FOREWORD

During the year 1893 on the streets of Chicago were hundreds of women who had been thrown out of employment. The genuine helplessness and hopelessness of these women appealed strongly to the generous heart of a wonderful woman, Dr. Sarah Hackett Stevenson, one time president of the Chicago Woman's Club. She went before this club and stated that there was no place in this great city where a woman without funds could find shelter—a woman who would work if given an opportunity. She demanded in the name of humanity that this, her club, do something at once to relieve the situation.

Her plea had its effect, and money was subscribed for beginning work. Other clubs responded to the call for help and contributed both furnishings and funds. And what was called the Woman's Model Lodging House was opened to the public.

No questions were asked of those who came for shelter—the past was not the thing to be dealt with—only the present and future. A charge of 15 cents a night was made, and if they were without money work was given them and they were paid for it—they, in turn, paying for their lodging. It was the principle of the organization that the actual handling of this money helped to preserve self-respect and that they might not feel themselves objects of charity. This principle has held through the years and no woman or child is turned from the door as long as there is a place to rest.

Hon. William B. McKinley of Champaign, Ill., gave as a memorial to Dr. Stevenson the present home at 2412 Prairie avenue, which will accommodate sixty women and about fifty children. The organization has become one of the strongest in the city—a delegated body of eighty-two members who represent women's organizations of Cook County. For the last few years the work has grown and broadened, until almost every trouble and sorrow that can come to women and children is brought to this door.

The woman who is on the downward path of years, when it is so hard to find employment, her little money gone, often weakened both mentally and physically from lack of nourishment and worry—she might be any one's mother—if not able to work for her lodging, is supplied

Foreword

from the loan fund. Often she can return the small amount and she does not feel that she has received charity, but that the hand of a friend has grasped hers, and her faith in humanity is restored. The young girl who is alone and without money is safe from the cheap rooming houses of the city. The mother with her little family, who has been left, by desertion or death, without the father's protection comes to this home and remains until she can gather up the thread of existence once more. Often she is saved from placing her children in institutions or giving them for adoption. An average of 105 women and children are cared for in the Lodging House each day.

As time brought the need of better facilities for the care of the children, the generous friend of the Institution, Wm. B. McKinley, gave the building at 2408 Prairie avenue for Nursery purposes. Here the children are cared for during the day, while the mother is seeking employment, or otherwise adjusting her affairs.

A limited number of neighborhood children are also cared for. A trained nurse and kindergartner are employed. Twenty-four hour feedings for bottle babies are furnished so that the little ones diet may not be disturbed. In this department 60 children are given daily care. The mother has charge of her family at night. Every effort is made by this organization to keep the mother and her children together. We believe that separation should be only after every other method has failed.

A visit to the Stevenson Memorial will interest you and you are most welcome at all times.

MRS. HERBERT D. SHELDON,
President.

BEEFSTEAK ROLL

Mrs. J. E. Kelly

Use a large slice of round steak cut one-half inch thick. Make a dressing by mixing together: One cupful grated breadcrumbs, two-thirds teaspoonful salt, one well-beaten egg, one tablespoonful melted butter, one small onion, grated, a few dashes of paprika and a half teaspoonful powdered sweet herbs. Lay the steak on a board, sprinkle with salt and pepper, spread thickly with the dressing and roll up. Wind with soft cord to hold in place. Put three tablespoonfuls of pork fat in a frying pan and when very hot, dredge the roll with flour and brown it quickly on all sides. Place meat in kettle that has a tight fitting cover. Meanwhile, add to the fat in the pan two slices of minced onion, and one tablespoonful flour. Stir until very smooth, pour in a cupful of stock (or hot water) and when the gravy boils, pour over the roll with a pint of strained tomato. Season to taste with salt and pepper, cover the kettle closely and as soon as the contents boil, place where it will simmer for about two hours. HAMBURGER POT DINNER

Line bottom of a pot with small pieces of suet; when this is melted, place meat balls in the pot, cover with water, and cook until rice is about done. Add one can of tomatoes (quart can). A half hour before serving, peel enough medium-sized potatoes to circle the platter to be used. Place these on top of tomatoes. When potatoes are done, arrange them around the outside rim of the platter with the meat balls in the center, and pour over the meat enough gravy for first serving. Remainder of gravy may be used on table in a casserole or gravy dish. Care must be used in measuring the rice—too much will cause the balls to fall to pieces. One advantage of this dish is that it may be prepared the day before, or the morning before serving, with the exception of the potatoes.

About fifteen minutes before serving add nut meats and olives cut into strips. In the meantime, heat the beans by themselves; turn all together and cook ten minutes, when it is ready to serve.

Put it into gallopin boiling water, quite heavily salted; water should be at least four times quantity of rice. Boil until barely done; drain in a collander and set to drain in the mouth of the oven for five minutes.

HOUSEHOLD HINTS

When peeling onions, if you will hold the onions under the running cold water, there will be no discomfort experienced.

Put a thimble over the end of rods and you can easily run it through your curtains, or an old glove finger will answer the purpose if thimble is too large.

To mark a hem in linen, remove thread from the machine and run the goods through the hemmer as though stitching; you will find a perfect hem turned down.

For removing odor of onions from hands, use celery or powdered celery seed.

A handful of salt rubbed around sink will help remove all grease and keep it sweet and clean.

A tiny pinch of soda will sweeten cream slightly soured.

To remove bread or cake from pans, apply wet cloth to bottom of pan.

Tack a piece of asbestos on end of ironing board for iron stand.

Burn a piece of camphor gum to rid house of mosquitoes.

To break glass evenly, tie a string around the glass, saturated with kerosene, then fill with cold water as high as the string; set fire to the string, and glass will snap at point of string.

If a silver spoon is placed in a jelly glass the boiling jelly can be poured in without the least danger of breaking the glass.

To cream butter and sugar easily when butter is hard, warm the sugar slightly.

For angel, sunshine and all sponge cakes, add the cream of tartar to the eggs when half beaten, and if soda is called for, add it to the flour.

Lime water and linseed oil is an excellent application for burns.

To caramelize sugar: Put in a smooth granite saucepan or omelet pan, place over hot part of stove and stir constantly until melted and of the color of maple syrup. Care must be taken to prevent sugar from adhering to sides of pan or spoon.

To renovate food chopper and sharpen its knives, grind a piece of sand soap through it.

Before using new tinware, if you will rub it well with lard and heat it thoroughly in oven, it will not rust.

To remove paint from window pains, rub with baking soda.

To remove match scratches from painted woodwork, rub with slice of lemon, then with whiting, and wash with soap and water.

In making pancakes, two tablespoons of snow stirred in quickly is equal to one egg.

Two apples placed in your cake box will keep the cake moist.

If in cooking you have accidentally put too much salt in anything, a small amount of brown sugar will counteract it.
