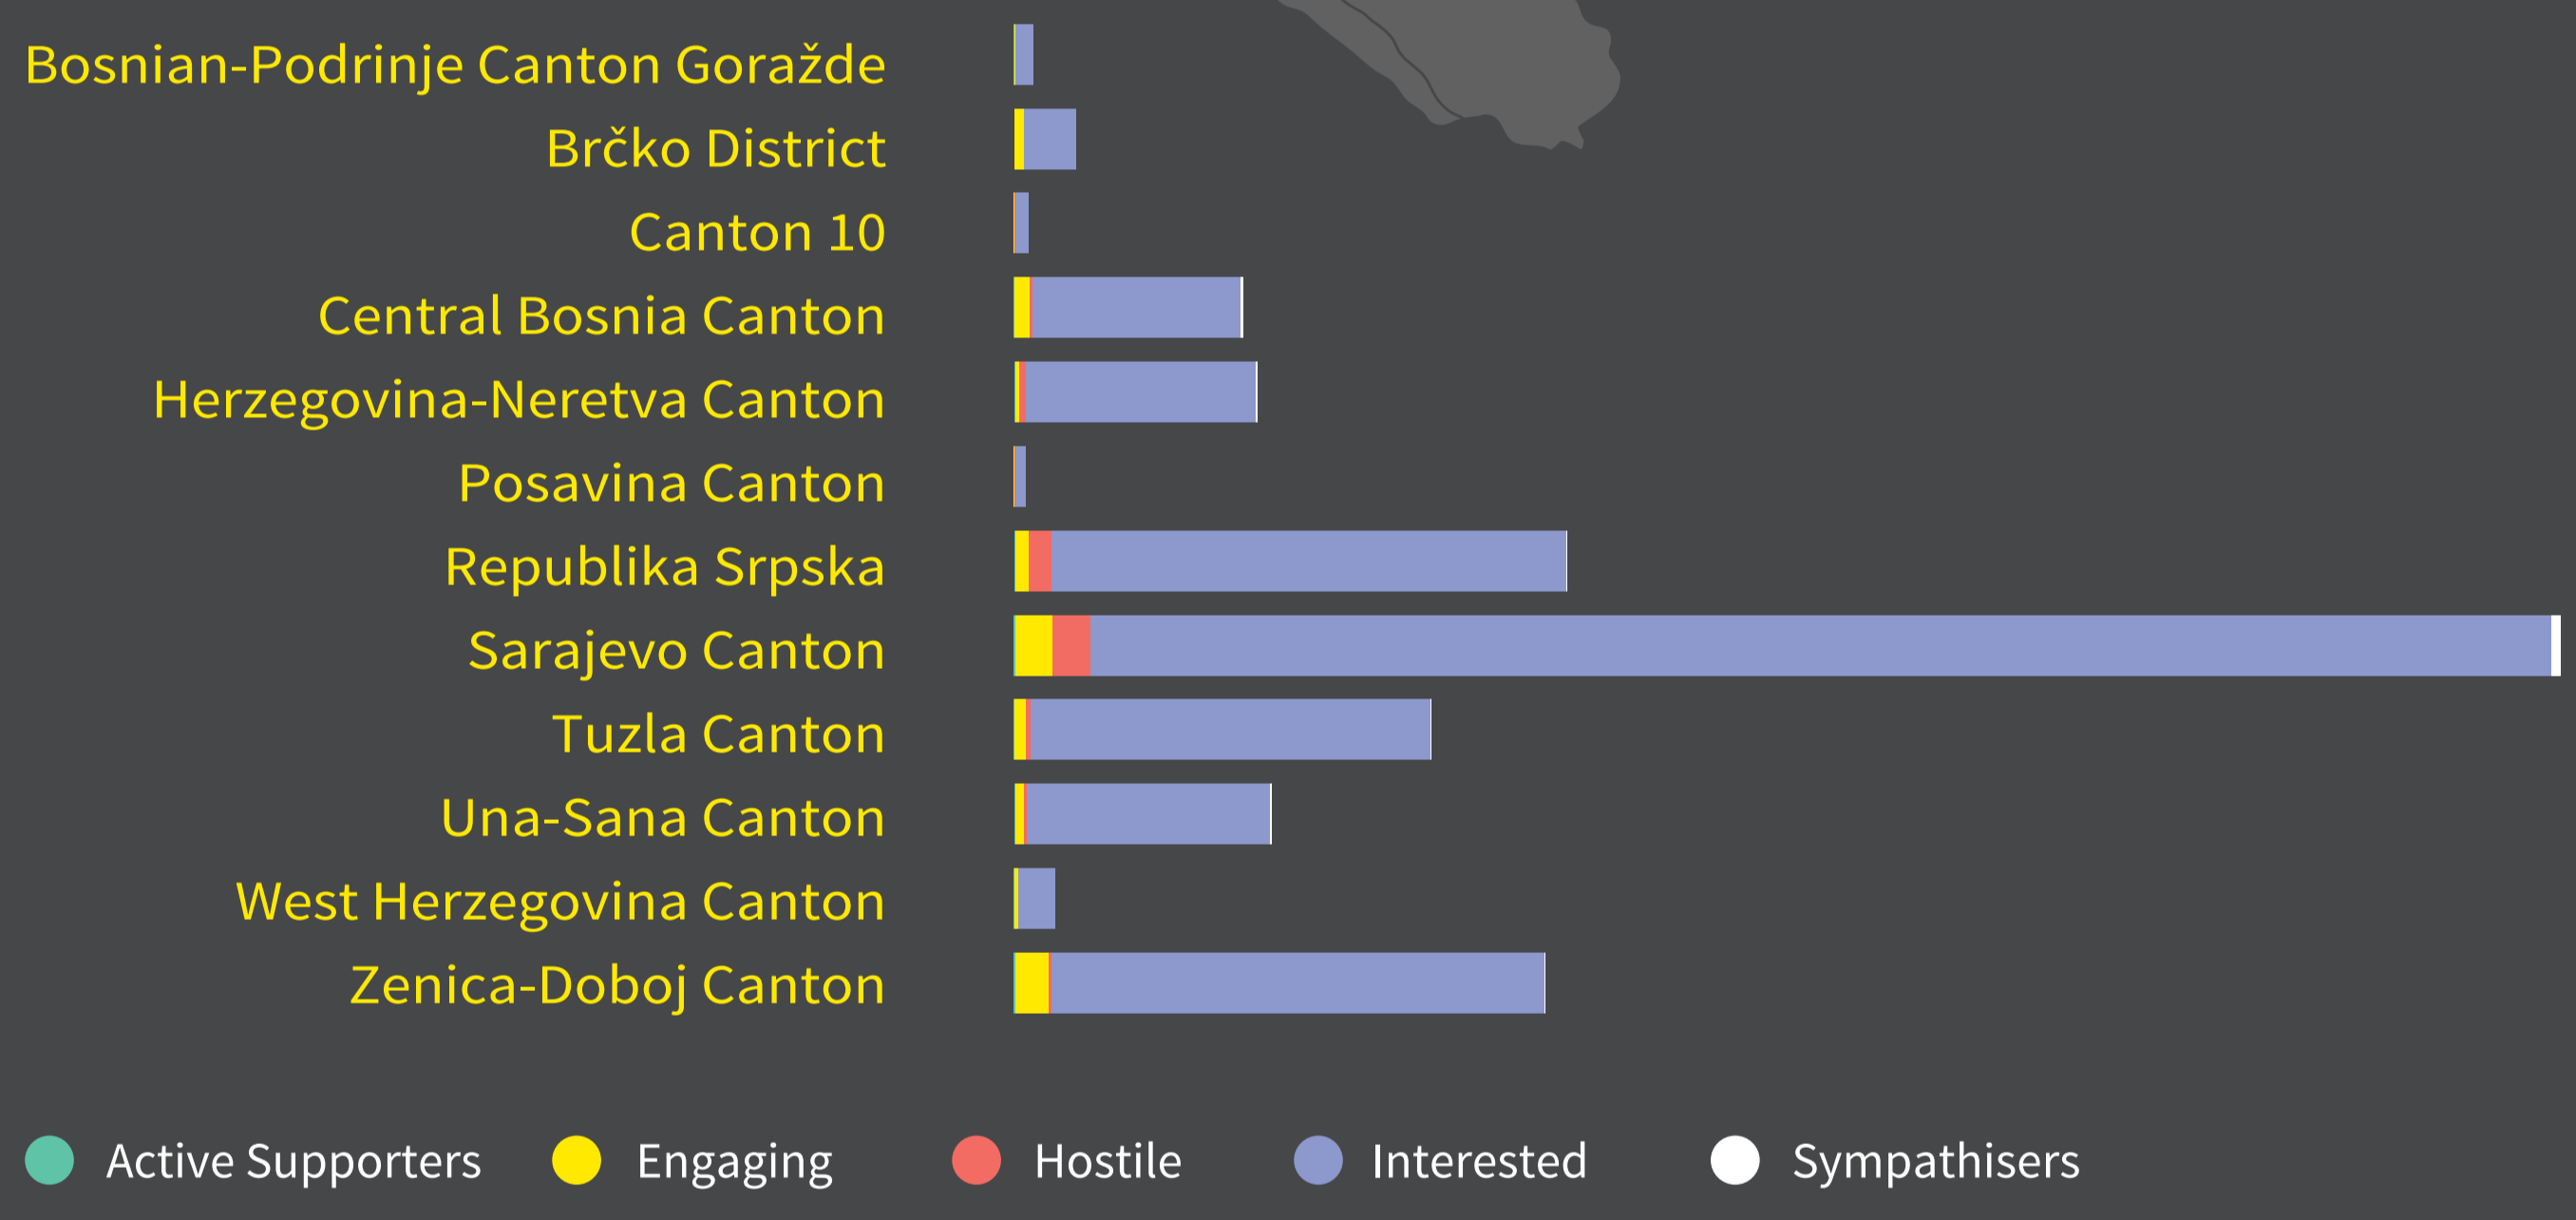

Straight after Sarajevo Canton, the Republika Srpska recorded the highest level of searches indicating hostility in the entire country.

Posavina Canton and Canton 10 recorded the lowest level of data - mostly indicating interest - and no searches indicating active support for jihadist organisations.

Gjilan District recorded the highest number of searches indicating sympathy for jihadist groups, while also recording one of the lowest levels of hostility.

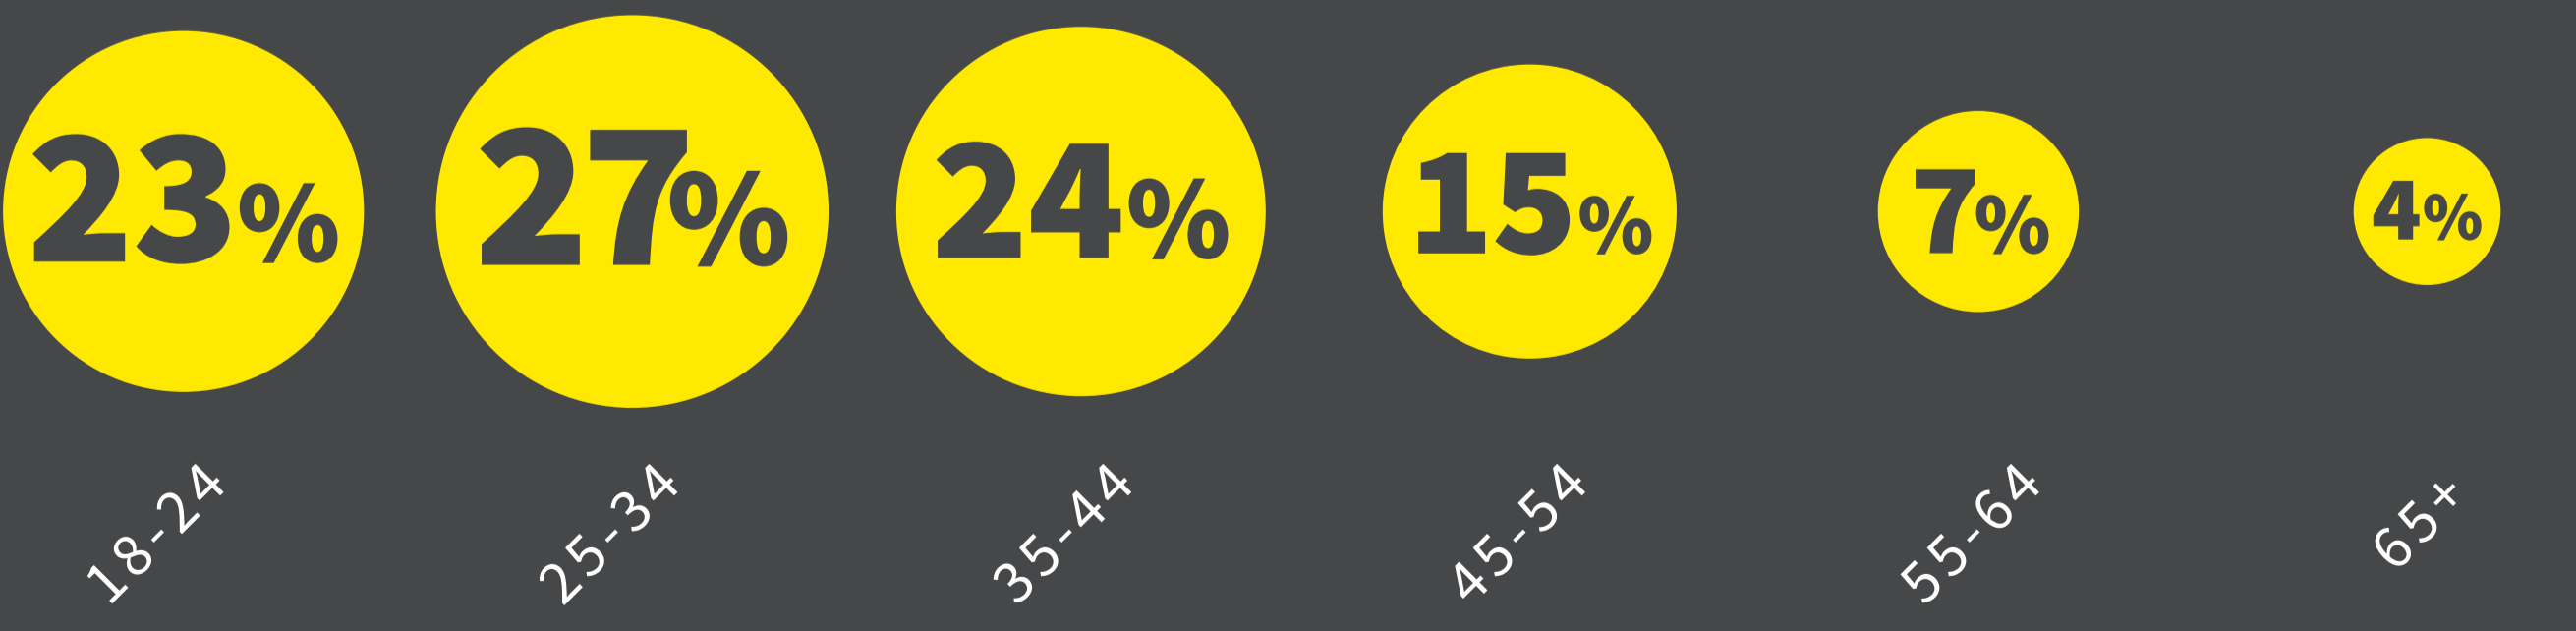

Pristina District recorded, by far, the highest level of searches indicating hostility in the entire country.

Pristina, Prizren and Mitrovica Districts recorded the highest level of searches indicating engagement with jihadist propaganda material and media outlets.
