No. 1

SPEECH OF HON. FRANK P. WALSH, CHAIRMAN OF U. S. INDUSTRIAL COMMISSION, BEFORE THE A. F. OF L. CONVENTION.

President Gompers introduced to the convention Hon. Frank P. Walsh, Chairman of the Industrial Relations Commission.

Mr. Walsh: Mr. President, Ladies and Gentlemen: Sensible as I am of the fact that the very great compliment implied by this invitation to appear before you today is due to the small part I happen to be paying in a work which I, at least, believe to be very significant to the masses of mankind, not only in this country but in the world; but as I look about this audience, seeing the familiar faces of so many that I have met in this work, and so many that I have had the great privilege of co-operating with in the past, I hope I may be forgiven for believing that there is at least an atom of the personal in the invitation, and thank you from the bottom of my heart therefor.

The institution known as modern industry has an earth-grip in strength unequalled by any other social organization known to the world. Its strength, primarily, consists in the fact that it, of all other bodies, has first-hand access to chemistry and physics, the moving forces of the world, because there is involved the personal fortune of every individual connected with it; not only affecting his board and clothes, but all of the aspirations of his heart, his hopes for freedom, his desire for the mental, moral and social expansion of himself and the children who are to succeed him. And if my work upon this commission has taught me but one thing in regard to the labor movement—aye, I might make it more personal and say, if my contact with your distinguished President and those members selected by your organizations as two of my colleagues upon this commission—it is to give no narrow meaning to that phrase, first declared, so far as my knowledge goes, by the Knights of Labor, and I notice very lately expressed to you by your distinguished chairman, that the injury of one is the concern of all, means, if it means anything, that an injury to the humblest and weakest of God's creatures is the concern of all mankind.

The work we are called upon to do, technically speaking, is to make a study of labor in the principal industries of the United

States; to study the growth and maintenance of organizations of wage earners and employes; to study the systems of collective bargaining now known to the world; to understand, if we possibly can, by investigation, the effect that labor and employers' organizations have upon the public welfare and the rights and powers of the public to deal therewith; and finally, to ascertain, if possible, the causes of industrial dissatisfaction and make recommendations to the Congress of the United States referring thereto.

I might say, my friends, that the first annual report of this commission is now in the hands of the clerk of the House of Representatives, to be released, I hope, upon the first day of the meeting of Congress. In that report you will get the first suggestion of the scope of the work of this commission. You will get, not definite findings, but a free statement of the issues of the contentions between capital and labor, and a tentative finding of some of the great underlying and fundamental ideas from which this great question must be approached, if not settled. In the very heart of that report you will find the question of collective bargaining. If I understand correctly the history of my time it is that idea that has gathered you here today. If I were asked to give an interpretation of collective bargaining I would paraphrase one given by a great student of economics and say that collective bargaining is that machine devised by studious and self-sacrificing men that might make it impossible for the well-fed to drive hard bargains with hungry men.

The significance of the work which we are doing, my friends, I hope will appear patent from that report. When we began the work I made but one pledge, so far as my heart, soul and brain could carry it out, and that was that in this investigation nothing should be held sacred but the truth; and in the recommendations that I hope God will give me the strength to have part in formulating nothing will be cared for except justice.

We have heard the complaint of the employers of this land, voiced by something like 300 men, of everything perhaps open to criticism in the genesis, maintenance and operation of the modern labor union. For the first time in this country we have per-

mitted, in a public way, to have voice given to every complaint and every protest made by labor against the formation of employers' organizations and the carrying on of modern industry. We have endeavored to hold the balance even, and while listening to the criticisms of labor unions we have also given voice to the disinherited of God's creatures, the exploited man; we have allowed to give utterance to the expressions of protest of the exploited woman, and we have endeavored to make articulate the sob of the exploited child in the maelstrom of modern industry.

Of the contribution which you and your fellows have made to this great work I would be less than frank if I did not give some voice to my appreciation of it this morning. If I were called upon today to say what suggestions have been made to give driving force to those questions in industry and economics that vex the nations I should have in frankness to draw away from the expressions of the members of your organization, away from those great fundamental suggestions made which came from the gentleman I see sitting upon this platform this morning, and for significance I would point to the utterance in a very few lines given forth by the President of the Illinois State Federation of Labor, who protested against what he dramatically, forcefully and I believe truthfully called the double standard of morality in modern industry.

The idea that the workman is to be considered a good and moral citizen if he accepts a fair day's wage for a fair day's work—interpreted to mean that he should work at least eight hours, or until he is tired out, for a wage that is sufficient to supply the necessities and none of the luxuries of life—for that he is called moral. In the same industry another human being with the same desires, the same aspiration and the same human nature, deriving everything of his from that same industry, who is called moral and upright, aye, and even great, if he has succeeded in getting all he could out of that industry without any work and without any application—that was one of the striking thoughts given to this commission by a member of your organization, and it was spread broadcast through this land.

If I were asked for another one I would like to picture to you, if I had the power of description, that great woman who appeared before the commission in Los Angeles, Mrs. Noel, who sat in the presence of the commission in a crowded hall and heard one of the great captains of industry of the United States testify that he contributed thousands of dollars to the support of an institution out there, organized frankly for the purpose of fighting organized labor; that he had never attended a meeting of his organization for three years; that he did not know off-hand its aims and purposes;

that he operated an industry employing 3,500 men, women and children, and had always treated his employes fairly. He admitted his organization was for the purpose of upholding the open shop. He did not know the number of labor organizations in Los Angeles.

Upon close examination by Mr. John B. Lennon and Mr. James O'Connell, of your organization, assisted by Mr. Austin B. Garretson, the other representative of labor, many of the contentions of Mrs. Noel were upheld. She said: "You gentlemen are going about seeking the causes of industrial unrest. Have you not seen it in the statement of the last witness? He has a machine that is operated by him that has to do with the life and health of 3,500 human beings. He said he treated his employes right, and yet he admitted he did not know the cost of keeping an unprotected woman in decency and comfort in Los Angeles. He contributes thousands of dollars to the upkeep of an organization and does not know its aims and purposes and has not attended a meeting for three years. He says it is formed to fight organized labor, of which he knows nothing. He has shown you he has no knowledge of his own industry, of the machinery which he is setting in motion to fight organizations of labor and no knowledge of the personnel or motives of the organizations of labor. In other words, he has shown he is absolutely ignorant of social economics; and so I say that a great cause of industrial unrest would be removed if the government could establish a board, such as states and local communities have formed to examine engineers and examine men before they go into those great industries, which means so much to human welfare and human life, without being properly equipped."

She made another suggestion that in this day of investigating committees, inquiring into the cost of room rent for young women, inquiring into the cost of luncheons, the cost of medical attendance, some investigating body ought to be organized to investigate the standard of living of those men at the head of these great industries, to find out whether or not their manner of living is not so violently in contrast to the manner of living of their employes that it is a distinct cause of industrial unrest.

Many of the questions we have to meet are fundamental questions. I say, however, there is no question which we will be called upon to pass upon in which you do not have a most important stake. Not only for the two million and more of your members, not only for perhaps the ten million more directly under your influence as members of your family, and the countless millions now and in time to come that are depending upon the effort you are making here today and in other parts of this country; but we will undertake while passing upon these merely technical things to bring out, if we

can, those fundamental questions of unequal distribution of wealth, or perhaps improper handling of national resources that has such a strong bearing upon those questions you are dealing with locally.

All over the Pacific coast we heard from the employers the cry that men were massing in the great cities; we heard the cry of "Get back to the land," and when the forces of labor were put on there was a counter cry—"Get back the land." A representative of your organization called attention to the fact that in one state upon our western border, with a population of less than one million, four groups owned 38,000,000 acres of the most fertile land God's sun ever shown upon, and were holding it away from the beneficial use of mankind. Another member of your organization in San Francisco pointed out the fact so vital to our nation—because it reaches down into the life of the family—that in one of the great counties of California there was a school district of 110 square miles that had in it forty-seven school children, and another of 102 square miles that had in it a school population of forty children; one of the most fertile valleys in the whole world, containing 89,000 acres of land, in which there were but nineteen children, or one to every 4,661 acres of land, and one school district of 189 square miles that did not have one child in it—all of this land held in great tracts away from the beneficial uses of mankind.

The insistent cry of labor is for its democratization, if I may so express it, that no man will be satisfied, no man of intelligence ever, until he is given the full product of his own toll. That sentiment, my friends, was expressed by your distinguished President at our first meeting in New York; it has been voiced by every intelligent leader of labor thought from the Atlantic seaboard and up and down the Pacific coast. One finding I can say this commission will make, after an investigation covering the wide territory I have mentioned, after hearing from almost 300 employers representing all of the great industries practically of the United States, in point of numbers representing an employing capacity greater than any body of men ever brought together before in the history of this country, we found but five men who would disagree with the underlying principle of collective bargaining, and we will so report.

And, my friends, what is democratization of industry? As I understand, it is simply this: That every man who toils shall have a compelling voice in the conditions under which he gives his work, a voice as to compensation, as to hours, and as to conditions; and when I say that every man must have the product of his own toll if justice is to be established I mean every man who labors with his hands, with the muscles of his body, with his brain, every man who plans, every man who constructs, every architect, every draftsman and artificer.

Now, my friends, let me make this one suggestion, that I may be excused for hoping will animate your minds, because I am not here to give you advice. I have always believed that all the government can do is to unshackle industry, that all law can do is to establish justice between man and man. Your destiny depends upon yourself and you must work it out.

SPEECH OF PRESIDENT GOMPERS, IN REPLY TO ADDRESSES OF FRATERNAL DELEGATES.

President Gompers: After the messages we have heard, I take it now it would be appropriate to just express briefly the appreciation of the delegates to this convention of the American Federation of Labor of all that has been said, even when upon any particular point there may be a division of opinion or dissent. Of course, we are pleased to have expressions of good will and hope for the advancement of our movement. But, after all, the movement itself is not the thing, it is not the goal. The organization, the movement of labor, is the instrument and the vehicle to attain the great objects of right, of justice and of humanity.

On behalf of the convention (I am sure I am but very feebly expressing our appreciation), when I say we are greatly gratified and thank you from the very bottom of our hearts that you should have come here and expressed to us your hope for our welfare, to have shown that which you have done and are trying to do.

We are assembled here in convention, and in holding our annual conventions we are not the dominating factor of the labor movement of America; we come here as the representatives of the organization on the continent of North America, representing the heart throb and the mental thought of the toiling masses of America. We hope to give expression in concrete form of the hopes and yearnings and aspirations of the toiling masses of America. We try to voice their sentiments and their grievances, and to insist and to make the demand upon modern society, and all the representatives of modern society, that the wrongs and the grievances from which the toiling masses of our country and our time have so long had imposed upon them be remedied, and to secure the rights to which they are entitled and which too long have been denied them.

We cannot always direct our movements as some would like to have the movement directed; we must deal with the elements within our ranks which constitute the great rank and file of the organized labor movement. We have not always the choice of material. The men and the women who labor, the men and the women who give service to society—and the service without which civilization itself could not exist—these make up the rank and file of the organized labor movement, and these we have the honor to represent.

For years and years, and particularly in these last two decades, there have been elements at work among the exploiters of the people of our country to go into the fields and in the poorest and the worst fields of the world, and by a system so deep it is with difficulty it can be observed or uprooted, and by the great agencies which money affords them to utilize bring from all parts of the world men of labor, with all the weaknesses and all the shortcomings and all the ignorance and prejudice upon their heads.

And we say this to you, gentlemen and ladies, as we say it to the world—at least I want to say it for myself, to be responsible for the utterance—that if these men are good enough to be brought to our country to work for your profit, they are good enough, with all their weaknesses and shortcomings, for us to organize them and try to make better men and better women of them. And our movement, I repeat, can only be, if it is truly a movement of labor, a representative gathering of the thoughts and the hopes and the prejudices, if you please, and the shortcomings, if you please, and the strength and the weakness of the men and women in the United States and Canada who have been brought here under such circumstances to mingle with us; and if we can in our way try to help them, and by our maturer experiences to rightly guide them, we have done something for the establishment of the American character, of American concepts; to help them and to help our country, and particularly to help the men and women of labor and the children of our times who are to be the men and women of the future, that they may have a better understanding of their rights and their opportunities, as well as to impregnate their minds with their duties and their obligations.

We aim to earn and deserve the good will of our fellows. We have seen the misery and poverty and degradation existing in industry, involving thousands and thousands of men and women, without a protest or a word of sympathy on the part of what is known as the public; and it has been only when, through the instrumentality of the much misunderstood labor movement, that we have stirred the hearts and the minds of the people oppressed with a sense of the wrongs committed against them, and when they have indulged in a protest which resulted in a strike, as typified, if you please, by the coal miners of America, as typified even up to the recent time, and now, in the textile industry, as it exists now among working people in the iron and steel industry. The thought of Sunday rest, insofar as that industry is concerned, was never given a second consideration by the great corporation and the vested interests, and many men whose duty it is, in speaking in the name of the Lord, who walked, like the Pharisee, on the other side.

The organized labor movement represents the toiling masses. I know as well as anyone can tell me that there are some working people who would dispute that utterance and say: "Mr. Gompers, you do not represent me." And insofar as any credential is concerned he speaks the truth; but there is a deeper and a more important credential which, in common with my fellow workers I carry, and that is the credential to give the very best there is in me, to see to it that the cause of wrong is exposed, to arouse public opinion, the public conscience and public resentment to remedy wrong and establish right.

I believe in quietness and order; I try to lead that life myself, and I will go as great a length as any man in the world to try to maintain order and peace and tranquility, but there comes a time in the history of labor when to remain in tranquility is to rivet the chains of slavery. I want, if I can, to express what I believe to be, or what I know to be the sentiment and the view of the American labor movement, without regard to any division of opinion as to which direction the movement should go. We try to avoid strikes, but we are preparing for any strike into which we may be forced; and we realize that the time has not yet come when the angel of peace has descended upon the world. We are going to try to get along as best we can in this labor movement of ours and give the best that is in us toward making it as represented and typified by the American Federation of Labor itself and its constituent bodies, the national and international unions.

On the opening day I took occasion to remark that the meetings of our conventions are open. I think it is but once in the history of the American Federation of Labor that an executive session was held. They are open to the criticism, favorable and otherwise, of our friends or foes. We are going on with our work as the light is given us to help the men and women of labor, even though they are not represented in this convention. We are going to try to influence the opinion of our time, that all the people may have a better concept of that for which we are striving, and to try to use the good influences and the services of the organized labor movement to maintain as much of peace in our own country and continent as we can, and to endeavor to extend that beneficent influence upon the minds and consciences and hearts of the people the world over.

Again, without any invidious comparison, addressing each of our fraternal delegates and the chairman of the Industrial Commission, I want to say that for all you have said, the good will you have expressed, the advice you have given us, we shall give it all the best possible consideration of which we are capable. Again, I thank you heartily for your coming here and for your expressions of good will for our welfare.

All Contributions and Correspondence Relating to the Journal, Should be Addressed to J. B. Casey, Editor, Room 8, Law Building, Kansas City, Kansas.

Entered at Postoffice, Kansas City, Kansas, as Second Class Mail Matter.

NEW YEAR'S GREETING.

As this issue of the Journal comes from the press on the first day of the year, we embrace this opportunity to wish all of our members a very Happy New Year.

We hope the New Year just coming into existence will prove to be one of the most prosperous that our members have experienced in a long time. Present indications point this way, and we hope nothing will arise to change this promising condition.

With this wave of prosperity should come a stronger campaign for the extension of our organization among the eligible men now working at our trade and still outside its ranks. The necessity of organization among our people has been demonstrated very forcibly in recent years, if we would reap our share of prosperity when it arrives. Our members should show they are alive to their own interests and loyal to the organization of which they are a member, by joining in this work of organizing wherever possible. Get those around you interested, take their application to your lodge and if you know of others who may be organized, but not being in a position to do the work yourself, let the facts be known and an organizer will be furnished, and above all let us now, on the threshold of a New Year, solemnly resolve to banish from our ranks all spirit of discord and knocking that only too often shows itself; let us view the knocker in his true light—an enemy of our organization and its members, and banish them from our ranks. If we will do this we will have laid the ground work for a growth and development, not before reached by our organization.

VOTES TO CONTINUE HARRIMAN LINES AND I. C. STRIKES.

According to the result of the vote taken by the strikers on the Harriman Lines and Illinois Central, as announced by the Railroad Department, a majority of the men voting were in favor of continuing the fight against these roads and it will no doubt be pushed to the limit. This vote was ordered taken by the Executive Officers of the Railroad Department in order to get the true sentiment of the men involved, when they were forced through existing conditions, to withdraw financial support. Their action in doing so was violently assailed by some of the radicals and the honesty of their

motives questioned. Such inflammatory and unwise outbursts, in our humble opinion, does the course of labor a serious injury and the officers in charge of these matters rank injustice. How were they going to find out what the wish of the majority of men was unless they were given an opportunity to express that wish by a vote? As we understood the matter there was to be no great publicity given to the matter, but effective means were employed to reach all; they were to argue the merits of the matter in the lodge room and record their votes as they deemed it best. In consonance with this evident policy, we made no mention of the matter while the vote was being taken, as circular letters and ballots were sent to every lodge of each and every organization affected, and no matter where the men who came out might be working, they had an opportunity to vote. Furthermore, it seems to us this opposition to letting the men in the ranks have an opportunity to vote on the question is very inconsistent, as those who opposed it are advocates of the referendum and lay claim to such democratic ideas, and this referendum is one of the most democratic of principles. This vote, while not near so large as it should have been, has served to clarify the atmosphere; the Officers of the Department know what the men desire and can act accordingly; the only harm done was through the hasty and ill advised hue and cry against the Executive Board of the Department.

This incident should serve as a warning for the future, and prompt our members to be on their guard against similar unwise and hasty outbursts.

THE EUROPEAN WAR SHOWS THE NEED FOR GOVERNMENT OWNERSHIP OF WIRES.

The present European conflict shows the absolute necessity of the telegraph and telephone for the proper conduct of an armed conflict, and it has further shown that privately owned lines in case of serious conflict with a foreign foe would be an absolute menace to the safety of our country. Modern warfare with the immense armies that several nations of the world are capable of putting into the field, would be too vast for any general to efficiently handle unless he could use the telegraph and telephone; both are being used more and more, to conduct operations and provide the necessary co-operation among the different forces involved.

Strange to relate, while the greatest republic of the world, yet we are about the only great nation that does not own and control its telegraph and telephone lines, and there is a growing sentiment among the people of the United States, that we, too, should own and control all means for the transmission of news and business. Congressman Lewis of Maryland has already introduced a bill for this purpose.

THE COLORADO MINE WORKERS' STRIKE DECLARED OFF.

At a recent meeting of representatives of the miners on strike in Colorado, it was decided to call off the strike in that state, which has been on for so long and which involved most of the coal miners in Colorado. This action was recommended by the International Executive Board of the United Mine Workers of America.

The recent convention of the American Federation of Labor passed resolutions calling upon the President of the United States to have a Federal receiver appointed to take over these mines and run them in the name of the people. A committee from the miners, later on, called upon President Wilson and presented this request. The President informed the committee he had been advised that he could not legally do this, even though the operators persist in their refusal to accept the plan of settlement recommended by him. This prompt and self-sacrificing action of the mine workers in declaring the strike off will place them and their cause higher in the estimation of the public, and the operators will have to bear the odium of public disapproval for their tyrannical and unyielding attitude in refusing to treat with organized labor and the full responsibility for any disorders that may occur in the future. The Federal Industrial Commission recently held public hearings and investigated conditions in these strike regions, and it was fully shown that while the operators were refusing to treat with the men, they spent hundreds of thousands of dollars in sustaining thugs and strike breakers, and a great many other thousands in hiring writers to distort and pervert the true conditions as they existed, in a vain effort to influence public opinions in their behalf. It was proven that one writer was paid \$12,000 for writing an article which was widely circulated by the operators. This writer admitted to the commission that many of the statements made in this article were false, and that many others that he made he did not know whether they were true or not.

As the true facts become more widely known, public opinion will eventually force these operators to treat with their men, or out of business. The principle of collective bargaining is recognized the world over and these coal barons will find they cannot reject this just principle with impunity. President Wilson has named a commission, consisting of Seth Law of New York, C. W. Mills of Philadelphia and Patrick Gilday of Clearfield, Pa. This commission is named in accordance with the plans of settlement as proposed by President Wilson and accepted by the mine workers, but rejected by the operators. This commission will take up any further complaints that may arise. Whether it will be able to accomplish much good remains to be seen, but if the operators persist in their refusal to treat with their employes as an organized body, the commission will not be able to do much good; however, it is quite likely the lash of public opinion will force them to change their attitude.

STILL TRYING TO BOOST OUR MILITARY ESTABLISHMENT.

We pointed out in our November issue that the European War was being used as an excuse to arouse public sentiment in favor of a large increase in our army and navy. Since that time this jingo sentiment has crystalized into an organized effort for this purpose. The daily press a few days ago informed us that "two hundred and fifty representative citizens of New York" had formed "The National Security League," and an effort will be made to organize branches throughout the country, as a first step towards inaugurating a nation-wide campaign to boost the army and navy.

One of the worst features of this military expansion campaign is that indications point to the probability of one of our great political parties taking up this as a campaign issue for the real purpose of boosting itself into power again. If it does, this, of course, means several years of agitation upon this subject and should they at last become successful upon such a platform it would give a tremendous boost for a large standing army and a big navy. Congressman Gardner started a hue and a cry about our unpreparedness to defend ourselves against an enemy; however, upon investigation it was disclosed that his fears were not well founded; our coast defenses were found in good shape with a reasonable amount of ammunition and supplies on hand. Our army, while it will not, of course, compare favorably with the great standing armies of some of the European nations, it is sufficient to form a nucleus around which to center the state militia and the volunteers which has been our main reliance since the foundation of the republic. Furthermore, it is disclosed that our navy is the second largest and most powerful navy of the world; furthermore, the digging of the Panama Canal has doubled its efficiency in the matters of defending our shores; if either coast should be menaced, the fleet could be quickly transferred from one ocean to the other. While there may be some nervous people who have honestly entertained the fear that we were not prepared to defend ourselves should a foe arise, still we are convinced that much of this agitation is not being waged so much for our country's safety, as to gain a political advantage for the agitators. Another group we may safely bet will boost this matter is the army of contractors that furnish material and supplies to the army and navy.

Leaving aside all this jingoism and nervous hysteria, we believe we should pursue a policy of preparedness to meet any emergency that might arise. We can, however, effectively do this without creating a large standing army. Let the government increase its manufacture of arms, ammunition, equipment and standard supplies; then change the term of enlistment for the soldiers and sailors from four years, as it is now, to one or two years. At the termination of each enlistment a large portion of the trained soldiers and sailors will not re-enlist, but return to civil life, so others will have to be enlisted; thus a constant stream of men will pass through the army and navy, trained in the service, and while they will return to civil life, their retirement could be made conditional upon their agreeing to respond to a call to the colors in case of need, which might arise within five years after the termination of their enlistment. The reserved arms, equipment and supplies could be used to fit out these reserves and in this way a trained and efficient army could be gathered together in a very short while. However, our greatest source of security for the future must be as it has been in the past, based upon our peaceful and equitable policies in dealing with the other nations of the world. So long as we maintain this attitude towards our neighbors of the world and maintain our present military establishment in an efficient manner, we will have no reason to fear for our country's safety.

NAVY YARDS MAKE GOOD SHOWING.

The belief that work done in our navy yards cost an excessive amount has been long entertained by some of our people, and that it was economical to let work out to contractors and let the latter make enormous profits rather than have the work done in the navy yards. However, the true facts in the case are gradually becoming known and it is found that work done in navy yards is done as efficiently, expeditiously and economically as in private yards. Several ships have been built in the navy yards in recent years, and in each case they were built for less than they would have cost in private yards, and the work was done in a more thorough manner, as contractors will usually skimp if possible.

In the annual report of the chief of the Bureau of Engineering recently made public, it was shown that the engines for the dreadnaught New York was quickly constructed at the New York Navy Yards and for less than they could have been built in private yards, and even a better showing was made in the Mare Island Navy Yard, where the machinery for the gunboats Monocacy and Palos were constructed at a cost one-third less than if built in private yards. Other cases of like nature could be quoted, but this, we believe, is sufficient to show their efficiency.

While this good showing stands to the credit of the men, still it seems conditions are not harmonious or satisfactory, and wide-spread complaints and protests have come to our notice recently, and it seems to us it is due to the rasping, irritating and senseless policies of some of the little petty-fogging naval officers who are trying to wield the "big stick" of military discipline upon a body of mechanics, who even though they are government employes, are American citizens and feel that they should not be subject to the strict discipline practiced upon enlisted men. If some of those officers clothed with a little brief authority knew their parts better, they would try to win, by kindness, the confidence of the men, and thus encourage them to make still better efforts. If a sane and efficient management is used in directing the management of the navy yards and their thousands of employes, still greater achievement will be secured and greater savings will result.

THE A. F. OF L. TO OWN A HEADQUARTERS BUILDING.

After a number of years of preliminary agitation and talking up sentiment in favor of the American Federation of Labor owning a building in Washington for its headquarters, it now begins to look as if the matter was soon to come to a successful issue, as the last convention, which recently met in Philadelphia, authorized the executive council of the federation to either buy a piece of ground and erect a building or to purchase a building already erected, which would prove suitable for that purpose.

Now that the council has secured the necessary authority it will no doubt promptly act in the matter, and we may soon be able to herald the fact that a permanent home has been secured for the federation.

It will no doubt prove of financial benefit to the federation and a source of strength and permanency that nothing else will. Such a move would

be of an advantage to our own organization; if a commodious building in the residential section, but near to the business section, was purchased, it could be paid for in a few years by the rent we are now paying for our present headquarters and then our organization would have a permanent home, free from rent. The only cost would be for the taxes, insurance and upkeep; furthermore, as the years went by and the city grew in size, the value of the place would greatly increase in value. A number of international unions have secured buildings along this line.

A FEDERAL JUDGE ORDERS AGREEMENT RESTORED.

The receivers for the Wheeling and Lake Erie Railroad, under date of October 1, 1913, entered into a federal agreement with shop trades, which was to be in force for one year and until thirty days' notice was given by either side that a change was desired. On October 28, 1914, a notice was posted by the company declaring the agreement would be null and void after December 1, and in the meantime the shops of the company were closed down. Under date of November 24, the general manager authorized the superintendent of motive power to arrange to open the shops on December 1, under a set of rules drawn up by the latter. Under these rules many of the best features of the agreement were left out. A copy of these were given to the men for approval, but the men refused them and sought to have their old agreement renewed. The superintendent of motive power, however, refused to do so and an appeal was taken to the general manager, and international vice-presidents of the organizations affected went to work on the job. However, their efforts before the general manager did not prove successful, so they went to the receivers, and met with the same result, so as a last effort to bring about a peaceable adjustment they sought the aid of Judge Clark, United States district judge in charge of the receivers. Here we are glad to say they met with success and the following notice has been posted by officials of the company, which is self-explanatory:

"Notice to employes locomotive department, December 5, 1914:

"Notice posted October 20, 1914, is hereby rescinded. The general shop rules and regulations governing the employment and service of machinists, boiler makers, blacksmiths, pipemen and tanners, their respective helpers and apprentices in the locomotive department of the Wheeling and Lake Erie Railroad Company, which became effective October 1, 1913, will continue in effect until thirty days' notice is given by one party to the other desiring a change. All other employes in the locomotive department will continue in service under the same rules as were effective on October 1, 1914."

The vice-presidents and other officers of the union, as well as the men involved, deserve credit for their active, intelligent and persistent efforts in this matter, and the result shows the wisdom of exhausting every possible means to avoid trouble and reaching an amicable settlement. In this case a satisfactory settlement was secured without a contest.

International Vice-President Maher looked after the interests of the boiler makers. We desire to compliment Judge Clark on his good examples,

which we hope will be followed by other judges having charge of receivers in like cases. This wise and liberal action has done much more good to this road and the territory through which it runs than could any possible arbitrary action.

COMMISSION ON INDUSTRIAL RELATIONS SUBMITS PRELIMINARY REPORT.

The Commission on Industrial Relations has submitted its first report to Congress; the report is a preliminary one and contains an analysis of the evidence and opinions of the various groups of witnesses that appeared before it, in reference to the cause of unrest and dissatisfaction seemingly existing among the industrial portions of our people.

The commission makes no specific recommendations, but is evidently laying the ground work for a number of far-reaching ones to be submitted later. In the summary of evidence the report speaks as if the commission had been very much impressed with the importance and benefit of conciliation in labor disputes and lauds this plan as being superior to that of all other plans so far advanced towards settling industrial disputes, and it is quite likely that increased facilities for the use of this means of preventing and settling them will be provided as a result of the commission's investigations and recommendations.

The report shows that a vast amount of investigation and testimony has already been made and plans perfected for securing much more; the report throws out many valuable suggestions and is well worth reading by any one interested in the industrial problems that confront us.

RAILROADS GET INCREASE IN FREIGHT RATES.

The Interstate Commerce Commission recently granted 5 per cent increase in freight rates for the Eastern, Southeastern, Southwestern and Middle West territory on or east of the Missouri River. This increase, however, does not affect shipments of coal or iron. The reason given by the commission is that bituminous coal and coke rates were raised twice recently and anthracite coal and iron shipments are to be considered in other proceedings before the commission.

It is estimated that this will increase the revenue of the roads affected about \$50,000,000 per annum.

The commission, a short while prior to this freight rate increase, issued a ruling to the effect that roads could charge more than two cents for interstate passenger fares even though the states through which the road runs, have a two-cent rate; this ruling practically nullifies the two-cent rate on at least one-half of the passenger traffic. As a consequence a readjustment of rates is being put into effect. These two decisions should greatly increase the revenues of the roads and stop their complaint. It is to be hoped the result will be an increased activity in the repairs of motive power and equipment.

QUOTATIONS.

Speak gently! 'tis a little thing
 Dropped in the heart's deep well;
 The good, the joy that it may bring
 Eternity shall tell.

—G. W. Langford.

No unkindness of a brother can wholly rescind that relation or disoblige us from the duties annexed thereto.—Barrow.

Be not diverted from your duty by any idle reflections the silly world can make upon you, for their censurs are not in your power, and consequently should not be any part of your concern.—Epictetus.

Frugality may be termed the daughter of prudence, the sister of temperance and the parent of liberty. He that is extravagant will quickly become poor, and poverty will enforce dependence and invite corruption.—Dr. S. Johnson.

The greatest flood has the soonest ebb; the sorest temper the most sudden calm; the hottest love the coldest end, and from the deepest desire oftentimes ensues the deadliest hate. A wise man had rather be envied for providence than pitied for prodigality.

Revenge only barketh at the stars, and spite spurns at that she cannot reach. An envious man waxeth learn with the fatness of his neighbors. Envy is the daughter of pride, the author of murder and revenge, the beginner of secret sedition, and the perpetual tormenter of virtue. Envy is the filthy slime of the soul; a vermon, a passion or quicksilver which consumeth the flesh and drieth up the marrow of the bones.—Socrates.

The brave only know how to forgive; it is the most refined and generous pitch of virtue human nature can arrive at. Cowards have done good and kind actions. Cowards have even fought, nay sometimes conquered; but a coward never forgave—it is not his nature; the power of doing it flows only from a strength and greatness of soul conscious of its own force and security, and above all the little temptations of resenting every fruitless attempt to interrupt its happiness.—Stern.

Let us cultivate a true spirit of union and harmony. In pursuing the great objects our condition points out to us, let us act under a settled conviction and an abiding feeling that these twenty-four states are one country.

Let our conception be enlarged to the circle of our duties. Let us ex-

tend our ideas over the whole of the vast field in which we are called to act. Our object be, **Our Country, our whole Country and nothing but our Country**, and by the blessing of God, may that country itself become a vast and splendid monument, not of oppression and terror, but of wisdom, of peace and of liberty, upon which the world may gaze with admiration forever.—Daniel Webster.

Consider what you have in the smallest chosen library. A company of the wisest and wittiest men that could be picked out of all civil countries, in a thousand years, have set in best order the results of their learning and wisdom.

The men themselves were hid and inaccessible, solitary, impatient of interruption, fenced by etiquette; but the thought which they did not uncover to their bosom friend is here written out in transparent words to us, the strangers of another age.—Emerson on Books.

The meanest thing the knocker says
 About the other fellow
 Exposes to us just one thing—
 The knocker's streak o' yellow.
 —Detroit Free Press.

Mechanical Department.

TO DEVELOP THE PATTERNS FOR A TWO WAY REDUCTION ELBOW.

By L. L. Lane, Miles City, Mont.

The first step is to construct the proper elevations of two elbows as in Fig 1, and by projecting downwards draw the plan. Now on the center line 1' 2' of the plan draw a half circle with a diameter equal to that of the small pipe or elbow as shown; divide it into a number of equal parts, in this case eight, and project them to the plan Fig. 2, as 1-2-3 and so on to 7, and then divide the

tion, and then the hypotenuse of this triangle is the true length of the line 2' 1; in this way all the true lengths are found by constructing triangle in this way as shown at Fig. 3. Now to lay out the pattern for Section A, at Fig. 4, first draw the line 1 2', then with 1 as a center and a radius equal to the arc 1-2 of the plan, describe an arc at 2 and with 2' as a center and a radius equal to the true length of 2'-2 (taken from one of the triangles) already constructed at Fig. 3. Describes an arc at 2, then with 2' as a center and a radius

large circle from 2' to 7, into six equal parts as 2' 3' 4', etc.; now project these to the elevation and then draw lines forming triangles as shown by dashed line in the elevation from 2' to 2, 3 to 3, etc., and this is done the same way in the plan as shown. Now to construct the triangles at Fig. 3, to find the true length of the lines for the pattern, take one of the lines in the plan, say we will start with 2' 1, making this distance equal to the base of the triangle and its height equal to the perpendicular height of the corresponding in the eleva-

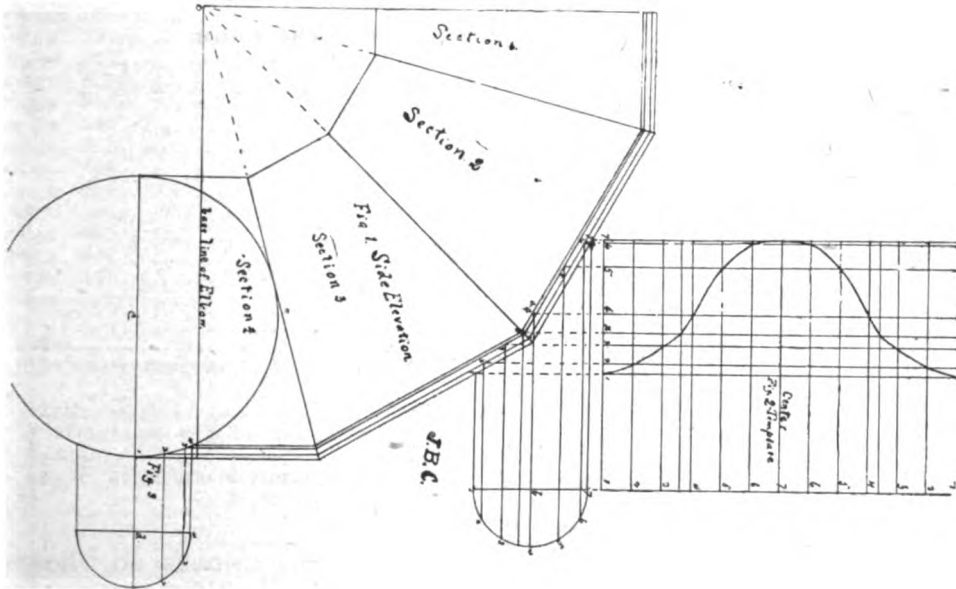

tion, and then the hypotenuse of this triangle is the true length of the line 2' 1; in this way all the true lengths are found by constructing triangle in this way as shown at Fig. 3. Now to lay out the pattern for Section A, at Fig. 4, first draw the line 1 2', then with 1 as a center and a radius equal to the arc 1-2 of the plan, describe an arc at 2 and with 2' as a center and a radius equal to the true length of 2'-2 (taken from one of the triangles) already constructed at Fig. 3. Describes an arc at 2, then with 2' as a center and a radius

TO CONNECT A SMALLER PIPE TO A LARGE ELBOW, PARALLEL WITH ITS BASE.

Fig. 1 shows the side elevation of elbow and pipe. To layout template for pipe connection, mark off elbow the desired size and with the number of sections, in this case four.

tend them up through the four sections as shown, next strike the semi-circle at the end of pipe at top, using B as center and the same radius as in Fig. 3.

Divide the half circle into six equal parts from 1 to 7 and from these points of division strike lines parallel with the center line A B. Extend these lines as follows: Com-

Then locate the pipe connection, by first striking A-B, parallel with the base line of elbow, then take one-half of the mean diameter and mark off on each side of this line and strike lines through these points until they strike elbow. Next strike a parallel line sufficiently far enough below the base line to allow a semi-circle of the elbow to be struck on bottom (4) section as shown. Next extend this parallel line out far enough to reproduce Figure 3; take one-half of mean diameter of pipe as before, and mark on each side of this line and through these points strike lines until they connect with circle. Take dividers and with one point at D and the other at 4, strike the semi-circle at the end of small pipe as shown. Divide one-half of this from 1 to 4 into three equal parts and from the points 2 and 3 strike lines parallel with the center line and connect with circle of elbow. From where these lines strike circle of elbow, strike lines up and parallel with side lines of elbow, ex-

mencing with line 2, extend it to the second line of elbow, then extend the third line until it strikes line 3 in the elbow, line 4, which is the center line, should be extended to line 4 of elbow. Then line 5 will be extended until it reaches the third line of the elbow and line 6 will stop at line 2 of the elbow. From where these lines cut the lines in elbow, strike right-angle lines as shown, numbering them from 1 to 7, also strike line parallel with these lines at the end of pipe. Next ascertain the circumference of pipe, using the mean diameter from which to circulate and mark it off on this line; divide this into 12 equal parts, which is twice the number of parts in the semi-circle; from these points strike right-angle lines and number them from 1 to 7 and from 7 to 1.

Next take a pencil and trace a line through points where these two sets of lines cross as shown; this will represent the cutting line for templates for pipe connection.

International Officers' Reports.

Kansas City, Kas.

The following tabulated list of lodges and votes is the result of the ballot recently distributed among all lodges of our Brotherhood, in reference to the strikes on the Illinois Central, Harriman Lines and the Pere Marquette Railways. The tabulation shows the lodge members belonged to when called upon strike, total number of votes to continue strike, total number to discontinue strike, number of votes and number of lodge sending same in, and total votes cast. The total vote is credited to the lodge of which members belonged when strike was called, the vote is shown in the last column to the right and the number of the lodge in the first column to the left.

NUMBER OF VOTES AND LODGES VOTES CAME FROM.

F. P. REINEMEYER, I. S.-T.

COMMUNICATION FROM THE INTERNATIONAL SECRETARY-TREASURER.

Kansas City, Kas., Dec. 17, 1914.

To the Officers and Members of Subordinate Lodges, Greeting:

I wish to submit to you the late receipts received from lodges since November 20, in reference to the raffle for the benefit of Brother Wagner's family.

Late raffle receipts:

Lodge 3.....	\$ 10.00
Lodge 7.....	1.75
Lodge 57.....	1.25
Lodge 105.....	6.00
Lodge 154.....	10.00
Lodge 227.....	.75
Lodge 229.....	4.75
Lodge 244.....	1.50
Lodge 249.....	14.00
Lodge 311.....	5.00
Lodge 364.....	1.00
Lodge 419.....	2.50
Lodge 495.....	1.50
Lodge 496.....	4.50
Lodge 546.....	5.25
Lodge 547.....	.25
Lodge 590.....	6.25

Total \$ 76.25
 Previously reported. 972.75

Total \$1,049.00

Trusting this will be satisfactory, I beg to remain,

Yours fraternally,
 F. P. REINEMEYER,
 I. S.-T.

REPORT OF SECOND VICE-PRESIDENT NOLAN.

At the conclusion of my last report was at Washington, D. C., there for the purpose of preventing the passage of an amendment to the boiler inspection law, if possible to do so, also matters in the interest of Lodge 450 at the national capital.

I desire to inform the officers and members of the Brotherhood, although successful in preventing the passage of the amendment to the boiler inspection law this session, it was a pretty difficult job, as every possible effort was put forward by the representatives of the locomotive engineers, locomotive firemen and their friends to put the amendment through the various committees of the House of Representatives.

In looking squarely at this proposed legislation from a humane, as well as from a business standpoint, it seems that the very purpose of the boiler inspection law, as intended by Congress has been entirely lost sight of, by those whom the legislation was enacted to protect, in a scramble for positions in the Bureau of Boiler Inspection, as well as under its jurisdiction as district inspectors.

I have stated on many occasions in the columns of the Journal and do so again, that the boiler inspection law has not been enforced, and say without fear of practical

contradiction either from a legal or mechanical standpoint that no inspector can qualify according to the law as enacted, either bureau or district inspectors, unless they have practical knowledge of the construction and repairing of boilers, yet we find many have been appointed to such positions through a civil service examination who absolutely know nothing of the practical construction and repairing of boilers, such is the case, and cannot be denied, as all railroad shop mechanics know it.

Congress adjourned October 26th, but the amendment is still in the Rules Committee of the House of Representatives, although I had been told on several occasions in the presence of Bro. J. D. Evans of Lodge 450, that the amendment would pass regardless of our opposition, but it didn't, and can further assure the promoters it's doomed to defeat as it will never pass the Congress of the United States in its present form.

But nevertheless I have no doubt, another effort will be made to pass the amendment when Congress convenes in December and as usual the Brotherhood of Boiler Makers, Iron Shipbuilders and Helpers of America will be on the job, in the interest of law, and the enforcement of it. Nothing more or nothing less. Therefore let every member of the Brotherhood do his part when called on later on by the International President by individual appeals to your senators and congressman of your district, giving them your reasons why you are opposed to any amendment to the boiler inspection law passed by Congress, February 17, 1911. In this way your representative at Washington, D. C., will be in a position to bring about a more crushing defeat of the proposed legislation.

October 4th, by instructions of President Franklin, left Washington, D. C., for Norfolk, Va., to meet the management of the Norfolk Southern Railway for the purpose of adjusting a Federated grievance on the question of overtime at the New Bern, N. C., shops. On reaching Norfolk, met Brother King, who was then representing the machinists on the above system.

October 5th, in company with Bro. King and a committee from the Berkeley shops (Brothers Cousins and Joliff), met the officials of the company, and after several hours' conference trying to bring about a settlement, and without any success whatever, as the general superintendent, Mr. Sack, insisted that one or more members of the Federation must be disciplined in order to adjust matters. A suggestion was made, and accepted by the general superintendent that Brother King leave for Washington, D. C. and lay the situation before President Johnson of the Machinists and if necessary, have him come to Norfolk, as a member of his organization, was the victim for discipline.

President Johnson arrived at Norfolk Oc-

tober 7 when he again met the officials of the Norfolk Southern Railroad Company, and after many hours' conference the grievance at the New Bern shops was adjusted, all men returning to work the following day, October 8, with the possible exception of one member of the Federation, who will return to work later on. At least that was the understanding before conference adjourned.

October 8, visited Newport News, Va., to look after the strike situation there, and discuss conditions with the strike executive board, Brothers LeCompte, McArthur and McCaully, who made a report on the strike conditions, as well as the amount of work and number of scabbies in the boiler shop. The members of Lodge 55 came out on strike to win, were forced to, because their members were discharged for refusing to work piece work, also came out with an idea that the Metal Trades Council would support them through joint action. After voting to do so in case piece work was enforced, in the boiler shop, but nothing doing. Strike would not have occurred only for the action taken by the Metal Trades Council. As I fully realized it would be useless unless we had joint action of that body, the boiler makers came out with that understanding, but the Council's members still continued to work, the result was the boiler makers had to fight it alone, and did like trade unionists, with the possible exception of a few scabby rats, some of them even drawing strike benefits who returned to the pen to be branded as traitors by the members of Lodge 55, and the International Brotherhood. It is no wonder what has occurred since the boiler makers strike at Newport News, and the way they had been double crossed. Good union men have been discharged for the purpose of disrupting the local unions. Many had to leave town to find employment elsewhere, which has so seriously affected the movement, that it will require some hard work, time and money in order to restore some degree of confidence again among the metal trades organizations of Newport News.

In connection with the Metal Trades Council of Newport News and in justice to the following local unions who were affiliated, was ready at all times to support the boiler makers and through their officers urged joint action at several meetings of local council, local of carpenters and joiners, pipe men and electricians.

The foregoing statement is cold facts. The entire labor movement of Newport News knows it. All fair minded citizens know it also, and has told me so on many occasions, that the boiler makers had a grievance all right, and the officials of Newport News Dry Dock Company will respect them for the clear cut fight put up by them when Gibson and his scabbies will be gone and forgotten, for justice, though crushed to earth, will arise again.

October 9, returned to Washington, D. C., in connection with legislative matters; also to take up a grievance for Lodge 450, with the secretary of the navy. Met Secretary Daniels in company with Brother Evans, who assured us that grievance would receive his most careful consideration. One very important matter at issue in boiler shops was adjusted later on.

October 28, attended a regular meeting of Lodge 55 with President Healy in the chair. There was a good attendance, strikers still on the job. Brother Healy is a faithful advocate and a staunch friend of the Brotherhood for years in this neck of the woods as well as the general labor movement of Old Virginia, always ready to defend its principles, and help a deserving brother in need, but no union can pay the second visit to Brother Healy who brings trouble to himself through the cup that cheers, for almost every meeting, under the good and welfare of the order, he never fails to give that quiet lecture on sobriety among men who toll in mine, factory, contract or railroad shops. He is a temperance man at all times, but is opposed to prohibition as interfering with the privileges of the individual man.

Brother Healy is known at Newport News as a good citizen who can be depended on at all times to respond to duty's call, either in politics for the man with the union card who is qualified for the position, or in the interest of his fellow workers. He is not a radical by any means. On the contrary always consider carefully both sides of a controversy between employer and employes, and when a brother is right he is with him to the last ditch. When he is wrong he don't hesitate to tell him, even to an intimate friend. What he says he means. His word is as good as his bond. Such is the characteristics of the president of Lodge No. 55.

October 28, received orders from Brother Hinzman to leave for New Orleans and assist Lodge 37 in adjusting a grievance there. Before leaving for New Orleans and in compliance with previous orders from headquarters had a meeting with the general manager of the Roper Lumber Company, Norfolk, Va., relative to reduction in wages of all their employes last September and during conference on the wage question, his principal reason for a reduction in wages was the war in Europe, and would be compelled to close down indefinitely unless business picked up or war was ended soon, as the company depended mostly on import business, and would be pleased if their employes could get better jobs somewhere else, and was frank to admit that the men were entitled to more compensation for their labor owing to living conditions and what it cost.

I requested he meet a committee to discuss the question of late reduction, but refused, stating it would be useless to meet any committee on the wage question at

present, but had no objections whatever to a committee meeting the local management at New Bern, N. C., and knowing that nothing could be accomplished in meeting local officials of the company I notified one of our members employed by the company at New Bern, result of Norfolk conference, leaving for New Orleans on the night of October 29.

Arrived in New Orleans November 2, met the business agent (Brother Curry), Brother Daley, president of No. 37; Brother Costella, corresponding secretary, and Brothers Barker, Smith, Mason and others whose names I have forgotten.

A special meeting of Lodge No. 37 was called for November 4, to take up the pending grievance, as several of the members of No. 37 had quit their jobs at Rost Station, La., and had an idea they were out on strike. Meeting was called to order by President Daley, after which a lively discussion opened up, many members explaining how trouble started on the job at Rost Station, and cause of it; a motion was made and carried that a committee be appointed to wait on the Murphy Company and report to Lodge No. 37. Committee, Brother Curry, business agent of No. 37, Brother Mitcheal and the writer.

Met Mr. Murphy on November 5 in his office, and at once opened up the cause of trouble at Rost Station, the committee going over the entire situation with him, and ended with the following statement from the proprietor of the Murphy Iron Works, assured the committee he had several more tanks to erect and would put our men on them, but job where men struck on several occasions refused to reinstate all in a body, but had no objection if they could find boarding accommodations on the job.

From statements made by several brothers at special meeting November 4, both were responsible for trouble at Rost Station, La., the men on the job and the foreman, also.

First. The men agreed to work on job under certain conditions and scale of wages, which seemed to be satisfactory, \$4.25 for caulkers, \$4 for riveters and \$3.50 for helpers. That's where a fatal mistake was made, as the New Orleans scale was 25 cents higher; further, all men hired by the company at New Orleans got transportation to job and board while at work; yet many of the men knew the conditions and hired on job; afterward called a strike because some brothers who complied with instructions of Lodge No. 37 got theirs.

Second. Too much booze furnished through orders given by the foreman on job; this charge can be proven according to information given by many of the men who worked on job, if an investigation is made, also discrimination of the rankest kind against some of our men on job, and so notified the management November 10 which changed conditions somewhat.

Another special meeting of No. 37 was called November 7 to hear the report of committee appointed for November 4 to wait on the Murphy company, which made the following recommendation that pending grievance at Rost Station, La., be called off and an effort made to secure an agreement for Lodge No. 37 with the various boiler firms in the city of New Orleans. Before voting on the committee recommendation, I urged every member present to vote for the best interest of the International Brotherhood and Lodge No. 37, allow no brother to influence another in casting his vote. After an all-around discussion on the proposition by many members on the floor, a vote was taken, which was unanimous in favor of the committee's recommendation.

November 8, with same committee, had a meeting with the management of the Johnson Iron Works, going over the industrial situation in connection with the boiler makers and helpers of New Orleans and vicinity, explaining the many reasons why an agreement was necessary in order to prevent hasty action of labor disputes in the future. Many other matters were discussed during meeting, which are unnecessary to report at the present time, but may in the future if matters are not changed on a business basis in the interest of the boiler makers and helpers as a whole at New Orleans. Before leaving the office of the Johnson Iron Works, recommended that a joint conference be held between a committee from Lodge No. 37 and the boiler shop proprietors, in order to get down to business on shop conditions and wages. There was considerable opposition to a move of that kind, but finally agreed to do so, providing the other firms would do likewise; we next called on the management of the Murphy Iron Works, Dussal Iron Works, and the Stern Foundry, Boiler & Machine Works, all of whom agreed to meet a committee when conference was arranged.

November 13, in company with Brothers Shea and McCabe of Lodge No. 442, attended a regular meeting and smoker of Lodge No. 206, the majority of whose members are employed at the Texas Pacific shops, Algiers, La. Promptly at 8 o'clock, Brother Koenig, president of Lodge No. 206, called the meeting to order; during meeting many propositions came up in the interest of the Brotherhood, which were handled in a business-like manner and according to the constitution; several applications for membership were acted on; also, two new members were initiated. Under the good and welfare of the union, the visiting brothers were called on for short addresses on the International Brotherhood and New Orleans Lodges Nos. 206, 442 and 37.

Brother Shea was the first speaker; his remarks were given the closest attention by every brother present, as he touched upon many vital questions that affected the boiler makers and helpers at this time, owing to

depressed business conditions which have reduced shop forces to a considerable extent. He urged closer co-operation in the future, so as to place the trade of boiler making and iron ship building in a position from a mechanical viewpoint where the trade should have been years ago, and hoped that the membership would realize one important fact that legislation in this age of modern progress was an absolute necessity to protect our interests and elevate our craft, and closed his remarks in urging all present to never allow personal feeling to interfere when questions of importance were at stake, and all questions were important, when working conditions and wages were the issues.

Brother McCabe of No. 442 was the next speaker, and stated that when he received the invitation of No. 206 to attend their regular meeting and smoker he fully intended to make an address, at least one of appreciation, as it always was a pleasure to him as well as every member of Lodge No. 442 to attend a meeting of Lodge No. 206, had prepared a speech for the occasion, but after Brother Shea's address, he concluded to reserve his right for a future meeting, which was satisfactory to the chair. Brother Smith of Lodge No. 37 was next called on; responded all right in a humorist recital of conditions in the past, and what is necessary to be done in the future, and in closing his remarks told the members present that they all knew him, was right on the job and was there to say.

The next speaker was Brother Henry, who gave a pretty good account of himself, as well as the conditions in the port of New Orleans, and didn't hesitate to state plain facts, either; he has the correct line on the situation in the Crescent City, and is somewhat of a diplomat all right, as his explanations of complex conditions among the boiler makers and helpers on that occasion and how to change them, is the correct move to get better results in the future.

Next on the program was Brother Barry, Recording Secretary of Lodge 206, an old time member of the Brotherhood, was with the movement way back years ago, when Billie Gilthorp was a chairman of the boiler makers' committee and secured the 9-hour day in the port of New Orleans. Brother Barry explained many amusing incidents which occurred in the good old days long ago, when boiler makers stood up, like trade unionists in an honest effort to better their conditions, which made many of the younger members sit up and take notice.

There are many old members faithful and loyal to the Brotherhood in New Orleans, and among others is the old reliable Brother Coughlin. May his shadow never grow less, a good conservative member always on the job, either at the laying bench or lodge meeting. May he live to enjoy many years of health and prosperity, is the most sincere wish of the writer.

Brother Reynolds is the active Financial

Secretary of Lodge 206, always at his desk when meeting is called to order, to attend to the stamp end of his lodge in order to keep every member square with the International.

Brother Kenny and his committee on refreshments were on the job sure, as everything good for the inner man, which New Orleans is noted for, was served in a way that was appreciated by all present, with a sparkling beverage to cheer the boys, and union made cigars to while the time away, while songs were sung and yarns told of the boiler makers and helpers of New Orleans in the years gone past, when friction was unknown, after which that, faithful president of Lodge 206 (Brother Koenig), closed the meeting in due form, all departing for their homes pleased with the business transacted, as well as an evening of genuine pleasure to all present.

November 14, left New Orleans for Mobile, Ala., to straighten out a financial matter between Lodge 112 and the International Secretary-Treasurer's office; found industrial conditions there in pretty bad shape in both railroad and contract shops, but all are looking forward for improved conditions in the near future.

Owing to the conditions at Mobile it seemed impossible to get a meeting of Lodge 112, but had a meeting with the President and Secretary, who assured me that reports would be mailed regular in the future in order to comply with the Constitution, after which I returned to New Orleans to meet the managers of the Johnson Iron Works, Murphy Iron Works, Dussel Iron Works and the Stern Foundry, Boiler and Machine Works, as previously agreed to, and expect to attend a meeting of Lodge 112, Mobile, on my way home.

November 25, attended a regular meeting of Lodge 37, at which many questions came up for considerable action, and among others were two proposed agreements with the above firms in this city, one for the Boiler Makers and Helpers in New Orleans and vicinity, the other for all members of 37 employed in the construction of tanks; which was approved of after considerable discussion, after which a motion was carried that a committee be appointed to investigate conditions at Rost Station, La., as the Murphy, Threadwell and Ritter and Conley firms have several tanks under construction there, and report back to Lodge 37 at a special called meeting, if committee deemed necessary. The following members of 37 composed committee: Brother Curry, business agent; also Brothers Barker, Vallega and Oltman.

November 26, in company with the above committee, held a meeting with the representatives of the following named firms: Murphy Iron Works, Johnson Iron Works and Dussel Iron Works. Owing to pressing business matters the representative of the Stern Foundry, Boiler and Machine Works could not attend, but had a conference with him in his office, November 27th. The

above conference was a very important one for the Boiler Makers and Helpers of New Orleans, as the above firms agreed to recognize the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America, through an agreement, and it was agreed before we adjourned to present one to each of the above firms for their approval and signature, with the exception of the Johnson and Murphy Iron Works, who gave their reasons for objecting to sign any agreement, which seemed to be satisfactory to the members of Lodge 37, at least at present. It was understood that the other firms favorable to joint conference would sign an agreement with Lodge 37 without any hesitation whatever; in fact they told me so, but later on refused for some reason or other, best known to themselves. The members of Lodge 37 know it, and the reason will be settled at once for all in New Orleans in the very near future, as the Boiler Makers and Helpers of New Orleans realize that they are up against it, and see absolute necessity of getting closer together as they can't afford to be double-crossed any longer and allow the condition of affairs to exist, that don't exist in any other city or town in America.

New Orleans is a growing commercial city as well as a manufacturing center, with all the natural advantages for even greater prosperity in the very near future. As such, therefore, we should be active in our interests by building up, and perfecting a united lodge of the International Brotherhood on a business basis not for the protection of a chosen few, who bask in the sunshine of those who oppose any more of co-operation, knowing that the Boiler Makers and Helpers' interests are safe, when unity exists, and unity must exist if we intend to get results in keeping pace with the industrial development of the Crescent City. The past must not be considered. On the contrary we must look to the future very carefully as the welfare of the members and their families, both financially and otherwise, depend on the business methods of conducting the affairs of the Brotherhood, always electing lodge officers on their past records for good business, not on their popularity with the members, but on the contrary on their ability to hold such positions with credit to the lodge they represent as well as the International Brotherhood, hewing at all times to the constitution and enforcement of it, for such is the key to success, either from a local or national standpoint, as discipline inspires confidence, and where confidence exists the future power of the Brotherhood to do things and get there is assured.

As the tangle in New Orleans and vicinity is not settled by any means, at the conclusion of this report, will close in thanking the officers and members of the three lodges in New Orleans, 442, 206 and 37, for their active co-operation and kindness rendered while trying to adjust a com-

plicated grievance of long standing there. It will be settled later on, with at least some protection to the members, as a whole, and credit to the International Brotherhood. I remain,

Yours fraternally,
THOS. NOLAN.

REPORT OF FOURTH VICE-PRESIDENT WEYAND.

Cleveland, Ohio.

The following is my report for October and November:

On my arrival in Cleveland on October 1, 1914, I started an organizing campaign in the interest of Lodge No. 5. Owing to the long continuous strike on the New York Central lines, a large number of our members have gone elsewhere to look for employment and a number of our members became delinquent. Hence the organizing campaign, and with the co-operation of Brother G. H. Brady, B. A., of Lodge No. 5, I visited all boiler shops in the city to meet and talk to the delinquent boiler makers and helpers, relative to their reinstatement. Realizing that I would have to leave Cleveland in a short time to attend our annual meeting of the Council, I arranged to defer the open meetings until I returned from Kansas City. On October 9, 1914, I left Cleveland for Kansas City, where I was detained as a member of the Council in handling such grievances and other matters which came before the Council while in session up to October 26, when the Council adjourned, and as usual each councilman receives instructions from the International President as to what work he is to take up after leaving Kansas City. In accordance with my instructions, I left Kansas City on October 26, for Atlanta, Ga., where I arranged to handle two law suits brought against our organization and our Journal by I. A. Reeves, a former member of Lodge No. 2. I arrived in Atlanta on October 27, met with Brother John Fitcher, Secretary of Lodge No. 2, made arrangements to meet Brother Fitcher, the following day in order to consult and engage an attorney to protect the interests of our organization. On October 28, Brother Fitcher and myself had a conference with John Y. Smith, an attorney, in regards to both cases. Also visited Brother Jerome Jones, a representative of the A. F. of L., for advice relative to the qualifications and attitude of Attorney Smith in labor cases. On the recommendation of Brother Fitcher and Brother Jones, I engaged Attorney Smith to defend the International in two law suits for libel, brought by I. A. Reeves, for being published in our official Journal, for refusing to obey the strike order on the Nashville, Chattanooga and St. Louis Railroad, ordered by a vote of the men over a year ago. Brother Fitcher and myself arranged to put all evidence and records of the local trial committee into the hands of Attorney Smith and have him file his answer to said suits at once. I was informed by Attorney

Smith that it would take a few weeks before said cases would come up for trial, and in accordance with the International President's instruction for me to take up the St. Louis controversy, I left Atlanta on October 30, went to St. Louis. In making arrangements to handle the St. Louis controversy it was necessary for me to get all data in connection with the entire case. On November 3, I went to headquarters for all necessary information. I returned to St. Louis November 5, and arranged to meet a committee of Lodge No. 27, November 5, and arranged to meet a committee of Lodge No. 27 to go over the entire matter as man to man, and from a standpoint of good business. I may say in taking up this controversy I felt I should have some assistance in meeting the arguments of an entire committee, therefore, I requested Brother Hinzman to have Vice-President Maher come into St. Louis for a few days. On November 6, Vice-President Maher and myself met a committee of five members, representing Lodge No. 27. I informed this committee that the Council requested me to visit St. Louis and ascertain if the members of Lodge No. 27 had made up their mind to do business with the International. If that was not their intention, the officers be requested to turn in the charter, all money and property of the organization. We had several meetings and many matters were gone over, pertaining to the controversy. But there was only one question to be decided, was it the desire of the members and officers to again put Lodge No. 27 in good standing with the International. I may say, I found this sentiment prevailed amongst the committee of Lodge No. 27. We assured them we would be fair in trying to work out a settlement. The committee informed us they had only a limited amount of money at their command and were willing to help work out a settlement under such terms after considerable discussion as to the amount they ought to pay. The following proposition was submitted by the committee: We agree to pay in cash, \$1,075.00, this amount to include the payment of our old bill and the reinstatement of 139 members, including boiler makers, apprentices and helpers. I agreed to submit their proposition to the International President and the Executive Council and if they sanctioned the settlement on those terms, I would close up the St. Louis controversy. The proposition was submitted to Council in document, the vote of the Council being favorable. I closed up the St. Louis controversy on their terms. I then arranged a meeting with Lodge No. 27, also a meeting with Lodge No. 51, which were to be held as soon as possible. In the meantime I visited some of the shops in St. Louis, including the Terminal Railroad and Missouri Pacific shops. November 16, had special meeting with Lodge No. 27 for the purpose of talking to the members on the question of consolidation of Lodge No. 27-51. No-

ember 17, I attended a meeting of the newly organized local of Terminal Boiler Makers and Helpers. Installed their officers and talked to the members on the benefits of the new laws and the organization in general. November 18, I attended a special meeting of Lodge No. 51. Had a very nice meeting, talked on the question of consolidation of the two lodges in order that they may be able to employ a business agent to look after the interests of the members. At the meetings of Lodge No. 27-51 they appointed a committee of each lodge to decide upon some plans of co-operation and consolidation. November 21, I came to Cleveland to again take up the organizing campaign for Lodge No. 5; sent out a large number of letters and arranged for an open meeting for delinquent members. November 30, had a very large open meeting in the interest of Lodge No. 5, with a good corps of speakers to interest the delinquent members. The principal speaker was our Seventh International Vice-President, Brother M. Maher, who was in Cleveland in connection with officers of the Blacksmiths, Machinists and Carmen and a federated committee of the Wheeling & Lake Erie Railroad, for a conference with the officials. Vice-President, Brother Horn, of the blacksmiths, also attended this open meeting and appealed to the boiler makers and helpers to get together and strengthen Lodge No. 5 to bring about better conditions in the city of Cleveland. From present indications the organizing campaign is a success and we hope to build up Lodge No. 5 to its former standing. This concludes my report to December 1, 1914.

Trusting the same is satisfactory and wishing all our members a Merry Christmas and a Happy and Prosperous New Year, I am.

Yours fraternally.

LOUIS WEYAND,
Fourth Vice-President.

REPORT OF VICE-PRESIDENT MAHER.

At the conclusion of my last report, was in Pittsburg, Pa., reorganizing Lodge 318, and am pleased to report that the membership of 318 increased some 24 members, also have learned that since my visit to Chillicothe 15 helpers have joined our organization. I went from Pittsburg to Warren, Ohio, to try and reorganize Lodge 239, but did not meet with any success. Perhaps when conditions are better results can be attained in Warren. From Warren I went to Newark, Ohio, and succeeded in organizing the Tucker boiler shop and also several men in the B. & O. shops and look for better results there later.

From Newark I went to the council meeting in Kansas City; after council adjourned returned to Newark, Ohio, and arranged meeting which President Franklin attended and addressed on his way to Philadelphia, and believe good results will be attained from this meeting. While in

Newark I received a telegram from headquarters to go to St. Louis at once, which I did and met Brother Weyand, fifth vice-president, and we arranged a meeting with officers of Lodge 27, and after several meetings Brother Weyand and myself were able to submit a proposition to council which the council have since voted on favorably and in which Lodge 27 paid old debt to Grand Lodge and reinstated 139 members, the whole amount being a nice tidy sum, and I hope that in the near future Lodges 51 and 27 will get together, and that harmony will prevail as it should in the city of St. Louis, as there are sure some good live members in that city.

From St. Louis I went to Springfield, Ill., to attend meeting of System Federation, Wabash Railroad, and met a fine, bright lot of men. There was a jurisdictional dispute there between the boiler makers and machinists and System Federation decided in favor of boiler makers in view of the fact that they had been doing the work in dispute for 25 years. From Springfield I went to Chicago to assist Brother Coglan, business agent Lodge 39 in controversy with the Standard Oil Company, Whiting, Ind. Controversy settled satisfactorily to Brother Coglan and Lodge 39. From Chicago, I went to Conneaut, Ohio, where I found that a man named Pierce was trying to organize one big union under a set of Pennsylvania shop rules. I held a meeting of our local there and warned our men against Pierce's organization. Any one reading the constitution of said organization carefully would need no warning. While in Conneaut I received wire from headquarters to go to Massillon, Ohio, at once which I did and found that officials of Wheeling and Lake Erie Railroad had posted a notice on October 28th declaring agreement of System Federation effective October 1, 1913, null and void and submitting a set of shop rules to committee which deprived them of all rules and conditions which they had gained by years of organization. The committee at once submitted a counter proposition asking for their old rules and an increase of four cents per hour, more power to the committee. This committee is deserving of a whole lot of credit for the intelligent manner in which they handled controversy. I had the pleasure of meeting in Massillon Vice-President Roy Horn, Blacksmiths; General Organizer J. J. McEntee, Machinists, and Vice-President W. H. Ronemus, Carmen. We instructed the committee to submit company's proposition to all crafts at mass meeting and proposition was voted down unanimously by the men. We then instructed committee to take the matter up with the general manager in Cleveland which they did with no results. Then they met receivers, still no results. They then requested that management meet International officers which they agreed to do. We met management and after several hours

of argument and no results we decided to submit controversy to Judge Clark, Federal Judge, who after listening attentively to controversy, informed us he would take the matter up with receivers, and when we again met receivers we found that Judge Clark had made favorable recommendations and management agreed that if we would withdraw demand for increase, they would post a notice in all shops and roundhouses rescinding their notice of October 28th and stating that agreement effective October 1, 1913, would be continued until either party desired a change, such change to be subject to a thirty days' written notice and that all other employes in motive department would work under same conditions as they were prior to company posting notice October 28, 1914. This we agreed to submit to men in view of the fact that increase asked for was only a counter proposition. We then went to Massillon and committee submitting this proposition to men and same was accepted by all crafts at mass meeting. This was quite a victory for system federation on Wheeling & Lake Erie and their committee is deserving of all the credit and are good, live wires, all of them.

While in Cleveland I met Brother Weyand and Brother Brady, business agent Lodge 5. Brother Weyand is trying to build up Lodge 5. I attended two meetings while in Cleveland and both were very well attended, and I look for Brother Weyand to do some very good work in Cleveland. I also attended a meeting of the Carriage and Wagon Workers with Vice-President Horn, a very good meeting also. From Massillon I returned to Conneaut to attend mass meeting for the purpose of forming a System Federation. Brother Weyand, Vice-President Horn, Assistant President Knight of the Carmen and General Organizer Malloy of the Machinists, also attended meeting. We are to hold another in the near future and expect better results at the next meeting. From Conneaut I went to Newark, Ohio, where I am at this writing.

Wishing all a Happy and Prosperous New Year, I remain,

Efraternally,

M. A. MAHER,
Seventh I. V. P.

REPORT OF INTERNATIONAL DEPUTY ORGANIZER DICK

In sending my report to be published in the official Journal to give the rank and file a chance to learn what I have done since I was appointed as I. D. O., would say my work has been mostly confined to the organizing of the men in the oil fields of California and I must say it's a tough proposition in spots. I done fairly well with the men working for the Standard Oil Company, but I have been unable to do much with the men working for Lacey's or Lewellen from Los Angeles. I have visited a few of their jobs, found most of the men too busy to talk to me; I never saw such

a bunch of willing slaves in all my travels, most of this work is done on the desert, very hard to get to some of the jobs and harder to get away from them; if it had not been for some of the good fellows, and I find a good many in California, doing secret organizing on the different jobs it would be very hard for anyone to do much good, so any good that has been done I give credit to the men that has helped me in my work. A good many worked very hard to line up the unorganized, and I thank them very much.

I have gone to all places I knew there was work going on. I went to a job in Hamminton where they were building two dredges. I got there on Sunday, found the men working; I spoke to them after dinner; they told me to come back pay day, and it would be two weeks before they would get any money. I advised Brother Heller to line them up, which I understand he did. I also visited a job near Los Angeles, found the same conditions there. I had Brother Herman go out there and initiate them as I was called away.

I have been in Los Angeles a few times; never was there long enough at one time to do much good; it's a hard place at this time to do any organizing work in any craft. I believe the only way to get around it would be to have a man there for a long time, that way he may be able to do some good.

I made a trip to Arizona where I found the iron workers were doing all of our work including tanks, smokestacks and water towers. I met the iron workers' steward, and after a short talk he agreed with me it was our work, but said he was only one. I called a meeting of the boiler makers and helpers and was surprised to see so many in the hall. A few old timers who had gone delinquent but all willing to come back in the organization. I told them what was our work and to go take it, which they were willing to do. I wanted to know if they were ready to start a local and it was impossible to give out applications fast enough. I then proceeded to initiate them; after that part was over we had an election of officers, I thought every one in the hall wanted to hold office; the voting was close, but all seemed satisfied after our meeting was over. I had a committee appointed to go to the Iron Workers' meeting and show them the agreement that was made between the boiler makers and iron workers and as I had important business in Bakersfield it was impossible for me to attend the meeting. I wired the conditions to Brother Franklin; he attended to his part as I had several letters saying the boiler makers had got all the work that belonged to them and that all boiler makers and helpers were organized; also there was a good chance to organize most of the men working in the state of Arizona.

There are so many unfair firms in California, always paying under the scale and working one hour more, also many men

seeking work, it is very hard to get the conditions that belong to us. I could write a good deal more about the conditions in California, but at this time I think it best not to as I know the bosses read our Journal and would learn more than they ought to.

This concludes my report to November 1, 1914. Hoping same will be satisfactory, and with best wishes, I remain,

Yours fraternally,

JOHN DICK.

The following amounts were received and turned over by me:

JOHN DICK, I. D. O.

REPORT OF JOE REED, INTERNATIONAL DEPUTY ORGANIZER.

Editor Journal, Brothers' Greeting: In submitting my report of work performed by me since my appointment as International Deputy Organizer for the Pacific Northwest, I will endeavor to be as brief as possible.

Under instructions from President Franklin on July 1, I left Portland for Prince Rupert, B. C., to try and line up the work of building a large floating dry dock under construction for the Grand Trunk Pacific, and I am glad to say that I was successful in making arrangements for the work to be done by our members, and set the wage scale at 62½c an hour for boiler makers and 50c an hour for helpers, eight hours a day.

In response to a telegram from President Franklin I went to Vancouver, B. C., where there were several large tanks being built for the Imperial Oil Co. On arriving there I found the job had started and a large gang on the job, but not one of them had a card. I talked with several of them but only two of them consented to take out cards. I also talked with the foreman and he said he would rather have union men on the job but he was under instructions to run an open shop job, but he would give card men preference and he would work the union hours and pay the union scale, but in doing so he hoped our men would not interfere with the men already on the job. I assured him that our men would attend to their own business, then he asked me to send him three boiler makers out the next morning, which I did, and I am glad to say that these men assisted me in every way possible and in a very short time we had about thirty men on the job.

I am glad to report that I was successful in having an agreement signed up with the Wallace Ship Building Company of North Vancouver, who are at this writing very busy on a large ship repair job where most of the members of Lodge 194 are working and which has enabled me to increase our membership by twenty-three new members. Altogether I have taken about fifty new members into Lodge 194. But there are quite a bunch to be organized in Vancouver yet and the majority of them are old time members of the type well known all over the country that claim they got a dirty deal or they would never have dropped their cards. There are very good prospects for the brothers in Vancouver as there is at present under construction a large ship building yard and two dry docks, and I am going to do my best to organize every boiler maker and ship builder in Vancouver before this yard starts up.

I am sorry that there has not been much chance to do any organizing in Victoria as trade has been very dull, and on my two visits there I found most of our members out of work.

And the same can be said of Seattle where there has been next to nothing doing for this last nine months. I hope there are good times in store for both these places in the near future.

The contrary is the case in regards to Portland where all the members of Lodge 72 have been working steady for the past five months. There is at present under construction a large gas holder which I am glad to report is an absolutely fair job; also two small holders which are also fair. I was also successful in making arrangements with local contractors to send our members out of the city to several tank jobs in the following towns: Astoria, Flavel, Corvallis, Eugene, Camas and Garfield. There is at this time a large ship repair job at the Willamette Iron Works of Portland and although this firm have in the past been absolutely opposed to union labor

we have about thirty members on the job and I have succeeded in having an interview with the manager, the result of which was very encouraging, and I hope the brothers that are on the job at present will do their best and show this firm that we are the men for this class of work. And I am glad to say the manager told me they were getting splendid results and he hoped this job would be the means of bringing us closer together.

I am also glad to report steady increase in the membership of Local 72. I also visited Everett at Brother Franklin's request, and tried to re-organize Lodge 500, and am glad to state that I was successful in starting them out again with seven members. But I am afraid it will be a hard struggle to keep them together unless work picks up in this district very soon. Hoping this, my first report through the Journal, will meet with the approval of all, with best wishes to all for a Happy and Prosperous New Year, I remain,

Faternally yours,

JOE REED,
International Deputy Organizer.

REPORT OF INTERNATIONAL DEPUTY ORGANIZER SCOTT.

Albany, N. Y.

Dear Sir and Brothers:

Complying with instructions received some time ago from Vice President Hinzman, and in accordance with a decision reached by the executive council at their last meeting, requesting the organizers in the field to make a report of their work in the Journal, I wish to submit the following brief report covering the work I have done from the time I went on the road, or from September 1 to the present time.

When I received my appointment from President Franklin in the latter part of August I was instructed to proceed to Wilkes Barre, Pa., and get in touch with the men working in McCallum's shop. On arriving there I found that there was a good chance to organize these men, but that there wasn't enough men employed there at the time to start and successfully continue a lodge at Wilkes Barre. I found, on investigation, that Lodge 71 at Scranton, had lapsed, and as Carbondale was the nearest place to Wilkes Barre where a lodge existed, I decided to put those men into that lodge, at least for the time being. I want to say in connection with this that we also succeeded in getting an agreement covering this shop, a copy of which I am inclosing with this report.

From Wilkes Barre I went up to Scranton and spent considerable time trying to re-organize Lodge 71. These men are all employed in the D. L. & W. shops at Scranton. They are working under a piece work system, and like most men in shops of this kind, they are laboring under the delusion that they need no organization. Of course there are a few men working there that know better and who are willing and anx-

ious to see the lodge started again and kept going, but in spite of the assistance these few rendered, I am sorry to report that I failed on this mission, but I have no further excuses to offer, as I believe I did everything it was possible to do in order to get these men started.

From Scranton I went over to Elmira, N. Y., and re-organized the lodge in that city starting out with twelve members. This is not a very promising start, but I believe that with the assistance of these men we may be able to get started again at Sayer and that this lodge will soon grow to be many times as large as it is at present.

While in Elmira I received word to proceed to Lansford, Pa., and render what assistance I could to the members of Lodge 573 whose agreement with the Lehigh Coal and Navigation Company was about to expire. I got into Lansford as soon as I could, attended all of the meetings between the committee and the master mechanic and we finally succeeded in getting another agreement that was perfectly satisfactory to every member in the local. This is something very unusual, especially when there is no direct increase in wages, but the members of this lodge felt to a man that cutting ten hours of the week's work and the other concessions that were granted was about all they could get at this time considering the condition business was in throughout the country. I want to say for Lodge 573 that there are few lodges in the Brotherhood that has made greater progress for the last few years than they have and I believe if conditions are better when this agreement expires they will be able to replace it with one that will stand comparison with the best.

From Lansford I received orders to proceed to Mayfield, Pa., to try and organize the boiler makers and helpers working for the O. W. I was tied up for some time on this job because these men were opposed to going into Lodge 547 and wanted a charter of their own. I finally succeeded in overcoming the opposition to Lodge 547 and had those men initiated. I also succeeded while working in Carbondale in organizing the boiler makers employed in Hendricks shops. In spite of the fact that they were working short time, we succeeded in getting every boiler maker employed there into the organization; about this time I had reasons for suspecting that things were not just what they should be in Lodge 547, and on reporting same to President Franklin I received instructions to remain in Carbondale and go over the affairs of this lodge. I am not going to try and describe here the conditions I found this local's affairs in; things were certainly in an awful mess; there hadn't been an audit made in over three years, and very few records kept or minutes recorded. One or two men were conducting the affairs of the lodge and doing things to suit themselves. Members who had been paying their dues regularly and should have had stamps in their books

were carrying around receipts from the secretary instead, and the money that should have been used to purchase stamps from the I. S. T. was spent defraying the expense of a standing delegate to the System Federation and for other purposes. We succeeded in time in getting things cleaned up and an audit was made for three years to date. At the meeting the report was made, all offices were declared vacant and a new set elected. The secretary and treasurer was each placed under bond. The lodge is now in first class running condition, the membership has been increased from twenty-two in September, to over sixty in November. Every boiler maker today employed in or around the city of Carbondale is a member of Lodge 547 and I sincerely hope that it will remain that way.

The members of this lodge I believe have been learned their lesson and I look to see more interest taken in the local in the future than there was in the past.

I also wish to report having reinstated two ex-members of Lodge 71, one of them was reinstated through the Grand Lodge at his own request, the other through Lodge 547.

I want to say in conclusion that I am now making a trip over the D. & H. from Watervite to Plattsburg under instructions from Brother Hinzman, and I hope in my next report to be able to show good results.

Respectfully submitted,
CHAS. F. SCOTT, I. D. O.

REPORT OF DELEGATES TO THE A. F. OF L. CONVENTION.

To the Officers and Members of All Subordinate Lodges, Greeting:

Your delegates to the metal trades convention, also to the American Federation of Labor, desire to report briefly the actions taken upon some of the most important matters that came before the convention.

The Metal Trades Department of the American Federation of Labor convened November 5 at Walton Hotel, Philadelphia, Pa. Reports of the officers, president and secretary, were printed in pamphlet form and distributed among the delegates the first day of the convention. These reports covered the work accomplished and undertaken by the department during the past year. They also contain such recommendations as in their judgment, would advance the interests of affiliated organization. One of the principal subjects handled by the department was the recommendation of the Executive Council of the American Federation of Labor dealing with the laws of the American Federation of Labor for the government of the several departments which are chartered by the American Federation of Labor and which is given herewith in full:

Article XV.—General Rules Governing Departments of the American Federation of Labor.

Section 1. For the greater development

of the labor movement, departments subordinate to the American Federation of Labor are to be established from time to time as in the judgment of the American Federation of Labor, or of its Executive Council, may be deemed advisable. Each department is to manage and finance its own affairs.

Sec. 2. To be entitled to representation in any department, organizations eligible to join it must first be and remain in affiliation to the American Federation of Labor.

Sec. 3. To be entitled to representation in local councils, or railway system federations of departments, local unions are required to be part of affiliated national or international unions affiliated to departments, or of the American Federation of Labor. Said local unions shall first be and remain in affiliation to central labor unions chartered by the American Federation of Labor.

Sec. 4. The fundamental laws and procedure of each department are to conform to, and be administered in the same manner as the laws and procedure governing the American Federation of Labor. No department, local council, or railway system federation of same shall enact laws, rules, or regulations in conflict with the laws and procedure of the American Federation of Labor, and in the event of changes of laws and procedure of the latter, departments, local councils, and railway system federations are to change their laws and procedure to conform thereto.

Sec. 5. Each department to be considered the official method of the American Federation of Labor for transacting the portion of its business indicated by the name of the department, in consequence of which affiliated and eligible organizations should be part of their respective departments and should comply with their actions and decisions, subject to appeal therefrom to the executive council and the conventions of the American Federation of Labor. When an organization has interests in departments other than the one of its principal affiliation, it is to be represented in and pay per capita tax to the other departments upon the number of members whose occupations come under such other departments.

Sec. 6. Departments of the American Federation of Labor are to have their headquarters located in the city of Washington, D. C., and if possible in the same building with the headquarters of the American Federation of Labor.

Sec. 7. Departments of the American Federation of Labor shall hold their conventions immediately after the convention of the American Federation of Labor and in the same city where the convention of the American Federation of Labor is held, at which time and place their laws and procedure shall be made to conform to the laws

and procedure of the American Federation of Labor and to go into effect the first day of January immediately following, to conform to the date when the laws and procedure of the American Federation of Labor go into effect.

Sec. 8. The executive council of each department shall consist of not more than seven members, including the executive officer or officers thereof.

Sec. 9. The officers of each department shall report to the executive council of the American Federation of Labor that the department has conformed to the laws, procedure, and actions of the American Federation of Labor as they affect each department.

Sec. 10. In the building trades department (on the basis of its law of 1913), organizations having seven or more delegates, each such delegate shall on roll-call be entitled to two votes. A roll-call shall be held upon the demand of one-fourth of all delegates whose credentials have been accepted and who have been seated in the convention.

Sec. 11. The officers of the various departments shall submit a quarterly report to the executive council of the American Federation of Labor of the work done by their department, and its general conditions.

Sec. 12. At all regular meetings of the executive council of the American Federation of Labor, there shall be present during some period of the council meeting, the executive officer or officers of each department, to take up with the council matters that may be of mutual interest.

Sec. 13. A page of each issue of the American Federationist to be available to, and to be used by each department for official report or for publication of some subject identified with the department, each department to designate its officer to submit the report.

Realizing that the departments will find it necessary to change several of their laws, modes of procedure, and other matters affecting them by reason of the adoption of the laws and recommendations we have above submitted, and that it will require some considerable time to put them in practical operation, we submit the following so that time and opportunity may be afforded the departments to conform to the new law and regulations:

Resolved, That Article XV of this constitution as adopted by this convention shall go into full force and effect and be a part of the constitution of the A. F. of L., on and after March 1, 1915. And in the meantime, that is, up to said March 1, 1915, Article XV of the Constitution of the A. F. of L., as it now exists, shall be in full force and effect.

Inasmuch as this law, if adopted would necessitate the changing of the laws of the department to conform to the laws of the

American Federation of Labor, the department took a recess until the American Federation of Labor had concluded its work. The convention was reconvened Sunday, November 22 and completed its work by making such changes in the law as was made necessary by the adoption of the foregoing recommendations which were modified and amended in order to permit the railroad department to maintain headquarters and to hold its conventions at such time and place as best conform to the needs of the department.

I am also giving herewith Section 5 with the recommendations of the committee which were adopted, dealing with the per capita tax and the method of paying same to the departments.

Sec. 5. Each department to be considered the official method of the American Federation of Labor for transacting the portion of its business indicated by the name of the department, in consequence of which affiliated and eligible organizations should be part of their respective departments and should comply with their actions and decisions subject to appeal therefrom to the executive council and the conventions of the American Federation of Labor. When an organization has interests in departments other than the one of its principal affiliation, it is to be represented in and pay per capita tax to the other departments upon the number of members whose occupations come under such other departments.

We recommend that the words "in which it shall pay per capita tax upon its entire membership" be inserted immediately after the word "affiliation," in the seventh line of Section 5, and that the words "but this in no instance shall be less than 20 per cent of the membership upon which it pays per capita tax to the American Federation of Labor" be added immediately after the word "departments" in the last line.

A motion was made and seconded to adopt the recommendation of the committee.

Also Sections 7 and 8 as they were adopted by the convention:

The report of the committee was adopted, and the section as amended reads:

Sec. 7. Departments of the American Federation of Labor shall hold their conventions immediately after the convention of the American Federation of Labor and in the same city where the convention of the American Federation of Labor is held, at which time and place their laws and procedure shall be made to conform to the laws and procedure of the American Federation of Labor and to go into effect the first day of January immediately following to conform to the date when the laws and procedure of the American Federation of Labor go into effect. For reasons of transportation, expediency and the methods of representation the railroad, metal trades

and mining departments may hold conventions at other dates and places, and in that event said departments shall authorize their executive boards to have said departments' laws conform to the preceding portion of this section.

Sec. 8. The executive council of each department shall consist of not more than seven members, including the executive officer or officers thereof.

Your committee recommends that the words "this not to apply to or interfere with the procedure on this subject found to be essential in the railway department," be added.

The recommendation of the committee was adopted, and the section as amended by the committee, reads:

Sec. 8. The executive council of each department shall consist of not more than seven members, including the executive officer or officers thereof. This not to apply to or interfere with the procedure on this subject found to be essential in the railway department.

The foregoing sections contain the principal changes made by the committee and the convention in the recommendation contained in Article 15 and recommendation by the executive council. Your delegates were opposed to and voted against the adoption of this law for the reason that we believe the departments should have autonomy in regulating their own affairs and in the adoption of such laws for their government as would best suit their needs. We trust, however, that this law will work out satisfactorily, but in the event it proves unsatisfactory and acts as a detriment to the departments, it should be repealed or amended at the next convention.

The following officers were elected for the coming year: Jas. O'Connell, President; A. J. Burres, Secretary-Treasurer; Jas. W. Kline, 1st Vice-President; J. A. Franklin, 2nd Vice-President; T. M. Daly, 3rd Vice-President; John R. Alpine, 4th Vice-President; J. J. Hynes, 5th Vice-President; Jas. Valentine, 6th Vice-President.

THE AMERICAN FEDERATION OF LABOR CONVENTION.

The 34th annual convention of the American Federation of Labor convened in Horticultural Hall, Philadelphia, Pa., November 9, and continued in session until November 21. There were 358 delegates, representing 92 International and National Unions, 22 state federations, 70 central bodies, 18 local trades and Federal Labor Unions, and 7 fraternal delegates.

Statistics furnished by Secretary Morrison shows a net increase in membership of 1913 of 24,667. When the industrial conditions are taken into consideration, the showing made by our movement is very creditable.

The report of the Executive Council of the American Federation of Labor is a very interesting document. It is not only

voluminous, dealing with a vast number of subject matters, but is replete with interesting facts and information covering every phase of our industrial, social and economic conditions. This report is contained in the printed proceedings of the convention and can be had by writing to Secretary Morrison of the American Federation of Labor, Washington, D. C., and inclosing 25 cents to cover printing and postage.

Resolution 141, which was introduced jointly between our organization and the machinists with reference to the proposed amendment to the locomotive boiler inspection law now pending in Congress, pledges the American Federation of Labor to the support of a bill to be drafted and introduced and enacted into law, if possible, which will cover the inspection of locomotive boilers, engines, tenders and their appurtenances. Such inspections to be done by men who have had practical shop experience in their respective trades and the wording of the bill to be such that none can qualify except those who have had practical shop experience. I am giving you herewith the resolution as adopted by the convention.

Resolution No. 141—By Delegates J. H. Franklin, of the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America; W. H. Johnston, of the International Association of Machinists:

WHEREAS, We now have a law enacted by the Sixty-first Congress, known as the locomotive boiler inspection law, which provides for the inspection of locomotive boilers and their appurtenances, and,

WHEREAS, This law, in Section 3, provides that the chief inspector and his two assistants shall be selected with reference to their practical knowledge of the construction and repairing of boilers and to their fitness to systematize and carry into effect the provisions thereof relating to the inspection and maintenance of locomotive boilers; and,

WHEREAS, Section 4 of this act provides in part that there shall be appointed 50 district inspectors, and further provides that in order to obtain the most competent inspectors possible it shall be the duty of the chief inspector to prepare a list of questions to be propounded to applicants with respect to construction, repair, operation, testing and inspection of locomotive boilers and their practical experience in such work; and,

WHEREAS, The chief inspector promulgated rules as provided for under this act which admitted and made it possible for applicants to qualify as inspectors, likewise without practical experience in the construction, repairing and testing of boilers; the rules adopted also provide that the common carrier operating a railroad must inspect its locomotive boilers at stated intervals and report to the district

inspector under oath the result and finding of all such inspections, which results in the employes of the carrier, who must be men of years of practical experience, reporting to men who are lacking in practical experience, and consequently are incompetent to either pass upon, offer suggestions or issue instructions in furthering or putting into effect such measures as are essentially necessary to the fulfillment of the purposes of said act of February 17, 1911; and

WHEREAS, There was introduced in the Sixty-third Congress bills known as Senate Bill S. No. 6165 and House Bill H. R. 17894, amending the present locomotive boiler inspection law to cover the inspection and to bring under the supervision of the Boiler Inspection Bureau the engine and tender and their appurtenances, and providing that the present inspectors of the Locomotive Boiler Inspection Bureau shall have the same supervision and authority over the engine and tender and their appurtenances that they now have with respect to the boiler of a locomotive and the appurtenances thereof; and

WHEREAS, If the act of February 17, 1911, as amended in accordance with the provisions of Senate Bill No. 6165 and H. R. 17894, the result will be that inspectors who have no practical experience in the construction, repair and inspection of engines and tenders and the appurtenances thereof will be appointed, as is now the case, with respect to the locomotive boiler and its appurtenances; and,

WHEREAS, It is recognized and conceded by all practical mechanical men who have supervision over the construction, maintenance and inspection of locomotive boilers of the railway systems of this country, not over 20 per cent can qualify or come up to the desired standard required by the railways themselves. It must be self-evident that in appointing men to these important positions who are without practical experience, few, if any, can qualify or come up to the standard demanded by the act herein specified. And we contend that a competent boiler inspector will not make a competent inspector of engines and tenders and its appurtenances, for the reason that he has not had the necessary technical training, and that most essential qualification, practical experience; therefore, be it

RESOLVED, That this, the Thirty-fourth Annual Convention of the American Federation of Labor, go on record as favoring the appointment of inspectors with practical experience in addition to the other qualifications demanded by the Boiler Inspection Bureau; and be it further

RESOLVED, That the officers of the American Federation of Labor be instructed to co-operate with the organizations directly interested who are affiliated to the American Federation of Labor in drafting a suitable bill and in having it enacted into law to cover the inspection of locomotive boilers, engines and tenders and the ap-

purtenances thereto, said proposed bill to contain provisions for the appointment of inspectors having practical shop experience, clearly specifying and recognizing the indisputable fact that none but those who have had such practical experience in their respective callings can qualify for these positions.

The committee recommended the adoption of the resolution as amended.

A motion was made and seconded to adopt the recommendation of the committee.

Carried.

It is our intention to have this bill drafted and introduced immediately after the first of January and we shall do all within our power to secure the enactment of the legislation proposed and outlined by the above resolution in order that competent and efficient inspection of locomotive boilers, engines and their appurtenances may be had.

The same staff of officers were re-elected and Mr. Wm. Green, secretary of the United Mine Workers of America, was elected to fill the vacancy on the council which was caused by President White of the Mine Workers declining to accept the position of vice-president of the American Federation of Labor after his election at Seattle convention in 1913.

The convention finished its business and adjourned sine die at 11:45 p. m., November 21.

BUILDING TRADES DEPARTMENT.

The executive council in their October meeting authorized the president to again make application to the Building Trades Department and instructed that Brother Dohney of Lodge No. 1, of Chicago, Ill., accompany the International president in presenting our case to the delegates of the Building Trades Department, and we are more than pleased to report that our application was acted upon favorably by the convention on November 25 and we were admitted into affiliation with the Building Trades Department.

The next convention of the American Federation of Labor, also the Metal Trades and Building Trades Departments will be held in San Francisco in November, 1915.

There were many matters came before the different conventions in which our organization was interested and your delegates did everything in their power to see that our rights were fully protected. We desire to express to the membership our appreciation for the honors conferred upon us in being selected to represent the organization at the American Federation of Labor and Department conventions, and wishing you one and all the compliments of the season, and with best wishes, we are,

Yours fraternally,

J. A. FRANKLIN,
WAID B. GRAHAM,
M. J. McGUIRE.

Agreements

(Copy.)

This agreement made and entered into this 10th day of September, A. D. 1914, between the McCallum Machine Company of Wilkes Barre, Pa., of the first part, and the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America, of the second part, witnesseth:

Article 1.

This agreement shall become binding on the parties hereto and take effect on theday of....., 1914, and continue in force until superseded by another.

Article 2.

All boiler makers' work done by the party of the first part of the first part shall be done by members of the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America.

Article 3.

Nine (9) hours shall constitute a day's work, and all work performed over nine hours will be paid for at the rate of time and one-half and double time for Sundays and holidays.

Article 4.

The minimum rate to be paid by the party of the first part for boiler makers shall not be less than thirty-two (32) cents per hour.

Article 5.

In the event that either of the parties to this agreement desires to change the same or any part thereof, the said party so desiring the change shall give thirty days' notice in writing to the other party, specifying in the written notice the change or changes desired.

IN WITNESS THEREOF, the parties hereto have caused this agreement to be duly executed the day and year first above written.

THE McCALLUM MACHINE COMPANY,
By JOHN MacCULLUM.

Attest:

THE INTERNATIONAL BROTHERHOOD
OF BOILER MAKERS, IRON SHIP
BUILDERS AND HELPERS OF AMER.
ICA,

By CHAS. F. SCOTT, Organizer.

Correspondence.

A COMMUNICATION FROM PRESIDENT WHARTON OF THE RAILWAY DEPARTMENT.

St. Louis, Mo., Dec. 1, 1914.

The circular letter sent out by the Grand Lodge officers under date of October 31, in which notice was given of the discontinuance of strike benefits on the Harriman, Illinois Central and Pere Marquette roads, after December 1, 1914, has resulted in a number of resolutions being adopted, also letters from a few individual members, the trend of which has been a general denunciation of the Grand Lodge officers, the Railroad Department and everyone else who dared to express an opinion contrary to that held by those who are responsible for the issuance and publication of resolutions and letters that fall far short of stating facts, but rather tend to express the views of those who have not given the matter due consideration.

As a matter of fact, we must not lose sight of the rights of all our members, whether working for a railroad company or engaged in other industries, fully fifty per cent of the members belonging to organizations represented in the circular of October 31 are not employed in the railway industry, and another very large percentage was not employed on the Harriman, Illinois Central and Pere Marquette roads at the time the strike was inaugurated. We might in justice to the vast majority of the members, ask the Harriman, Illinois Central and Pere Marquette strikers how many of the rank and file of the respective organizations were consulted, or had any voice in the movement that resulted in these strikes? Yet, their membership and dues and assessments have made it possible to continue these strikes for over three years. Many of these members are working under most unsatisfactory conditions of employment, and have proven their loyalty by contributing their moral and financial support to their fellow members on strike, they have not only done this, but they have continued to work under these unsatisfactory conditions, foregoing the opportunity to help themselves in order that they might help the men on strike; at least some of the organizations have reached the limit of their finances and in such an extremity there is but one course to pursue—notify the men on strike of their inability to pay strike benefits. This has been done.

The next question that confronted your officers was, Would it be fair to discontinue the strike benefits without giving the men an opportunity to say whether or not they desired to continue a strike under these conditions? We have every reason to believe that had we adopted any other method we would have been justly open to severe criticism.

It has often been stated that approximately 35,000 men came out on strike. Has anyone stopped to consider just what it would cost to pay strike benefits to such a large number of men? Then, again, we must stop and consider just how many men of this vast number have remained on picket duty after they failed to receive benefits, and again we must consider just how many of those who are now on picket duty will remain when benefits are discontinued. Your officers did the only thing that could be done under the circumstances. To discontinue strike benefits without giving the men a chance to say whether or not they desired to continue the strike under such conditions, would have been unfair to those who have stood the brunt of the fight; we would have been accused of forcing men to do one of two things, either quit the strike, or go to work on the struck roads. If the strikers vote to continue the strike without benefits, then they have decided the question for the time being.

The circular sent out to the membership is a plain statement of the conditions now confronting at least a majority of the organizations we endeavored to avoid being accused of trying to influence the vote either for or against the proposition. We give the men full credit for the splendid efforts put forth and the many sacrifices they have made and then asked them to decide whether or not they desired to continue the strike under the conditions that would become effective December 1, 1914.

The question of continuing a strike has often been submitted to strikers under similar conditions, and will, no doubt, be submitted in any strike of the future under the same conditions.

We have given the several protests received, a careful perusal, and this leads us to believe that few, if any, of the originators of the resolution and letters have presented thoughts or expressions worthy of true union men or men who have the qualities they claim the officers are lacking in. The methods adopted bear a close relation to the tactics and mode of procedure of certain well-known agencies engaged by certain employers in their efforts to sow the seed of dissension within our ranks, hoping thereby to create a suspicion in the minds of the members against the honesty and integrity of the officers, which would naturally weaken if not disrupt, our movement.

The campaign of unwarranted vilification and abuse directed at the officers and the wide publicity made available through the columns of the Strike Bulletin and the Railway Federationist certainly cannot be expected to be of benefit either to the strikers or the organizations with which they are affiliated.

The men who have adopted such tactics are themselves guilty of the very act they would have the rank and file believe the officers have committed.

It is neither our desire nor intention to enter into a prolonged controversy with the very few who have seen fit to belittle themselves and bring discredit on the movement by their uncalled-for, cowardly attempt to discredit the officers who have fulfilled the duties of their respective officers without fear or favor.

At least four out of the five officers were acting with the full knowledge and approval of the members of their respective General Executive Boards in the discontinuance of strike benefits. The charge that these officers were attempting to call off the strike is not true, and the circular letter of October 31 will bear this out.

Reference has been made to the indorsement of these strikes by the R. E. Department convention held in Kansas City, April last; that is true; it is also true that this convention indorsed resolutions calling for financial assistance to aid the strikers, also the proposed investigation of the strikes by the Industrial Relations Commission, and the raising of funds for the defense of Carl E. Person. The Grand Lodge officers assumed the responsibility of paying for the preparing and presenting of the evidence before the Industrial Relations Commission. We carried out the instructions of the Kansas City convention in making arrangements for the defense of Brother Person; we could furnish some very interesting details in connection with this matter, but will refrain from doing so at this time. We are still indebted to Attorney Frank Comerford to the extent of some seven thousand dollars.

We have also complied with the instructions of the Kansas City convention in regard to raising funds to finance the strike. We sent an appeal to something like three thousand, five hundred lodges, comprising all local lodges of all organizations affiliated with the department. We have also appealed directly to the delegates attending the Kansas City convention, calling their attention to the action taken, and as a net result of all our efforts we herewith submit a brief summary dating from May 9 to the close of November, 1914:

Locals Contributing.	Amount.
B. R. C. of A..... 8	\$ 246.00
I. B. of B. & H..... 7	115.75
I. B. of B., I. S. B. & H..... 2	19.25
I. A. of M.....26	1,786.45
A. S. M. W. I. A..... 1	13.00
S. U. of N. A..... 1	10.00
Personal	4.00
Bal. on hand from 4-6-14....	24.50
<hr/>	<hr/>
Total	45 \$2,218.95

In regard to the Industrial Relations Commission, many of the members have an

entirely erroneous opinion of the functions of this commission. Their powers are confined to investigating the causes underlying industrial unrest and the recommending of remedial legislation; they have no authority to adjust or in any manner act as a mediator in any strike or impending strike. There is nothing in the proposition submitted by the officers that will react to the detriment of those directly concerned; we say this without fear of successful contradiction; we have had the pleasure of meeting various members of the commission and we speak advisedly. Practically the entire scope of the investigations deal with matters arising from conditions that existed prior to the appointment of this commission.

Because of the publicity given those who saw fit to rush into print and air their views before the public in general, we shall expect this statement to be given the same consideration, and it is with regret that we take this action, because we believe that matters of this kind should be handled through the regular channels of our organizations.

However, this is the inevitable result of having men editing and publishing so-called labor papers, who fail to properly safeguard the interests of the vast majority under the cloak of maintaining what they please to term "free press" and "free speech."

In the circular of October 31, we stated that we expected criticisms from certain individuals, and we say now that we welcome criticism, but some of the bulletins circulated and articles published in the Railway Federationist and the Strike Bulletin cannot by any stretch of the imagination be termed a criticism; they rather reflect a determination to coerce and intimidate the officers from performing their duty because of the fear of publicity.

The editors of the Railway Federationist and Strike Bulletin seem to fully coincide with the views expressed by some of the thoughtless and impulsive members who are so shortsighted that they fail to see that in their efforts to malign and bring into disrepute their officers, they are simply undermining the very foundation of the structure to which they must look for support.

A. O. WHARTON,

President Railroad Employes' Department.

Algiers, La.

Dear Sir and Brother:

Lodge No. 206 had the pleasure of being honored by our Second International Vice-President Thomas Nolan, the Grand Old Man of the Brotherhood, on November 13, 1914. This was the first time Brother Nolan ever visited Lodge No. 206. As the night was a stormy one, Brother Nolan had a strenuous time crossing from the New Orleans side, in company with Brothers Joseph Shea and John McCabe of

Lodge No. 442. Brother Nolan spoke on many matters of interest. He explained the good accomplished at the San Francisco convention for the uplift and protection of our members; he also explained the amendment to the Boiler Inspection Bill and why it was introduced, and appealed to all present to get interested, and be ready to act when called upon by the International President.

Brother Joseph Shea of Lodge No. 442 was the next speaker and gave us a good talk on organized labor in general and how much labor has accomplished in the last ten years. Brother John McCabe, also of Lodge No. 442, gave a short and interesting talk. Brother Charles Kenney of Lodge No. 206 spoke on conditions in the contract shops along the river front. Brother Ed Barry, also of No. 206, gave a short and interesting talk. Brother William J. Smith, the old reliable, was the next speaker, but just at this time the refreshments were about to be served, and the brother in his genial way excused himself for the present so that he could do justice to what Lodge No. 206 had prepared for the occasion; nevertheless, he gave us a good talk, anyway.

Next on the program was a song by Brother William Powers, entitled "Solomon Levy," which was enjoyed by everyone present, and it started all the members in to show how much vocal talent they possessed, before we adjourned.

Since the meeting of November 13, Brother Nolan has been doing some excellent work here, and has made many friends among the boiler makers, not to mention the numerous outsiders he met and won their confidence. Brother Nolan had ten helpers to promise him that they would put applications in Lodge No. 206 at their next regular meeting.

Am glad to say that everyone of them lived up to their promise and got in line at our regular meeting December 11. This makes the T. & P. 100 per cent organized as far as boiler makers, apprentices and helpers are concerned. The lodge gave a banquet on the head of it, and it was one of the most enjoyable evenings we have had in a long time. Brother Kenney, as usual, had the refreshments prepared and saw to it that no one was neglected. In conclusion, I wish to thank the officers and members for their co-operation in 1914 and hope the incoming officers for 1915 will show the same activity as their predecessors.

Hoping I have not taken up too much space in our valuable Journal and will see this in the next issue, I am

Yours Fraternally, JOSEPH KOENIG,
President and Cor. Sec., Lodge No. 206.

Sedalia Mo., Dec. 19, 1914.

Mrs. Jas. B. Casey,
Editor and Manager of Journal,
Dear Sir and Brother:—The undersigned

respectfully request that you publish the following as an expression of thanks or appreciation of the members of Royal Lodge No. 113, to the Brotherhood at large for their generosity in responding to the call for assistance for the wife of our worthy brother, H. Z. Wagner:

To Our International Officers and Brotherhood at Large:

This is to certify that Royal Lodge No. 113, through its secretary, has just recently received a bank draft for the sum of nine hundred and forty-two (\$942.00) dollars, made payable to Mrs. H. Z. Wagner, issued by F. P. Reinemeyer, International Secretary Treasurer, this being the amount derived from the watch raffled for the benefit of Mrs. H. Z. Wagner.

To those who were entrusted with the care of making arrangements for this very important affair, have doubtless conveyed to the members of our Brotherhood the true spirit of unionism and we should feel that we had failed to do justice to our best impulse if we did not at least try to express our appreciation for courtesies shown in our behalf. We speak this way because of the fact that Brother Wagner was one of our very best members; a good union brother who always stood ready and willing to help his fellow man if distressed.

To the brothers at large and especially to those who so generously responded to the call of our appeal for assistance, we certainly appreciate the kindness you have conveyed to our Brother Wagner's wife. We feel that our Brotherhood is going forward at such a rate that it will only be a very short time until we will be, and should be able to care for the unfortunate members of our Brotherhood and it does seem that it would be a good business proposition if each and every local lodge would install a relief fund and have their local laws made so as to protect this fund against the drawing out of any money from this fund except for the purpose specified in the laws governing this fund. This fund should be set aside for the sole purpose of helping our unfortunate brothers by using it to purchase raffle tickets or donations as a lodge gift and so on.

Again thanking all who have co-operated with us in our request for financial assistance in behalf of our unfortunate brother, H. Z. Wagner, with best wishes, a Merry Christmas and a Happy New Year to all, we are,

Fraternally yours,

W. H. SIMS,
J. L. JACKSON,
G. H. GREEN,

Committee.

Newport News, Va.

Mr. James B. Casey,
Editor Journal.

Dear Sir:

On December 9, 1914, a sad and distressing accident occurred in the yards of the Chesapeake & Ohio Railroad, Newport News, Va., which resulted in the death of

Brother W. S. Wuezbachs, a member of Lodge 292, Parsons, Kas., Reg. No. 69756.

An open space in a train of freight cars on a siding was the cause of Brother Wuezbachs' untimely end, not thinking for a moment there was any danger whatever in passing through, but was caught between the cars and almost crushed to death, as he only lived a short while after the accident occurred. Brother Milford Martin of Deer Lodge No. 528, was with him, and present when Brother Wuezbachs passed away.

Brother Healey, president of Lodge 55, who was then visiting Wheeling, West Virginia, wired Brother Hickey to have the members of Lodge 55 take charge of the body and have his remains shipped to his mother in far away Los Angeles in case a request was forwarded to do so.

The officers and members by vote of Lodge 55 desire through the columns of the Journal, to extend to his sorrowing mother and other members of his family, as well as the officers and members of Lodge No. 292, our most heartfelt sympathy, knowing that Almighty God will comfort and console them, for He doeth all things well. Although cut down in the flower of manhood yet we bow our heads in humble submission. May he rest in peace.

W. M. LECOMPTE,
W. F. McCANLEY,
JAS. E. McINTYRE,
Committee.

A LETTER OF THANKS FROM MRS. WAGNER.

Sedalla, Mo., Dec. 15, 1914.

Editor Journal.

Dear sir:—I kindly ask you to grant space in your publication for this, my letter of thanks and sincere gratitude, to all the lodges and members, also Grand Lodge officers who so generously co-operated in the watch raffle of which I am the beneficiary.

Sincerely and gratefully yours,
MRS. H. Z. WAGNER.

Dear Friend: Teague, Tex.

I am inclosing a New Year's card, thinking perhaps there may be some readers of the Boiler Makers' Journal who have just such a friend to whom they would like to send a New Year's card.

Do you know who I have sent one to? I cannot buy a present, because he is the one I have to ask for the price, so I just sent him this card. (My husband.) It is something he did not produce, and it tells him more than anything I could have given him—my gratitude to him and how much I honor his friendship and protection. This may seem out of place to some, but not to me, for I feel when my husband works hard all day in order to earn my daily bread I owe him my purest and best thoughts, so that is what I sent him for a New Year's card.

Wishing all a Happy New Year, I humbly remain,

MRS. JOHN CURE,

Lafayette, Ind.

Dear Brother and Editor:

I am returning to you the cut of the official emblem under separate cover which I hope you will receive O. K. We, the committee, wish to thank you for the use of same.

Lodge No. 360 gave its first annual card party and dance at the Bartenders' Hall, corner Third and Ferry Streets, December 12, 1914.

Starting at 7 p. m., with the card party and playing until 9 p. m. and then everyone was invited to partake of the excellent lunch of ice cream, cake, coffee and sandwiches, which were prepared free of charge.

The hall was decorated in very nook and corner. Every one present enjoyed themselves and are eagerly looking forward to the next time 360 puts on her war paint for a good time.

The prizes at cards were awarded to Brother Willus Wiendorf and Mrs. James Nelson, wife of the well known local car builder.

The rest of the evening was devoted to dancing, and as we had about seventy-five couples present the committee was certainly pleased with their effort to get out a big crowd, for it showed the people in this burg that the boiler makers were not dead. And were on the job when it came to entertaining.

The committee first appointed James A. Peacock, Richard A. Davis and John Halpins, but as we soon saw the job was too big for us to handle alone, Brother Frank Goodman came forward and volunteered to handle the refreshments and he did to everyone's satisfaction.

Brothers Frank Bongen, William H. Cassman and Charles Larhman also assisted the committee at the hall and if it had not been for the good will of the boys we would have been snowed under.

Hoping you and all the boys have a Merry Christmas and a Happy New Year and you can spare us a small space in the Journal for our little write up. I beg to remain,

Yours fraternally,
JAS. A. PEACOCK,

Corresponding Secretary, Local 360.

Tulsa, Okla.

Dear Sir and Brother:

I am sending you five names of party who got state charter of The Independent Steel Tank Builders of America. It was filed in Oklahoma City November 12, 1914. I wish you would publish in the Journal in large type so the other lodges take notice if they apply for card. Their names are W. F. Burcham, D. V. Kelly, J. W. Phillips, W. E. Etter, B. D. Fritchey. Address Drumright, Okla.

Hoping to see this in the Journal. With best wishes I beg to remain,

Yours fraternally,
M. PEASE,
Asst. Sec'y of 592.

The Brotherhood of Boiler Makers & Iron Ship Builders of America.
Gentlemen:

Replying to your request for a statement of my views regarding the proposed amendment to the Federal Boiler Inspection laws which would authorize the district inspectors to inspect the various parts of an engine, as well as the boiler.

I understand that this amendment is opposed by the railway companies, as well as by your organization. I will take pleasure in complying with your request, but the short time allotted to me to reply does not give me time to give it as much thought as I think it really deserves.

In the first place, who originated the proposed amendment? If you will refer to the Second Annual Report of the Chief Inspector to the Interstate Commerce Commission, dated November 1, 1913, you will find that it contains a recommendation for this legislation; therefore, it originated in the Chief Inspector's office in Washington, and similar to all other efforts of this character, it was immediately supported by those who might be benefited thereby. It must, however, be noted that there was no outside demand for this legislation either by the railroad companies or from the general public. What was the object?

When the boiler inspection law became effective July 1, 1911, there immediately arose a contention as to the eligibility of others than boiler makers as chief and district inspectors. It is obvious that the primary object of introducing this amendment was to defeat the boiler makers' claims to these positions rather than any special desire on the part of the originators to promote public safety.

This contention being the real reason for proposing this amendment, it is necessary that a brief reference be made to the merits of the claims of the boiler maker's organization.

The law as it now is says (Sec. 3) that the chief inspector and his two assistants shall be selected with reference to their practical knowledge of the construction and repairing of boilers.

Many boiler makers claim that this part of the law was never carried out in making the appointments. They claim that none of the men appointed as chief or assistant had a practical knowledge of the construction or repairing of boilers, the authorities making these appointments, as far as I can learn, made no extended investigation into what qualifications were necessary to construct and repair a boiler. No examinations were held to determine whether the men appointed filled the requirements of the law. It is certain that the President is not competent of his own knowledge to select men capable of constructing and repairing a boiler, without being advised.

It seems that engineers, firemen, machinists and boiler makers were held to be eligible. No boiler makers were appointed

as chief or assistant chief inspectors, and when the fifty district inspectors were appointed, it was claimed that only ten boiler makers in the entire United States could be found that were qualified to hold these positions and as a further aggravation to the boiler makers' vacancies were filled as late as July 1, 1914, without any further examinations to give the boiler makers who might have qualified themselves in the meantime, an opportunity to compete for the positions.

It would, therefore, seem apparent that boiler makers were not wanted or desired as inspectors; this naturally caused a friction. The writer does not know what authorities advised the President in making the appointments, but does know that engineers, firemen or machinists are not qualified to construct and repair a locomotive boiler. I will quote you an authority on this subject who no one can deny is one of the best informed mechanics in this country. I refer to Mr. Samuel Vauclain, Vice-President and General Manager of the Baldwin Locomotive Works. Mr. Vauclain says, in reference to a locomotive boiler:

"It is that portion of the locomotive which requires the greatest amount of thought, the greatest amount of skill and not only skill but dexterity. Huge plates must be rolled into shape, their nature must be studied, the amount of heat that can be applied, the method of turning a flange so as not to destroy the material, and a thousand other things that must come into the handling of the material which goes into the boiler. A thorough knowledge of the mechanical side, how to calculate stresses, and to correct the mistakes the draftsman is sure to make and is constantly making in the designs he sends in, and were it not for this honest criticism of designs, many and many a failure would go out from the manufacturing plant unnoticed and disaster would occur."

From Mr. Vauclain's statements, and it is also known to mechanics that to be qualified to construct a boiler there are many things necessary to know that are not taught in technical books or schools, and this knowledge can only be gained by practical experience. Therefore, a man who has not had that experience cannot possibly fill the requirements of Section 3 of the federal laws.

Self-preservation is said to be the first law of nature and in this we find the motive for the proposed amendment—the safety of their own positions being the object. The safety of the public and the large, unnecessary expense that the railroads are put to are not considered. I will now show the effect this law would have if passed.

The engineers have a strong organization and in indorsing this amendment they are seeking to find places for the weaker members of their organization. It is a well-known fact that the engineers are the

highest paid organization in the world working for wages. The best class of engineers make from \$200 to \$250 per month. These men could not afford to take a position as district inspector at \$150 per month; therefore, the government in taking engineers as district inspectors, must take that class of engineers who are incompetent by lack of experience with a railroad company to hold an important run.

It is the duty of an engineer to thoroughly examine his engine before starting on a run, his own life depending to a certain degree on his competency in making his examination. If this amendment should become effective, it would mean that this competent engineer would have to have his defects pointed out to him by a less competent engineer, a fireman, a machinist or a boilermaker, who doesn't know anything about an engine, and the opinion of these men would be enforced by law.

"O, Consistency, Thou Art a Jewel."

The writer is a foreman boiler maker. The interest of each individual boiler maker is his interest in the advancement of our business. I cannot close without an appeal for fair play for boiler makers. No railroad in the world has ever appointed an engineer or a fireman or a machinist to the position of boiler inspector. There was no precedent for the President to appoint these men. If the President was called on to appoint a district attorney, would he appoint a doctor? The doctor might obtain a set of law books and his decisions might be equally as fair as far as the general public would know, just as intelligent, as those of the lawyer would be. But would it be law? However, should the President presume to appoint a doctor it is very probable that the doctor would decline from a sense of honor and professional courtesy. I shall be very glad when the same spirit of honor and courtesy actuates all of our people. The writer has no grouch against the federal inspectors—they are all good fellows. Industrious and intelligent—some of them are my personal friends. They are fully equal to a good doctor in a lawyer's job. I hope they will keep their position as long as they want to, but when new appointments are to be made I would like very much for those making the appointments to remember that passage of Scripture which reads:

"Render, therefore, unto Caesar the things that are Caesar's."

With my best wishes to each and every member of the organization, I beg to remain

Yours very truly,
J. H. NOONAN.

Vallejo, Cal.

Whereas, the United States Civil Service Commission has issued an order curtailing and suppressing the inviolable rights of American citizenship guaranteed us by our National Constitution, to the extent of

denying labor the very necessary right of working for desirable legislation, and men who pledge our interest and their support.

Resolved, That we, the members of Lodge No. 148, emphatically condemn the present gag rule and usurped authority of this commission as a dangerous weapon against workingmen and subservient to good citizenship, and we further

Resolve, That this lodge urge our International officers to use all their power to have these undesirable rulings rescinded, at least to the extent of exempting all employees not in a supervisory capacity.

E. B. WOLF,
J. F. JONES,
GEO. HARRIS,
Committee.

Carbondale, Pa.

Dear Friends and Brothers:

I, acting as corresponding secretary of Carbondale Lodge No. 547 of the International Brotherhood of Boiler Makers and Iron Ship Builders and Helpers of America, will try to let you all know of the wonderful growth of our lodge during the last few months. Through the efforts of our ONE GREAT district organizer, Mr. Chas. F. Scott, who has devoted a couple of weeks of his precious time right here with us, he has worked, striven earnestly and brought a weak, scrawny lodge, which it was when he arrived on the scene, through his perseverance with the assistance of our lodge president, E. T. Dickinson, finally began bracing it up by degrees. They have at last succeeded in getting every boiler maker and boiler maker's helper on the Pennsylvania division of the D. & H. Company in line for the worthy cause; they then got the boiler makers of the Hendricks Manufacturing Company, Carbondale, Pa., to "fall in"; they then got a line on boiler makers employed at Mayfield Yard Terminal of New York, Ontario & Western Railroad Company to "come across," finally making a strong and flourishing lodge of about 65 or 70 members, where we had but 25 or so when Mr. Scott got "a-working," so you all can see what a "good hustling organizer" is worth to an organization of this kind.

While in our city of Carbondale, Mr. Charlie Scott made a number of friends for himself; shortly before his departure the lodge called a special meeting, which finally closed with a form of a small banquet (blow-out) as you may call it, or departing reception for Organizer Scott. At the meeting there was voted a hearty vote of thanks to Mr. Scott for the good work he done while with us; there was a very pleasing number on the entertainment. We had Brothers Thos. Carden and Geo. Hall giving a few piano selections and vocal solos. Brother Carmeno Cerra followed with a recitation. Brother Harry Quinn also done his share, as well as Brothers Lieberum and Tanner, in a "rapid-fire" dialogue on "Who's Who in War." After a closing

address by Brother John Santanna, the entertainment was adjourned with all hands happy.

It is the intention of Lodge 547, however, if possible to run entertainments regularly during the long winter months.

Hoping all the boys and brothers will try to wake up a little as our little lodge did, I remain, wishing all the brothers in behalf of Lodge 547 a Merry Christmas and a Happy New Year.

Yours fraternally,
JAMES A. FLANNERY.

Ft. Worth, Tex.

Dear Sir and Brother:

By request I am writing to ask that you publish in the next issue of the Journal that Herman Kessler has squared his accounts here and is O. K. as far as this lodge is concerned.

Also that Chas. Maseman, after due investigation, has been exonerated of charges that appeared in the official Journal some months since.

The official roster for this lodge for the next term will be as follows: President, G. E. Chester, 951 Jefferson Avenue; Vice-President, L. F. Green; Recording Secretary, S. K. Grammer, 918 St. Louis Avenue; Corresponding and Financial Secretary, L. A. Freeman, 2250 Jennings Street (without opposition); Inspector, J. M. Craig, 504 Missouri Avenue; Treasurer, T. H. Kelley, 1900 Sixth Street; Trustees, L. Bauer, Chairman, 925 Josephine Street; R. N. Parmley, 912 Avans Avenue; W. A. Bigley, 1302 Bluff Street.

Also attached please find revised mailing list effective January 1, 1915. Trusting this will be satisfactory, and wishing you a Merry Christmas and a Happy New Year, I remain,

Yours fraternally, **L. A. FREEMAN.**

Milwaukee, Wis.

Dear Sir and Brother:

Inclosed find list of the following officers that were elected at Tuesday night's meeting of Cream City Lodge No. 107, Milwaukee, Wis.: J. Hoppens, president; J. Benish, vice-president; P. Sonnenberg, business agent and corresponding secretary; R. Dale, financial secretary; O. Kannenberg, treasurer; Ed Reininger, recording secretary; M. Miller, inspector; D. Ellix, inside guard; H. Pwers, N. McLean, Ed. Leyman and C. Ceperski were appointed trustees.

The following officers' addresses are: P. Sonnenberg, business agent and corresponding secretary, 623 Greenbush Street; J. Hoppens, president, 1302 Fraterney Street., and R. Dale, financial secretary, 319 Fourth Avenue.

Hoping to see this in your next monthly Journal and thanking you for past favors, I beg to remain,

Yours fraternally,
R. DALE, Financial Secretary.

P. S.—Wishing you and all a Merry Christmas and a prosperous New Year.

Brainard, Minn.

Dear Sir:

Inclosed please find a group of boiler makers of the night gang, Lodge No. 116, Brainard, Minn. Standing from left to

A GROUP OF THE BOILER MAKERS ON NIGHT GANG, LODGE 116, BRAINARD, MINN.

right—"Goldie" Senti and "Moonshine" Brady. Sitting, left to right—"Cyclone" Kohn, "Brick Arch" Mielke and "Smoke Box" Hurley.

Hoping to see this in the journal, I remain

Yours fraternally,
JACK HURLEY.

A NEW YEAR'S CARD—BY MRS. JOHN CURE.

Teague, Tex.

My Friend:

I call you my friend because in some way in this world that seems so full of chance, yet through which I am persuaded there runs a deep and intelligent purpose, you and I have been thrown together. We come to know each other.

And when we touched, you and I, two human atoms in this big universe, a fire was kindled.

I liked you; you liked me.

Why, none can tell; it is just one of those wondrous miracles that happen in this wondrous life.

That fire still burns in me. I want you to know that I am still your friend. The sight of you this day, the sound of your voice, the touch of your hand, could make me happy.

I don't like to grow away from my friends. Life is so crowded and the necessary work so absorbing that well-beloved faces drift into the gray fog of forgotten days. But here comes the new year and reminds me that the best part of my life consists in its friendships. So I send you this, in the hope that you may kindle a little today at the thought of me, that you may have a little wish that I were near you, and that you and I may meet at least in thought. I have no present to send you, but I am sending what is better—genuine

heart throbs. They are through and through these lines. If you hold the paper close to your own breast, I am sure you can feel them. The days we have spent together, I have not lost one of them; they are with me now, walking through my memory, not like sad ghosts, but like smiling angels, to remind me I stand soul to soul with one who likes me and whom I like, and we are marching bravely and blithely toward that unknown world.

Think of those days when you read this and reach out your hand and touched mine across the distance of years and miles.

I meet enough people who do not like me or what I do; the world has plenty of destructive forces of envy, misunderstanding and antipathy. Nobody gets along with everybody, but you and I belong to the great invisible Order of Friends. We stand against the world. We feel eternity. If we should not meet in this life again, we will surely meet in the next, and on some peaceful star our laughter shall ring out there, where there is no shadows of parting. Then hail to you, my friend, and the best in life for you! Contentment and love be yours, and plenty of good work to do. May your heart be always brave. May your nature grow rich in all that happens to you. Hoping we will soon meet again and often to "knit up the raveled sleeve" of friendship.

Wishing each and all a Happy New Year, I am

Very truly,
MRS. JOHN CURE.

Chicago, Ill.

To All Members of Organized Labor:
Dear Sirs and Brothers:

As we are now closing the books of our anniversary ball given by the Burnside Local Board of the I. C. System Federation, we wish to submit the following report, with our hearty thanks to the members who so loyally supported our cause through the purchase of tickets.

We have held the books open up to this time owing to the fact that we had a number of tickets out unheard from, and hoping to hear from them before making our report.

We are glad to say that our ball was a success both socially and financially. Receipts from Blacksmiths' organization. \$ 97.00
Receipts from Boiler Makers' organization. 75.00
Receipts from Machinists' organization. 214.50
Receipts from various other organizations. 313.27
Receipts from political candidates. 54.50
Receipts from program. 94.00
Receipts from cloak and lunch room. 22.85
Total receipts. \$871.12

Disbursements.

To Carl E. Person Defense Fund. . . \$100.00
To printing bill. 118.55
To stationery and postage. 84.00
To hall rent. 20.00
To orchestra. 18.00
To refreshments, cigars, etc. 28.83
To decorating hall and all other expenses. 77.06

Recapitulation.

Total receipts. \$871.12
Total expenses. 446.44

Leaving a balance of. \$424.68

This amount was distributed among thirteen pickets in equal proportion to service rendered, and a small donation to two old aged strikers who have received no support scarcely from their respective organizations. One of them belonged to the Federal Labor Union and the other is a member of the Sheet Metal Workers.

Respectfully submitted,
I. J. CUNDIFF,

Secretary-Treasurer Burnside Local Board
I. C. S. F.

Elizabeth, N. J.

Dear Sir and Brother:

Please publish in the next issue of the Journal that we held our regular meeting Wednesday night, Thanksgiving eve, and after the meeting about a dozen of the brothers stopped at Kraussl Cafe, where they were having a raffle for turkeys and chickens and various other things good to eat on Thanksgiving day, and want to say that the boiler makers won everything in the place. Brother John Reynolds won two turkeys, 23 and 19 pounds respectively; Brother Frank Ruben won a pig and a duck; Brother Tom Duff won a lamb; Jake Monohan won a goose; Tommy O'Brien won three chickens. The rest of the brothers won a chicken apiece. I got the dice. Next day we went visiting one another, had lots to eat and drink—some session, and I dare say we had a rather delicious Thanksgiving.

With best wishes to all brothers, I am,
Yours fraternally,
S. M. RANKIN, Sec. 176.

Tulsa, Okla.

Dear Sir and Brother:

We are sending Brother Reinemeyer, secretary, a draft for \$1,000.00. Brother Ryan is in the office now, and the brothers of 592 desires for you to make a cut of said draft and publish the same in the Journal next issue.

Hoping that we are not asking too much and that Local 592's request will be granted, with best wishes,

Fraternally yours,
WM. CAREY, Secretary.

Kansas City, Kas., Dec. 17, 1914.

The above is a fac-simile of a draft received from Wm. Carey, secretary of Lodge 592, Tulsa, Oklahoma.

Accompanying this draft was a supply blank ordering supplies of seven hundred eighteen boiler makers' due stamps, three hundred helpers' due stamps, one thousand due books, and one report book, making a total of one thousand dollars worth ordered;

long will we continue to swallow bitter defeat, so long will our brothers suffer in vain. We feel that the workers have not kept pace with the development of capital, and that it is essential to our welfare that we form a closer union so that a solid front may be presented when we seek our rights. We urge all our members at this time to give their earnest consideration to the position we and our brother union men are in.

one of the largest cash orders that has been received at this office.

Lodge 592 is one of the largest lodges we have in the Brotherhood. They reported six hundred and sixty-nine boiler makers and three hundred ninety-four helpers, a total of one thousand sixty-three members in good standing for the month of November.

Yours fraternally,
F. P. REINEMEYER, I. S.-T.

RESOLUTION.

WHEREAS, A ballot has been presented to the members of the Harriman, Illinois Central and Pere Marquette lines to decide whether or not the strikes should be called off, and

WHEREAS, The Harriman and Illinois Central have been our strongest organized roads, and,

WHEREAS, The reason given for this action by our officers is that the finances are exhausted, which means that these strikes cannot possibly be won, and,

WHEREAS, It has been fully demonstrated to us during the past few years that we can no longer successfully fight or even hold our own against a powerfully entrenched capitalist class controlling government, courts and press with our present form of individual craft organizations; therefore, be it

RESOLVED, That we, the members of No. 116, conscious of the fact that we are engaged in the world-wide struggle between capital and labor, realize that, so long as we endeavor to secure justice through futile methods of individual craft organizations, so

We feel that conditions demand that we solidify our forces, for only then will we become a power able to maintain our rights and occupy our proper level in society.

L. A. REFEURATH,

Cor. Sec. No. 116.

Note.—The editor does not believe the publication of resolutions like the above is for the best interests of our organization or its members and on receipt of the above, wrote to the secretary of the lodge, expressing this opinion; however, we received a reply in which the request to publish was reiterated, with the statement that the lodge would assume full responsibility for same, and rather than have any just grounds for complaint for censoring articles, we are publishing the above resolutions; however, we cannot refrain from pointing out some of the errors of reasoning they contain. The resolution gives "individual craft unionism" as the cause of our failure to so far win the strikes mentioned, when, as a matter of fact, they are federated strikes in which each trade acted in concert with each other and could not have done any more were they in "one big union." Therefore, this reasoning is from false premises, and the true cause for failure to so far win out will have to be sought in some other direction. In our humble opinion there were several contributory causes, but we do not believe the present is the proper time to discuss them, as the result of the vote taken by the men on strike had decreed that the fight be kept up, so instead

of discussing matters of this kind, it will be more to the purpose to make every possible effort to renew the contest with all the vigor possible, so that a favorable result may yet be achieved; until then, it seems to us discussions of this kind are out of order.—The Editor.

East Boston, Mass.

Dear Sir and Brother:

At our regular meeting on December 3, our good friend and associate, Sixth International Vice-President John Dowd, was a welcome visitor and he received a cordial reception from the members. Brother Dowd spoke in detail regarding his efforts to better the working conditions of the workers in our trade in this vicinity, particularly the boiler makers and assistants in the employ of the Boston & Maine Railroad System, who have had serious grievances and whom have been on the verge of quitting their work for several weeks, previous to the arrival of John J. Dowd on the scene, but it speaks volumes for the sagacity and humanity of Brother Dowd who pointed out the foolishness of calling a strike at this time of the year, and the cruel suffering that would result to the innocent mothers and children if such action was taken—thus Brother Dowd in his sincere and logical mode of reasoning prevailed upon the would-be striking railroad men to take no such drastic action until conditions and opportunities were more propitious. Meanwhile, Brother Dowd has mapped out a program of conference and propositions for the mutual consideration of the men and magnates that there is every reason to believe will pave the way for satisfaction to all concerned. Diplomacy and sensible argument—not threats of a resort to violence, intimidation, etc.—have inevitably marked the course of John J. Dowd's successful solutions of intricate and puzzling wage problems in the boiler making and iron ship building industry in the New England states and the great Empire state.

Lodge 585 also received a very encouraging report from its business agent, Brother Daniel N. Generson, who has been right on the job ever since he took office. Brother Generson (with the able assistance of John J. Dowd who has accompanied our business agent in his quests for jobs for good Union men, and his efforts to reorganize this city and state and to bring back delinquents to the fold) is having a rough road to travel but if perseverance, courage and industry deserves success then Bro. Generson will achieve the same.

DANIEL B. McINNES,

Editor Journal:

Just a line to you and the rest of the brothers to let you know that Local Lodge 302 is doing business all the time, even

though we do not get into print through the pages of our Journal.

At our last regular meeting, on December 2nd, 1914, our members went on record as not forgetting the members of our local that are unfortunate in being laid off or out of employment just at the time of the year that work is needed the most, and that is around the holidays, when the dear little ones are expecting the arrival of Dear Old Santa, but may it be said for our members that they have not been lost sight of, as we took steps at our regular meeting to provide funds to give them a good joyous Xmas at home with the little ones, by a liberal donation out of our treasury so that life and joy may prevail on that day of blessing.

A committee of eight was appointed by the local divided up in four sections to cover the city as our brothers live in all sections of the city to look after their wants and to see that they will be well taken care of and to see that the little ones would not be forgotten. Now, brothers, I don't pretend to be a writer, but I hope that these few lines may go home to some of the careless brothers that never give a thought for anyone but themselves and if we find that our brothers need a helping hand, we are the ones that are fortunate in having steady work should be willing to at least do what we can for our less fortunate ones, and if our treasury will not stand these calls on it, to be willing to go down in our own pockets for such a worthy cause and in this way show the outside shopmate that there is a motive in being a union man other than to walk up and pay your monthly dues and carrying a card in his pocket. So here's for more success along these lines and hoping that some of the other locals have taken steps along these same lines.

Trusting you will find space in the January Journal for these few lines, with best wishes to the grand officers, also to the rest of our brothers, for a happy and prosperous New Year, I beg to remain,

J. DU BRUCQ, Local 302.

Brainerd, Minn., December 5, 1914.

Mr. Editor and Brothers, Greetings:

During the past four years, the working class of America has gone through many bitter experiences, particularly in West Virginia, Michigan and Colorado, and what more closely affects us on the Harriman and Illinois Central lines. We have watched our brothers in all these conflicts put up an heroic stand against overwhelming odds. We have seen how they have sacrificed all that a man holds dear, aye, even their lives, in defense of the principles of labor. It is not necessary for me to recount the terrible suffering that our brothers have gone through. You are all familiar with the whole history of these strikes, at least you should be, for they have been repeated again and again.

But what do we learn from these industrial battles, brothers? Do we learn anything? If so, why do we not seek to prevent them? Do we simply see the effect? Namely, a body of men—workers—trying to secure more wages and better conditions from employers who refuse to pay more wages or grant better conditions. Now, this is simply the effect of some underlying cause.

The cause is the **ANTAGONISTIC ECONOMIC INTERESTS**. On one side we have the employers, or capitalists, always seeking more profits, a greater share of the products; on the other side, we have the great masses, who own nothing but their ability to work, always seeking more wages and better working conditions, in a word, **ECONOMIC FREEDOM**.

For over half a century, this struggle has been going on in this country. In normal times, we have been able to adjust the opposing interests by the peaceful means of agreements, but all the time, smoldering under the surface, lies the inherent, antagonistic interests, which, at times, break forth in bitter, open conflicts, such as in Colorado and Michigan. In these battles, the worker does not meet the capitalists as capitalists, but under the disguise of courts, legislatures, federal and state troops, the press and the capitalist private army of thugs and gunmen.

Little wonder then that the worker is crushed and defeated when he gives battle to such an array of force. Little wonder, indeed. We might as well expect an army such as Washington had to successfully combat the highly efficient German fighting machine as for the workers with our isolated organizations to successfully fight capital with the whole powers of government behind it.

It seems sheer folly to me to continue as we have been doing. Why quibble and refuse to face facts? I **BELIEVE ORGANIZED LABOR IS GOING TO HAVE A TREMENDOUS STRUGGLE IN THE NEAR FUTURE TO HOLD WHAT IT HAS**, and it seems to me, unless we can solidify our forces and quickly, we are going to receive a severe reverse. I am not a pessimist, for I am satisfied that labor will eventually triumph, but, brothers, before that time comes, we will have more bitter experiences. We will see many of our brothers shot down and their families hounded over the hills like beasts, for this is the penalty union men have paid and will pay for daring to stand for their rights.

Now, brothers, I am of the belief that the only way in which labor can win is by adopting the modern methods employed by our masters. I do not mean their gunmen and thugs or their armored trains and high-power rifles. We will not need such brutal forces as they employ. But we should adopt their wise policies; namely, to unite ourselves into one solid body, conscious of our

economic interest, to secure our own representatives in our Congress, legislatures and courts. These are things we can easily do. **FURTHER BLOODSHED IS NOT NECESSARY.**

Why persist in bucking a stone wall? We have done that long enough. Labor is powerful. It is only a lack of consciousness of its power that keeps it in submission. Once the workers become conscious of their strength, they will become an irresistible force that nothing on earth can resist. Therein lies our only hope. **GET TOGETHER, STAND TOGETHER, ONE FOR ALL, ALL FOR ONE.**

The labor question is a world problem; it will never be solved by capitalists or professional politicians. It can only be solved by the working class. This is the lesson we must learn.

Fraternally yours,
J. G. BROWN,
Lodge No. 116.

**' IN MEMORY OF BROTHER
E. E. SANDERS.**

Sedalia, Mo.

After a life's fitful fever, he sleeps well; after life's arduous toils and struggles, we say, "Rest, Rest, Perpetual Spirit." Brothers, with bowed head I venture to write an item of respect for one that is gone. If we could all feel that so many and sweet things could be said of us as have been said of Brother Sanders, it would mitigate the horrors of the grave and smooth our passage to the land beyond. I have heard the highest tributes paid to the memory of our beloved brother that I have heard paid to anyone for a long time, and I said that a life that could inspire the expression of so many lofty and virtuous sentiments had not been lived in vain. The estimation in which he was held as a good citizen is well known to all who knew him.

Sweet was the fragrance of these flowers upon his casket, but sweeter far the fragrance of his memory. There is a voice from the tomb sweeter than song.

He has left a void in our ranks which none can fill and the first feeling that came to me when I received the sad news was that there is nothing serious in mortality when such young and useful men are so stricken down, but while we feel his loss so heavily, what must be the feeling of her whose whole soul has been occupied by his image for many years? Truly, for her the heavens seem hung with black, but in such an hour can only commend her to some higher source for consolation.

He has left her but little of this world's goods, but has bequeathed to her a far richer legacy, the priceless heritage of a spotless name. During all the years that I knew and worked with Brother Sanders I never asked him his religion, because we are told that by their fruits ye shall know them.

His very remains now rest in Crown Hill Cemetery, and with heavy hearts we gave him up. Brother Sanders, we are lonely without you. Good night, sweet peace, and flight of angels sing thee to thy rest.

M. J. DONOHUE.

Chicago, Ill.

Dear Sir and Brother:

I have been waiting for the brothers that still hold tickets to either send them or the money in, and as they have not done so I will write and thank our brothers and sisters who were so kind as to take them, and those that could not on account of poor times returned them, I therefore take this means to say thank you to one and all.

Our dance and card party of October 17th was not such a big success as we had hoped it would be, the weather man had sent rain to greet us and of course the people who are afraid of melting stayed at home and the old timers all turned out. We had about 65 couples—just a nice crowd to have a good time.

The card party prizes were pretty and donated by the following people: One ladies' party box, one guest's leather pocket book, both donated by "The Fair," State, Adams and Dearborn Streets. One hand painted cake plate, donated by Mrs. L. Brown, 3723 W. Chicago Avenue. Pair fine suspenders donated by James Garland, 3824 W. Chicago Avenue. One box fine cigars donated by Sister Lux and two consolations by Sister Green. One creamer and sugar bowl donated by lodge.

I thank each and every one that was so kind to help us and I hope the brothers who still have tickets will at least please return them.

Anna Grace Sawyer, our friend and florist, was with us on the night and donated 200 carnations for the dancers and words cannot express our thanks to all our donators and we hope the Brothers and sisters will show our thanks by trading with these kind people.

I hope you will find room in the Journal for this letter and I wish all the brothers and sisters a Merry Christmas and a Happy New Year. Thanking you and all the brothers and sisters also donators again, we remain,

Fraternally yours,
MRS. JAS. W. SANDY,
MRS. FRANCIS,
MRS. SELDON,

Committee Garfield Park Lodge No. 12, L. A.

Wilkes Barre, Pa.

Dear Sir and Brother:

Just a few lines in regards to Local 547 of Carbondale, Pa. Held a special meeting on Monday evening, November 23, and had a very large meeting and had the honor of having Brother Chas. F. Scott, deputy organizer, present, who has been in this

section of the state and had been meeting with success and has put new life in 547, besides increasing our membership from about 23 members to 65 at present. Out of this number there are six from Wilkes Barre, Pa. Brother Scott has also met with success in Wilkes Barre, Pa., in securing an agreement and closed shop with MacCullum Bros'. Machine and Boiler Works.

And I want to inform the Brotherhood at this special meeting a vote was taken and thanks extended to Brother Scott for the good work he has done for Lodge No. 547 in increasing our membership—43 new members.

Also enjoyed a good talk by Brother Scott and after the business of the lodge was finished, refreshments were served.

Hoping to see this in January Journal, and wishing all the members success, I beg to remain

THOS. CAVAN,

Wilkes Barre Representative, Local No. 547.

Dear Sir and Brother:

By unanimous vote of Lodge 220 in regular session Tuesday, November 3rd, I was instructed to notify you of the action taken by Lodge 220 relative to the action of the Executive Council, of the Brotherhood discontinuing the strike benefits on Dec. 1, 1914, and to request you to publish same in the Journal.

Action Taken by Lodge 220.

It was moved and seconded and carried by unanimous vote to send a protest to the Grand lodge protesting against the action of the executive councils in discontinuing the strike benefits, and request that the Grand Lodge continue to pay strike benefits until the strike is entirely settled or called off, and that this action be published in the next issue of the Journal.

By vote of the majority of the members of Local No. 220 in attendance at our regular meeting last night, October 6, 1914. I was requested to write you relative to calling off of the strike on the I. C. & Harriman Line Railroads, and ask you to take the matter up with the other organizations affiliated with the R. E. department to that effect, and to put out a referendum in our organization to be voted on.

Trusting you will handle this matter as it should be, I remain,

Yours fraternally,

I. J. CUNDIFF,
Secretary No. 220.

I desire to call your attention to the inconsistency contained in the first of the foregoing letters, where a protest is presented against the discontinuance of benefits in view of the action taken by the same lodge as shown by the last of the letters under date of October 7, wherein Lodge No. 220 requested that I take the matter of calling the strike off up with the other or-

ganizations affiliated with the Railroad Department and requested that we put out a referendum vote to our organization to be voted on.

You will note the lodge is now protesting against the very action that they requested that we take in their letter of October 7.

Without further comment or discussion, I will leave it to the membership to pass judgment on.

With best wishes, I am

Yours fraternally,

J. A. FRANKLIN,
International President.

Chicago, Ill.

Dear Sir and Brother:

By request of a number of members of Lodge No. 39 who sold raffle tickets for the benefit of M. Griffin, we wish to announce that No. 433 was the winning number, and Brother Griffin, who is a union engineer, wishes to thank one and all for their kindness in assisting him.

Hoping you can find space in our official Journal, and with best wishes, I am

Fraternally yours,

JOHN S. COGLAN.

Dear Sir and Brother:

A few words to the members on behalf of Brother W. J. O'Bryan's application for pardon:

Brothers Thos. Culligan, John Call and I visited the state's prison at San Quentin Thursday, December 10. We had the regular half hour allowed all visitors with Brother O'Bryan, found him very cheerful and bearing up well, also looking well.

Brother O'Bryan's conduct has been excellent and he is now helping take care of the cells. He is very thankful and appreciates what the brothers are trying to do for him.

The situation in the matter of the application to the governor of the state of California for a pardon of William J. O'Bryan is now ready to be filed. The delay in filing the application has been caused by the necessity of obtaining thousands of signatures throughout the state. Nothing would have been gained to have filed the application for the pardon before this, owing to the activities of people who are prominent in the state in political matters.

We have been informed that we have splendid and valid reasons to present to the Governor for O'Bryan's pardon. One of the most reassuring matters that has come to our attention recently is the statement made by the non-union man who was the companion of Avall, the man that O'Bryan shot, that on the night of the shooting Molina made a statement in the presence of a number of witnesses to the effect that Avall, on the night of the shooting, went armed, looking for O'Bryan, and that if O'Bryan had not got him (Avall) he, (Avall) would have killed O'Bryan.

We have been informed that had such

testimony been available at the trial of O'Bryan for the murder of Avall, it is quite probable that a different verdict might have been obtained.

On the whole we are very sanguine when the Governor of the State of California is thoroughly acquainted with the entire history of O'Bryan's case, that some relief will be granted him.

It is necessary that the application for the pardon, as well as all other matters necessary in connection therewith be carefully handled, and therefore we are going slowly and surely about the business of securing the pardon, and we have every cause to feel optimistic of the final outcome.

Decatur, Ill.

Dear Sir and Brother:

Lodge No. 447 of Decatur, Ill., had a warm time on the night of December 15. It was our regular meeting and we elected officers for the year 1915. War was declared at 9:45 p. m., all officers and 96 men on the firing line. The first to be brought up for slaughter was His Majesty the President, Brother James Gray. Well, this brother has held this job for five years, which shows that good union men do stick. Next was the office of vice-president; well, we have a brother in this position who can repeat the ritual from cover to cover. Now comes the best secretary in the United States, corresponding and financial, Charles J. Younger; this brother is a war horse by deeds, as well as name; he has held this job for over seven years, which shows that he is a business man as well as a wielder of the hammer.

Brother M. J. Kelley was made recording secretary; now for any man to accept this job, it shows that he is certainly a man of vim, for we assuredly need two or three to keep up with the smeary salve, which is plentiful at this time. Brother Leo Singer was given the job as gold keeper, which is at present not a very great deal. Inspector Richard Conroy of Dublin, Ireland, had no opposition.

Trustees are as follows: H. J. Freischlag, chairman; Al. Reinking, Law, Bridgewater; and poor little me was made the goat—Journal correspondent. Well, brothers, should you come this way, please bring a good paid-up card, for no other kind is recognized here.

Yours fraternally,

EDW. E. IVEY,
Journal Secretary, No. 447.

Teacher: "Earl, did you whisper today?"

Earl: "Yes; wunst."

Teacher: "Clarence, should Earl have said 'wunst'?"

Clarence: "No, he should have said 'twicet.'"—Everybody's Magazine.

A Compilation of Labor News.

BY THE A. F. OF L. NEWS SERVICE.

WOULD DEFEAT SEA TREATY.

Washington.—On the ground that life at sea will not be protected, that the LaFollette seamen's bill, now pending in the Senate, will be valueless, and that legislation of this purport will be impossible, the American Federation of Labor is opposing the ratification of the treaty—or convention—signed in London last January by the world's maritime nations at their safety-at-sea conference.

In a public statement President Gompers gives the following reasons for this opposition:

"The convention, adopted by the London conference, instead of being a proposition for safety of life at sea, might better be termed a surrender by the United States to legislate in the interest of the people of our country, and to give away the freedom of the seamen, as well as to cripple the government in the regulation of immigration.

"In the first place, the proposed treaty does not afford protection of life at sea, and so far as practicability is concerned would not safeguard life or property to any appreciable degree more than the disasters which have occurred within the past decade.

"The proposed treaty places the power to regulate the well-being and health of passengers, that is, of emigrants subject to the legislation of the countries from which they depart and hence would not be subject to the laws of the United States, to which they would be immigrants. Thus, though a seeming impartiality in practice, the emigration is from other countries, the emigration is into the United States. There is little if any immigration from the United States to other countries in the sense in which emigration is understood.

"The question of the welfare and the freedom of seamen when vessels are in safe harbor is wholly disregarded in the proposed treaty. If the proposed treaty were ratified by the Senate it would make it impossible for the Congress of the United States to enact the just and humane provisions of the seamen's bill now pending before Congress.

"If the Senate desires to ratify the proposed treaty, then it should adopt the action of the committee on foreign relations in June, 1914, when the following was recommended:

"Provided that the United States reserves the right to abrogate 'treaties, conventions, and agreements' indicated in Article 68, in accordance with the terms of such treaties, conventions, and agreements, and to impose upon all ves-

sels in the waters of the United States such higher standards of safety and such provisions for the health and comfort of passengers and immigrants as the United States shall enact for vessels of the United States.

"With that proviso adopted, the government and the people of the United States retain for themselves the right to legislate for our own protection and advancement and to the advantage of all. Without such a proviso the treaty should not be ratified."

PRESIDENT GOMPERS TALKS IN SOUTHERN CITY ON WORKERS' HOPES AND AIMS.

Richmond, Va.—During his short stay in this city, last week, President Gompers addressed the National Society for the Promotion of Industrial Education, the members of the city's administration board, and one of the largest mass meetings ever held in Richmond, which was arranged by local unionists.

In his address before the educational conference, the trade unionist defended strikes, as much as they are to be deplored, because they are the most civilized method of expressing a natural and warranted discontent. In referring to the fight organized labor is making on convict labor, President Gompers said the workers did not believe that convicts should not be employed, but they insisted that these unfortunates should not be exploited for the gain of employing contractors or for the profit of the state. He favored the state-use system of solving this question. President Gompers said no argument by him was required in support of industrial education, as a great part of his life had been devoted to combating wrong-headed notions about the attitude of organized labor with reference to every sort of social and economic questions, and that the degree of ignorance of the workers is not so great as the presumptuous and supercilious often assume it to be. He declared organized labor is not opposed to the development of industrial education in the schools, but is eager to co-operate in instituting them. Labor, the speaker insisted, cannot favor any scheme of industrial education which is lop-sided, and the only way to avoid working an injury to organized labor under the name of industrial education would be to find out what the demand is in any given community.

At the mass meeting, held under the auspices of the Central Trades and Labor Council, President Gompers said that men and women today no longer beg for consideration, that they no longer present gaunt figures of hunger in demand of their needs, but that they demand right, they demand

justice and freedom. "Though it is hunger still," he said, "it is a new form of hunger. It is the hunger for better food, the hunger for better raiment; the hunger for better homes, for better surroundings; the hunger for better opportunity for our children, so that they may no more be the subjects of exploitation, but that they have equal rights and liberties with other people. What is the labor movement? It is the crystallization of a sentiment of indignation, of the expression of the discontent of the masses of the working people who desire relief from burdens too long borne, who ask for privileges too long denied them."

President Gompers said every law enacted during the past ten years of benefit to the workers was advocated by organized labor twenty-five years ago. He said James Donahue Sullivan, a printer, member of New York Typographical Union, was the first man to propose the initiative and referendum; that the Australian ballot, direct nominations, the corrupt practices' act, direct primaries, child labor laws, safety appliance acts, and even the public school system were the result of organized labor's efforts.

"We want industrial peace," said Mr. Gompers, "but we do not want it at any price. It must be peace with a progressive improvement. The masses should have the improvements they desire, if the world is to be made a better world. As to compulsory arbitration and enforced award, that is but another species of slavery. Our aim is that every man shall have his own best concept of right and justice—that he shall be able to enter upon a contract upon an equality of terms."

STATE EQUIPS HEALTH TRAIN.

New Orleans, La.—The Louisiana "health train," in charge of the state board of health has made a successful tour of many southern cities in the interest of cleanliness and right living. The state recently voted an appropriation to meet expenses, but in many cases railroads have made no charge for hauling the equipment, and invariably gave it the right of way. Medical authorities made addresses to visitors and explained the exhibits, which include sanitation, care of babies and dangers that follow the use of "consumption cures" and other fake medicines.

"We now have our own train of two big Pullman cars, owned exclusively by the state of Louisiana," said Dr. Dowling. "When we began this work four years ago, we had to borrow two old cars from the railroads.

"Next year we expect to equip another train, carrying out other ideas so that we can visit a town in Louisiana twice each year and carry a different message to them on both trips. We expect to have many other models illustrating the proper manner of living in the home, in the schoolroom, and in the business office."

FAVORS OLD AGE PENSIONS.

Washington.—In his annual report, Secretary Redfield, of the Department of Commerce, declares the United States cannot longer hold off from giving protection in their old age to its faithful employes.

"In spite of the occasional loss of aged employes, due usually to death or resignation," says the secretary, "superannuation still increases, thus accentuating the disadvantages of an impaired service, the discouragement of a retarded rate of promotion for young and deserving employes and the feeling of unrest and perhaps dread of dismissal by those who are aware of the fact that the best service they are able to render does not reach the average standard of the younger employes of the same class and grade.

"While superannuation probably exists, it has been found difficult under present conditions to obtain admissions of the actual conditions from the higher officials under whom aged employes serve.

"Naturally, so far as may conscientiously be done, officials are reluctant to make any statement which might lead to the separation from the service of those who have given the best years of their lives to the government and who, if deprived of their income, would face poverty and want.

"In both governmental and commercial centers retirement on some system of pensions for superannuated employes is becoming more generally recognized as both a practical and profitable movement. That such a policy can be carried out by the government so as to be ultimately a means of economy seems to have been demonstrated.

"A system of retirement has been adopted by the leading governments of Europe; and its growth among business corporations indicate the value of the results accruing from the policy. It is found to affect not only immediate relief, but its benefits are seen in its influences on the younger and more active class of employes.

It removes much of the incentive to seek other employment where the prospects are brighter; it induces many to render more nearly the maximum of service; and improves the esprit de corps when it is known that the faithful employes may expect to be cared for after they have become incapacitated in the service."

WOULD END WIRE MONOPOLY.

Washington.—"I expect to make an effort, together with other members of Congress, who have studied the question, to bring up a bill to turn the telephone systems of the United States over to the postoffice department, during the present session of Congress, and I have reason to believe that we shall be able to pass it," said Representative Lewis, a member of the labor group.

"The American postal service averaged 60,000 pieces of mail matter handled per

employe, in 1913; 13,000,000,000 in all. The average cost to the consumer was about 2 cents. Private monopoly would require from 5 cents to 10 cents for such service. In June, last, the express companies were losing about a cent on each package carried, on an average charge of about 50 cents. The same month parcel post charged an average of 15 cents for the packages it carried, and after paying all costs, including the railway pay, has some 3 cents profit less on each package. Telephone communication is in the same class as express service. It is a natural monopoly, and must be in the hands of the public to be either cheap or efficient."

DEFENDS COMPENSATION LAW.

San Francisco.—Harris Weinstock has answered the charge of an insurance company that the state's promise to refund 15 per cent of its premiums to policy holders in the state compensation insurance fund is a "get-rich-quick scheme," and is a "pilfering of a fund set aside to protect industrial cripples."

Weinstock shows that these reductions now total 40 per cent over the charge of private companies, and that the state, in the matter of efficiency, has broken all records in the settlement of 3,000 claims. Of these there have been only eleven disputed cases, and out of these there have been only three cases where the injured worker's right to compensation had to be determined by the commission. In the remaining eight cases the issue was simply to determine who were the rightful dependents of the injured workers, the extent of such dependency, or the extent of permanent disability.

STEEL CARS FAVORED.

Washington.—In its annual report to Congress, the Interstate Commerce Commission recommends the use of steel cars in passenger trains, and prohibition of the use of wooden cars between or ahead of steel cars.

Definite penalties for violations of the hours of service act is also favored. At the present time the A. F. of L. and the railroad brotherhoods are urging the passage of a law that will fix a minimum fine of \$100 for violations of this act. Courts, in many instances, have nullified the purpose of this legislation by the small fines inflicted on railroads found guilty of working their employes more than sixteen hours in twenty-four.

The commission also asks for explicit and certain authority to examine all documents and records of the railroads. A plea for standard operating rules is included in the report.

AGAINST "SURPRISE TESTS."

Chicago.—Abolition of the "surprise tests" given engineers will be demanded of the arbitration board now hearing grievances of engineers and firemen in this city.

The "surprise test" is as follows:

While running a through train at high speed in the night the engineer is assured by a white signal that all is safe. Then, as the engine turns a curve, he sees a sudden flash of red light and he realizes that possibly death awaits him and his passengers.

With nerves taut, the engineer begins to apply his brakes. And immediately the red light disappears, a white one shows, and again the engineer is told by signal that all is safe and he has the right of way.

This sort of test may prove to be a lasting blight upon the engineer's physical and nervous constitution, according to the engineers.

O. K. COMPENSATION LAW.

Columbus.—The Ohio Manufacturers' Association has changed its mind toward the state compensation law, and at its fourth annual convention O. K.'d this measure, and recommended that no change be made in the law for at least six years, or until it is given a fair trial, if a longer period is necessary. Members of the association were among the most bitter opponents of the law last year, and resisted to the utmost efforts of organized labor to secure the passage of the act.

The employers favor stronger organization, but hasten to assure the public this view is not urged for the purpose of "exterminating employes' organizations, but for the purpose of having the manufacturers' side presented."

LABOR EDITOR JAILED.

Stockton, Cal.—Five days in jail and a fine of \$250 is the sentence imposed on F. P. Lamoreux, editor of the Stockton Labor News, by Judge Norton, of the Superior Court, who found the unionist guilty of contempt because, in referring to an injunction issued by the court, he expressed editorial views as follows: "When a judge wants to do something not authorized by law, he simply makes a law to suit himself." The court held this was a contempt, and on motion of one of the attorneys for the anti-union association of employers, cited Lamoreux and several other unionists. The latter were discharged, while the editor was jailed, although the court assured him "there was no personal feeling in the matter."

STIR UP HORNET'S NEST.

Battle Creek.—The followers of one Dan Cupid are rushing to the support of this little gent because the board of education has put its ban on weddings among school teachers. The practice is verging on an epidemic, and the authorities have resolved to stop it by ordering the county clerk to refuse marriage licenses to any young woman employed in the schools, on the ground that the brides-to-be are "contract-breakers." The county clerk is "dared" to

POISONS IN INDUSTRY.

In his annual report, Chief Factory Inspector Nelson suggests that the state of Illinois is not adequately conserving the health of its working people in trades which expose them to the dangers of occupational diseases.

"The large number of cases of sickness reported in the tinware, car seal, paris green and china color transfer industries," explains Mr. Nelson, "undoubtedly cause room for anxiety. Our law is very narrow in scope and does not include all of the harmful industries in the state. In many of the industries, such as the transfer of pictures and designs on chinaware, boys and girls are employed and quickly contract lead poisoning. The children in this industry, being just above the child labor law in age, cannot be prohibited from working in this trade. This is just one instance where the law should be amended to prohibit any one under the age of twenty-one from working in any occupation where they are exposed to the dangers of trade poisonings.

"The manufacture of paris green is another industry made difficult to control under our present law. Here the danger lurks in the dust-laden air, filled with paris green powder. The use of respirators is rendered prohibitory on account of the friction around the mouth and nose. The workers in this trade within a few days become covered with ulcers on the mucosa of the mouth and nose. Almost ever case reveals scrotal ulcerations.

"Another dangerous trade is that of painting. While the painting occupation shows only a few cases of plumbism in our monthly reports, it is to be noted that only an insignificant number of painters in this state is being reported on. Almost 30,000 painters are employed in this state, yet our law does not offer them any protection except in a few cases, where they are employed in shops of carriage and automobile body makers and car shops. No one state bureau in this country nor even the United States government knows to a certainty how many painters suffer from lead poisoning, although no other trade risks greater exposure to it. No nation-wide survey of the ravages of lead poisoning in the ranks of painters has been made in this country. Our law should be amended to include this vast host of workmen and bring the same benefits to obtain as in the other industries.

"To the suggestions I have just offered as amendments to our present law should be added still another. Industrial wood alcohol poisoning attacks varnishers and furniture finishers, lacquerers and hatters. Alcohol should, therefore, be designated in the list of dangerous substances such as are enumerated in the present law.

"And, finally, the law should be made to apply to calsson workers. The increasing amount of calsson work connected with the building of bridges, tunnels, subways and skyscrapers has made the dis-

ease commonly called the 'bends' a formidable one.

"I have pointed to the vigorous enforcement of the present law and the narrow scope of the same. My numerous suggestions for amendments to the present law show that the state is not offering the most adequate protection to the working people in the many trades and occupations which endanger their health."

APPLAUD WILSON'S ANSWER.

Trinidad, Colo.—The Free Press, this city, applauds Secretary of Labor Wilson as follows because of this trade unionist's speech before the recent A. F. of L. convention:

"Answering his foes and maligners a few days ago in Philadelphia, William B. Wilson, Secretary of Labor, said:

"If securing justice to those who earn their living by the sweat of their face is partisanship, then count me a partisan on the side of the man that labors."

"You have been criticised and accused of partisanship, but only by those greedy corporations which would rob the workingman of his last right or crust that they might more the speedily and surely pile up their dividends. No one with fairness or justice in his soul has so accused you, though, and it is good to see that you possess the courage and manhood to come right back at your traducers, although it was known all along that you did own to these things.

"Your office was created in the interests of the working public. You were appointed in order that the workingman might have a friend and a word in the big works going forward at Washington. You sensed the intention of your job, and you have proved yourself the man for the job.

"It is really lamentable that the enemies of labor should live to see the day when the toiler would have a real friend in a high place. It is quite too bad that the day should have arrived when the worker should be looked after just a trifle. But that day seems to be here, and while we are vastly sorry for them, it begins to look as if this harsh and labor fighting corporation would have to swallow their chagrin and make the best of the new conditions.

"Go to it, Mr. Wilson. Every time a corporation abuses you, we are going to go right out in front, throw our hat in the air and give three cheers. Because we will know that when you are being abused you are doing your work in the right way."

HONOR A VETERAN.

Philadelphia.—Organized carpenters of this city are improving the home of Mrs. Peter J. McGuire, located at Camden. The carpenters take this occasion to again honor the memory of a trade union veteran, who founded the Brotherhood of Carpenters and Joiners and who did pioneer work in upbuilding the American Federation of Labor.

FREE LABOR COMES FIRST.

St. Paul.—Free labor must be given first consideration, is the thought behind a decision by Attorney General Smith, who has ruled on the contemplated action of the prison board in manufacturing chairs and settees of wood wrapped with prepared paper. This is proposed to furnish work for convicts in place of the prison shoe contracts, which were ended last summer.

In answer to the board's query as to the legality of this action, the attorney general said:

"The object of the law is to permit introduction in the state prison, under proper conditions, such industries as are not carried on in the state and which do not diminish the market for free labor in the state.

"If the proposed industry is to be deemed an independent industry and is not carried on in the state, then you may introduce such industries into the state prison.

"Your board should make a thorough investigation and ascertain whether it is probable that in the introduction of this industry you would not reduce the amount of the work in the state by persons not confined in prisons.

"The law must be interpreted in the light of its purpose, which is to employ a certain amount of the convict labor in some industry, provided it does not interfere with the employment of their labor in the state."

PROFESSIONAL LIST GROWS.

Washington.—In ten years the list of persons engaged in professional pursuits in this country has increased 500,000, according to figures given out by the federal census bureau. In 1910 the number was 1,825,127, compared with 1,258,538 in 1900. Of those engaged in professional occupations in 1910, 1,151,709 were males and 673,418 females. This compares with 827,941 males and 430,597 females in 1900.

During the decade the proportion of males decreased in the professions from 65.8 to 63.1 per cent, while that of females increased from 34.2 to 36.9 per cent. In 1910 there were four women to every seven men engaged in professional service, a large proportion of the women being teachers.

Some of the noteworthy increases follows. Architects, males 110.55, females 200.7; literary and scientific persons, males 102.9, females 126.0; actors, males 95.0, females 88.1. The smallest increase was in the number of lawyers, being males 6.5 and females 33.0.

SCHOOL SANITATION URGED.

Washington.—Insanitary rural schools result in physical defects which cause needless suffering and hardship in later life, says the United States public health service, in a bulletin just issued.

"The necessity of extending to rural schools the same sanitary advantages now enjoyed by urban schools is obvious," declare the investigators. "This neglect of

sanitary precautions observed in rural communities is undoubtedly due to lack of sanitary knowledge. Instructing the people in the value of sanitation will naturally serve to make them adopt measures such as are now in force in cities for the proper construction and maintenance of school buildings and the regular medical inspection of school children. School hygiene has a great economical value, in that it serves to prevent the spread of disease and makes the children now in the schools healthier members of the community and the country at large."

WATCH NEW CONSTITUTION.

Brooklyn, N. Y.—The Central Labor Union will recommend to the executive board of the State Federation of Labor that it agree upon certain measures to be embodied in the new state constitution. The state body will be asked to appoint a special committee on constitutional convention to work for labor measures when the convention meets, and in the meantime to become acquainted with the demands of organized labor, that same may be properly presented. It is further suggested that a special convention of New York trade unionists be called at Albany next spring, while the constitutional convention is in session, to consider a platform and a program.

NAVY YARD ECONOMY PRAISED.

Washington.—That the gunboat *Monocacy* was built by the government at the Mare Island (Cal.) navy yard, transported to Shanghai, China, and there re-erected by contract at a cost totaling only two-thirds of the sum asked by private ship builders, is one of the references on navy yard economy found in the annual report of Rear Admiral Watt, chief of the bureau of construction and repair of the navy.

"There is now a greater value of new ship building work in progress and authorized at navy yards, and a larger number of navy yards so employed at new construction than ever before in the history of the new navy," the report declares.

PEONAGE LAW ILLEGAL.

Washington.—The United States Supreme Court has held that the code of Alabama, which permits peonage, is unconstitutional because it conflicts with the thirteenth amendment of the Federal Constitution. It was charged that one J. A. Reynolds held E. W. Fields in peonage to work out a debt, and that Reynolds had Fields arrested, according to law, for the purpose of compelling him, by involuntary servitude, to pay the debt.

The defense was that Fields was convicted and fined by a court for selling mortgaged property, after which the court allowed Fields to confess to judgment in accordance with the Alabama law, which was questioned in this case. Fields signed a contract to "work out" the debt, but later refused to abide by it, and was arrested.

CITIZENS MUST BE AROUSED.

Boston, Mass.—In a public address, Health Commissioner McLaughlin declared the average American citizen would not obey a sanitary order unless its purpose was understood. "Once the matter is made clear to him," said the speaker, "his is no perfunctory compliance." To make this possible, it was urged that a campaign of education be started. The health official said:

"The press, the pulpit and the schools can all be made powerful factors in this campaign for better hygienic conditions. Settlement workers, nursing associations and other philanthropic agencies can be enlisted.

"Certainly one of the most important agencies is the public school. I know of no field so promising for public health instruction as the public schools, and especially the lower grades.

"We tested this plan thoroughly in the Philippines in time of cholera epidemics, and this was the most effective way of reaching the parents in the poorest homes."

TO PAY UNION RATES.

St. Louis.—An ordinance providing for union scales of wages on city work is now before the mayor for signature, and it is believed by local organized workers same will be approved. The ordinance calls for the payment of wage rates "as shall from time to time be the prevailing rate for such mechanics and laborers, respectively, as are members of organized labor unions in said city." It is further provided that: "For the purpose of ascertaining such prevailing rate of wages, from time to time the officers charged with the duty of employing such mechanics and laborers shall be and are hereby authorized to resort to and make inquiry of the executive officers of such organized labor unions and to fix from time to time the rate of wages to be paid to such mechanics or laborers employed by the city so ascertained to be the prevailing rate among members of such unions."

SURVEY FOR ALASKA RAILROAD.

Washington.—Chairman Edes, of the commission named by Secretary of the Interior Lane to select routes for the proposed government-owned railroad in Alaska, has returned to this city after a field survey, and is now preparing a report on prospective routes. It is believed the commission will also recommend the government taking over the Copper River or the Alaska Northern railroad.

WILL ACT TOGETHER.

Oklahoma City, Okla.—The joint legislative board, consisting of representatives of the State Federation of Labor, Farmers' union, and the Brotherhoods of Engineers and Firemen, will meet in this city, December 15, for the purpose of framing remedial legislation to be introduced at the next session of the state legislature.

STATE DECLARES DIVIDEND.

New York.—The workmen's compensation commission has authorized the state insurance fund to "announce that it expects to declare dividends averaging 15 per cent on the business of the six months' period, July 1 to December 31, 1914."

It is also announced that "employers who placed their insurance in the state fund will save, on the basis of initial rates, 8 1-3 per cent below the rates of the liability companies, and prospectively 15 per cent dividends, approximately \$250,000, on the cost of their insurance for the first six months, as compared with what they would have been obliged to pay if insured in stock companies. On the other hand, employers who elected stock company insurance will pay, according to the same estimate, at least \$1,250,000 more than their insurance would have cost them in the state fund."

It is stated that readjustments of rates for the next six months' period will be made, and this will reduce the state fund charges 20 per cent below those of liability companies.

URGE BOYS TO JOIN UNION.

Detroit, Mich.—In an address to union newsboys, Judge Jeffries, the well-known police court official of this city, said:

"The world has come to the point where we must belong to some kind of an organization in order to exist. Men in unions are getting high wages because they are in an organization. They are getting wise, and they are learning that by combination they can get better conditions. You boys, as you come together, one, two and three, help yourselves. The world is no longer beginning to rate men by physical strength. Some men accumulate fortunes and don't know how to spend them. What we want is to let all have better houses, better food and better clothing."

BLOCK ARMOR INQUIRY.

Philadelphia, Pa.—Armour plate manufacturers in this state have blocked every effort of the congressional committee to secure information that will enable congress to determine whether the government should erect mills and manufacture its own armor plate. While the steel magnates have been placed on oath, the committee has practically failed in its purpose. The manufacturers defend their position on the ground that the United States is their competitor, and will be treated as such.

COLLECT COMPENSATION.

Waterbury, Conn.—While collecting insurance, Henry J. Larke suffered a freezing of the nose and nasal tissues, resulting in erysipelas, from which he died last March. His widow sued the company, and in a decision just filed by Compensation Commissioner Williams, it is held that employes subjected to excessive cold, which results in injuries or death, can collect compensation.

WAR BUDGET GREATEST YET.

Washington.—Appropriations aggregating \$104,124,512, to carry the army through the coming year, are proposed in estimates which the war department has completed for submission to Congress. This is an increase of \$3,105,300, over the total carried by the army bill for the current year, although reductions are made in the allowances for many branches of the service.

A new item of \$100,000 for purchase of automatic rifles is asked. Altogether \$2,900,000 is sought for ammunition, compared with \$3,000,000 carried in the current law. For field artillery for the organized militia \$2,000,000 is asked, \$2,100,000 having been appropriated last year.

The estimates of the navy exceeds last year's total of \$145,000,000 by about 1,000,000. This department also wants an increase of 240 additional officers and about 4,500 men to fully equip American warships.

COMPLAIN OF DISCRIMINATION.

Washington.—Clerks and draftsmen employed by the government in Washington and at other navy yards and naval stations are discussing methods to secure a thirty days' annual leave, enjoyed by other classified civil service employees. The complaining workers are now only given fifteen days, and in the event of a failure of the department officials to equalize the leaves, it is said Congress will be appealed to.

EXTEND COMPENSATION ACT.

San Francisco.—The state industrial accident commission has ruled that an employe is protected by the state compensation act when he enters the employer's premises,

even though the accident occurs outside of working hours. This decision was made in the case of a worker who was being conveyed to his place of employment in a vehicle owned by the employer. The horse took fright and overturned the wagon, injuring the worker. The commission held the injured man was technically on the premises of the employer and awarded damages.

TO TEST WOMEN'S LAW.

Washington.—Briefs have been filed in the United States Supreme court attacking the constitutionality of the Oregon minimum wage law for women. Summed up, the briefs hold that such legislation is beyond the power of a state, is unsupported by public opinion, would be destructive of business, and would increase the cost of living.

Noncompulsory legislation in Massachusetts and Nebraska is approved in the briefs, but the compulsory legislation in Oregon, Washington, Colorado, Wisconsin, Minnesota, California, and Utah is condemned.

WIRELESS TO RUN TRAINS.

Scranton, Pa.—After a six months' trial, officers of the Delaware, Lackawana & Western railroad announce that they will replace the wire system of telegraphy for wireless telegraphy in the operation of their passenger trains between Hoboken, N. J., this city, and Binghamton, N. Y. It is said that the company is equipping a wireless station in Buffalo, and when this is in operation the transportation department will be able to communicate direct from its western terminal to its eastern terminal, Hoboken.

Among Our Exchanges.

TEMPERANCE, NOT PROHIBITION, IS DEVELOPING THE HIGHEST FACULTIES IN MAN.

Have you not often wished to be able to get away from the humdrum of work, of business, the routine of public, and even, at times, of home life? Have you not asked yourself, if there is really nothing else in this world but hard work and the hunt for the dollar? Have you not longed for a quiet retreat? Have you not gone out with your wife to theater or country, or to a cozy corner in a comfortable eating house, and reveled once more in the blissfulness of exclusive companionship, as you did while you were engaged, or almost so, and not yet married?

"It is foolish and unjustifiable to put a stop to even the most moderate enjoyment or the aforementioned stimulus" (alcoholic drink), quotes Prof. Lafayette B. Mendel, of Yale University. "One does not need to have recourse to the argument that the inclination to acquire it in some form or

other is really the expression of an inextinguishable human instinct which has made itself felt in all ages and by all peoples. One needs only to ask: 'Must our machine, then, always work in the same monotonous, tiresome tempo as the pendulum of a clock? What harm is there if from time to time it pumps somewhat more quickly under a high pressure of steam it, subsequently, during a period of slower work, it can make good this slight unnecessary expenditure of force by drafts from an abundant store of energy, and repair any small damage which its mechanism may have suffered? It is certainly a fact that many a bright fruitful idea has been born from a bumper of fragrant Rhine wine which, perhaps, would never have come from the water jug of a vegetarian. Many a bitter heartache, which would have eaten deeper and deeper by drinking raspberry lemonade, has been softened by a nice cup of coffee; many a trouble, many a care, has disappeared in the smoke of a cigar—and

that is surely worth something in this poor human existence."

It is not he who indulges temperately in alcoholic drink that produces or promotes crime, insanity, poverty or other misery. Rather is it he who would deprive us of part of the joy of living, for he is responsible for that spiritual starvation from which much of this misery and wrong-doing spring.

Time was when the enjoyment of physical existence was the chief aim of living men. With the growth of higher moral ideas came the knowledge that this could not be all there was in life. Unrest took hold of the ancient world, there were protests against the sensual life on the one hand, while the great accumulations of wealth led to greater indulgence on the other hand. Out of the mysticism of the East came the great religious revolution, and the medieval church, going to the opposite extreme, condemned all enjoyment of physical existence.

In the present day we are beginning to see that here, as in other things, truth lies midway—temperance. We see that the men of the middle ages went too far in the reaction from extreme sensuality when they contrasted the "prince of this world" with the prince of the spiritual world and condemned all enjoyment of life as being of the flesh and the devil. We are beginning to see as, according to the biblical account, the Creator saw in the beginning, that the world is good, and we, being in and of the world, have a right to enjoy it, not in the old animal and sensual way, by abandoning ourselves to the lusts of the flesh, but in that temperate way which becomes civilized man.

The prohibitionist has taken only the first step from the ancient days. He remains standing on the ground of medieval morality. For him there is either swinish indulgence or ascetic abstinence and self-mortification. He has not yet taken the second step which would place him in the full sunlight of modern ethical thought recognizing the propriety of temperately enjoying this world as not only compatible with, but conducive to, the development of the highest faculties of man. It always ends in the same thought—temperance—
Ex.

THE SUN AND THE WIND.

Turn back your memories to the old school days, and turn over the pages of the second reader, and you will find the story of the Sun and the Wind. You all remember it. How the Sun and the Wind met one day, and the Wind began to boast about its strength, and challenged the Sun to match forces. The Sun accepted.

"See that old man," said the Wind. "I can take that coat off of him much quicker than you can." So the Wind started. The Sun went behind a cloud, the temperature dropped and a fierce gust of wind swept

round the old man. But the harder the wind blew the tighter the old man buttoned his coat, and the tighter he clung to it, until finally the Wind gave up in despair.

Then the Sun came out from behind the cloud, and cast its mellow golden beams upon the silvery hair of the old pedestrian. The old man mopped his head with his handkerchief. Soon he unbuttoned his coat, and at last as the Sun broke upon him in one grand smile of warmth he took off his coat and placed it on his arm.

The Brother in the Labor Movement who you think wears a coat of prejudice because he does not exactly agree with you on every fine point of economics and tactics, his friends say is but a little strong minded. Perhaps you yourself are not wholly without fault. One thing remember you can never make him change that coat by blowing and blustering at him, and telling him he is positively wrong.

Why not try a little sunshine? Why not cultivate his acquaintance, and talk things over with him. You will find that the average man you consider prejudiced has some mighty good ideas of his own. Ideas you have never dreamed of, and which it will benefit you to know about.

There is need of a lot more sunshine in the Minneapolis Labor Movement, and of a lot less bluster and wind.—Labor Review, Minn.

REAL WORK TO DO.

No one should think himself privileged to give his time and ability to amusement only. Everyone has a duty in the world to be of use to himself and to those with whom he has to do. The most satisfactory life is that which has been of most benefit to his fellow man. It is not only in great things that this duty calls. There are boys and girls to whom a word given at the right time might be the means of putting them on a better path. There are the old who are wearied and discouraged in the life struggle and to whom a word of appreciation gives real joy. A cheerful little chat does much to brighten the day for an old person. There are sick to be cheered and encouraged; there are neglected ones who would be made happier by some timely little attention. The eye should be kept open and the ears alert that no opportunity of doing a good, kind deed may be lost. To bring happiness in place of sorrow, to relieve suffering, to guide the wayward—this is leading a useful life. No one who lives rightly, can live for himself alone.—Milwaukee Journal.

SPIES DISCOVERED IN LABOR COUNCIL IN AN OHIO CITY.

American Federation of Labor Organizer Howard Keating, sprung a real sensation at Akron, O., when he notified the Central Labor council that H. E. Ellis, financial secretary of that body, and B. Furey, corresponding secretary, were spies in the pay

of the employers of that city. Ellis made a confession implicating a number of supposed union men and women who were also drawing pay as spies.

Those spies are held responsible for many of the controversies arising between the employers and workers in the Ohio city.—Detroit Labor News.

REPLIES TO NAVAL CRITICS.

Secretary Daniels Declares That Navy Is in Fine Shape.

Washington.—Statements made by Senator Lodge and Representative Gardner, Massachusetts, regarding the need for an investigation of the nation's military and naval defenses, brought responses from Secretary of the Navy Daniels.

Referring to Representative Gardner's statement that there were only fifty-eight long range torpedo tubes in the navy, Secretary Daniels asserted that inasmuch as these tubes can be used only on the new ships beginning with Nevada and Oklahoma, the navy was really preparing in advance instead of being delinquent in this respect.

"Senator Lodge has been a member of the naval affairs committee of the senate for many years," the statement says, "and if he knows, as he says, what we have, why does he want an inquiry? Congress determines what the navy shall have. We have been making progress and the navy is in fine shape."—Daily Paper.

BAD TEETH A CAUSE OF CANCER.

Constant irritation of any part of the body is now well recognized as an important contributory cause of cancer. One of the forms of irritation which has been repeatedly observed to result in this disease is the constant friction of the sharp edges of bad teeth or of imperfect plates against the sides of the tongue. To be sure, sores on the tongue caused in this way do not always become cancer. Neither are wounds from toy pistols always followed by lock-jaw. But there is danger in both cases, and it is as easy to avoid it in the one as in the other. A bad tooth should never be tolerated in any event, and the danger of cancer is only one more good reason for having it attended to. Cancer of the tongue may occur at any age, but it is most common between 40 and 60. Statistics show very few cases under thirty. The majority of these cases occurred in females, while in later years males were found to be more frequently attacked. Cancer of the tongue in young subjects is especially fatal. Out of thirty cases there were only two recoveries. The others died within ten months or could not be traced. As one-third of all the cases investigated have been shown to be definitely associated with jagged or decayed teeth or imperfect plates it would seem that here, at least, is one method of preventing cancer. It is probable that other conditions occurring in combination with the bad teeth increase the likli-

hood of cancer of the tongue as a result, but the removal of this form of irritation is so simple a matter that deaths in cases of this kind must be mostly charged to pure neglect. Where a sore place caused by a jagged tooth does not promptly heal there is real danger of cancer. If the removal or treatment of the tooth does not relieve the situation and the ulcer continues, prompt operation is necessary, for this form of cancer is quickly fatal.—Journal, American Medical Society.

BOILER MAKERS' BANQUET PROVES A BIG SUCCESS.

About two hundred members of Boiler Makers' Local 317 enjoyed a banquet at the Labor Temple Wednesday evening. Practically all of the members of the organization employed in the oil fields were present. Automobile stages were run to Pond and Taft to bring the boys in and take them back to their work.

At 7 p. m. a business session was held and following the business meeting which ended at 9 o'clock the banquet was served in the main hall at the Temple. From 10 o'clock until midnight the boiler makers and their guests partook of the sumptuous dinner which had been prepared and was served by a crew of caterers from the French Cafe under the direction of Jack Wallace.

W. W. Harris, editor of the Union Labor Journal, acted as toastmaster and among the speakers who responded were William Jones, secretary of 317; J. Thompson Stanton, president of the Labor Council; R. W. Henderson; Barclay McCowan, district attorney-elect; J. J. Fitzpatrick, Tommy Egert, Richard C. Miller, Coral F. Roberts, associate editor of the Union Labor Journal, C. B. Dantelson, Arch Dixon, coroner-elect; Frank Walker and J. W. O'Connor of the Boiler Makers' organization.

The meeting was called to order by John Dick, international organizer for the Boiler Makers, who stated that the purpose of the banquet was to afford the members of Local 317 working in this jurisdiction to have an opportunity to meet with local representatives of organized labor and express to them their appreciation of the efforts of the local union men in behalf of the Boiler Makers in the strike early in the present year.

Many were the appreciative remarks addressed by the speakers to the Boiler Makers who are accredited with having one of the most militant and at the same time most efficient organizations in the country.

Selections on the piano were rendered by Professor Mott which were among the most appreciated features of the evening.

A flash light picture was taken by artists from the Marcell studio. Those desiring a picture can secure one at the studio.

The banquet was in every way a success and will long be remembered by members of 317 and their guests.—The Union Labor Journal, Bakersfield, Calif.

WHY SHOULD LIGHT COME FROM LEFT SIDE.

The well known fact that, when using the eyes for any near work, the illumination should come from the left side rather than the right is often disregarded. Let anyone who considers the matter of little importance once demonstrate to himself the difference and he will never forget it. Take a pencil and paper and try to write while in such a position that the light will fall from the right side. The shadow of the hand or pencil or both is thrown on the paper in such a way as partly to cover the characters one is making. This necessitates a closer viewpoint and a conscious strain on the eyes. Now let the position of the writer be reversed so that the light falls on the work from the left side. He will notice that the shadows fall away from the work he is doing and leaves the field unobscured. In making the change he cannot help but notice the feeling of ease that immediately is experienced by the eyes. This applies to any other kind of near work in which the fingers work under the guidance of the eyes. This fact should be remembered in planning school-rooms, workrooms, offices and any places where steady close work is to be performed.—Journal American Medical Society.

THE "AIR TOWEL."

Agitation for the suppression of the roller or common towel for public use has swept over the entire country, as it is considered a menace to public health. Shortly after the elimination of the public drinking cup by all authorities, the crusade on the common towel in public places started, and some ten months ago Massachusetts, Ohio, and Michigan passed laws prohibiting its use; since then more than thirty states have made similar laws.

The common towel was succeeded by the paper towel, the use of which requires, besides the initial expense of the towels, an attendant to supply fresh and remove soiled and wet towels from the lavatories. Now the last word in economical and sanitary innovations is the "air towel" used in the large public lavatory in the District Building at Washington, D. C. This "air towel," or electric hand drier, is the invention of J. M. Ward, superintendent of the District Building. In appearance it resembles a rectangular box 11 by 13 inches set on a sanitary base having 12-inch legs, with an opening in the top of the case in which the wet hands are held while being dried. The device consists of a blower that forces air through an electric heating element to ducts and deflectors suitably placed for distributing the warmed air to all parts of the hands at the same time, and is operated by a foot lever or pedal, which in turn operates a quick-acting switch, thereby setting the blower in motion; by removing the foot the device is put out of operation: the hands come in contact with no part of the device, thus assuring a perfectly sanitary operation.

It takes just thirty seconds to dry the hands, and although this seems long while standing with the hands in the drier and practically unoccupied, tests have shown that the ordinary operation of drying the hands with a towel consumes more time if the hands are to be dried as thoroughly as by the electric drier. Being dried perfectly, there is no unpleasant sensation.—The Granite Cutters' Journal

LEARNING TO KNOW EACH OTHER.

In the school house in Bellevue, Wis., a few evenings ago, upon motion of the Catholic priest, the Methodist minister was elected president of the community's social center for the coming winter.

Then three basket ball teams were formed, including the priest, the minister, the blacksmith, the editor, a farmer, the keeper of the village restaurant, a dentist, a clothier, a teamster, a druggist, a garage owner, the banker, the saloon keeper, a hardware merchant and a house painter.

They differed in religion, in politics, in incomes, in social status, about as widely as men can differ. But in the common school building, in the free democracy of the social center, they agreed to lay aside their differences for the novel purpose of discovering how much good fellowship there was in meeting together, now and then, as equals, as brothers.

In the democracy of play, in the democracy of rank, fair discussion of public questions, they are finding out, these differing men of Bellevue, that, as human beings, they're amazingly alike, once you get below the surface.

And out of this agreeable discovery will come, for Bellevue, more tolerance, more kindness of feeling, more give and take, than it had ever known before. Even when they shall differ again—as of course, they often will—it won't be with as much bitterness, as much bigotry, as much mean hate, as of yore.

It's a wonderful solvent, is brotherhood.—Stockton Record.

THE FREIGHT RATE DECISION AND PUBLIC OWNERSHIP.

For the benefit of the railroad corporations the Interstate Commerce Commission has consented to the levy of a special tax on the already over-burdened industry of the United States. That is what the 5 per cent increase in freight rates means. The action taken is not surprising, in view of the heavy pressure brought to bear upon the commission for many months. Resistance to such pressure was difficult, and this fact should be borne in mind in passing judgment on its action. But clearer than ever, through this decision, is it shown to be a fallacy that in public regulation is the solution of the public utility question. For a while it seemed as though the Interstate Commerce Commission had furnished an example of a regulative body that actually regulated. But the very restraint it

put on the predatory tendencies of the railroads must have stirred these corporations to stronger efforts to subdue of commission. These efforts seem finally to have met with success. The two latest appointments evidently strengthened corporation influence. Even in the case of so efficient a body as the commission, it is now shown possible for the regulators to fail to regulate. How can anything better be expected, then, of the many public service commissions, created to evade application of the real remedy for franchise monopoly—public ownership? The commission's decision, however, is a severe blow to the cause of private monopoly of public highways. It makes clear that nothing but public ownership of railways can prevent railroad domination of government.—The Public.

THE RIGHT OF PETITION MUST NOT BE ABRIDGED.

Is the right of petition guaranteed in our constitution a paper right or one that may be invoked by every citizen? Does a government employe alienate this right because he works for the government? If they have not the right to petition for redress of grievances, how do they differ from the subjects of an absolute despotism? Free men cannot with safety give up the right of petition or the right of self-protection, whatever the nature of their employment. The railway mail clerks charge that they have been denied this right. Some time ago the railway mail service introduced a system of "scientific efficiency" based upon the stop-watch and time study researches. The motions and the reactions of the clerks were noted and timed by "experts" in efficiency who stood guard with stop-watches in hand. The clerks were treated like machinery, to be speeded up to the highest rate possible. They charged that the real purpose of this humiliating treatment was to establish standards to prevent many from securing promotion.

The railway clerks exercised their constitutional right and sent petitions to representatives and senators, protesting against the efficiency system. Meanwhile Senator Borah had introduced a bill prohibiting a time study of the movements of employes by means of a stop-watch or any time-measuring device and also prohibiting payment of a premium or bonus as wages.

In September Mr. Alexander H. Stephens, general superintendent of the railway mail service, made a speech in Indianapolis, in which he said:

"And let me tell you that anybody that signs that petition with that statement is up before the General Superintendent of this service for removal for lying. Tell your fellow clerks that. I do not think any of you gentlemen in Indianapolis have signed that petition, but whoever signs it is going to come up before the General Superintendent for removal."

Such a threat was a gross, illegal and tyrannical interference with the constitutional rights of the railway clerks, rights which are peculiarly valuable to them, since they are denied the usual methods of redress used by employes in private industries. So pressing were the needs of these clerks and so great was the coercion exercised by the superintendent that many of them wrote to Senator Borah, asking to have their names removed from the petitions. These letters state directly or indirectly that the writers cannot afford to imperil their means of earning a livelihood.

This is indeed a serious situation and should be carefully and thoroughly investigated by the Senate Committee on Education and Labor, to which the letters were referred.

So great a value did our forefathers who established the independence of our country put upon this right that they demanded it to be put in the amendments to the constitution. The following is the first amendment:

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances."

This right of petition is a right necessary to a free people and must be maintained inviolate. The railway mail clerks must and will be protected, and they themselves must insist upon their rights.—American Federationist.

THE GIRL AND THE YOUNG MAN.

No girl who respects herself will accept from a young man attentions which she knows he is not able to give. When a young man on a \$15 a week salary splurges around on a \$15 a day basis, something is wrong, and the girl who allows such a young man to spend money for her entertainment is indirectly a party to the wrongdoing of which he may be guilty. A case in point is a young man, only 18 years old, who has been brought back from Toronto to New York, charged with the theft of \$4,000 worth of jewelry. His first stealing he confessed, was to "make a front" with a girl at a dancing contest. He took a pin and a ring from his employer, expecting to return them. He never did return them, and this first theft, made in order to shine with a "little beauty" at a dancing contest, led to many other thefts for himself and others. No one would be foolish enough to seek to excuse a young man for stealing in order that he might make a dashing appearance in a tango. The less obvious moral we would draw from the incident is that a girl is not using her influence as she should when she countenances or encourages extravagance in a young man.—Leslie's Weekly.

SPOTS BEFORE THE EYES.

The prevalence of this condition has given rise to a great many curious ideas. Almost everyone either sees fixed or floating spots at times, or hears some friend complain of these conditions, so that it is not strange that many misconceptions have arisen. The commonest form of floating spots are those which are known by the name of *muscae volitantes*, an old name which indicates how long the condition has been observed. These are tiny transparent chains, or strings, which are seen especially on a white or brightly illuminated field. They persistently float in the line of vision, and though a shake of the head may carry them out of the way, they at once float back again. These spots are probably caused by the remains in the fluid part of the eye of certain cells which should have been completely absorbed in the development of the eye. They never lead to impairment of vision and, as before stated, are perfectly transparent. Other floating spots are due to cob-web-like masses of inflammatory material which are thrown out into the fluid of the eye by some low grade inflammation.

These spots usually obscure the vision, which is their great point of difference from the former ones. It is, of course, very important to find out in any case whether the spots are due to inflammation or not, and this can only be done by a skilled observer. It is a prevalent idea that the wearing of a dotted veil may leave permanent spots in the field of vision. While the dotted veil may be a source of strain by causing the wearer to pull on the eye muscles in order to avoid the obstruction to vision, it certainly is not the case that the dots, or any other object seen, can be permanently photographed on the nerve tissues of the eye. There is only one exception to this statement. Many people who have carelessly looked too much at the sun, generally in observing the eclipse, have actually produced a slight inflammatory change in the retina, so that there is always a blurry spot wherever they look. But it is doubtful if any light less brilliant than the sun can produce a permanent spot, and certainly a dark object cannot do so.—Journal of the American Medical Association.

News of General Interest.

A COMMUNICATION FROM THE SECRETARY OF THE AUSTRALIAN BOILER MAKERS AND SHIP BUILDERS' UNION.

Note.—The following communication was received from Secretary O'Toole of the Australian Union, which was in response to our letter of greeting after having secured his name and address in one of our foreign exchanges, and is reproduced for the benefit of our members.—The Editor.

Newcastle, October 29, 1914.

James B. Casey, Esq.,
Editor-Manager Boiler Makers' Journal,
America.

Dear Sir and Brother:

I have to acknowledge receipt of your favor of August 31, which reached me a few days ago; also the two copies of your official journal, for which I thank you.

I regret to say that I cannot return the compliment, as we in Australia have not yet published a journal or report, but I hope to be able to do so in the very near future.

I shall be very glad to have a copy of your constitution, as you were kind enough to suggest, and I will forward under separate cover a copy of our Interstate Conference, which was held in 1911 and a second one in 1913; the former contains a copy of our rules, but in this connection I have to state that at the present time we are having them revised by our legal advisers, as in their present form they are not quite in accord with our Federal Arbitration Act, etc.

I inclose a couple of our balance sheets, which may be of interest to you.

I have read your journals with interest, and will be greatly obliged if you could forward them to me regularly, and expense in connection with the matter will be gladly borne by me.

A brief outline of the career of our society may also be of interest:

For a number of years the Boiler Makers in Australia carried on in their respective states in their own particular way without any connection with each other whatever. In October, 1902, an Interstate Conference was held at Sydney, N. S. W., at which representatives of the Societies in N. S. Wales, Queensland, S. Australia and W. Australia were present. The result of this conference was that a federal funeral fund was established and it was agreed that each state should contribute the sum of 4/4 per annum for each financial member on their books towards this central funeral fund. Further conferences were held in 1905 and 1908, and although the question of a closer amalgamation was debated at these conferences, nothing tangible was done in the way of bringing the societies together before the Interstate Conference, which was held in 1911. As a result of the deliberations at this conference a Federal Council was established and they took over the control of the Federated Boiler Makers and Iron Ship Builders, etc., was then registered as an industrial union, with the Federal Arbitration Court.

We have at the present time 15 branches of the society in Australia, with a total membership of about 2,900.

Each branch still controls its own finances and is empowered to make its own rules to suit local requirements, provided such rules do not infringe on the federal code. The Council is sustained by a fee of 2/2 per member per quarter, which is paid by each branch for the members on the books at the end of each quarter. We have a system of clearances which hold good all over Australia and members benefit accordingly. Each state has its own industrial legislation, which differs very largely so that we have found it extremely difficult to set up a constitution which will meet the peculiar requirements of each state. The Federal Arbitration Act is of little or no use to us in its present form, so that up to the present we have not bothered about trying for a federal award for Boiler Makers. In N. S. W. we have a Wages Board system which has contributed largely to our difficulties, as there are no less than 12 tribunals which have boiler makers' condition included in their constitution. Although we have fought hard and spent much money we have not been successful in altering this condition of affairs.

We are working along the line of amalgamating the funds of the branches and ultimately having one central board of control, this I hope to see achieved ere long.

I shall be very glad to communicate with you at any time and to afford you any information as to Australian conditions of labor so far as boiler makers are concerned.

I read with interest your report re the Boiler Inspection Act, particularly as we have for a number of years been trying to have such a measure introduced into our legislation here, but without success up to the present. All our states have a Boiler Inspection Act but N. S. Wales have not placed such desirable act on their statute book yet. The railway systems being state-owned have competent boiler makers for the periodical inspection of locomotive boilers and as a result of their strict inspection very few boiler accidents have occurred. I sympathize with your desires to have competent boiler makers appointed as inspectors; we have had the same trouble with the marine inspections, where invariably an engineer is appointed, as he inspects the machinery as well as the boilers and hulls of steamships at their bi-annual inspections.

The matter of an acknowledgement of transfers or clearances will be placed before my executive at the first opportunity and personally I should like to see the arrangement accomplished.

I have only recently taken over the secretaryship of the Council and I am trying

hard to bring our organizations closer together than they are at present.

With fraternal greetings from Australia to our comrades across the sea and with best wishes to yourself, I am

Yours fraternally,

JNO. O'TOOLE,

Secretary Australian Federal Council.

NAPOLEON.

(By Robert G. Ingersoll.)

A little while ago I stood by the tomb of the first Napoleon, a magnificent tomb of gilt and gold, fit almost for a dead deity, and here was a great circle, and in the bottom there, in a sarcophagus, rested at last the ashes of that restless man. I looked at that tomb, and I thought about the career of the greatest soldier of the modern world. As I looked in imagination I could see him walking up and down the banks of the Seine contemplating suicide. I could see him at Toulon; I could see him at Paris, putting down the mob; I could see him at the head of the army of Italy; I could see him crossing the bridge of the Lodi, with the shadow of the Pyramids; I saw him returning; I saw him conquer the Alps, and mingle the eagles of France with the eagles of Italy; I saw him at Marengo; I saw him at Austerlitz; I saw him in Russia where the infantry of snow and the blast smote his legions, when death rode the icy winds of winter. I saw him at Leipzig, hurled back upon Paris; banished; and I saw him escape from Elba and retake an empire by the force of his genius. I saw him at the field of Waterloo, where fate and chance combined to wreck the fortunes of their former king. I saw him at St. Helena, with his hands behind his back, gazing out upon the sad and solemn set; and I thought of all the widows he had made, of all the orphans, of all the tears that had been shed for his glory; and I thought of the woman, the only woman who ever loved him, pushed from his heart by the cold hand of ambition—and I said to myself as I gazed: I would rather have been a French peasant and worn wooden shoes, and lived in a little hut with the purple grapes growing red in the amorous kisses of the autumn sun—I would rather have been that poor French peasant, to sit in my door, with my wife knitting by my side and my children upon my knees with their arms around my neck—I would rather have lived and died unnoticed and unknown except by those who loved me, and gone down to the voiceless silence of the dreamless dust—I would rather have been that French peasant than to have been that imperial impersonation of force and murder who covered Europe with blood and tears.

BURLAP WRAPPINGS ON STEEL PIPE.

By Frank C. Perkins.

The use of saturated burlap wrappings on lock bar steel pipe as utilized at the West Jersey Pipe Works at Paterson, N. J., may be noted in the accompanying illustration. It is claimed that the use of insulating wrappings for large water mains prevent corrosion and are useful in the mitigation of electrolysis of buried pipe and either underground structures with complete insulation by impervious wrappings possess great practical merits.

Greater mechanical strength of the common protective coatings against abrasion is secured during transportation and installation if some sort of fabric is wrapped around the pipe. The effective thickness of pro-

Where the pipe has been dipped in the mineral rubber coating and the coating has sufficiently set to prevent flow in the subsequent operations, it is wrapped with 10-ounce Calcutta burlap cut into strips 18 inches wide. The pipe is placed on centers of the wrapping machine where it is carried on the reel of a carriage traveling longitudinally during the rotation of pipe.

It is drawn from the reel by the revolving pipe through a tank containing a hot solution of mineral rubber pipe coating and is then wound spirally on the pipe, the burlap being lapped upon itself to about the width of an inch. The tension of the burlap while winding is sufficient to cause the burlap to lap close and snug on the pipe, but not enough to strain or tear it.

tection is also cheaply increased. At first the pipe is dipped in the regular pipe coating (mineral rubber) as usual, and after this coat has set, it is sent to a wrapping machine in which the pipe is rotated on centers. The bed of a lathe-like machine carries a shallow pan containing pipe coating maintained in a liquid condition by a furnace built under the pan. A carriage travels longitudinally over the pan, carrying burlap strips 18 inches wide and wound on a reel.

This is unwound from the reel and wrapped on the pipe by the rotation of the latter and in traveling from the reel to the pipe the burlap is passed, by means of guide rolls through the coating in the pan so that it becomes thoroughly soaked. The combination of the rotating motion of the pipe and the longitudinal travel of the carriage results in giving the pipe a spiral wound burlap covering with a lap about an inch and strongly adhesive to the pipe.

The wrapping is kept back far enough from the ends of the pipe to leave the rivet holes accessible and not interfere with the making of the field joints.

After the pipe is laid, riveted, calked and tested, the field joints are wrapped with one wind of the burlap which has been immersed in field coating. This insulated pipe has been used $\frac{3}{4}$ and $7\frac{1}{2}$ feet in diameter by the cities of Winnipeg, Minneapolis and Montreal. The cost of this wrapping is from 35c to 60c per foot of pipe.

DISCUSS WORKMEN'S COMPENSATION.

Philadelphia.—With more than two hundred delegates in attendance from all parts of the country, the American Association for Labor Legislation opened its eighth annual meeting here today at the Hotel Walton, with a joint session with the City Club of Philadelphia, for the discussion of work-

men's compensation measures. The meeting was opened by the reading of a message from Dr. Martin Brumbaugh, governor-elect of Pennsylvania, on Pennsylvania's opportunity to enact an adequate workmen's compensation law in 1915.

Congressman Daniel J. McGillicuddy, of Maine, spoke on "Workmen's Compensation for Federal Employees," a modern bill for which he has introduced in the House of Representatives. "In a 330-page report," said Mr. McGillicuddy, "the Federal Bureau of Labor Statistics recently described the first five years' operations under the present out-of-date and inadequate compensation law for federal employes. The report showed that fractures of an arm or a leg have led to payments in amounts less than \$25, the loss of an eye in amounts varying between \$25 and \$50, and in a case of the loss of a right arm the injured workman was entitled to a payment of less than \$50, while in three cases of the loss of both legs the average compensation was \$377.40. No other country, furthermore, offers to the widow and children of an employe killed in its service an amount so pitifully and disgracefully small." The new bill, Mr. McGillicuddy continued, has been drafted with great care to supplant the existing law. It covers all civilian employes of the government, it provides compensation for occupational diseases as well as for accidental injuries, and establishes a scale of 66 2/3 per cent of pay during disability.

John Mitchell, of the New York State Workmen's Compensation Commission, gave a brief statement of the successful operation of the New York law, the most liberal as well as one of the newest in the country. "The State Workmen's Compensation Commission of New York," said Mr. Mitchell, "is handling compensatable claims under the new law of that state at the rate of 70,000 per annum, and first notices of injury at the rate of over 200,000 per annum. The commission is now able to keep up with its business, which is creditable in view of the fact that the compulsory law became effective on a given day in July, and the full onslaught of the state's business was felt by the commission. Naturally, there still remain some crudities to be worked out, and a few exasperating delays, but the progress of organization indicates that within a few weeks everything will be running smoothly.

"It may be said that the law gives general satisfaction, with the possible exception of the matter of insurance rates, which experience is proving to have been too high. But this is the common experience of every state adopting such laws. Lack of compiled statistics compels the rate makers to put themselves on the safe side, and a rate to be safely high must be too high. However, in the administration of the state insurance fund the commission has been able to declare a general average of 20 per cent,

reduction in rates, and in addition to that to refund 15 per cent dividend upon business of the first semi-annual period.

"In its schedule of benefits, New York offers the most generous measure of compensation in the entire country, and it can be safely said that it has the best balanced schedule. That the schedule of 66 2/3 per cent is not too high is best evidenced by the fact that according to the present payments the law, when it has settled to a firm basis of administration, will entail little or no added burden upon the industries of the state. The money hitherto paid out by employers for liability insurance, for time off aid and for medical services, will more than accomplish the full measure of compensation.

"Some embarrassment of administration results from doubtful coverage under the law, it being sometimes difficult to determine whether or not an employe has his rights under the common law or under the compensation law.

"In the expense of administration, which is a good index, New York's early experiences are favorable. Based upon the total premium income the expense ratio is smaller than 4 per cent; and based upon the aggregate payment of compensation it is about 10 per cent. This is in fine contrast with the very expensive system heretofore prevailing.

"It can be said for the New York statute that it is a practicable one, and that the end of the first year of administration will amply justify its enactment. Employers will be more and more satisfied as the rates are adjusted to actual cost. Employes will be more and more satisfied as speed is developed in the handling of claims. Both of these requirements will easily be made by the development of experience and the lapse of a few months."

A number of speakers took part in the informal discussion which followed.

MOVING CHICAGO STEEL GRAIN TANKS

By Frank C. Perkins.

The accompanying illustration shows the method utilized in the moving of the great steel grain tanks at Chicago, Ill.

This remarkable undertaking of the moving of large steel storage tanks a distance of about five miles in connection with the removal of the Albert Dickinson seed plant of Chicago to a new location at Washtenaw Avenue and Thirty-fifth Street, near the Drainage Canal, was accomplished without difficulty.

The old site was being cleared for the new terminal work of the Pennsylvania Lines. The plant included 22 steel storage tanks 60 and 40 feet high and 30 feet and 40 feet in diameter, weighing 40 to 50 tons each, and as these were in good shape it was desired to move them to the new plant.

It will be noted that the tanks were covered with conical tops supported on light radial trusses. A timber gallows frame was built, large enough to straddle a 60-foot tank, and having two sets of hoisting tackle on the crossbeam. This was set up over a tank, and the hoisting hooks attached to two sling plates bolted to the top of the tank. It is stated that then the rivets of the middle circular seam were cut out by hand, and the upper half of the tank was lifted by the tackle. The lower half was raised by jacks sufficiently to allow of placing under it four heavy timbers, with blocking and wedges to support it at various points.

and the tank sections hauled on this and onto a large deck scow, the scow holding three sections. The scow was then towed down the river and the Drainage Canal to a point near the new plant. A roller runway supported on piers of blocking was extended from the deck to the bank, and the tanks were hauled off by a horse winch.

It is said that the final disposition had not been decided. They may be erected on a site adjacent to the canal, or they may be moved to the site occupied by the rest of the plant. In the latter case, they will have to be raised and transferred across two railway embankments and a small canal.

It is held that the tanks could have been

Finally under the supporting frame were two lines of timbers with planking, forming roller runways for the wooden rollers used in moving buildings. The lower section of the tank was then hauled out by a hoisting engine, the block of the hauling rope being hooked to a bridle attached to the two side timbers of the supporting frame.

There was a similar frame built and the upper section of the tank lowered upon it. These frames remained under the tanks throughout their removal. Each section of tank was held in shape by an interior frame of four timbers, with blocking between these and the tank shell.

There was also interior ties of wire cable attached to threaded rods which passed through rivet holes and were secured by nuts. A double-track roller runway was built through the yard to the river bank,

moved without cutting them apart, but for the large number of electric wires and cables strung along the Drainage Canal. The river trip was somewhat slow, as there were 17 bridges to pass. The Western Avenue swing bridge over the canal had no operating machinery, and to be operated by the tugs, which cast loose the scow and hitched their two lines to chains hanging from the ends of the adjoining bridge.

This remarkable work was accomplished by the Pittsburgh engineers, John Eichleay, Jr., Company.

RELEASED ON RECEIPT.

Chicago.—The first week of the arbitration hearing of the demand of 65,000 employes of the Western railroads for better wages and working conditions developed important testimony favoring the employes. Four witnesses were on the stand during the week

and all of them by word of mouth and by strong exhibits of statistics and regulations proved that the requests of the workmen are just. The introductory speech for the engineers' and firemen's brotherhoods was made by Warren S. Stone, Grand Chief Engineer of the Brotherhood of Locomotive Engineers. Mr. Stone drew a vivid picture of the hardships, long hours, constant strain and unpleasant working conditions at present the rule among railroad employes in the west.

He spoke of the so-called surprise test as conducted by several of the western railroads as amounting almost to torture. This was one of the impressive moments of the arbitration hearing.

"Imagine an engineer," said Mr. Stone, "who already has been on duty, say for sixteen hours, running a passenger train at a speed of sixty miles an hour through a snowy winter's night. This engineer is fighting off tired nature, doing his utmost to perform the very serious labor which confronts him. He sees ahead through the mass of snow flakes a white light which tells him the way is clear; there is a curve just beyond and the giant locomotive leaps and bounds around it at a speed which a layman would say in itself is not exactly safe.

"Through the woolly haze now the engineer sees a line of freight cars on a siding and just as he detects them, there is flashed a red light which instantaneously carries to his mind a warning of danger and possible death. He resorts to the air brakes, and he and the fireman both prepare to jump, knowing that if the heavy passenger train takes the siding and jams into the freight cars there is no chance for either of them in the locomotive cab. His heart is in his mouth—I may say here that if these surprise tests are kept up it will be no uncommon thing for engineers to be found dead in their cabs—when suddenly a white light again is flashed before him, he has the right-of-way and he discovers that the whole event has been a stage affair. That is, some minor official of the railroad has gone to the trouble of arranging conditions with the devilish idea of giving old employes of the line a severe trial.

"What we object to, Mr. Chairman, is not a fair surprise test, or rather an efficiency test, as it should be termed, but to the test

which is overdrawn, which is not a routine affair of travel, and which the engineer and fireman probably never in their careers would have to face. This condition has become so bad that we have even sought legislation against it. In Kansas, we will show, a law has been passed forbidding offensive surprise tests. However, we will show that despite this law railroads in Kansas still are resorting to it."

William S. Carter, President of the Brotherhood of Locomotive Firemen and Enginemen, was one of the strongest witnesses of the hearing during the week. Mr. Carter presented an important exhibit which holds that the basis of employes' pay should be the locomotive's weight on driving wheels; not only this, but that the more a railroad employe does to produce higher profits for his employer, the greater should be the employe's compensation. Mr. Carter under cross-examination by James M. Sheean, counsel for the railroads, emphasized the fact that the higher cost of living and installation of so-called safety first devices should be given great weight by the arbitration board in adjusting the wage scale. The witness held that the increased cost of living is obvious and that the installation of safety devices, although they inure to the benefit of the traveling public, has vastly added to the engineers' and firemen's responsibilities and cares.

Where inventive genius has been able to put devices in the modern locomotive which give it power to haul longer and more profitable trains, not adding to the burdens of the men in the cab, President Carter contended that the profit sharing idea should enter here. That is, he held that where the installation of such devices on locomotives conspire to increase the profits of the railroad companies, the economic theory is, and the philanthropic idea is, to share with the employe such gains.

Other witnesses of the week were M. W. Cadle, Assistant Grand Chief of the engineers' brotherhood; Walter D. Moore, a clerk in the grand lodge office of the firemen's order; and Samuel T. Steinberger, another clerk in the firemen's office force. They presented figures and rules and regulations proving that many roads in the western territory not only at the present time pay as high wages as the brotherhoods are requesting, but in many instances are doing even better than that.

Smiles.

THE SMUTTY STORY AND ITS DIRE EFFECT.

It advertises your own ignorance.
 It displays your lack of a sense of decency.
 It indicates the state of your inner character.
 It exhibits the nature of your inner soul.
 It shows your better self is being suppressed.
 It illustrates the sordidness of your soul.
 It typifies the meagerness of your resources of entertainment.
 It proclaims the coarseness of your ideas of humor.
 It tells of the inadequacy of your means of expression.
 It reveals the depth of defilement you have already reached.
 It proves to your friends how greatly they may be disappointed in you.
 It stultifies the testimony of those who said you were a good fellow.
 It soils the imagination of your hearers.
 It hangs vulgar pictures on the inner chamber of the imagination of other men from which they cannot escape.
 It disgusts men of finer sensibilities who care for the clean and wholesome things of life.
 It nauseates good men who love fun and hate dirt.
 It dishonors your parents and your wife and your children, and your friends and your home and your business and your God.
 —Ex.

HE WON THE BET.

A traveler came across two men having a heated argument. One said:
 "What do you know about the Lord's Prayer? I'll bet you \$10 you can't repeat the first line."
 "I'll take the bet," said the other man, and, turning to the stranger, asked him to hold the money.
 "Now, what is the first line?" asked the first one.
 "Now I lay me down to sleep."
 "You win," said the first man. "I didn't think you knew it."—Lippincott's.

ONLY HOME AT MEAL TIMES.

"Get away from here or I'll call my husband," threatened the hard-faced woman who had just refused the tramp some food.
 "Oh, no, you won't," replied the tramp, "because he ain't home."
 "How do you know?" asked the woman.
 "Because," answered the man as he sidled toward the gate, "a man who marries a woman like you is only home at meal times."—Dallas News.

The apoplectic little man pounded the counter with his apoplectic little list.

"I never dealt here before and I'll never deal here again!" he shouted. "The management here is rotten. You have nothing, nothing! I'll try once more. Have you any tomatoes?"

"No, sir; sorry, sir," replied the clerk.

"What? Not even in cans?"

"Not even in bottles."

The apoplectic little man crushed his hat down further on his head and bit his mustache until the blood came. He consulted the list in his hand.

"I'll give you another chance! Have you any potatoes? Think carefully now!"

"Not a potato in the place," said the clerk apologetically.

"Ye gods! Well, I'll give you one more chance. I'd like to see the end of this. Have you any sugar?"

"Not a grain, sir. Sorry, sir."

The apoplectic little man sank down on a stool and let his list flutter to the floor.

"And you call this a grocery store!" he said, tauntingly.

"No, sir," corrected the clerk, mildly. "This is a cigar store."

The apoplectic little man rolled off the stool in a fit.—Detroit Free Press.

A reporter on a Kansas City paper was among those of a relief train that was being rushed to the scene of a railway wreck in Missouri. About the first victim the Kansas City reporter saw was a man sitting in the road with his back to a fence. He had a black eye, his face was somewhat scratched, and his clothes were badly torn but he was entirely calm.

The reporter jumped to the side of the man against the fence. "How many hurt?" he asked of the prostrate one.

"Haven't heard of anybody being hurt," said the battered person.

"What was the cause of the wreck?"

"Wreck? Haven't heard of any wreck."

"You haven't heard of any wreck? Who are you, anyhow?"

"Well, young man, I don't know that that's any of your business, but I am the claim agent of this road."—Harper's Magazine.

Hungry Hawkins—Do yer mean to say ye got a square meal o' dat sour woman?

Diplomatic Mike—Sure.

Hungry Hawkins—Well, yer a wonder. How'd yer do it?

Diplomatic Mike—When she opened de door I sez: "Is yer mother at home, miss?"

TIT FOR TAT.

A noted wag met an Irishman in the street one day, and thought he would be funny at his expense.

"Hello, Pat!" he said. "I'll give you eight (in) pence for a shilling."

"Will ye, now?" said Pat.

"Yes," he replied.

The Irishman handed over the shilling, and his friend put eight pence into his palm in return.

"Eight in pence," he explained. "Not bad, is it?"

"No," answer Pat; "but the shilling is!"
—London Tit-Bits.

WHEN SCOT MEETS SCOT.

The lady was the owner of a small shop, writes the London Telegraph, and her squire acquired the habit of seeing her home, and carrying the cash bag that contained the day's receipts. It was generally heavy.

"You must be doin' weel," remarked the gentleman, frequently.

Oh, ay," the lady would reply, "it's a guld bit business."

But she did not disclose that besides the moderate drawings the bag contained the counter weights. The canny lover only discovered that fact after marriage.

One day a college youth went West and got work on a farm. He wasn't very well informed about farm life, but as he was willing to work, the farmer hired him. That night the farmer said, "How are you—a pretty good runner, hey?"

The collegian swelled with pride. "I took the prize at college for being the fastest runner."

"Well, then," said the farmer, "you can bring in the sheep."

Two hours later the young man entered exhausted, his breath coming in short gasps.

"Have any trouble?" asked the farmer, grinning to himself.

"I got the sheep in easy enough," said the youth, "but I had an awful time catching the lambs."

"Why, I haven't any lambs," said the farmer, in surprise.

Together they walked to the pen. There were all the sheep and also five jack rabbits.

The school teacher had punished Tommy so often for talking during school and the punishments being apparently without effect, that as a last resort she decided to notify Tommy's father of his son's fault.

So, following the deportment mark on his next report were these words: "Tommy talks a great deal."

In due time the report was returned with his father's signature, and under it was written, "You ought to hear his mother."

—Harper's Magazine.

TOOK NO CHANCES.

Robert W. Chambers, the author, says that a certain man, who lives in a suburban town in North Jersey, is no beauty. He is not only long and angular, but has a face and complexion that neither pale blue, sky yellow nor any other color in dress effect will attune to.

One day, according to Mr. Chambers, the aforesaid party called to see an acquaintance and, while waiting for him to appear in the parlor, was entertained by the little 8-year-old son.

"Well, what do you think of me?" asked the caller, after conversing several minutes.

Instead of replying the boy turned aside and thoughtfully hung his head.

"You haven't answered me," smilingly persisted the caller. "Aren't you going to tell me what you think of me?"

"No, sir," returned the youngster. "Do you suppose that I want to get a licking?"

Professor Sudbury, who was extremely near-sighted, went to the barber's, sat down in the barber's chair, took off his glasses, and allowed himself to be shaved. When the artist was done with him he did not move and for a while nobody disturbed him. But other customers began to arrive and the chair was needed. The head barber, suspecting that his learned patron had fallen asleep, asked his boy to wake him. The professor overheard the order.

"No, my good man," he said, "I am not asleep. The fact is I am frightfully near-sighted. When I took my glasses off just now I was no longer able to see myself in the mirror opposite. Naturally I supposed I had already gone home."—New York Evening Post.

The old-fashioned farmer, who liked nothing more than to dicker, bobs up now and then to rub elbows with the moderns.

In a department store recently one of the old-fashioned kind approached the clerk and inquired:

"How much are you asking for rubber boots today?"

Then, when he was told the price, he looked wise and queried:

"And how much are you gettin'?"

Captain: "All is lost. We cannot save the ship."

Ikey: "Do you hear what he says, Moses, the ship is going to sink?"

Moses: "Vell, let it sink. Vat do we care? Ve don't own de boat."

"I tell you," said Bill, "there is an indescribable sense of luxury in lying in bed and ringing one's bell for his valet."

"You've a valet?" asked Bill's friend.

"No," replied Bill, "but I've got a bell.—
Ex.

NEEDED GLASSES.

Bitter experience is a wonderful teacher. No doubt the young lady had often been told that she ought to wear glasses, but had neglected or refused to do so.

There was a most determined look in her eye, however, as she marched into the optician's shop.

"I want a pair of glasses immediately," she said. "Good, strong ones. I won't be without them for another day!"

"Good, strong ones?"

"Yes, please. I was out in the country yesterday, and I made a very painful blunder which I have no wish to repeat."

"Indeed! Mistook an entire stranger for an old friend, perhaps?"

"No, nothing of the sort. I mistook a bumblebee for a blackberry."—Judge.

One morning Gifford met his old friend Hall. After they had greeted each other, Gifford said:

"Say, will, I heard today that your son Thomas was an undertaker. I thought you told me he was a physician."

"Oh, no," replied Hall positively; "I never told you that!"

"I don't like to contradict you, old friend," insisted Gifford, "but really I'm positive you did say so."

"No; you probably misunderstood me," explained Hall. "I told you he followed the medical profession."—Boston Herald.

"Do you know, Bill, I nearly lost a sovereign today."

"How was that?"

"Well, you see, I went to call on a friend of my wife's, and he asked me to lend him a sovereign. 'Yes, certainly,' says I, and I brought out a sovereign, but it got no further than my hand."

"How was that?"

"Well, you see, one of his daughters commenced to sing 'Kathleen Mavourneen.'"

"Well, what has that got to do with lending a sovereign?"

"Everything, Bill, for she started like this: 'It may be for years, or it may be forever,' so I popped the guid back in my pocket."—"Tit-Bits."

Poetical Selections.

THE CRY OF THE DREAMER.

I am tired of planning and toiling
In the crowded hives of men;
Heart weary of building and spoiling,
And spoiling and building again.
And I long for the dear old river,
Where I dreamed my youth away;
For a dreamer lives forever,
And a toiler dies in a day.

I am sick of the showy seeming
Of life that is half a lie;
Of the faces lined with scheming
In the throng that hurries by.
From the sleepless thought's endeavor,
I would go where the children play;
For a dreamer lives forever,
And a thinker dies in a day.

I can feel no pride, but pity
For the burdens of mart endure;
There is nothing sweet in the city
But the patient lives of the poor.
Oh, the little hands too skillful,
And the child-mind choked with weeds!
The daughter's heart grown wilful,
And the father's heart that bleeds!

No, no! from the streets' rude bustle,
From trophies of mart and stage,
I would fly to the wood's low rustle
And the meadow's kindly page.
Let me dream as of old by the river,
And be loved for my dreams away;
For a dreamer lives forever,
And a toiler dies in a day.
—John Boyle O'Reilly.

WHAT HAVE WE DONE TODAY?

We shall do so much in the year to come,
But what have we done today?
We shall give our gold in a princely sum,
But what did we give today?
We shall lift the heart and dry the tear,
We shall plant a hope in the place of fear,
Who shall speak the words of love and cheer,
But what did we speak today?
We shall be so kind in the afterwhile,
But what have we been today?
We shall bring to each lonely life a smile,
But what did we bring today?
We shall give to truth a grander birth,
And to steadfast faith a deeper worth
We shall feed the hungry souls of earth,
But whom have we fed today?
We shall reap such joys in the by and by,
But what have we sown today?
We shall build us mansions in the sky,
But what have we built today?
'Tis sweet in idle dreams to bask,
But here and now do we do our task?
Yes, this is the thing our souls must ask:
"What have we done today?"
—Nixon Waterman.

USE WELL THY FREEDOM.

Use well the freedom which thy Master gave.
(Think'st thou that Heav'n can tolerate a slave?)
And he who made thee to be just and true
Will bless thee, love thee, ay, respect thee, too.
—Holmes.

FOOLS IS RIGHT.

Two friends were hanging on a bar and
speaking of the war
And wondering what all those guys should
shoot each other for.
"What fools those fellows are!" said one.
"What fools they are to fight!"
The other man agreed with him and an-
swered: "Fools is right!
The Kaiser sure will lose his goat—he
hasn't got a chance
To win from England, let alone from Rus-
sia and from France."
"Aw, rent a hall!" the other said. "You're
talking like a yap,
When this here war is ended France will
not be on the map."
And so they argued back and forth until
they came to blows,
And ere the barkeep stopped them they had
smashed each other's nose.
And one of them had just remarked: What
fools they are to fight!
The other had agreed with him and an-
swered: "Fools is right!"
—Geo. E. Phair.

THE JOY.

The joy is in the doing,
Not the deed that's done;
The swift and glad pursuing,
Not the goal that's won.

The joy is in the seeing,
Not in what we see,
The ecstasy of vision,
Far and clear and free!

The joy is in the singing,
Whether heard or no;
The poet's wild sweet rapture,
And song's divinest flow!

The joy is in the being—
Joy of life and breath;
Joy of a soul triumphant,
Conqueror of death!

Is there a flaw in the marble?
Sculptor, do your best;
The joy is in the endeavor—
Leave to God the rest!

—Julia C. R. Dorr.

Might we not resolve that every day
we will do at least one act of kindness?
Let us write a letter in such terms that the
post will bring pleasure next day to some
house; make a call just to let a friend know
that he has been in our heart; send a gift
on someones' birthday, marriage day or any
day we can invent. Let us make children
glad with things which they long for and
cannot obtain. And a thousand other things
which we could do within a year, if we had
eyes to see and a heart to feel and had the
will to take some trouble.—Ian Maclaren.

HUMAN PROGRESS.

All is action, all is motion,
In this mighty world of ours,
Like the current of the ocean,
Man is urged by unseen powers,

Steadily but strongly moving
Life is onward evermore;
Still the present is improving
On the age that went before.

Duty points with outstretched fingers,
Every soul to action high;
Woe betide the soul that lingers—
Onward, onward, is the cry.

Though man's form may seem victorious,
War may waste and famine blight,
Still from out the conflict glorious,
Mind comes forth with added light.

O'er the darkest night of sorrow,
From the deadliest field of strife,
Dawns a clearer, brighter morrow,
Springs a truer, nobler life.

Onward, onward, onward, ever,
Human progress none may stay;
All who make the vain endeavor
Shall, like chaff, be swept away.

—Earl D. Laraby.

TELL HIM NOW.

If with pleasure you are viewing any work
a man is doing,
If you like him or you love him tell him
now;
Don't withhold your approbation till the par-
son makes oration,
As he lies with snowy lillies o'er his brow;
For no matter how you shout it, he won't
really care about it,
He won't know how many teardrops you
have shed;
If you think some praise is due him, now's
the time to slip it to him,
For he can not read his tombstone when
he's dead!

More than fame and more than money is the
comment kind and sunny,
And the hearty, warm approval of a friend,
For it gives to live a savor, and it makes you
stronger, braver,
And it gives you heart and spirit to the
end.
If he earns your praise, bestow it; if you
like him, let him know it;
Let the words of true encouragement be
said;
Do not wait till life is over and he's under-
neath the clover,
For he can not read his tombstone when
he's dead.

—Selected.

THE MINT-BED OF VIRGINIA.

(Written for the Columbia Record.)

In the State of Old Virginia where the
peach-and-honey flows,
Where the gardens teem with verdure and
the fragrant mint plant grows,
There is sadness deep and lasting 'mong
the courtly F. F. V.'s,
For they've voted prohibition, and the pros-
pect does not please.

From the Allegheny Mountains to the sunny
"Eastern Shore,"
They will close the spirit fountains and
the booze will flow no more.
Not even in the cities can they "wink the
other eye,"
For 'tis useless when the commonwealth
has gone so very dry.

Empty will the old decanter be, with nary
drop to give
To the thirsty soul dependent on its con-
tents to revive
His Spirits sad and drooping when he feels
so "down-and-out,"
Oh, it is a doeful story; 'tis a shame be-
yond a doubt.

In the stately Old Dominion where the mint
so fragrant grew,
There'll be lack of inward comfort and the
dearth of "mountain dew."
There'll be moaning there and groaning in
the land of Cavaliers,
A pall will be upon the land, the common-
wealth in tears.

Shades of heroes long departed looking
from the other shore
Shake their heads in disapproval that the
julep is no more.
And their sympathies go out from their
long home beyond the Styx,
To the prostrate state whose people are in
such an awful fix.

They say the Old Dominion State has al-
ways set the pace,
For matchless hospitality and gentle, court-
ly grace,
Yet I fear me that she's fallen on some very
evil ways;
For "mine host" can hardly give the cheer
he gave in former days.

"What is life without the julep?" cries the
irate F. F. V.,
" 'Tis a garden void of tulip; 'tis a fruit-
less, leafless tree.
'Tis a purposeless existence; 'tis the play
with Hamlet gone.
Oh, would that I had perished ere this evil
deed was done!"

No julep in Virginia! Do I read the news
aright?
Is it possible that such should be the Old
Dominion's plight?
Is it really true that "mountain dew"
(though known by other names),
Can not be found in any town—'en "Rich-
mond on the James"?

So the mint beds of Virginia will soon have
passed away,
Though memories of their fragrance will
live for many a day.
Here's to the Old Dominion! We love her
wet or dry,
And our candid opinion is she'll stay "wet"
on the sly.

—Edward C. Elmore.

NEVER MIND THE KNOCKER.

Go ahead and make your play;
Never mind the knocker,
They're in every worker's way;
Never mind the knocker;
Every one who seeks to shine,
If successful, they malign:
'Tis of fame a certain sign—
Never mind the knocker.

If you have a task to do,
Never mind the knocker;
Have your nerve and see it through;
Never mind the knocker,
When your labor has been done,
You may know that you have won,
If the pounding is begun
Never mind the knocker.

They strike only those who climb,
Never mind the knocker.
'Tis success they deem a crime,
Never mind the knocker.
If they hammer at your name,
Then be sure you're in the game,
'Tis a species of acclaim—
Never mind the knocker.

In Memoriam

MEMBERS.

Brothed Wade C. Gamer, Reg. No. 88097,
of Lodge 382, Childress, Texas. Died No-
vember 22, 1914, from an operation for ap-
pendicitis, age 26. Married.
Peter Hanley of Lodge 130, Butte, Mont.

RELATIVES OF MEMBERS.

Mrs. Mary McGough, mother of Wm. Mc-
Gough of Lodge 37, New Orleans, La., died
October 7, 1914, at Dayton, Ohio, age 75
years.
— Cox, father of Brothers Harvey
and Ernie Cox of Lodge 587, Beaumont,
Texas.

Lodge Notices

Dust, et al.—Lodge No. 418.

Any corresponding secretary taking up the cards of Brothers Henry Nick Dust, Reg. No. 25437 or C. F. Lannon, Reg. No. 38812, or B. G. Jenkins, Reg. No. 42728, will please hold same and correspond with 418, as all these brothers left here owing bills, and have never let their whereabouts be known.

Erratta.

In the last issue we published the name of Paul Sorgen, as having been fined and suspended by Lodge 322, for scabbing as boiler maker. Carbondale, Pa., was given as the place where he is working. This is a mistake it should have been Carbondale, Ill., which is on the I. C. System.—The Editor.

Huff—Lodge No. 360.

Will you please publish in the next Journal the following: Will Talmage Huff, Reg. No. 93506, please correspond with Lodge No. 360 at once on important business.

J. A. PEACOCK, Cor. Sec. 360.

Fitzpatrick—Lodge No. 47.

Please insert in the Journal for the information of Brother Jos. Fitzpatrick, Reg. No. 95353, who left Des Moines. The brother left Lodge 47 on June 15, 1913, and as his father is anxious to hear from him, please communicate with him or the financial secretary.

F. JOHNSON, Fin. Secy, 47.

C. P. REDDICK, C. S., L. 418.

McManus—Lodge No. 592.

Anyone knowing the whereabouts of Brother Peter McManus, Register No. 91387. He is 30 years old, 6 feet tall, has brown hair and gray eyes. Please notify the undersigned, or if you should see this please correspond with your mother.

WM. CAREY.

C. & F. S., Lodge 592.

Richardson.

Anyone knowing the whereabouts of J. J. Richardson, Reg. No. 89151, please correspond with Lodge 100.

J. P. O'NEIL, C. S., L. 100

Teague, Texas, Dec. 18, 1914.

J. D. Landuall, Register No. 87363: Will you please make some arrangement with me to pay the thirty-nine dollars and ninety-five (\$39.95) cents grocery bill you left unpaid, that I stood good for, believing in your honesty. I will be glad to get it in payments of \$10.00 per month. Remember John Cure earns his money working at the same trade you do. Hoping your manhood will step forward, I am,

Respectfully,

MRS. JOHN CURE.

Swain—Lodge No. 567.

Any secretary taking up the card of Brother T. D. Swain, No. 38826, will please hold same and notify corresponding secretary of Lodge No. 567, as this brother left here owing a note of \$75.00 with one of his brothers securing it and he had to pay it off and he has never paid one cent on it.

To all boiler makers coming this way, please have a paid up card as we have got a new agreement here and everything will be all O. K.

R. L. WHITE, C. S. 567.

Robertson—Lodge No. 173.

Any secretary knowing the whereabouts of Brothers H. E. or Earnest Robertson will please correspond with the secretary of Lodge 173, as the brothers borrowed money which they failed to make good, and also left his due book in "Hock."

J. P. TAYLOR, Secy, 173

NOTICE, TEXAS UNIONS.

Want address of Frank Farley, boiler maker, recently from Mexico, to clear land title. J. M. Daniel, Laredo, Texas.

Lost and Found

Lost Due Book—Senn.

Due book of John Senn, Reg. No. 56050, was lost or stolen on train in Clinton, S. C., on October 15. Anyone finding same please return to E. S. Ryan, Sec. L. No. 20

Lost Due Book—Reynolds.

Due book of James Reynolds, Reg. No. 49061, was lost at Calgary, Alberta, Can. Finder will please forward to A. Doornbos, C. S., L. 596, Casper, Wyo.

Lost Due Book—Hoag.

Lost due book of F. D. Hoag, Reg. No. 33842. Finder please return to Secretary Lodge 267.

F. R. LEE.

Found Due Book—Desenger.

Found at Casey, Ill.—Due book and card of Brother L. F. Desenger. Said book was issued by Lodge 25. The brother may have same by proving his claim.

F. P. REINEMEYER, I. S.-T.

Found Due Book—Jones.

Found at Danville, Ill., due book of Brother Frank Jones. Said book was issued by Lodge 447. The brother may have same by proving claim.

F. P. REINEMEYER, I. S.-T.

LIST OF MEMBERS PREVIOUSLY ADVERTISED.

H. Czatlenski, Reg. No. 64922, by Lodge 32 for non-payment of room rent. Earl Bennett, Reg. No. 75435, wanted by Lodge 100 for non-payment of bills amounting to \$67.65.

**"I like the way Sweet-Orr Overalls
are made--they're Great!"**

They have an extra high apron or bib that gives complete protection. They are big, roomy overalls and fully cover the body. No cloth is skimped and no workmanship spared in their manufacture.

SWEET-ORR "Ace of Spades" Non-Shrinkable OVERALLS

Best of all, they stay the same in fullness and size and remain just as comfortable from the day you buy them to the day they wear out. That's because they do not shrink. All the shrink has been taken out by a special SWEET-ORR process. No matter how often you wash them, SWEET-ORR "Ace of Spades" will never shorten up—not even one-sixteenth of an inch. Try a pair and be sure they have the special label like those illustrated here. Union Made.

Sweet-Orr & Co. Inc.

*"43 Years in the Overall
business"*

NEW YORK**

By Insisting Upon Purchasing Union Stamp Shoes

You help better shoemaking conditions.
 You get better shoes for the money.
 You help your own labor position.
 You abolish child labor.

Do not be misled by retailers who say: "This shoe does not bear the union stamp, but is made under union conditions." This is false—no shoe is union made unless it bears the union stamp.

No. 2.

ADDRESS OF HON. W. B. WILSON,
SECRETARY OF THE DEPARTMENT
OF LABOR, BEFORE THE A. F. OF
L. CONVENTION AT PHILA-
DELPHIA.

Mr. President and Fellow Trades Unionists—Immediately following my talk to you at the Seattle convention I was severely criticised by such employers of labor as the president of the Founders' Association and by some metropolitan newspapers because I had addressed you as "Fellow Trades Unionists," and because of some other statements which I had made to you at that convention. I want to say to you now that I would not change one iota or tittle of the statements that I made to you then, from the salutation as "Fellow Trade Unionists" down through to the statement that every little property is a law-created and a law-protected title. And the same elements that criticised those statements asserted that the Secretary of Labor was partisan to labor.

It will be forty-three years on the 22d day of this month since I became a trade unionist, under our former great leader of the miners' movement, John Siney. In the time that has intervened I have been a member of the various trades unions as they succeeded each other among the miners of the United States, and am today a member of the United Mine Workers of America. During these forty-three years' experience, most of it active experience in the trade union movement, I have never understood that the trade union movement stood for anything else than justice to the wage workers. It has never desired to impose an injustice upon anybody else; and if the securing of justice to those who earn their bread in the sweat of their face constitutes partisanship, then count me as a partisan of labor.

The new Department of Labor, when instituted, was directed to utilize its energy for the promotion of the welfare of wage workers and their opportunities for profitable employment. In carrying out the purposes of the Department one of the first steps that we took was to communicate with the other departments of the Government, asking them to make arrangements by which the Department of Labor would

be notified of every contract let by them, in order that we might have available for the use of the public, trade unionists and non-unionists included, the information concerning the contracts that were let, and whether or not the eight-hour workday was applied.

We have concluded those arrangements and we are now receiving from the various departments of the Government statements relative to the contracts that are being let, and the conditions and terms under which they are let, and the sub-contractors working under them. In carrying through the eight-hour law, while it was pending in Congress, both in its consideration before the committee and its consideration upon the floor, we met with some obstacles, some difficulties that had to be overcome before an eight-hour bill could be enacted.

One of the first difficulties we met in dealing with the eight-hour workday from a general standpoint, as applying to all contracts for supplies for the Government, was the question as to whether it was intended by the eight-hour law to require the eight-hour workday to follow back all of the supplies purchased by the Government to the original point of producing the raw material. For instance, in purchasing supplies of foodstuffs for the army and navy, the question was asked whether it was the intention of the bill to apply the eight-hour workday to the men on the farm, many of them owning their own places, who raised the foodstuffs that were to be purchased. It was thoroughly understood by those who were handling the bill in behalf of labor, and those who were handling the bill on the floor of the house and in committees, that any bill which carried the eight-hour workday back to the farm and the farmer could not be enacted into law. And in that situation the proviso was inserted excluding from the operations of the eight-hour law those things which could be usually bought in the open market.

In interpreting that clause of the amended bill the position by those in charge of it was that the question of whether or not an article could be usually purchased in the open market was not a legal question; it was not a question of law; it was a question of fact, and the department letting the contract was the department authorized to pass upon the question of facts and not

the Department of Justice. The Department of Justice passes upon questions of law; the other departments pass upon questions of fact. And I may say to you here that in the debate upon that question it was clearly stated that dressed stone was an article that in the judgment of those in charge of the bill, could not be usually bought in the open market, and consequently came within the operations of the eight-hour law.

A statement has been made with reference to the Lincoln Memorial. Unfortunately for us and unfortunately for the labor movement the decision upon the Lincoln Memorial question was a decision involving a point of law and not a point of fact. And that decision grew out of this situation—that the bill authorizing the appropriation of two million dollars for the building of the Lincoln Memorial, and the actual appropriation of fifty thousand dollars of that amount to begin the work, was made seventeen months before the new eight-hour bill went into effect, and consequently comes under the provisions of the old eight-hour bill. That is the situation so far as it applies to the Lincoln Memorial, and it is an unfortunate situation for us.

In further carrying out the work of the Department we have inaugurated a system of mediation in trade disputes. Section 8 of the organic law of the Department provides that the Secretary of the Department may act as a mediator or he may appoint conciliators in trade disputes. During the year and a half, or a little more, that the Department has been in existence we have handled scores of trade disputes, and out of those scores there have been but three or four in which we have failed of success; there has been the Pere Marquette shopmen's strike, the Calumet miners' strike and the Colorado miners' strike. In those three we have not succeeded in bringing about a satisfactory adjustment of the difficulty. In all of the others, some of them involving many more men than were involved in either of these three strikes, we have succeeded in bringing about an adjustment that was satisfactory to all parties concerned, thereby promoting industrial peace, and at the same time promoting the welfare of the wage workers.

We have taken the ground, and we think justly, that employers and employes have a mutual interest in securing the largest possible production with a given amount of labor; the larger the amount that is produced, the larger the amount that is available for distribution; that their interests only diverge when it comes to a determination of the share that should go to each and the methods under which the material should be produced. As their interests only diverge at those points, it is the proper thing for employers and employes alike to sit down around the council table and work out the problems they have to deal

with on as nearly a correct mathematical basis as possible.

Working from that theory of the mutual interest that each has in production, we have proceeded to the consideration of these problems. And again, Mr. President, we have been criticized as being partisans, upon the theory that the Department of Labor in acting as a mediator performs judicial functions. Now, the Department of Labor, in acting as a mediator, does not perform any judicial functions; what it performs are diplomatic functions, and there is no more reason that the Department of Labor should be debarred from handling trade disputes upon a diplomatic basis because it is interested in the welfare of the workers, than that the Department of State should be debarred from handling international disputes because of the fact that it is a part of the Federal Government and interested in the welfare of the United States.

What we need, in handling trade disputes, and what we have attempted to select in handling trade disputes, is men who have had experience and who are levelheaded and understand the technicalities of the subject-matter they are to deal with. You cannot take a man who has had no experience, you cannot take a man who knows nothing about a trade, no matter how big he is, and inject him into the negotiations for the settlement of a trade dispute and expect to get beneficial results from his injection into it. You must take men who have had practical experience.

And so, in carrying out the work of the Department, we have invariably selected one man who had a technical knowledge of the affairs, as seen from the standpoint of the worker; and we select one who had a technical experience and a knowledge of the standpoint of the employers, and we have sent those two men into the trade dispute conditions with instructions to endeavor to bring about a settlement of the difficulty upon a basis that would be just to all parties concerned; because, after all, while we desire industrial peace, while we want industrial peace, and we want it permanently, we realize that there can be no permanent industrial peace that is not based upon industrial justice.

And so we have gone on with this line of work, and, as I have said, in nearly every instance we have been successful. And those instances where we have been unsuccessful have been principally due to that class of employers, extremists, a class becoming smaller and smaller as the years go by, who look upon their employes as simply a part of the machinery of their establishments; to be treated in exactly the same way as they would treat other machines, with this difference; that the inanimate machine in their shop is so constructed and so standardized that they can calculate with almost mathematical accuracy what the working strain and what the breaking

strain of the machine is; and they know that if they crowd the machine up to the breaking strain, and it does break, it will cost them something to replace the machine. Not so with the human being that is employed by them, and that they look upon as a machine. He is not standardized, he is not uniform in his physical and mental equipment; there has been no method determined by which you can calculate the breaking strain or the working strain of a human being. Even the worker himself does not know what his own breaking strain is, and if you crowd that human machine up to the breaking strain, and it does break, then it costs the employer nothing to replace it.

We have held throughout that the human being is an entirely different thing from the machine, and should be treated entirely different from the manner in which you treat the machine. The human being who is employed in the plant is a living, moving, sentient being like themselves, with all the hopes and all the aspirations that God has implanted in the human breast, and is entitled to the same consideration as you would give to any other human being who is not engaged as a wage worker.

During the year we have made at least one great step forward in the passage of the Clayton anti-trust bill, which is also an anti-injunction bill. To my mind it is the greatest step that has been taken by labor and for labor within the past two generations. Since 1878 our courts have been issuing injunctions in trade disputes. These injunctions are based upon the theory that some one has a property right in the labor of an employe. Any lawyer will tell you that the writ of injunction is a writ that issues from an equity court only, and they will also tell you that an equity court deals with property and property rights; and when an injunction is issued restraining Jim from interfering with John, because the interference with John will affect John's employer, it can only be upon the theory that the employer has a property right in the labor of John. Now, the employer cannot have a property right in the labor of John without having a property right in John himself, because labor, as you have so often declared, is a part of man, it is inseparable from him. The moment labor is applied and something results from the application of that labor, the material that results from the application of it is property, it is a commodity, it can be treated as such, but the labor that produces it is a part of the man himself. You cannot have a property right in the labor of the man without having a property right in the man, and a property right in man is contrary to the spirit of our institutions.

And so the Clayton anti-trust anti-injunction bill declares that the labor of a human being is not a commodity of an article of commerce. If that statement alone were all that was in the bill it would still be a big

step forward; but that statement is only an interpretation, it is only a means of backing up and making valid the other items in the anti-trust bill relative to the issuance of injunctions. And so labor is now placed in the position that it ought to occupy in that respect, where it is recognized as being a part and parcel of the community instead of being classed as a "brother to the insensible clod that the rude swain turns with his share and treads upon."

We have all along recognized that the employers own the land, that they own the plants, that they own the machines; but we have positively denied, continuously denied, that they own the men, and for the first time in the history of this or any other country we have that idea embodied in legislation—that labor is no longer a commodity or article of commerce, and cannot be any longer considered as such.

So we are making progress, step by step, slowly, it is true, because large bodies move slowly. It has been a gradual evolution. The change from the feudal system to the present system and the removal of those ideas, the removal of those lines of thought that grew out of the feudal system itself, has been a slow process that has only been brought about as a result of the militant organizations of labor.

It is said that the Department of Labor has to deal with others than organized labor; that it represents other workers than organized workers, and that is true. The Department of Labor represents and looks after the interests of all the wage workers of our country whether organized or unorganized. The same may be said of every trade union in our country. There isn't a trade union in existence in trade or industry that has made progress that has not, in making that progress, also benefited every man working in the industry who is not a trade unionist. So far as the Department of Labor is concerned, it will utilize every force that it finds available to its hands for the purpose of promoting the welfare of those who toil. It will use most those agencies which are most effective; and, in my experience, those agencies which have been most effective in improving the conditions of the wage workers have been the trade unions of this country. I thank you.

**ADDRESS OF FRATERNAL DELEGATE
FROM THE CANADIAN TRADES AND
LABOR BEFORE THE A. F. OF L.
CONVENTION.**

Fraternal Delegate Rigg: Mr. Chairman and Delegates to the Thirty-fourth Annual Convention of the American Federation of Labor—I want to express to you the deep sense of honor with which I regard the privilege of my attendance at this convention as a representative of the Dominion Trades and Labor Congress. Although divided from you by a boundary line, which on

the other side of it we invariably refer to as the "imaginary line," the Canadian trade union movement is cognizant of an indissoluble association with the American Federation of Labor; and every delegate elected to fraternally represent that congress in the conventions of this great body esteems it a great privilege and a high honor to be selected for such a position. When President Gompers attached to my coat yesterday morning the badge of this convention I felt as though I had been privileged to receive a great and honorable distinction—proud to wear it, proud to be privileged to meet you in this convention.

This convention is an important gathering, charged with the responsible duty of protecting and promoting the interests of the great mass of the organized wage earners of this North American continent. I come to you today as the bearer of a gift which, from the point of view of the great possibilities that are wrapped up in the trade union movement of this continent I deem a great deal more precious than a gift of frankincense and myrrh. I come to you bearing the gift of the brotherly spirit of the entire trade union movement of the Dominion of Canada. North of latitude 49 degrees, the trade union movement has no feeling that the geographical lines of demarcation can separate it from the bond of fellowship and brotherhood with the trade-union organizations south of that line.

Perhaps it is necessary for me to say something with regard to the reason for the existence of an organization north of that line, which is separate from and independent of the American Federation of Labor. I should feel that I had failed absolutely in the performance of my mission here today if I did not succeed in impressing upon your minds, those of you who may not be familiar with the reasons of the existence of the Trades and Labor Congress of Canada, that the reason I am here in an ambassadorial capacity is not due to any weakness of the bond that binds the trade unionists of Canada with the trade unionists of the United States. The badge that I wear, the membership that I carry, is that of the International Brotherhood of Bookbinders, an international organization that I have in the past had the pleasure of representing in a full delegate capacity.

And what is true in my own case is true concerning every member affiliated with the Trades and Labor Congress, with the exception of just a few organizations of wage earners for whom there exists no international organization. I think you all see that the Trades and Labor Congress is not organized as a rival institution to this great American Federation of Labor. As trade unionists organized along industrial lines, we are a component, integral part of this body, and that institution is so highly valued and prized by the trade unionists of the Dominion of Canada that we are jealous that nothing shall come between us to

separate the Canadian trade-unionist movement from the trade-union movement of this entire North American continent. This is an inheritance, this association, of which we are proud and which we will maintain with all our zeal.

The Canadian Trades and Labor Congress exists solely by virtue of that accident of fate which caused Canada to be governed separately from the rest of this North American continent. In this city of Philadelphia one cannot help being made aware of that tragic result of 1776, whereby through the folly, through the autocracy, through the injustice which the British Government of that day sought to impose upon the colonists of this country, impositions which could not be borne by self-respecting men and women, the break came, and a separate nation was established on this continent. While that has been the cause of separating the United States from Canada, there are many causes, there are many results, rather, which today makes us feel and understand that, so far as the establishment on this continent of another nation is concerned, the results, so far as the great ambitions and purposes of working class freedom are concerned, have never been impaired thereby; but that the declarations which are embodied in your Constitution have made for the promotion of a spirit of democracy, to such a degree that it has been a valuable contribution to the development and upbuilding of democratic institutions throughout the world.

The condition of affairs that separates Canada along governmental lines from the United States makes it imperative that there shall exist an organization north of that imaginary boundary line of a strictly Canadian character, an organization whose function is to protect the wage earners along legislative lines. This is the sole reason for the existence of the Trades and Labor Congress of Canada, which is the legislative mouthpiece of the workers of that country. Matters that affect the jurisdiction of trade unions or the control of trade unions along industrial lines do not come within the province of our congress. This is the place where all these matters legitimately belong, and where, so far as the Congress of Canada is concerned, they will be permitted to belong. We have no desire whatever to invade the scope of the operations of the American Federation of Labor.

The Dominion Trades and Labor Congress is pledged very specifically to the recognition of a principle which is, and has been for the past few years, at least, embodied in the constitution of the American Federation of Labor; that principle which was enunciated by Chairman O'Connell on Monday morning has been the principle that, in spite of the bigness of this North American continent, it is much too small to harbor the existence of two separate organizations for trade-union purposes in the one craft. And the very strictest adherence is practiced by the Congress of Canada to this

vital principle, that there shall not be more than one organization for the one craft.

The practice of the Congress during the last few years has abundantly evidenced, I think, the sincerity of that organization with regard to this matter. Some two years ago, when this Federation very definitely and specifically and finally disposed of the long-standing struggle which had been taking place between the Amalgamated Society of Carpenters and the United Brotherhood of Carpenters, the Trades and Labor Congress very quickly decided what its attitude would be. When the Amalgamated Carpenters had been expelled from the Federation they were just as promptly expelled from the Trades and Labor Congress. Immediately upon action having been taken by this Federation the Executive Council of the Trades and Labor Congress returned the per capita tax of the Amalgamated Carpenters when it was next offered; and that action was unanimously approved by the delegates at the succeeding convention, with the result that the Amalgamated Carpenters, who were very largely represented in the Dominion of Canada, recognized the necessity of throwing down the weapons of their warfare and linking themselves with the United Brotherhood of Carpenters and Joiners.

In another and more recent instance, that of the Electrical Workers, the same action was automatically taken by the Trades and Labor Congress; and it was one of the proud moments of our convention in St. Johns, N. B., that, so far as the Canadian District Council of the Reid-Murphy Electrical Workers were concerned, in a referendum vote then being taken the sentiment was going overwhelmingly in favor of uniting with the organization affiliated with the American Federation of Labor. And since the holding of our convention in St. John, N. B., in September of this year, that great work of unity has also been consummated and another strike of years has been ended.

This attitude of loyalty to internationalism, while adhered to most closely by the Congress, is still a practice which is most repugnant to the great mass of the employers of Canada. With much warring of words, with much flying of flags, and with a great deal of fervent patriotic pleading the employers of the Dominion of Canada tell us that it is unpatriotic and un-Canadian for us to send our good Canadian money south of the line to the headquarters of organizations located in the United States. They tell us it is a serious breach of the principle of self-respect for us not to have our own Canadian trade unions organized and controlled solely along national lines. In the last convention of the Congress, as you have just heard in the report of your fraternal delegate, the spirit of internationalism received just about the most severe test it could possibly have received, and came out unanimously triumphant so far

as the expression of the mind of the Congress is concerned.

We had in that convention Bro. Frank Farrington, of the United Mine Workers of America, and the Hon. Mr. Crothers, Minister of Labor, a position that carries with it a cabinet portfolio. During the last session of the Canadian House of Commons discussions took place relative to the barbaric and czar-like attitude of the government toward the striking coal miners on Vancouver Island; and the same minister of the British Crown in making his defense in connection with that strike, explaining the lethargy and the indifference of his department to the welfare of the miners who were in that great struggle, referred to Bro. Frank Farrington as a foreign agitator. And again, after he had been accused of this deed, in his defense before the Canadian Trades and Labor Congress, he carried with him the "Journal of the United Mine Workers of America," and turning over the pages he called the representatives of trades unionism in the Dominion of Canada to witness that the same Frank Farrington had, while he was in charge of the United Mine Workers' strike of Vancouver Island, repeatedly made reports to his international headquarters, which were addressed to the United Mine Workers of the United States, if you please. He said the term "America," being limited so far as its application is concerned, in the mind of the Minister of Labor and in the minds of multitudes more, as applicable only to the United States. As far as the workers of this continent are concerned it has no limitations, the great mass of the wage earners of this North American Continent are indissolubly joined together, and when we talk of the United Mine Workers of America we mean the United Mine Workers of the North American Continent. If any doubt now exists in the mind of the Minister of Labor with regard to the standing of the Canadian trade union movement on this matter in the future it will be solely due to his utter incapacity to receive any mental impression whatever.

The Congress of Canada stands foursquare for the principle of international trade unionism, and the sophistries, the subtle, deceptive influences which employers of labor and ruling bodies bring to bear upon us in an endeavor to separate us in order that they may fleece and exploit us more effectively. We have noticed that so far as the patriotic Canadian employer is concerned, his patriotism evaporates when it comes to a matter of a strike. Then he himself is very eager and very glad to fall back upon an appeal to these organizations of strike-breaking thugs which are recruited in this country for the purpose of beating into subjection the workers of the United States and Canada when they seek to promote their own interests.

But a new spirit of patriotism has been awakened in the minds and has stirred in the hearts of the trade-union movement of

this century, a spirit of patriotism based upon the fact of the common interests of the wage earners of the world. And while we regret exceedingly that the spirit has not been sufficiently developed yet to have averted that murderous carnage that is taking place on the fields of Europe, we are sure of one thing, and that is that the spirit of brotherhood which has been generated on this continent by virtue of the practice of international trade unionism is such as to make it a safe prediction that the workers of the United States and the workers of Canada will never consent, either by secret diplomacy or by any other means, to fly at each other's throats or spill each others' blood.

For more than one hundred years peace has existed between Canada and the United States. Four thousand miles of frontier are unguarded by any fort, and, so far as the democracy represented by our trade-union movement is concerned, there will never be a fort erected on that frontier line to menace and jeopardize those peaceful relations which exist today. I am not here to talk to you about the European war; I respect too much those obligations which are imposed upon me as the guest of the American Federation of Labor, and as one who temporarily finds himself in a neutral country, because Canada, as a component part of the British Empire is today in a state of war.

I am not going to discuss the war in any of its phases, but I do want to say just this word—and I think you will pardon me for the saying of it, I think I ought to say it—that coming from Canada and knowing that there are present in this convention, two well-known representatives of the British Trade Union Congress, I think I speak that which the Canadian Trades and Labor Congress would have me speak, and that I also voice the sentiment of our British brothers when I say that it is the fervent hope and desire of our hearts that this bloody conflict should be brought to a speedy termination and those international relations fostered by our movement again be established and promoted.

There has been a very remarkable movement in recent years owing to the sympathetic relations existing between the Congress and this Federation. Some forty-six international organizations have affiliated their entire Canadian membership with the Congress and pay their per capita tax from headquarters. This has been done because of the recognition of the principle that the Trades and Labor Congress of Canada seeks to preserve and advance the interests of the wage earners of Canada along legislative lines, which it would be practically impossible for the American Federation of Labor to do.

One of the great problems with which the workers of Canada are confronted is that of immigration. For years the Government has fostered every means of attracting labor

to Canada, with a complete and fatal disregard of the ultimate consequences. Immigration agencies operating on the bonus principle have carried on a vigorous trade. Employers' organizations have taken advantage of the situation and have most grossly misrepresented conditions that exist in that country; and, because of that great benevolent heart of theirs which seeks to attract the oppressed of Europe and give them a larger and freer life in Canada—that is the language of the Canadian employers when they are seeking to deluge the country with surplus labor—these workers have been imported into Canada with an utter disregard of what is likely to take place.

So far as the Trades and Labor Congress is concerned we have no objection to leaving our doors open to the toilers of Europe so long as they seek to come in along natural lines; but we have set our face like flint against the unscrupulous method adopted to artificially foster and promote immigration to Canada. This reckless policy of immigration, coupled with the merciless exploitation of those same workers when they reach Canada, and the mad spirit of land speculation has precipitated a condition of affairs industrially and commercially in Canada which makes sober-minded men and women afraid for what may happen in the near future. And this condition has been considerably intensified as a result of the war. Today we have throughout Canada a great mass of the unemployed for whom there are no bright prospects for this winter and for whose welfare every man and woman who is at all touched with the sentiment of human sympathy is deeply concerned. There is going to be a great deal of suffering in the Dominion of Canada, among the wage-earning class during this coming winter. In normal times during past years Canada has not exhibited those extreme symptoms of social disease which are so very manifest in the older and more thoroughly developed industrial nations.

Fraternal Delegate Riggs gave a brief review of the history and development of Canada in the past one hundred years, the increase in her population and in her manufacturing and agricultural development, and continued:

Canada's future development, it is easily seen from what I have told you, in spite of her rich agricultural resources, will be very largely along industrial lines, and it is extremely important that at the present stage an ample and an enduring foundation should be provided and maintained in connection with our trade union organizations. Now is the time, while our industries are young, while our wage-earning population is comparatively small, to cultivate in the minds of the workers those great principles which underlie and are vital to the welfare of the labor movement.

Recently I received a letter signed by

three international organizers, Brother Potts, of the Carpenters; Brother Hunter, of the Painters, and Brother McClellan, of the Machinists, in regard to the industrial condition in the maritime provinces in Eastern Canada. The call there is for international organizers to establish firmly the foundations of our trade union organizations, and at the same time to uproot and destroy forever an organization which has for a number of years had a disturbing and irritating affect upon the trade union movement of Canada. This Canadian Federation of Labor, as it is called, is cursed with the benediction of certain Canadian employers and seeks to rival your organization so far as Canada is concerned, can be very easily uprooted and destroyed in the maritime provinces if only the necessary attention is paid to that locality.

Fraternal Delegate Riggs spoke in an interesting manner of the general conditions of the labor movement, of the spirit and ideals and hopes and ambitions of the Canadian Trades and Labor Congress. He referred to the legislative matters in which the Congress was deeply interested, both in the Dominion Parliament and in the Provincial Parliaments, and at the attitude of the Government toward labor measures.

In concluding Fraternal Delegate Riggs said: We talk a great deal today about the progress that we have achieved in recent years; we tell of the wonderful accomplishments of genius; we speak of the tremendous power which has been exercised by humankind in the wrestle with Mother Nature until she has yielded her great secret. We are fond of speaking about how we have harnessed the forces of nature and made them the obedient servants of man. But I want for a few brief minutes to call your attention to another aspect of the situation. What about this wonderful progress we are making and have made in the past few years from the point of view of the unemployed. Unemployment is rampant and its effects upon our humanity are of a most disastrous and degrading character. I am told that in this country 1 per cent of the people own more wealth than the remaining 99 per cent. An ex-member of the Crown in the Dominion of Canada made the statement two years ago in the Dominion House that twenty-three men controlled the finances of Canada. With our great machinery for wealth production today, with our huge units of capital, with our specialization of labor, we have invented a wealth producing system which put to shame all the fabulous activities of ancient geni. And this has produced a crisis in our social system which has given us a multi-millionaire at one end of the scale, to whom wealth flows whether he sleeps or dissipates it, and the toiler who toils from early childhood until he falls into the grave, keeping company with poverty all the way, at the other end of the scale. What shall we say of the progress of our day from the

point of view of the sweated toilers, of the child slave or of the white slave, that modern product of which Victor Hugo speaks as bartering away a soul for a bit of bread.

These are the problems which challenge us, they demand our attention, they will insist upon forcing themselves before us for solution. And we are the men and women to face these problems, to find that solution. The great spirit and ambition and ideal of our labor movement must be to create a newer world wherein dwelleth righteousness; that no child shall cry for bread; that no mind shall be stunted by ignorance; that no maiden shall sell herself in order that she may secure food for her body; that mothers shall be protected from the incessant care and worry and heartbreak incidental to the life of the poor; where manhood shall be vigorous, healthy, intelligent, noble—these are the ideals for our labor movement in this twentieth century. The great ambition that must permeate us is that oppression of every species shall be dethroned and the good of the common people shall be conserved.

I have endeavored to indicate to you the relation of our Congress to this Federation of Labor, to tell you something of its activities, to show to you the spirit that inspires it. And now I want to say that the twentieth century belongs to the labor movement; that it calls to you and to me, not merely that we shall be trade unionists and wear our buttons and maintain those outward forms of association in our movement which consist of keeping our names on the register, attending meetings and all that kind of thing. These are but the forms of the spirit of our unionism. The true spirit demands from us that we shall go forth to meet the pressing problem that confront us today, and instead of merely giving of our money we shall give of ourselves; that we shall hear this appeal of the great mass of the community for enlightenment and emancipation, for salvation, if you please, and that we shall dedicate to this movement more and more as the spirit attaches itself to us our life, our time and our energy, our life blood, if you will, in order that there may be a dawn of a day in the not very distant future when there shall be given to every man, woman and child an opportunity to realize a full-orbed life, rounded and entire; where there shall be opened to the members of the working class those avenues which enrich and ennoble human life; that art and science and literature and music may be more diversified in the experience and the possession of the working class; that a new day shall dawn where burdens shall be lifted, where hope and comfort and joy and happiness shall take the place of sorrow and ignorance and crime.

Again I say to you that I am proud to bring to you today the fraternal greetings of the trades unionists north of parallel 49 degrees latitude, and to assure you, if such

assurance should be necessary, that, so far as the future is concerned, we will see to it as in us best may be that nothing shall come to separate us from our cherished association and affiliation with the international trade union movement of this North American continent.

THE VOLUNTARY NATURE OF THE LABOR MOVEMENT.

(By Samuel Gompers)

Mr. President, Officers and Delegates of the Building Trades Department: My presence with you this morning is a bit belated, but you who were in attendance at the convention of the American Federation of Labor will know that at the close of that convention I had about reached my vocal limit, and it was necessary to repair the pipe organ of expression before I could come here. Although I was not in the convention I was in the ante-room and heard much of the discussion of your first day and part of your second day's proceedings. I have come in contact with a number of the delegates to this convention individually and I am exceedingly pleased, more pleased than I can find words to express to you, at what I regard as one of the most satisfactory situations that have come under my observation in, lo, these many years. I shall refer to that perhaps a little later on. First, I want to extend to you the felicitations of the A. F. of L. in its entirety, as well as that of the delegates to the Federation, and as well, I believe, the feelings of the great rank and file of the organized labor movement which we have the honor jointly to represent.

I shall not take up much of your time, because I realize that time is exceedingly valuable to you, as it is to me, and that you want to conclude your business at the earliest possible moment. The work of the A. F. of L. convention, closed last Saturday at midnight, was of the most tremendous importance and significance. The horizon of the work of the labor movement has been clearer and higher and better and will go farther to cement the bonds of unity and fraternity among the organized working people of America, and to bring hope and encouragement even to the unorganized toilers who have not yet had the opportunity or conceived it to be their duty to join hands with us and make common cause for the protection and promotion of the common interests of the masses of Labor.

Quite apart from the work for external activities, or activity upon external matters and affairs of an economic, of a material, of an industrial, of a political, of a social and of a moral force, we have done some work in the convention of the A. F. of L. of governing our internal affairs and our internal relations which I am confident will not only be of far reaching consequence, importance, and benefit to the toiling masses of our movement, but has already accomplished a

great advance and brought much benefit.

I have already said that I heard part of your deliberations and have come in contact with some of the delegates to this convention; and I am confident that from your collective action in this convention and of the individual demonstration and feeling of sentiment of the delegates in and outside of the convention, much good has already been accomplished. Within this past few days I have seen men fraternize and shake hands and talk as though they were old time friends, and they are men who for several years turned their backs upon each other, or else hissed hateful and hating words to each other; men who have walked upon the other side, though organized in the same labor movement. I refer, of course, as you know, to the action of the A. F. of L. in the endeavor to bring about a better state of affairs in the relation of the various Departments in the A. F. of L. and the relation of the unions to the Departments, and the Departments themselves. I know, Mr. President, that it is a seemingly disagreeable position when we have power, or imagine that we have the power, and it is not always exercised. But my experience in the labor movement, as well as my study and observation of all affairs of man, is that it is a good thing to have power—that power is essential to the well-being of all organized labor movements; but the limitations of power set upon ourselves by ourselves, the exercising of power with moderation is to bring the greatest potentiality to the exercise of whatever power we have.

We find autocratic governments of the world in which power and absolute power is vested, and yet let at any time the autocratic power be exercised to such an extent as will outrage the sense of those governed and even autocracies are overturned. There is in the human breast a willingness to do the right thing. There is in the makeup of man that feature—and thank goodness it is implanted there—that when men feel there is a power attempted to be exercised over them, that compulsion, that coercion attempted upon them, a feeling of repugnance and resentment arises, and as a result we find that when asked within reason to do anything, when they are asked and persuaded that thus and so are the right courses to pursue, they will gladly yield in most instances. But you tell a man to do the same thing and accompany the command with the coercive threat, and say, "Unless you do thus and so we will mete out to you a punishment that will directly affect you and yours," the likelihood is that he and his associates will and the very earliest opportunity not only to resent it, but to follow the course directly opposed.

Let me say to you in all candor—I have said it upon occasions, not in public, I think, but this is an open meeting and I am willing to say it now in public—that for more than a year and up to the close of the convention of the A. F. of L. I have grave

misgivings as to the fate of our organized labor movement. You know that I have been associated with the organized labor movement for more than forty years; you know that I was one of those who participated in the convention which formed the A. F. of L. in Pittsburgh in 1881. You know, I think, that I may say without any appearance of vanity or vainglory, that I have been a strong and staunch adherent of the A. F. of L., and that I have tried to give some service to it; that I have tried to help in the organized labor movement, to extend its growth and its power and its influence, and that if any men had faith in its growth and permanency that I was one among them.

But I say to you again that with the tension that has grown up there was something sure to break. The alternative was presented that we would come to the point where our Departments and our international unions would be guaranteed their rightful position in the labor movement; that the international unions, the fundamental sovereigns and sovereignties of the organized labor movement, both in the Departments and the Federation itself, were to be guaranteed their rights, or else as sure as the sun rose and set the fate of the A. F. of L. would be sealed.

And, as I say, I almost despaired, and that opinion was shared with me by the active men in the labor movement of our country. Believe me when I say that the proposition changing and modifying the laws of the Departments and their relations to the international unions and the A. F. of L. were not the result of hasty, ill-considered action. Month after month, aye, for years, this question was in the minds of our men, and hour after hour of the meetings of the Executive Council of the A. F. of L. was devoted to discussion and thought of this matter. Conferences were held with the representatives of the Departments, conferences with the representatives of the international unions, all of them with the purpose of impregnating the minds of us all with the idea that there must be some easing up.

The E. C. of the A. F. of L. during the past year selected a committee composed of Brother James Duncan, Secretary Morrison and myself. We gave day after day to the consideration of the subject, then reported to the E. C. of the A. F. of L., and the matter as considered and proposed by the Council was reported to our Philadelphia Convention. In the convention it was referred to a committee and the report, modified by experience and immediate needs, was adopted by unanimous vote of the convention. I am glad, Mr. President, glad beyond expression and words, to be informed that your convention adopted, by unanimous vote, the proposition of Article XV of the constitution of the A. F. of L. relating to the Department. It does you credit as union men, as intelligent union men, as men who have the understanding of the responsibil-

ties resting upon them and of the great future in store for your Department and for our movement generally.

Let me say this: that I have no more doubt now of the permanency of the Department; I have no more doubt now of the permanency and the perpetuity and the constant growth and success of the Departments of our Federation than I have a doubt of the universality of mankind. I haven't the slightest doubt in expressing the thought that under the new conditions the organization of the United Brotherhood of Carpenters and Joiners will, in the very near future, reaffiliate where it rightfully belongs—in the Building Trades Department; I haven't the slightest doubt that under the new declaration of purposes and laws governing the A. F. of L., organizations of labor bona fide in character that should be with our movement, will soon be knocking at our doors. I feel confident that, as Philadelphia conventions of our Federation, first in Donaldson Hall and second in Independence Hall, each witnessed a growth in the development and expression of the American labor movement, so will the recent convention of the A. F. of L., and the convention of this Building Trades Department mark a new era of growth and development and power for the benefit and advantage, not only of our movement, but of every man and woman who toils, and will bring hope and comfort to the children of our time.

I said at the outset that I would not take up much of your time. Perhaps I have already trespassed beyond what I should have done, but I desire to say to you, Mr. President and gentlemen, from the bottom of my heart I extend congratulations to you upon the splendid position you have taken and the new relations of amity and good will which have been brought about, and for the future of your sessions that the same harmony will prevail. There will be a clash of opinion and judgment, but there will be no longer that clash of feeling among the men who ought to be brothers in this great uplift work.

Your officers know, and I am very glad so to testify, that during the year that is between conventions we meet frequently as much as twice a week. That does not occur always, but we have practically joint E. C. meetings, we have conference meetings, and there go over the interests which affect the working people of our country and our times. And these conferences are of great advantage. I shall want to enjoy the privilege, at least for this coming year, to meet with the officers and representatives of your Department as well as other Departments. We shall try to work out a law or a bill governing the hours of labor as affecting the government employes and those who do work for government through contractors and sub-contractors; and inasmuch as we have had the experience of misinterpretation of eight-hour laws in the past, interpre-

tations by attorneys-general who, by the aid of the most improved microscope found a comma in the wrong place and thereby gave the narrowest interpretation of the eight-hour law because of the comma rather than the broad interpretation of the law, we propose to co-operate with your officers, and they with us, to see whether we can not get an interpretation of the eight-hour law as it was designed, as we know it was really meant to be; or, if we can not, we are going to see if we can not get a bill enacted into law that shall mean eight hours, as the present law was intended by its designers and promoters.

And we shall do everything in our power without stint and without limit to try to bring about a greater growth of our labor movement, even a greater respect for it than is now entertained, and a greater confidence in it and a greater hope for it and its purposes. And in that work I am sure we shall be able to count upon the support, the active, enthusiastic support, of not only the officers of our international unions and not only the delegates to this convention, but the union man at home working at his trade or calling who realizes the benefit and advantage that the organized labor movement has been to him and his, and upon whom, after all, the success and the permanency of our movement depends, to bring home the cheering words of encouragement and hope to our fellow-workers and fellow-citizens, which is the mission of the delegates to this convention.

And as we are going from our convention to our homes, in behalf of the A. F. of L. and its great rank and file, I thank you for the courtesy of your attention, and wish you permanent, constant, growing success and power, and with it the wisdom with which that power shall be used in the interest of our common humanity.

TO PREVENT UNEMPLOYMENT.

Regularization of industry, establishment of public employment exchanges, systematic distribution of public work, prevention or absorption of surplus labor, unemployment insurance, and constructive care of the unemployable, are the six steps proposed in a practical program for the prevention of unemployment just issued in a twenty page report by Dr. John B. Andrews, secretary of the American Association on Unemployment, from the association's headquarters at 131 East 23d St., New York.

"The time is past," says Dr. Andrews, "when the problem of unemployment could be disposed of either by ignoring it, as was the practice until recent years in America, or by attributing it to mere laziness and inefficiency. We are beginning to recognize that the causes of unemployment are not so much individual and due to the shiftlessness of 'won't works' as social and inherent in our present method of industrial organization."

Employers, employes and the public as consumers, it is pointed out, all have a duty in helping to regularize industry. By establishing employment departments in their plants, planning output ahead, offering inducements for slack season trade and in other ways employers are urged to do what they can to make every job a steady job. At the same time employes are advised to encourage adjustments through short-time and overtime agreements rather than by discharge of part of the force, while discouraging excessive overtime by a demand for double pay for such work. "The slogan of the consumer should become 'shop regularly!'" says the program, in deprecating irregular and capricious purchasing.

Public employment exchanges are advanced as a matter of business organization and not of philanthropy. Both municipal and state exchanges are advocated, supplemented by a federal bureau of employment to secure similarity of operation and of information throughout the country. Neutrality in labor disputes is made a cardinal principle for all exchanges.

"Public work," says the program, "should be made to act as a sponge absorbing the reserves of labor in bad years and slack seasons and setting them free again when the demand for them increases again in private business." Successful operation of public works in several countries is cited.

Limitations on child labor, thorough industrial training, a revival of agriculture and country life, and a constructive policy of regulating and distributing immigration, are coupled with the regulation of working hours of adults as possible steps in preventing or absorbing the surplus of labor which intensifies the unemployment problem in large industrial centers.

For those who nevertheless are unemployed although able and willing to work, it is proposed that unemployment insurance such as is in operation in England since 1913 be established in America also. Out-of-work benefits by trade unions, either assisted or not assisted by public contributions, and a national system of public employment insurance, are suggested as possible methods. All have found successful application in various countries.

When all these steps have been taken, it is pointed out, there still remains the problem of the unemployable, including those who are sick, aged, inefficient, feeble-minded, or semi-criminal, as well as those who refuse to work. To these different groups it is proposed to give varied constructive care, aiming wherever possible at their early restoration to normal working life and independence.

The general scheme of economic reconstruction and organization outlined will, its backers believe, lead to conspicuous and permanent improvement. The plan is being widely circulated for criticism and suggestions.

THE BOILER MAKERS' JOURNAL

Official Organ of the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America.

A Monthly Publication Issued the First of Each Month from Room 3, Law Building, Kansas City, Kansas.

JAMES B. CASEY, Editor and Manager.

Subscription Price.....\$1.00 Per Year in Advance

ADVERTISEMENTS.

Advertising Rates Will be Furnished Upon Application to ..the Editor-Manager. No Reading Space Will be Sold for Advertising Purposes Under Any Circumstances.

All New Members Must Have Their Name and Address Sent in Through the Secretary of Their Lodge. After That They May Have Changes Made in Their Address by Filling Out Blank Form in Back of Book and Forwarding to the Editor.

All Copy Must be Received by the Editor by the 18th of the Month to Insure Publication in the Following Issue.

All Contributions and Correspondence Relating to the Journal, Should be Addressed to J. B. Casey, Editor, Room 3, Law Building, Kansas City, Kansas.

Entered at Postoffice, Kansas City, Kansas, as Second Class Mail Matter.

DEATH OF FORMER INTERNATIONAL SECRETARY-TREASURER GILTHORPE.

The International Lodge was very much shocked to learn of the death of former International Secretary-Treasurer Gilthorpe, which occurred at Mendon, La., Saturday night, January 9, of double pneumonia, after less than two days' sickness. After retiring from office last fall Brother Gilthorpe and his wife went South for the purpose of spending the winter in a warmer climate. He was enjoying the change and in good health and spirit until a short time before his death. Since he had retired from active duty and could take it easy his friends confidently expected he would live many more years to enjoy his honors and emoluments, and we are sure there are none who do not regret his early demise.

Brother Gilthorpe was one of the oldest in point of service, of any International officer of the labor movement, having served continuously from the consolidation of the old National and International in June, 1893, and was secretary of the old International with headquarters at New Orleans, previous to that time; he further bore the distinction of being among the first of any National or International officer being retired with pay.

The remains were brought to Kansas City and the funeral took place Tuesday morning from St. Mary's Catholic church. A solemn requiem mass was celebrated by Bishop Ward of the Leavenworth diocese. As a mark of respect to his memory all work at the International headquarters was suspended for the day.

The remains were followed to St. John's cemetery, where the interment took place, by a large concourse of relations and friends.

The floral offerings were numerous and beautiful. May he rest in peace.

A LOCKOUT IN THE OIL FIELDS OF OKLAHOMA.

What to all intents and purposes, amounts to a lockout, exists in the oil fields of Oklahoma and Texas, and effects the employes of about half of the tank building companies operating in the oil fields. They are as follows: Warren City Boiler and Tank Co., of Warren, Ohio; The Standard

Boiler and Plate Iron Co., of Niles, Ohio; Reeves Brothers, of Alliance, Ohio; Hammond Iron Works, of Warren, Pa.; The Petroleum Iron Works, of Sharon, Pa.; The Treadwell Construction Co., of Midland, Pa. and Riter-Conly Construction Co., of Pittsburgh, Pa.

While all of these companies operate open shop plants, they either had agreements with the men in the oil fields or they were paying the scale asked by the men. However, last fall work became slack and these companies true to their open shop proclivities, took advantage of the dull period through which we have been passing, and organized an association for the purpose of starting up operations in the fields under open shop conditions; our men were notified that after January 1, no job stewards would be tolerated, or committees from the organization recognized.

The Grand Lodge, as well as the officers of Lodge 592, have done everything to avoid trouble, but to no purpose, these firms seem determined to pursue their short sighted policy for the present. However, we believe they will soon be convinced of their error, and they will find their experiment a costly one, for when they seek a settlement they will find they will have to agree to be fair not only in the field, but in their shops as well, and their agreement will have to cover the men in the shops as well as the field, and they will have to agree to pay a living wage to all of their employes, no matter where employed.

It will be noticed all of these companies are from a section of the East in which a very poor standard of wages prevail, and they seemingly are seeking to drag down the standard in the oil fields, to that where they hail from, but we feel confident the loyal union men in the fields will soon convince them it cannot be done. As all efforts to adjust the matter failed for the reason the companies refused to answer communications, the Executive Council of our organization authorized our members to refuse to work under open shop conditions, and about 500 members of Lodge 592 suspended all work for the companies on January 18.

Furthermore Lodges 37, 39, 86 and 305 were notified to have their members discontinue work for these companies also, as all have been declared unfair.

There is another group of contracting companies from the Middle West that are doing work in the oil fields. These number about the same as those concerned in the lockout. These all have agreements with our men and are paying the scale and employ about half of the members of Lodge 592, which was given jurisdiction over the oil fields of Oklahoma, and which we believe has more than one thousand members.

The men voted to a man to refuse to work under these unfair conditions and are confident of winning out at an early date. These men are mostly all seasoned, expert tank builders, and are by years of training well fitted for the arduous task they have to perform and which is done under such a terrific speed, that only those well broke in can stand. Our members everywhere are advised to stay away from the oil fields until they are informed, through an official source of a settlement. Our members locked out

are warned of the possible efforts of their enemies, to cause some breach of peace, in order to secure the sympathies of the public. The men should avoid large assemblies in the street or highways, and should report to headquarters promptly each day and cheerfully perform the duties assigned them. Act peaceably and courageously, and stand together as union men and victory will be yours.

AMENDMENT TO LOCOMOTIVE BOILER INSPECTION LAW PASSES HOUSE.

The Amendment, offered some time ago, to the Federal Boiler Inspection law, and which has been on the unanimous consent list for some time, was taken up just after the holidays and passed by the house. It required unanimous consent to take this bill up, and if we only had one loyal friend present to raise his voice in objection the bill would still be on the waiting list of the House; as it is the measure has now gone to the Senate for action.

What the Senate will do remains to be seen, however, there seems to be considerable influence exerted in behalf of the measure.

This amendment would amend the boiler inspection law so as to take in the inspection of trucks, tenders, wheel tires and in fact the whole locomotive in general, this would more than double the present work and the work is altogether different from inspecting boilers, the idea seems to be to divert the principal work away from the inspection of boilers, this would offer a more plausible excuse for using other than boiler makers as inspectors, they have more than two of other trades to one boiler maker now under the old law, and if this amendment carries it is quite likely the bars will be lowered still further in order that incompetents of other trades might qualify.

The A. F. of L. Convention went on record as being opposed to this amendment, and the Railway Department did likewise. Our members should pass resolutions condemning the amendment in its present form and let their Congressmen and Senators know about it as soon as possible so that when it comes up for action in the Senate we may defeat it for good and all.

The transportation organization, strange to say, have indorsed the amendment of just and equitable laws, designed for theirs and the traveling public. Inspection of the parts of engines should come under the safety appliance law, extend this law and appoint more safety appliance inspectors, rather than try to mix things as the amendment referred to above would do.

KANSAS BOILER MAKERS HOLD A CONFERENCE.

A number of representatives from the lodges in Kansas held a conference in Topeka on the 27th day of December last, for the purpose of considering the necessity of an equitable boiler inspection law for Kansas. A very enthusiastic meeting was held and after the matter was discussed at length, it was decided to make a determined effort to secure such a law at

the present session of the Legislature which convened on January 12th and Bro. S. T. Sample, Secretary-treasurer of District Lodge No. 10, was selected to attend the session of the Legislature to work for its passage.

A large number of other labor organizations have indorsed the matter and officers of the State Federation of Labor have promised their co-operation and assistance and it is confidently expected that success will attend this systematic and determined effort to secure protection for the lives of those who are thrown around boilers, by seeing that unsafe boilers are not used.

The Kansas lodges thus sets a good example for other states to follow that have not yet enacted such a law.

TRYING TO KNOCK OUT WOMEN'S MINIMUM WAGE LAW.

Employers of the State of Oregon, who have been fighting the minimum wage law of that State, have appealed their case to the United States Supreme Court, and that body has concluded its hearing of argument of the case and taken it under advisement. Louis D. Brandies of Boston, represented the Oregon Wage Commission in defense of the law, and besides making oral argument of one hour's duration, has presented a written brief.

It will be remembered that it was Mr. Brandies who presented the masterly defense of the eight hour law for women several years ago, which more than anything else outside of its merit, was the cause of the law being declared valid. While we have not been a zealous supporter of the minimum wage law, as we believe the minimum would prove to be the maximum too, still if the people of a sovereign State deemed it necessary or beneficial for the protection of the female workers of that State to enact such a law, we believe they should have the right to do so without any interference from the Federal Courts.

Nine States have already passed women's minimum wage laws, and if the Oregon case is decided against the law, all of these State laws would be declared unconstitutional.

THE INDUSTRIAL COMMISSION TO INVESTIGATE ROCKEFELLER FOUNDATIONS.

The daily papers inform us that it is the intention of the Federal Industrial Commission to make an investigation of the activities of the Rockefeller, Sage and Carnegie "Foundations" and seek to learn how far they influence public opinion, and whether it is used for good or evil purposes. These foundations have been promoting industrial training especially in the Southern States, and it is charged they have tried to influence the opinion of the scholars, especially in reference to organized labor; furthermore it is openly stated that certain educators in different sections of the country have had their salary increased by a supplementary gift from these foundations on condition that, in return, these teachers are to teach such books and theories as are agreeable to those behind these foundations.

It is well to have these foundations investigated at this time, and if it is found they are seeking to influence the standard of education taught to our youths, they should be promptly wiped out of existence. These foundations represent hundreds of millions of dollars, the interest from which is used as those in charge of them desire. It will be recalled that a few years ago an effort was made to secure a perpetual charter for the hundred million dollar foundation of Rockefeller; however, we are glad to say the effort did not succeed and we hope no such effort will, as they are potent influences for evil in the hands of unscrupulous and designing men.

The activities and subjects which these seek to cover should be looked after by the State or National government, and under no circumstances should educational standards depend upon the benevolence of private wealth but should be supported by the government. By all means, let us have this investigation and let it be a thorough one, laying bare the whole workings and effects of these foundations. If they can stand the scrutiny of a rigid investigation, they will gain public opinion the quicker, and if they cannot stand the searchlight of the investigation, then the quicker we find out the better.

TOO MANY LAWYERS IN CONGRESS, SAYS ONE.

While many lawyers, as well as nine-tenths of the rest of us, realize it, only one lawyer that we have so far heard of, has admitted that we have too many lawyers in Congress for the public good. The papers tell us this man hails from Chicago. He is quoted as saying that "Out of the 531 members of both Houses of Congress, there are 302 lawyers." While we have not looked up the records as to the authenticity of this statement, if it is true we most heartily agree with his conclusion. The best governed community is that which selects its lawmakers, as far as possible, from all the different groups that go to make up the community.

The records of the achievements of the small labor group in Congress during the past two or three sessions fully demonstrate the trouble with Congress has been there were too few members in this labor group and too many lawyers and others without practical experience concerning the real problems that confront us at the present time. By all means, reduce this lawyer group and increase that of the labor group, and the country will be the gainer.

U. S. SUPREME COURT AWARDS DAMAGES TO HAT MANUFACTURERS.

A recent decision "handed down" by the Supreme Court of the United States awarded damages to Danbury Hat Manufacturers, which they allege they sustained because of a strike of their union employes. The amount awarded is three times as much as the real amount of the alleged loss.

This is the final outcome of the fight which has been made in the

courts for the past seven years, unless this same court opens the matter again on an error or some technical grounds.

What action of the Hatters or the A. F. of L. will be taken in reference to meeting the demands of the verdict is at present problematical; however, the decision is met with far more equanimity by organized labor because of changed conditions than it would have, had the law not been changed, for it would have created an intolerable condition that would not be tamely submitted to by organized labor, for it would have created conditions as bad as in the feudal days in Europe, centuries ago, when men were bound to the glebe (or land) and changed owners with the land, and could not go from one place to another without a permit of their master. The right to strike—to quit work whenever or wherever men may please, either singly or in a body—is an inalienable right that cannot be abridged so long as this right is exercised peaceably.

We hope some means may yet be found to thwart this nefarious decision, which is not based on constitutional law of this country, but upon the Taft Case decision of the House of Lords of England a few years ago, which was acknowledged to be a revolution in court decisions in that country, which has no written constitution like that of our own; however, corporation sharks in this country eagerly seized upon this decision and urged it upon the judges (of our courts) and they in this case lent a pliant ear, and it would bid fair to become general in a short time had not Congress, at the urging of labor, changed the laws recently so that another decision of this kind should be impossible, or if it is, an investigation of the court making it would be very much in order.

The decision affects 186 members of the Hatters' Union and the damages awarded to D. E. Loewe & Co. amount to \$252,130.

STANDARD TIME HUMBUG SHOWS UP AGAIN.

The receivers for the Chicago and Eastern Illinois Railroad have been trying to inaugurate a "standard time" system very much like that in vogue in the American Locomotive Company's plants a few years ago, and which our members in these plants succeeded in exterminating, root and branch, and that, too, single handed, and alone. However, it ought not to be very hard to displace such a questionable system, as it proved to be a dishonest proposition from the start, for men would receive 30, 40 or 50 cents over and above a nominal wage, for a whole week of strenuous work.

The plan is based upon the Taylor system of so-called scientific management. The standard time was secured by timing the swiftest workmen, working under the most favorable conditions; therefore there was no likelihood of the average workman, working under ordinary conditions, reaching par and thus secure the twenty per cent bonus held out as a bribe to induce men to strive to the limit, to secure; furthermore, a man might possibly earn a small bonus today and forfeit it all tomorrow because bad luck or a thousand and one things may prevent the next job being completed anywhere near the allotted time, and, as the system provides for taking the

average for each pay period, rather than each job, therefore what was made by hurrying on the first job would be absorbed by the lost time on the second job, and while the workman may have worked hard in each case and the cause for delay in completing the second job may have been entirely beyond his control, still there would be no compensation to him for the extra efforts put forth.

The whole system is a wilderness of red tape—records to be kept, and an abnormal increase in overhead charges, which, reduced to its last analysis, means an added burden for the workman without an adequate increase in the amount of compensation received.

However, while we are unalterably opposed to this pernicious system of work, we are equally opposed to the method used in trying to introduce the system, which is directly in conflict with an agreement entered into by the management with the Federated Shop Trades under date of September 1, 1913, and which was to continue in effect until a thirty-day notice was given by either side that a change was desired, and as no such notice was given, this agreement is still in force and it is based upon a straight day's work basis. The introduction of this bonus system is a direct violation of its provisions, and upon the face of it, it looks as if the management have tried the supervision of the United States Courts, the receivers should not allow to take advantage of dull times and slip one over on the men.

However, as this road is in the hands of receivers and therefore under the supervision of the United States Courts, the receivers should not allow such sharp practices to prevail.

It is often charged that the members of unions won't live up to their agreements, but it looks as if the shoe is on the other foot.

We hope the receivers will take prompt action in this matter as did Judge Clark in reference to the Wheeling & Lake Erie, as reported in the last issue of the Journal.

MR. FORD, OF PROFIT SHARING FAME, DENOUNCES MILLIONAIRE PHILANTHROPISTS.

Among the witnesses who testified before the Industrial Commission recently was Mr. Henry Ford, the Detroit millionaire motor car builder, who has justly earned a world-wide reputation as an employer of labor and who has inaugurated a real profit sharing system in his plants that means good wages to his employes. Mr. Ford expressed his contempt for men who by sharp practices and unfair dealings extract millions out of business and then became philanthropists; he justly and correctly states the attitude of all free workmen when he says "they want justice, not charity." He is quoted as saying: "The methods in vogue in my factory would permit taking over the entire population of Sing Sing prison and making good citizens of them." Since the inauguration of his profit sharing plan and a minimum wage of \$5.00 per day, he testifies that the efficiency of the men has increased from 15 to 20 per cent over their former standard of work produced, notwithstanding the hours were also reduced from nine to eight.

This result speaks for itself and should encourage other manufacturers to pay a fair part of the profits to the workers as wages. From all reports the plan as inaugurated by Mr. Ford has had splendid results upon the employes and their families—bank accounts and life insurance have greatly increased, as have also the number of homes owned by the employes; others have moved from squalid quarters to nice homes with healthful and uplifting influences surrounding them.

George W. Perkins also appeared before the Industrial Commission and extolled the alleged merits of the profit sharing of the steel trust. He apologetically states that ONLY 22 per cent of this trust's employes were forced to work twelve hours per day. He defended the efforts of the trust to sell its stock, water and all, to its employes. He attributed the FAILURE of this trust to make profits to the new tariff law. This seems to us a very cheeky statement, when the facts in the case all show the steel trust has stocks and bonds to the amount of about a billion dollars, which does not represent anything but water. The dividends and interest on this fabulous amount must be paid before the men get anything, as this is set down as fixed charges. One suggestion, I believe Mr. Perkins made, has considerable merit, that is that the working men (employes) should select one of their number to act on the board of directors of the company they are employed by. We spoke of this kind of a proposition some time ago, and believe there is merit in it, if it is honestly carried out, as it would inspire confidence of the men in what was being done, and this confidence would beget more confidence between the management and the men, and if it was backed up, by fair and frank dealings with each other, the result would be gratifying to all concerned.

SECRETARIES SHOULD SEND IN DEPOSITED CLEARANCE CARDS PROMPTLY.

From circumstances and information coming under our observation recently, it would seem that some of our secretaries are not promptly carrying out the law in reference to sending the clearance cards deposited in their lodges to the International Secretary-Treasurer. This law was enacted at our last convention and it is very important that the law be carried out promptly by each secretary so that the records at headquarters may be kept complete. Furthermore, there is a fine liable to be imposed upon any secretary failing to carry out its provisions.

It is not a hardship or much trouble to comply with, for after each meeting when the cards have been accepted, the secretary has only to indorse them, the date of deposit, number of lodge, and sign his name on each, and put them in an envelope and address to the secretary-treasurer. There is very little work attached to it and it can be transacted in a couple of minutes; furthermore, it is important that this information be in the hands of the International Secretary-Treasurer.

Therefore we trust all secretaries will follow out the law promptly. Get the habit of doing so right after each meeting and it will be an easy matter.

M. O. & G. STRIKE DECLARED OFF.

The federated strike which has been in force for nearly two years on the Missouri, Oklahoma and Gulf Railroad has been declared off by the railway department of the American Federation of Labor, effective December 28, 1914. This action was taken at a meeting of the executive officers of the railway department held in St. Louis on December 22, 1914, and was in response, we believe, to a petition signed by a large majority of the men involved.

We are sorry to learn this strike did not have a more favorable ending, and believe it would have been settled long ago had some of the officials of the company shown a disposition to be fair; as we visited Muskogee several months ago for International President Franklin to look after some other business and while there, on request of the M. O. & G. federation, sought to bring about a settlement, some of the officials of the company we found friendly, but those who had the determination of the matter in their hands were so hostile they would not even consent to discuss the matter. Later on, after returning to headquarters, we took the matter up with one of the receivers of the road, who at first talked fair and promised to take the matter up with us later on, but failed to do so, even though we tried on several occasions to meet him for that purpose.

DEATH OF FIRST INTERNATIONAL VICE-PRESIDENT HINZMAN'S MOTHER.

Just as the Journal was about ready for the press a wire was received by International Vice-President Hinzman, which announced the death of his mother at her home in Centerville, Ia. A paralytic stroke, which occurred at Christmas, summoned the family to her bedside during the holidays. After several days she seemingly rallied and grew stronger, and it was hoped her recovery would be permanent; however, her advanced years was against her and she gradually grew weaker until death.

The Journal desires to extend our sympathy and condolence to the two brothers, Al and Dutch, as well as the other members of the family.

No arrangements have been made for the funeral at this writing, but we presume it will take place in Centerville, near her former home.

PERSONAL MENTION.

Brother W. D. Walpole of Lodge 521, Van Buren, Ark., was a recent visitor to headquarters, and reports that he received a severe scalding while visiting the M.-P. round house there in December. The brother speaks in high praise of the brothers of No. 521 who nursed and looked after him

until fully recovered, and he desired that we make public their generous actions and his appreciation of same.

THE CORRECTION OF AN ERROR.

Among the lodge notices which appear in this issue will be found one from the secretary of Lodge 32, Kansas City, Mo., concerning the publication of the name of Brother H. Czatlenski, Reg. No. 64922, in the past two issues of the Journal for alleged failure to pay room rent, and as the lodge found a mistake had been made, now offers an apology to the brother.

It seems this brother's due book was stolen from him in Huron, S. D., last August and was advertised in October Journal, and a duplicate was issued to him by the I. S.-T. on request of his lodge. This brother left Kansas City soon after getting duplicate book and went south, and the person who got this book came here and went to work and secured room rent in the name of Brother Czatlenski, showing the stolen book to prove his identity. After working a short while he skipped out without paying his rent, and upon a complaint, Lodge 32 advertised him in the Journal. Brother Czatlenski was deprived of securing work in a couple of places because of this ad in the Journal, and as he is evidently an innocent sufferer, we hasten to get this in the Journal, even though our forms were practically closed for this issue.

QUOTATIONS.

'Tis education forms the common mind;
Just as the twig is bent, the tree's inclined.—Pope.

The best may slip, and the most cautious fall;
He's more than mortal that ne'er err'd at all.—Pomfret.

The poorest day that passes over us is the conflux of two Eternities; it is made up of currents that issue from the remotest past and flow onwards into the remotest future.—Carlyle.

Great men are they who see that spiritual is stronger than any material force; that thoughts rule the world.—Emerson.

There is but one way I know of conversing safely with all men; that it not by concealing what we say or do, but by saying or doing nothing that deserves to be concealed.—Pope.

To everything we call a cause we ascribe power to produce the effect. In intelligent causes, the power may be without being exerted; so I have

power to run when I sit still or walk. But in inanimate causes we conceive no power but what is exerted, and therefore measure the power of the cause by the effect which it actually produces. The power of an acid to dissolve iron is measured by what it actually dissolves.—T. Reid.

The adequate meaning of chance as distinguished from fortune, is that the latter is understood to befall only rational agents, but chance to be among inanimate bodies.—Bently.

The wise man has his follies, no less than the fool; but it has been said that herein lies the difference—the follies of the fool are known to the world, but are hidden from himself; the follies of the wise are known to himself but hidden from the world. A harmless hilarity and a buoyant cheerfulness are not infrequent concomitants of genius; and we are never more deceived than when we mistake gravity for greatness, solemnity for science, and pomposity for erudition.—Colton.

Mechanical Department.

To develop the hole for a small pipe connecting an elbow at an angle.

Fig. 1, shows an elbow and the dark line at the top center is an outline of a hole for a small pipe connecting with the elbow at an angle.

Fig. 2, shows segments of sections with the method for developing hole. The method of laying out section of small pipe to connect with the elbow was reproduced last month. After marking elbow as shown and develop divisional lines on outside of elbow, which

are measured from 1 to 4, where these lines cross the dark line at middle of elbow, are points of measurements in developing hole. On line a-b, set one point of dividers at b, and the other at point 1, transfer this distance to line 1 of template, next take distance from line a-b to point 2 and transfer as before to lines 2 on each side of center-line. Continue in like manner with points 3 and 4, then trace a line through these points, this will give outline for hole in this template. The other part of hole is made in the other template in like manner.

TO DESCRIBE THE PATTERN FOR AN OBLIQUE CONE.

To develop pattern, proceed to lay out outline of cone such size as wanted, as A, B, C, D, Fig. 1. Continue vertical A, B, C, D until they meet at O. Bisect large diameter C, D at F. Describe semi-circle from C to D, divide into any equal number of parts, in this case six, as C, 1, 2, 3, 4, 5 D; set one point of dividers at C and describe

lines to O. With O as a center, radius O, D strike circular line to C, Fig. 2, which equals one-half of diameter of base of cone; divide into the same number of parts as that of cone, strike lines from these division points to O, with O as center and radius from O to divisional points on both large and small divisional points as shown, if it is to be a lap joint allow sufficient extra for lap. This will complete one-half of template.

International Officers' Reports.

REPORT OF SECOND INTERNATIONAL VICE PRESIDENT NOLAN.

Since my last report for Journal my time has been mostly taken up in connection with the Amendment to the Boiler Inspection Bill passed by Congress February 17th, 1911, which has been fully explained on several occasions in the columns of our official and has gone through many parliamentary stages in an effort to pass it, namely, the House Calendar, Consent-Calendar, the Committee on Rules, and back again on the Consent Calendar.

But the transportation Organizations have failed to get the necessary support in Congress to have the Amendment become a law, at the closing of this report, January 2, 1915, although the usual sentimental appeal has been mailed to all Congressmen urging them to pass the Amendment as a Christmas present to the Transportation Brotherhoods for the protection of life and property on American Railroads.

If such a claim was the real purpose of the Amendment, it would have the unanimous endorsement of the entire American labor movement, but the object of the Amendment is not for the purpose claimed by any means. And all the mechanics employed in the railroad shops know it, on the contrary, instead of protecting life and property on American railroads, it would simply jeopardize it even to a much greater extent than at present in placing incompetent men in positions having only a theoretical knowledge and no practical experience whatever in the construction or repairing of boilers, as the pending Amendment purposes, that the inspectors of locomotive boilers will also be inspectors of locomotive engines and all its parts.

It is strange how some men's opinions change even in the face of statements made, and absolute knowledge from experience, knowing they are wrong, but there is a motive sometimes, that destroys some judgment, although aware that law is violated and justice discredited in order to gain a temporary advantage over his fellow man, or perhaps secure a position regardless of law or the required qualifications.

In considering past incidents in connection with the Boiler Inspection law, I find that in 1909 a meeting of labor representatives was held in the Bureau of Commerce and Labor, Washington, D. C., to discuss several important propositions that confronted labor at that time, and one of the propositions was a Federal locomotive boiler inspection law, among others who took part in that meeting was a representative of the Brotherhood of Locomotive Engineers, who participated in its deliberations and especially on the great necessity of a Federal locomotive boiler inspection

law, in order to protect the members of his organization. And in discussing the many reasons why such a law should be enacted, he said in part: I realize that none of my men will enter class of service, as none but boiler makers would be qualified to inspect a locomotive boiler, which statement was absolutely correct, and if correct in 1909 why not now, so that the Federal boiler inspection law may be carried out as intended by Congress, that life and property may be protected on American Railroads, as claimed by the advocates of the pending Amendment to the Boiler Inspection Act of February 17, 1911. But I am yet of the opinion should it come to an issue in the enforcement of the law, in order to protect his men in the cab that the representative of the Brotherhood of Locomotive Engineers will stand by his public declaration made in 1909, before the Bureau of Commerce and Labor, that none but competent boiler makers are qualified to properly inspect a locomotive boiler, for as a railroad man with years of experience in the cab of a locomotive he couldn't have said otherwise, as the protection of the members of his organization from boiler disasters was his first consideration when advocating a boiler inspection law, knowing that it required a practical boiler maker to pass judgment as to the condition of a locomotive boiler, which proves beyond a shadow of doubt, why the law as enacted February 17, 1911, should have been carried out, as intended by the Congress of the United States, namely; that a Federal locomotive boiler inspector should have practical knowledge in the construction and repairing of boilers, which law applies to Bureau and District Inspectors alike, yet we find only about sixteen boiler makers out of a total of fifty District Inspectors holding positions as Federal locomotive boiler inspectors, while a sufficient number of practical and technical boiler makers with all the necessary qualifications, could have been secured in the southeastern district alone, not to speak of other sections of the country. Still we find about thirty-four inspectors of locomotive boilers holding Federal positions who know nothing about the trade of boiler making unless from observation. The question is, what is the cause, or who is responsible for such a condition of affairs. In considering the selection of bureau chiefs from a mechanical standpoint, great care should have been exercised in securing competent inspectors for such important positions, for all must admit an error has been made, and a very serious one, from the viewpoint of law as enacted as well as practical mechanical efficiency, which is apparent to all fair minded men who understand the situation at issue, as the issue is not, who shall hold those positions, but on the contrary, the enforcement of the law.

Therefore, in consideration of the above, there should have been selected after the Federal Boiler Inspection law had been passed by congress, and signed by President Taft, a committee of well known practical and technical railroad boiler makers, having years of railroad shop experience as an examining board to pass upon the qualifications of applicants for the positions of chief, and two assistant chiefs of the Bureau of Federal Boiler Inspection, said board to make their recommendations for those positions to the President, who would make the appointments and be confirmed by the Senate, in that way, and no other, can a staff of competent inspectors be served or the law enforced and justice established.

There are many bills in the interest of labor introduced during the 63rd Congress, some of which have not received favorable consideration in committee, due to the fact that co-operation of labor representatives is necessary in order to prevent misunderstanding in securing favorable legislation to organized labor. There seems to be a disposition to follow in the same old rut of years ago, get what you can and let the other fellow take what is left. It won't work now days, as conditions have changed what effects on organization as a general proposition will effect kindred organizations, at that time, or later on.

If the railroad shop organizations should attempt to carry out the old methods of individual efforts when in conference with railroad managements, and be successful, system federations would be both useless and expensive, but experience has taught them that individual efforts in doing business with railroad officials have proved a failure on many occasions, hence joint action of all affiliated trades was the only logical move to cope with changed economic conditions in order to get favorable results in the interest of their members.

Therefore similar joint co-operation is just as necessary in trying to get state or national legislature, as joint action of a federation because the principle involved is just the same protection. The railroad employes department was organized for the same purpose, greater power through co-operation of its affiliated organization in getting results, either in the interest of the individual organizations or the federation as a whole, in that way misunderstandings and friction very seldom crops up, and experience has taught many of us that results along legislative lines cannot be successful in any other way, unless in extreme cases, when public clamor demands certain legislation, but as a general proposition labor legislation don't receive very much public indorsement by any means. On the contrary oppositions from certain co-operations is evident at all times, and on the job to defeat any measure that would benefit labor. The transportation organizations understands the necessity of joint action, while

I don't approve of their selfish propoganda in connection with the labor movement, or in securing state or national legislation, yet the four brotherhoods have secured and are securing legislation which no one who understands the situation can deny, has a joint legislative committee at all times in Washington with suitable quarters to properly carry on the work required, so as to keep in touch with their local organizations or legislation when pending, so as to be prepared to act according to instructions at any time, and have got results. Why not the various International organizations affiliated with the A. F. of L., railroad and metal trades department, have also a legislative committee in Washington, D. C., when necessary, as we are up against a problem either on national or state legislation in order to get some measure of justice in the halls of legislation, otherwise our chances for success along the above line will be very limited, as capital is organized and on the job, and without a particle of friction among its representatives with a well defined understanding as to what they want and how to get it.

I have received several letters of late from navy yard lodges of the Brotherhood, requesting information as to how to proceed in bringing about a close co-operation among the organized boiler makers, iron ship builders and helpers employed in government navy yards.

Lodges No. 57, 450, 19 and 148, realize the necessity of a naval district so the interest of all navy yard lodges of the Brotherhood can be looked after through the Navy Department at Washington when necessary.

Portsmouth, N. H., Boston, Mass., Brooklyn, N. Y., Charleston, S. C., and Bremerton, Wash., are yet to be heard from on the above proposition, but hope that in the near future a move will be set on foot to bring about a delegate meeting of all navy yard lodges of the Brotherhood at some central point in the East as all of the navy yards are in that territory with the exception of No. 148 and No. 290. I must say from past experience in connection with organization in government navy yards, that navy yard lodges of the Brotherhood are an absolute necessity in the interest of their members, even when railroad or contract lodges of the Brotherhood are in the same vicinity.

In the locality of the Norfolk navy yards there are three lodges of the Brotherhood—No. 57, a navy yard lodge; No. 298, a railroad lodge, and No. 428, a contract lodge, all three working in perfect harmony with each other, as they should be; no friction whatever, and when joint action is necessary for the benefit of all, they are right on the job, shoulder to shoulder as one. Navy yard lodges are an absolute necessity, for the protection of its members, as there seems to be a disposition on the part of the naval officials to extend the building of new ships in government navy yards, and with in-

crease of war ships of various types. A corresponding increase in the mechanical forces will be required on both new and repair work. Therefore, every effort should be made to get every eligible craftsman employed in government navy yards, members of the Brotherhood, so as to be in a position to co-operate jointly, either on legislation, through their Senators or Congressmen in Washington, or on working conditions or wage, which sometimes have to be taken up with the navy department, when local efforts fail.

There are many other matters of vital interest to members of the Brotherhood employed in navy yards that also require joint action to either introduce or prevent, and until such time as the boiler makers, iron ship builders and helpers employed in government navy yards realize the necessity of organization and become members of it very little progress can be made by any representative in Washington, D. C., in the way of securing what belongs to them, recognition, and when that is once accomplished unfair conditions is hardly ever forced.

I have been an advocate for several years of a naval federation of the trades employed in government navy yards, was a member of the navy yards league which was organized a few years ago and would have done much good, had not the leaders of the league showed a disposition at every opportunity to carry on their negotiations on an independent basis with the department, entirely ignoring their international representatives and of course the movement fell to pieces on that account, from the lack of united co-operation.

At present a Naval Federation of Trades should be organized among the various crafts employed in government navy yards, but no effect has been made whatever, as there seems to be a disposition to stand by the old adage, survival of the strongest numerically, and let the weak organizations get what they can, and if they get nothing, but promises, alright; that's not the object of the labor movement by any means.

The boiler makers employed at the Washington navy yards have a kick coming alright, as the recent action of the erecting shop relief association in debarring them from membership, smells pretty fishy.

There is what is known as a relief association in many of the shops for the benefit of the employes in sickness and accidents. The erecting shop association of which the boiler makers were formerly members of, changed their by-laws in order to debar the boiler makers from continuing their membership on the ground that the boiler trade was a hazardous occupation.

If such was the case, the boiler makers wouldn't have any protest against the relief association, nor could they raise any objection in excluding them from membership. But as members of the relief association, I

have been informed by authority that can't be questioned, that the association in the past haven't been called on to pay any more benefits to the boiler makers than other members of the association. There must be a reason. The boiler makers don't care very much either one way or the other, yet they feel that a great injustice has been done them and fail to see why the boiler trade is any more hazardous than other metal trades. Notwithstanding the relief association to the contrary.

As the great majority of work performed in the boiler shops (so called) is not the construction and repairing of marine boilers as generally supposed, but a different class of work altogether, both requires experience and skill to turn out, but a large percentage of work done by the boiler makers at the Washington navy yard is ordinance work, which requires first class mechanics trained from experience on that particular class of work, and don't have any more accidents among their men than any other metal trade in the yard, at least there is no record to prove to the contrary.

It is with extreme regret I have to report the untimely death of Brother W. S. Wurzbach, Reg. No. 69756 of Los Angeles, Cal., who was almost instantly killed on December 9, 1914, while crossing the yards of the Chesapeake and Ohio Railroad at Newport News, Va., and in company with Brother Wilford Martin of Lodge No. 528, Deer Lodge, Mont., who was present when the fatal accident occurred.

I met Brother Martin on December 12, at a special meeting of Lodge No. 55, who explained cause of sad accident. There are a number of tracks in the yards of the Chesapeake and Ohio railroad at Newport News, and in crossing them Brother Martin and the late Brother Wurzbach saw a train coming and stopped to let it pass, and stopped right opposite them, separated and left a small opening in train, thinking there was no danger in going through, they started, Brother Wurzbach first, was just between the couplings when the engine backed down and crushed him almost to death, as he only lived a few minutes after the accident.

Brother Healey, president of Lodge No. 55, was at that time visiting in Wheeling, West Va., but on getting information of the death of Brother Wurzbach, wired to several member of Lodge No. 55, to have the body properly looked after until his family or lodge would be heard from.

In company with Brother Hickey and Healy of Lodge No. 55, I called at Caffees' Undertaking Establishment, saw the remains which had already been embalmed, after which we arranged to have the members of Lodge No. 55 escort the remains of Brother Wurzbach to the railroad station when shipped to his late home, Los Angeles, Cal.

The writer joins with the officers and members of Lodge No. 55 of Newport News,

Va., in extending to his dear mother and sister, other members of his family as well as his brother members of the brotherhood, and friends in Los Angeles, Cal., our most sincere sympathy on account of the sad ending of Brother Wurzbach. May he rest in peace.

In conclusion let me say that conditions don't show very much improvement either in railroad or contract shops, in the south-eastern district as jobs are few and hard to get, this report is not made in the spirit of a calamity howler, but on the contrary from industrial conditions as they exist, and seen by the writer. There surely must be something radically out of joint when jobless men by the thousands find it impossible to secure employment, willing to work in order to support their families, and can't get it, in the land of plenty with a bumper crop in 1914. For when men and women must go hungry from lack of employment it becomes a pretty serious matter to think about that, in the development of a great nation, thousands of her citizens should be driven into enforced idleness, while none of our great statesmen seem able to apply a remedy, therefore, the time has come when organized labor must seriously consider the problem that comforts them for self-preservation.

Some of our statesmen are in favor of a great standing army with big appropriations for military purposes in order to prepare for war and any nation that fosters and cultivates that ideal will have war.

Europe has played the war game for years, and what has she got for her policy, ruined homes, hundreds of thousands killed in battle, with cripples, orphans and widows, in defense of what, that kings and their allies may gratify their ambition in the best blood of their people, but let us hope for changed conditions through the political efforts of the labor movement at the ballot box so this great nation of ours will devote her energy in the proper direction, in order to make prosperous citizens, instead of jobless ones. I am

Yours fraternally,
THOS. NOLAN, I. V. P.

To Officers and Members of all Lodges,
Brotherhood of Boiler Makers, Iron Ship
Builders and Helpers of America.
Dear Sirs and Brothers:

Your attention is called to the fact that there is a bill in the United States Senate at present which is known as the Goeke House Bill No. 17894, that provides for the inspection of the machinery and tenders of a locomotive, as well as the boiler itself. The indications are that the bill may be reported out by the Senate without further hearings, and passed at this session of Congress.

The bill in its present form is unsatisfactory and your attention is called to resolution No. 141, passed at the Thirty-fourth Annual Convention of the American Federa-

tion of Labor, held in Philadelphia. The resolve of which reads as follows:

"Resolved, That this, the Thirty-fourth Annual Convention of the American Federation of Labor, go on record as favoring the appointment of inspectors with practical experience in addition to the other qualifications demanded by the Boiler Inspection Bureau, and, be it further

"Resolved, That the officers of the American Federation of Labor be instructed to cooperate with the organizations directly interested who are affiliated to the American Federation of Labor in drafting a suitable bill and in having it enacted into law to cover the inspection of locomotive boilers, engines and tenders and the appurtenances thereto, said proposed bill to contain provisions for the appointment of inspectors having practical shop experience, clearly specifying and recognizing the indisputable fact that none but those who have had such practical experience in their respective callings can qualify for these positions."

Acting on this resolution the President of the Railway Department, in conjunction with the General Officers of the Trades interested met in Washington, D. C., the week of January 11 to 16, and drafted a bill that provides for the inspection of boilers, engines and tenders by practical experienced men who have had not less than five years shop experience at their respective trades. It further provides that fifty additional inspectors shall be appointed, to not only inspect the boiler as a separate proposition, but that the engine and tender inspectors will be separate from the boiler inspectors. This bill has been approved by the Executive Council of the American Federation of labor. Unless there is some quick action on the part of the shop trades to arrest the Goeke Bill No. 17894, the probability is that it will be passed before the bill we have drawn up and approved by the Executive Council of the American Federation of Labor can be presented to the Senate. You are, therefore, instructed to make this circular a matter of business at your next regular meeting and notify your Senator that the Goeke Bill, H. R. No. 17894, in its present form is not satisfactory and should be amended to conform to the bill drafted by the officers of the Railway Department and approved by the Executive Council of the American Federation of Labor.

Our reason for opposing the Goeke Bill, H. R. No. 17894, is that it simply extends the jurisdiction of the present Boiler Inspection Bureau to include the engine and tender. The present boiler inspection law provides for the appointment of fifty District Boiler Inspectors who were presumably to be selected because of their fitness and practical experience in the construction, repairing and testing of boilers. A large majority of the District Boiler Inspectors who were appointed and are now attempting to inspect locomotive boilers, had no practical experience and are incompetent to inspect

a boiler. If the Goeke Bill H. R. No. 17894 should become a law, the duties of the fifty District Boiler Inspectors would be extended to include the inspection of the locomotive engine and tender. Very few of these inspectors have ever had any practical experience in the construction, repairing and testing of machinery.

Our contentions are, and we feel sure that we can prove them:

First: That, only men with practical shop experience and training in the construction, repairing and testing of boilers, are competent or qualified to inspect a boiler.

Second: That, only men with practical shop experience and training in the construction, repairing and testing of locomotive machinery, are competent or qualified to inspect the engine and tender.

Third: That, it is absolutely necessary to at least double the number of District Inspectors if the work of inspection is extended to include the engine and tender, and is to become in any manner productive of the benefits to be obtained by proper and efficient inspection.

We urge that you not only have your officers, but as many of your members as can, write to Senators individual letters and get your Central Body and shop organizations to write to their respective Senators, protesting the passage of the Goeke Bill H. R. No. 17894, in its present form.

The necessity for prompt and immediate action is due to the fact that the four transportation organizations are flooding the Senate with letters urging the passage of the Goeke Bill No. 17894 at this session of Congress.

This bill passed the House January 4, and is now before the Senate Committee. It is therefore, essential that you take immediate action in line with the suggestions given above. We will be glad to have you send us a copy of your letter to the Senators, as well as copy of the reply received.

This action is in line with the action taken by the Convention or the Railway Department held in Kansas City, April last, and has since been approved by the Philadelphia Convention of the American Federation of Labor and by the Executive Council at its meeting January 11 to 16, 1916.

The success of the efforts of your officers in this matter largely depends upon your support and co-operation, and nothing will bring the desired results to a greater degree than by your voicing your sentiments directly to your respective members in the United States Senate. To facilitate and assist you in the work, we enclose a sample letter as a guide.

In writing your Senators we advise that you use your own phraseology.

Fraternally submitted,

WM. H. JOHNSTON,

MARTIN F. RYAN,

JAMES W. KLINE,

J. J. HYNES.

J. A. FRANKLIN,

International President.

Correspondence.

Miami, Ariz.

Dear Sir and Brother:

I am sending you a list of the members of Local No. 187, Miami, Ariz. As far as I know, this list will reach all the addresses of the members that I have been able to obtain.

The prohibition law is enforced here and the lid is on very tightly. Throughout the state, from information I get from the newspapers, the law is obeyed.

The law which is of more benefit to Arizona comes up for a hearing in Los Angeles before three judges of the Federal Court. An injunction is being asked for to restrain the state officials from enforcing the law known as the 80 per cent law. What will be the decision of the judges I do not know.

The law known as the 80 per cent law was a measure voted on and carried by a large majority of the electors in this state at the last general election.

The measure states that where five or more persons are employed, 80 per cent must be a citizen of the United States. A strong fight will be made against that law,

as the mining companies like the foreigners better than the natives.

A corporation in this place known as the Miami Copper Company made a statement through their legal counsel that 1,200 men were employed, and 100 were registered. At the mines of the Arizona Copper Company at Clifton and Metcalf, Ariz., there were two of the employees registered out of a total of 800 persons. At the United States Verd Copper Company's mines at Jerome, Ariz., on one of the levels of the mine 400 men were employed and only one American, and he was not old enough to vote.

There are other mining camps all over the state where an American is an undesirable, a dago looks good, but a Jap or a Chinaman looks better still to the corporation.

Drastic measures had to be taken and if the injunction is denied I am sure the law will be enforced. If the Arizona law is valid, I think that every state which has the initiative and referendum will enact similar laws in a short time.

Yours fraternally,

ROY DRUMMOND.

A GROUP OF THE MEMBERS OF LODGE NO. 434 WORKING FOR THE BELT LINE OF CHICAGO.

Champaign, Ill.

Dear Sir and Brother:

It is not often that Lodge No. 150 has much to write for the Journal, but as we have received quite a number of letters in regard to what we are going to do with our former members on the New York Central line whose cards were revoked in November, 1911, we thought in order for all lodges that have had the same experience that we have had, it would be a good way to let all members know just what we think is no more than fair to do.

While we do not believe in placing a fine of \$1,000 and having a former member suspended for 99 years, we do think it no more than right that the former members pay to belong to the union, and we think the best way to have the former member pay dollar for dollar, just the same as if they had not had their cards revoked, that is to pay each month's dues, and the \$20 assessment, the three-dollar (\$3.00) penalty and the cost of reinstatement stamp.

We have made out each former member's standing until January 1, 1915; this amount will increase \$1.50 a month until such time until the former member gets reinstated or unless by special dispensation by the lodge.

Chas. Mullin, \$78; H. C. Howard, \$74; T. Riordan, \$77; S. Alston, \$75; G. Reinhold,

\$76; L. McKinney, \$76; H. Phillips, \$79, and E. L. Wanamaker, \$76.

"CORRESPONDENT,
Twin City Lodge No. 150,
Champaign and Urbana, Ill.

Green Bay, Wis.

Dear Sir and Brother:

Green Bay Lodge No. 485 held their installation of officers, meeting at 3 p. m. Sunday afternoon, January 3, at the Boiler Makers and Helpers' Hall, 109 Donsman Street, which was very widely appreciated by all the members and families in attendance. As we were very fortunate in having Brother John Du Brucq of Milwaukee and wife and son in our midst, Mr. Du Brucq being a man of wide experience in lodge circles and committees and conventions was appointed to conduct the installation which was very well performed.

After the officers were all installed, Mr. DuBrucq gave the members a very interesting speech on very many important subjects which was of a great benefit to all our members and I hope will always be a guide to each and every member of our local. After this was over, refreshments were served and other amusements, and everyone enjoyed a very pleasant afternoon and evening, and departed for their homes with the best of feeling and hoping that we

have another installation that will be as well enjoyed and conducted as the one commencing the year 1915, and hope it will still be a more prosperous year than the one ending the year 1914.

Yours fraternally,
JOHN M. SLATER,
Fin. & Cor. Sec. Lodge No. 485.

Miles City, Mont.

Dear Sir and Brother:

Just a line to let the members at large know that Local No. 520, of Miles City, Mont., is still doing business at the same old stand. In the month of December we had Brother Callahan, District Business Agent of the Milwaukee System, with us, and made us a good social talk of the get-together spirit, and the members of Lodge No. 520 think that District No. 26 was fortunate in securing the services of so capable and honorable a man as Brother Callahan.

We also had with us about a week later, the 5th inst., Vice-President Wm. Atkinson, who is so well known to the members of No. 520 that he does not need an introduction when he comes around. The majority of the members of Lodge No. 520 have been shop mates of Bro. Atkinson, and we don't notice any difference in Billy Atkinson, although he is our Fifth International Vice-President, and one of our most trusted and popular officers, and Lodge No. 520 extends him an invitation to call on us at any time and he will be received with a glad hand, or in fact, any of the Official Family.

On December 31, 1914, we gave our sixth annual ball at Kinres & Havens' new Auditorium, and to say that it was a success would be expressing it mildly. The following members were on the dance committee: P. J. Gallagher, M. C. Sullivan, Ed. McSperritt, C. G. Simmons, Glen A. Fry, Chas. E. Cook and L. McNurlin. And we wish to publicly thank each and every member of Lodge No. 520 for their hearty co-operation, in which they supported the dance committee.

Brother Andrew Fleming, of Melstone, Mont., was present at the dance, and we would have been glad if all our out-of-town members could have attended.

Brother Ed McSperritt manufactured some punch, and to say he knew how to make the best ever, goes without saying, as they consumed 30 gallons in two hours, indicating that it was too good to keep. Brother Roy McNurlin disposed of the greatest amount of tickets sold by one, total of 34 to his credit, which is not bad, considering we are working on a four days a week basis, hard times having hit our shop for the first time in its history. The shop force is reduced to about one-half and also the road force.

Inclosed you will find a clipping from the Miles City Star, which we would like to see in print along with this letter in the official Journal.

Wishing you all a happy and prosperous

New Year, I remain,

Yours fraternally,
CHAS. E. COOK,
C. & F. S., No. 520.

East Boston, Mass.

Dear Sir and Brother:

Lodge No. 585, on January 7, elected officers for the ensuing term as follows: Wm. E. McNabb, President; Thos. Farmer, Vice-President; Daniel B. McInnes, Recording and Corresponding Secretary; James Vincent, Financial Secretary; Bernard F. McDonnell, Treasurer; John Kerrigan, Inspector, and James Kerrigan, Inside Guard. The following were elected as Trustees: James Kerrigan, John Warnock, John Cartright, Patrick Frawley and Robert Mills.

The old war horse, John J. Farrell, retired as Cash Steward, and Brother Harry Higgins being selected in his place. All the officers were elected by a unanimous vote, and they all made appropriate addresses, thanking the members for the confidence reposed in them, and stating their determination to further the interests of the Lodge and the Brotherhood to the best of their ability during their respective terms of office.

A pleasant feature of the proceedings was the action of the Lodge, on motion of Brother Thos. Farmer, in presenting Brother D. B. McInnes, the Recording and Corresponding Secretary, with a handsome leather traveling and document bag. The bag affair, which was engineered by President McNabb and his "joy committee," comes as a pleasant surprise to the writer, who fittingly expressed his appreciation of the generosity of his fellow members.

Brother Wm. E. McNabb has the sympathy of all the members in the recent death, after a long illness, of his nephew, Robert McNabb, a young man who was well known and highly respected in his community.

The Lodge went on record as favoring the giving to women the right to vote for all election of officers in this state, as we believe that the philosophy of history and the fundamental ethics of reason and justice, justifies that course, and we granted the request of the Massachusetts Women Suffrage Association to have one of their speakers address us on the subject of equal suffrage.

The Business Agent, Brother Generson, made a very encouraging report and the Lodge has decided that it will join the Metal Trades Section and the Building Trades Council, of the American Federation of Labor; and our action in this regard has received the approval of our true blue good friend and associate, Brother John J. Dowd, Sixth International Vice-President, whose messages of timely advice to us, have made a lasting impression for good on all the members.

Fraternally,
DANIEL B. MCINNES,
C. D., Lodge No. 585.

Decatur, Ill.

Dear Sir and Brother:

Life is like the morning rose. We never know when its life shall close.

On January 9, 1915, at 10:30 A. M., God called Mrs. Emma Abbott, the wife of our Brother Earl Abbott, home to her reward. He that is wise in all things always takes that which is best.

We, the members of Lodge No. 447, mourn with our brother. May God grant rest to the family in their hours of sorrow.

EDW. E. IVEY.

It is swet to be remembered and a pleasant thing to find that, though you may be absent, you are still kept in mind.

There was born to our Brother Leo Singer and wife a little boy on New Year's Morn, but God called the little soul home on January 3, 1915.

We mourn with our brother. May God help the mother and father bear their burden. We, the members of Lodge No. 447, extend our sympathy to the family.

EDW. E. IVEY, JR.,

Correspondent.

Rocky Mount, N. C.

Dear Sir and Brother:

That there now exists amongst the various labor unionists upon railroads considerable difference of opinion regarding the question of kindred amalgamation, as there is also commendable reasons to believe this issue is the outgrowth of modern industrial development augmented by the fact that engagement with railroads in recent years have approximately rendered scant encouragement, admitting a fair percentage of this showing can be attributed to a dominant inactivity. The question of amalgamation, closer alliance or industrial organization is of essential importance, and must be met with logical argument. For this purpose, and in view of the fact that our International Officers in their last executive session was requested by International President Johnson of the Machinists, to give this proposition consideration. I am of the opinion a few remarks along this line will not prove objectionable. While I appreciate the many contentions and in favor of this movement and believe the agitation will tend to stimulate and keep alive the militant spirit. I am also convinced there must be taken into account a factor of safety, or more properly expressed. Precautionary measures in controlling the destructive tendencies which are generally rampant to any change.

Let us dwell briefly upon the question of Federation, in the prospective, this is our adopted policy, considering the scope and expectations that may be realized "in this direction." To me it seems this work is scarcely begun. I see no better plan to bring together to educate and train the workers for United Solidarity, and until it has been demonstrated that federation is

inadequate to meet satisfactorily the needs of the workers, we should render every available assistance in extending this work. There is considerable speculation as to what form of organization will be necessary in measuring up to that standard, which will measure within a reasonable degree, concessions proportionate to the financial expenditures and energy put forth, class action. Industrialism, kindred amalgamation and craft unionists have their sponsors, but upon the plan of federation is placed the stamp of indorsement.

Then necessarily and logically the imperative duty of railroad trades is to yield harmoniously in perfecting this plan of organization. There is liberal assurance, the expected energy in furthering this work will bear fruit in due seasons, experience invariably teaches, without unnecessary sacrifice or waste at least. To insure genuine and lasting benefits it is best to adhere to the principle of expediency. Notwithstanding we at times can see in the distance, visions of more promising achievement.

We can at best keep step with the standard of intelligence or the strength of mental reasoning. Herein lies our greatest difficulty, educational improvement to grasp the situation as one of business in which we all must play our part. The plan adopted by the Kansas City convention of the R. E. Dept., as I wrote on previous occasions is well balanced and there is a vast field for active endeavor in co-operating and placing on a workable basis the plans outlined. There is I freely anticipate with this divisional plan of federation of federations, solidified for joint action more than a favorable prospect of commanding national attention. In this event we should be just as well able to establish our position as the transportation organizations.

I desire to add in conclusion railroad drafts will do well to work hand in hand in facilitating this work, which on close inspection will be found comparatively in line with the general trend of progress.

Trusting your limited space will permit, I remain, with best wishes,

Fraternally,

A. J. DIXON.

Banford, Fla.

Dear Sir and Brother:

I wish to inform you of the accident that happened to Bro. George Randall on Sunday, Jan. 3rd; he was run over by an automobile and had his right leg smashed. He is in a critical condition, in the hospital at Waycross, Ga.

J. H. SHUMAN,

Rec. Sec.

Roslindale, Jan. 11, 1915.

Dear Sir and Brother:

On Friday evening, January 8, 1915, Norwood Lodge No. 281 held their regular meeting and installed their officers for the en-

suing year. Brother Lidington officiating in the chair and I wish to say that Brother Lidington deserves to be congratulated for the efficient manner in which he conducted the installation of officers, also for the kind words of advice he tendered to the members present.

After all the important business being concluded, the refreshments and entertainment committee got busy, under the chairmanship of the Baltimore lightweight, which he conducted in an excellent manner. It was an interesting sight to see our Davy, the wee Doc and Doran slinging out the refreshments with a regular old costermonger cry, with the able assistance of Bro. J. Donovan, Bro. Lee and Bro. Dolly Gray, the renowned old boiler buster. Bro. Jas. Flynn, our sergeant-at-arms was there with bells on to grab anybody who did not the renowned old boiler buster. Bro. Jas. strictly adhere to the rulings of our honorable chairman.

During the entertainment, the gold dust twins were admitted i. e. Okie the kid, and Panama, the heavyweight. Okie gave us his old favorite song entitled, "The Old Wooden Bucket," which made us all sad for the time being, on account of the big tears rolling down the poor kid's face. Panama, the heavyweight twin gave us a recitation, which to tell the truth I can't recall, which probably is just as well, for my wife says I talk in my sleep, sometimes, so believe me if ever I come to go over that recitation in the middle of the night and my wife should hear it, it would be good night for me. O you Panama and O Kie!

At this time our worthy chairman, Bro. Bussey made a great hit with his old favorite monologue entitled, "The Wandering Jew Who Murdered the Ould Pig in Donegal."

Our vice-president, Brother Paton, entertained us with his old favorite song "Deer Island Down the Bay." Then up steps to the front, Sammy the Italian kid, with his war song. I could not tell the exact words of the song as I am not an expert interpreter, but just the same we thought it was alright, although it was a little high toned.

Our dear old Billy Brown, the pride of the Fairmount Hotel was there with old wind jammer bellows slinging out the music to perfection. The last we saw of him was about eight miles from our meeting hall, and his old bagpipes were still screeching, "It's a Long Way to Tipperary."

Jock Anderson was there with his new hat on, and strange to say, Jock got his lid safe home, which is a wee bit unusual for Jock.

Another of our celebrated artists was there, Johnny Scott, frae the auld toon O Dundee and gave us his old favorite, "She Cost Me Seven and Sixpence." The water Willie.

Taking everything into consideration, we had a very enjoyable evening and although everyone of the members who were present has and is passing through a most critical

and financial period, you could see nothing but smiling faces and behind those smiles you could see a determination to stand together, united to a finish.

There is one of our most genial members whom I almost forgot to mention, our own dear little sloan, our boiler maker jockey, bowling expert and beer slinger. Good boy Tod.

In conclusion I wish to tender the thanks of your humble servant and the members of Lodge No. 281 to the committee of arrangements for their painstaking efforts in making our entertainment a pronounced success.

ROBERT HENDERSON,
Cor. Sec. Norwood Lodge No. 281.

Waycross, Ga.

Dear Sir and Brother:

Last Sunday morning at Sanford I was run down by an automobile and rolled and dragged for several yards. I came out with my right leg broke above the ankle and bruised and smashed all over.

I was taken up and hustled up here to the company's hospital and will not get out for three or four months as the break in my leg was an exceptional one. For four inches of bone were smashed to splinters and broken off at both ends, making a bad place to heal quickly. I was in such agony that I forgot to give instructions about the lodge business, and things may not come very regular or straight until I get my hands on them again.

I would like for a notice of my accident to appear in the Journal so the boys that are in our jurisdiction will know why their letters are not answered.

Hoping this is satisfactory, I am

Yours fraternally,
GEO. RANDALL, S. L. 422,
A. C. L. Hospital.

Chicago, Ill.

Dear Sir and Brother:

Will you kindly insert the following in your February edition of the Journal and oblige the member of Local No. 1, Chicago, Ill., Jno. Burke, Secretary.

To my brothers and friends who so generously purchased tickets for the benefit raffle that was given under the auspices of Local No. 1. The raffle was postponed from December 9th, until January 9th and the lucky number that won the watch was held by Brother Jno. Magee, No. 167. I take this means for thanking my many brothers and friends for their kindness.

Yours sincerely and fraternally,
MICHAEL CLEARY.

Indianapolis, Ind.

Dear Sir and Brother:

A few lines for the Journal for all boiler makers and iron ship builders and helpers to stay away from Indianapolis, iron workers are doing our work.

Yours fraternally,
WM. S. FROHLINGER, C. S. 10.

Ludlow, Ky.

Dear Sir and Brother:

Your favor of January 6 at hand. Inclosed you will find list of officers installed at our last meeting. I wish to state we had a full attendance. Immediately after the meeting we enjoyed a Dutch lunch with refreshments and cigars. All enjoyed the entertainment given by the brothers. Nearly all the brothers gave a recitation or sang a song. The star of the evening, however, was our president, Brother Chas. Grainger, he is some entertainer, believe me.

Business is not very good in this vicinity at present, but hope to give a better report in the near future. I am in receipt of a telegram from Grand President Franklin, advising me of strike in oil fields in Oklahoma, Louisiana and Texas. Have advised all brothers not to go in that direction.

Hoping to see this in the next issue of our Journal, I remain,

Fraternally,
D. L. O'BRIEN,
Lodge No. 105.

Nevadam, Mo.

Dear Sir and Brother:

Can you find room for these remarks in the Smiles columns of our Journal?

The most stupendous joke of the universe is the educated ignoramus.

With every increase in knowledge there comes a corresponding increase in responsibility.

Some men and women can be bought with money, others with position, others with flattery.

Just as it's unmanly to fight, when seeking personal reward, so it's unmanly not to fight, when duty calls, and we are restrained only by fear.

When a mother fails in her high and sacred duties toward her child, that child is very liable to fail in its high and sacred duties toward the home and the world.

The world will find itself many miles toward the higher goal, when men become as much interested in better bred boys and girls as they are now interested in better bred horses, cows, sheep and hogs.

No boy or girl has been properly educated unless they have been taught to do nobly and well some definite work—some service that goes to complete the total of the world's toil.

Men who sit in the house do not see the house in which they sit, they see the house across the way; or, marching in a parade, they do not see the parade, they see the folks along the way. Sometimes we know less about ourselves than those who stand about us.

It may not be ours to increase the bulk of our brain or our body, but we can increase—beyond measure—the value of each. The mind is to be cultivated and seeded; and it will produce accordingly. It is ours to reap what we sow, in the gardens of the mind.

Men are often accused of being inconsistent, when the fact is, facts are inconsistent. To ponder certain facts, approached from different angles, will lead to two, and sometimes three widely separate and pronouncedly conflicting decisions.

If you don't agree; just try pondering a few facts.

L. E. WHITEHEAD.

Lima, Ohio.

Dear Brothers:

I have read Journal for January, and have read with pleasure the report of Brother Joe Reed, Deputy Organizer, Pacific Northwest, and I would like to use a small space in our Journal to let Brother Reed know that an old friend of his, situated now nearly across the continent from him, has watched his work in our behalf, with interest. I was working with Brother Reed when he was elected business agent of Lodge No. 72, Portland, Ore., and made my home with him for some time, and I know Brother Reed to be a union man in every respect, and a hard worker in the interest of our Brotherhood.

I read with pleasure of his statement where he informs us of the progress he is making with the Willamette Iron Works of Portland, and when I read that I read good news. Any Brother who has ever stopped in Portland will realize just what this means for the Brotherhood, as that shop is one of the very few well-equipped shops on the coast, and has always been very antagonistic to organized labor, locally and otherwise.

This is certainly a boost for us and a boost for Brother Reed. I am glad to count Brother Reed among my friends, and take this means to thank him for the gains he has made in his territory for us.

Hoping Brother Reed will always continue with the same success and that some of the brothers in Lodge No. 72 will remember me, and wishing them all a successful and prosperous new year, I am,

Yours fraternally,

A. THOMPSON.

Beaumont, Tex.

Dear Editor:

I note an article in January Journal written by Mrs. John Cure that forcibly impressed on me the necessity of the wife's interest and co-operation in the affairs of our organization. Faithfully has she portrayed life's lofty ideals. Her voluntary efforts toward her husband's happiness cannot go unnoticed. Her interest in his personal welfare infuses into the article that which is divine and beautiful in womanhood. The priceless value and far-reaching influence of the wife or mother cannot be over-estimated. In life's arduous toil and through the most depressing circumstances, she still maintains her cheering thoughts of harmony which is wafted to you from the pure soul of the individual. I hope the

day is not far off when every wife and mother takes an active interest in our organization and furnishes favorable environment for the upbuilding and progress of our craft.

G. SPRATLEY.

THE BOILER MAKERS' RIDE.

By G. Spratley.

When I was a boy the boilers were made
Of common iron, and a very good grade;
The rivets were hammered and the flues
were rolled,
Hand chipped and caulked, in those days
of old.

How well do I remember the old iron track,
The cross-head pump and the diamond
stack;
The well-kept jacket and its polished bands,
The neat tin tally in the fireman's hands.

The engineer would say: "If you want to
ride,
If you've got a card, get on the other side."
He'd lower the hook, she'd do her best.
"We're off," he'd say, "for the golden
West."

But in these days of the six-foot wheel,
With boilers that bend, and made of steel,
The rivets are bulled, the mur-ring slants,
The back-head's filling while the air pumps
dance.

She has superheater tubes, a cast-steel
frame,

And easily handles a mile of train;
Electric lights, flange rollers and outside
gear,

Twenty tons of coal quite close in the rear.

The engineer will say: "If you want to
ride,
Go back, get in a boxcar and hide."
He'll work the rabbit and she does her best.
Your're off (maybe) for the golden West.

Note.—The following night letter was received over the Western Union wires from Lodge No. 22, Danville, Ill., and consists of resolutions adopted on the death of Brother Gilthorpe:

Danville, Ill., January 15, 1915.

At a regular meeting of Lodge No. 22, Danville, Ill., the following resolutions were adopted upon the death of William Gilthorpe:

Whereas, He was a loving husband and a kind and indulgent father, an honest and upright brother who was always ready to extend the hand of fellowship to a brother, true to his friends, forgiving to his enemies, if he had any, and ever faithful to his obligations, whose wise counsel will be sorely missed by all;

Resolved, That we, the members of Local Lodge No. 22, city of Danville, extend our sincere sympathy to the beloved wife and children of William Gilthorpe and join with them in their hour of sorrow and pray that

God will send the Angel of Peace to them; and be it further

Resolved, That a copy of these resolutions be spread on the minutes of our regular meeting and a copy be sent to the official Journal for publication, also a copy be sent to the bereaved family, and our charter to be draped for thirty days.

J. B. KEENAN,
RAY SCHENK,
WILLIAM J. IRWIN.

Chicago, Ill.

Mrs. William J. Gilthorpe and Family:

The officers and members of Lodge No. 454 extend their heartfelt sympathy to you and your family in your hour of sadness, occasioned by the death of your beloved husband and father, and our worthy, esteemed grand officer, whose good work has always spoken for itself.

Resolved, That while we lament with sorrow, we must submit to the will of our Divine Maker, who doeth all things well.

Respectfully yours,

CHARLES A. LEAHY,
E. R. DETTMER.

St. Louis, Ill.

Dear Sir and Brother:

Please find inclosed new roster of the new officers elected for the ensuing year for Lodge No. 377 of Moline, Ill. If you have space in the next issue of Journal, please insert same.

Carl Robison, president; John Parel, vice-president; William Murphy, recording secretary; C. R. Kizer, corresponding secretary; John Fulton, financial secretary; Carl F. Hipskind, treasurer; Charles McGown, business agent; John Gustavison and J. R. Kyle, trustees.

Wishing you a Happy and Prosperous New Year, I remain

Yours fraternally,

C. R. KIZER,
Cor. Sec. Lodge No. 377.

Chattanooga, Tenn.

Dear Sir and Brother:

Inclosed herein find copy of resolutions adopted by Lodge No. 14 relative to the death of Mrs. Anderson, wife of our worthy secretary, which please publish in our Journal, and oblige Lodge No. 14.

Yours sincerely and fraternally,

JACK GRIBBEN.

At the regular meeting of Lodge No. 14, Chattanooga, Tenn., the following resolutions were adopted:

Whereas, It has pleased the Almighty God in His divine wisdom to remove from this life the beloved wife of our worthy and esteemed brother, James F. Anderson, secretary of Lodge No. 14; therefore, be it

Resolved, that we, his brothers, extend to Brother Anderson and his family our heartfelt sympathy in this their sad hour of bereavement and pray that the Almighty

God may comfort and console them that they may bear their trial with Christian patience.

Mrs. Anderson died after a protracted and painful illness, which she endured with Christian fortitude and resignation. In early girlhood she affiliated with the church of her belief and was always a consistent member, a loving wife and mother and dearly beloved and esteemed by all who knew her; and be it further

Resolved, That these resolutions be spread on the minutes of Lodge No. 14's meeting and a copy sent to our bereaved brother, a copy to our official Journal for publication, and that the charter of Lodge No. 14 be draped for thirty days.

JACK GRIBBEN,
J. E. EVANS,
WILLIAM QUIGLEY,
Committee.

Danville, Ill.

Dear Sir and Brother:

A noble man, indeed, a loving father, a kind husband, a true friend, a good mechanic, a true union man was Brother Al Ranking, who for 43 years gave his life to others. God called our brother home on Thursday, January 4, 1915, at 10:20 p. m. He was stricken with pneumonia while at work, just one week to the day that he died.

This brother was a native of Indiana; Fort Wayne was his home. He leaves a wife and son, and we, the members of Lodge No. 447, do extend our sympathy to his family.

May God grant that we meet the noble soul in the Great Beyond.

Thoughts for Companions.

Just as the pansy petals fold
Closely about their heart of gold.
So in these lines may there be
Enfolded golden thoughts for the dear
friend who is far away,
Yet have you in their heart today,
And thoughts of all the happy past,
The sweet, sweet days that couldn't last.

CORRESPONDENT.

Newport News, Va.

Dear Sir and Brother:

I am inclosing you a copy of the resolutions adopted by Lodge No. 55, extending to the relatives of our deceased brother, W. L. Wurzbach, our heartfelt sympathy, for publication in our official Journal.

Yours fraternally.

T. F. RICHARDS,
Cor. Sec. Lodge No. 55.

At a regular meeting of Lodge No. 55 the following resolutions were adopted:

Whereas, It has pleased the Almighty God in his divine wisdom to remove from our midst our beloved brother, W. L. Wurzbach, we realize the loss is great to his father, mother, sisters and brothers, but remember the words of our Saviour, "Not my

will, but thine, O Lord, be done"; And be it further

Resolved, That we, his fellow brothers, extend to his father, mother, brothers and sisters our heartfelt sympathy in this sad hour of bereavement and pray that our divine Savior will comfort them in their inconsolable loss. Be it further

Resolved, That a copy of these resolutions be sent to the bereaved family, a copy spread upon our minutes and a copy forwarded to our official Journal for publication.

W. F. McCAULEY,
JAMES C. McINTYRE,
W. M. LE COMPTE,
Committee.

Balboa, C. Z., Panama.

Dear Sir and Brother:

At a special meeting of our local, No. 463, Dec. 29, 1914, the following resolutions were adopted:

Whereas, It has pleased Almighty God to take from our midst our esteemed brother, Thomas Scheler,

Resolved, That we, his brother members who sadly miss him, extend to his family our most sincere sympathy and pray and hope the Almighty God may give them strength to bear their cross with Christian fortitude; and be it further

Resolved, That a copy of these resolutions be spread on the minutes of our meeting, and a copy sent to our official Journal for publication, and a copy to the bereaved family, and the charter be draped for a period of thirty days.

GEORGE F. WOOD,
ALEX MCKENZIE,
W. H. KEENAN,
Committee.

Norwood, Mass.

Dear Sir and Brother:

At a meeting of the system federation of the N. Y., N. H. & H. R. R. System, held in New Haven, Conn., Room 39 Insurance Building, December 23, 1914, the following resolutions were adopted:

Whereas, It has pleased our Heavenly father to remove from our midst our worthy brother, J. J. Gallagher, General Vice-President of the Brotherhood of Railway Carmen of America, therefore, be it

Resolved, That we, the delegates to the System Federation of the New York, New Haven and Hartford Railroad System, fully realize having lost one of our true and faithful labor leaders, a man of high ideals, an exemplifier of unionism in every respect, a believer in justice to all; his power will be sorely missed. As a loving husband and father, his place can never be filled by those who loved him best. Therefore, we extend our sympathy to his bereaved family and pray Almighty God may comfort and console them in their hour of sorrow; and be it further

Resolved, That a copy of this resolution

be sent to his family, a copy spread on our minutes and a copy sent to the official Journals of the following organizations for publication:

International Brotherhood of Boiler Makers and Helpers,

International Association of Machinists and Helpers,

Amalgamated Sheet Metal Workers' Alliance,

International Brotherhood of Blacksmiths and Helpers, and

Brotherhood of Railway Carmen of America.

Signed:

J. CARNIE,

D. J. COLLINS,

For the Carmen.

REPORT OF PRESIDENT OF AUXILIARY NO. 10 FOR 1914.

Springfield, Mo.

To the Members of Auxiliary No. 10,
Springfield, Missouri.

Dear Sisters:—

While my report will be far from as encouraging as I had hoped to be able to make at the close of the year, still, taking into consideration our many disappointments and reverses, I feel that we, the few faithful that remain, are to at least be congratulated upon our faithfulness and energy in standing by each other and doing all in our power to prevent the little band from becoming extinct.

At the beginning of 1914 we had forty-six members; we now have twelve. We had in our treasury at that time \$21.90; we now have a balance of \$10.00. When we remember the fact that we lost \$34.87 by burglary during the year, and our membership has decreased until we have about one-fourth the number we had last year, it seems that we are more than holding our own in a financial way. While it is discouraging to have so many members drop out of the organization, it is not so hopeless to us who know the whys and wherefores of the case. It has not been merely a lack of interest. The first great blow came when we lost all our savings in a way that we can never hope to regain the amount, which caused many insinuations and remarks, which, as they always do, had a tendency to tear down rather than build up. Some members became offended at others; while others seemed to think it a loss of time and money to work and build up a treasury whose bottom could so easily drop out. About this time came the report from the International Convention, bringing the tidings that a per capita tax of 15c per member would be laid upon all auxiliaries for the purpose of maintaining a Grand

Lodge independently of the Boilermakers. Much to my surprise, this created consternation among the members of our lodge. While I felt this was the corner stone being laid for the foundation of the Auxiliary, others seemed to think it was some kind of scheme to get their money for which they would receive nothing in return, hence, the loss of about three-fourth of our members. I am merely stating these facts to show why our membership has fallen off so suddenly. While we regret the loss of these members, we feel that if we persevere, keep L. A. No. 10 alive, and prove our loyalty until such time as all can begin to feel the workings of the Grand Lodge and see and understand why a per capita tax should be assessed, our old members will begin to come back to us and new ones be added, until within a few years we will have a larger and more wide awake lodge in Springfield than we ever had before. At least we can profit by past experience and be a much wiser organization. We cannot have another loss of money, because our officers who handle money will be bonded and in case of any such loss, our interests will be safeguarded.

I will now proceed to enumerate some of the things for the good of the order that our Auxiliary has done during the past year. In the early part of the year a new set of local by-laws were drawn up and adopted by the lodge, but through some misunderstanding on the part of the secretary, were never submitted to the Grand Lodge officers for approval. When we discovered the mistake, it was so near the date for the convention, we decided to await until we saw how many were embodied in the new International Constitution before submitting them for approval. The President called a special meeting for all the officers of the lodge, when a whole afternoon was devoted to studying and instructing the officers in their duties in the lodge room. In the early summer we donated \$5.00 to a purse that was being made up for the purpose of a helper reported to have tuberculosis, to go to Arizona for his health. By securing a benefit show at the Jefferson Theatre and selling tickets on 50c commission, we were able to contribute to the Carl Person Defense fund the sum of \$47.15. With a view of adding a little more to our treasury, we organized the New Idea fancy work club, the dues being 5c per member per meeting, which amount was to go into the Treasury of the Auxiliary. Later when many new members not belonging to the auxiliary were taken in, the by-laws of this club were changed and the dues were put in the treasury of the club. However, at each meeting, some member of the club donates an article to be raffled off for the benefit of the auxiliary.

The New Idea Club adds greatly to the social side of our work. We have also had quite a few social gatherings among the members of the Auxiliary and their families, which were fully enjoyed by all. The anniversary of the organization of the Auxiliary was celebrated in a very appropriate

manner in the home of Mrs. A. E. Welch. Another affair which was a great success was a farewell party given Brother and Sister Raden just before their departure for their new home in Sapulpa. Many little surprise parties and showers have been given members who are unable to attend lodge, which is a pleasure to all parties who participate, and causes a feeling of good fellowship to exist between the members.

In the early fall, the Local No. 70 of the Brotherhood, who had until that time been kind enough to pay our hall rent for us, notified us that our organization had become so small that they could not see their way clear to pay our rent longer. We held one more meeting in the hall, and after discussing the matter, decided it would be wise until such time as the membership increased sufficiently to warrant us in renting a hall, to meet in some private home. Sister Gestring kindly offered her home for a meeting place, which offer was gratefully accepted. Since that time we have been meeting in this home, and while we appreciate the hospitality and courtesy of Sister Gestring, we hope to be able in the very near future to relieve her of this burden and move into a hall where we will have ample room to carry on our work as we did last year. Since meeting in this private home where we have not space to go through with our regular work, we have decided to improve our time by studying unionism in all its phases, and further equip ourselves by studying parliamentary law. Therefore, by a vote of the lodge, the last meeting in each month is devoted to two papers on unionism and a parliamentary drill, in addition to the regular routine of business. We feel that we have been greatly benefited by these papers and drills, and perhaps have gotten more good out of our little "round table" and heart to heart talks than we would have gotten out of our regular lodge work had we remained in our old quarters.

While this is not a very flattering report, I feel that a great work has just started in L. A. No. 10, and have great confidence and faith in the members we now have. I appreciate your help and support and hope to be able to secure about a dozen new members of the same material and energy, when there will be no question as to the success and future of our Auxiliaries.

Respectfully submitted,
MRS. A. F. BINGHAM,
President L. A. No. 10.

Mechanicsville, N. Y. Jan. 22, 1915.

Dear Sir and Bro.:

Enclosed find Resolutions adopted at our last regular meeting:

Whereas, It has pleased the Almighty God in His Divine Wisdom to be moved from our midst, our beloved and worthy Brother Morris Forelick,

Therefore, Be It Resolved, that we, his Brothers, extend to his family our heartfelt sympathy in their hour of sorrow and pray

that the Almighty God may comfort and console, that they may bear this trial with fortitude; and be it further

Resolved, That a copy of these Resolutions be placed on the minutes of our meeting, and a copy be sent to the Official Journal for publication.

SIDNEY CROZIER,
THOS. BALDWIN,
J. FEELEY,
Committee.
Per W. A. SAUNDERS.

Springfield, Mo.

Let each and every union man look back over the past few years and see the good that has been accomplished by organized labor.

They have worked hard for what they have gained, as we know, now let them go in their home and talk the advantage and the good that can be derived from the demanding of the union label, and by explaining the good they can do for the cause of the laboring class by organizing themselves in Auxiliaries, and the men that will take this trouble on themselves to do this will generally find the wife, mother or sister willing to do all they can to help the cause.

The working man who joins a union must bring himself to realize that if he gets anything out of it he must pay the price; let him take his family in full as a partner and get them interested in his own welfare and he will find their service of great benefit.

Therefore, let the few women that are organized go among our sisters that are not organized and explain to the best of our ability, the good that has been done for home and family and what can be done if we work for the cause of labor unions not for ourselves alone, but for the vast multitude of men, women and children, though we know the world is full of people willing to accept anything that comes without an effort on their part; therefore, the few that are willing to do their part are all too scarce to do much good without help; let each one that is willing to help assume an attitude to those that are not of the helping kind that will show them a cause that is worth working for. At the close of the coming year let each one look back and say, "I have tried."

MRS. WM. SPECHT,
L. A. No. 10.

Chicago, Ill.

I desire to call the attention of our readers to the article of Brother Franklin's in the January Journal relative to two letters from Lodge 220, published in same Journal.

I do not think his criticism just and fair as it reflects upon the intelligence of the members of No. 220, and it is as unwarranted as it is inexplicable.

You will note one of No. 220's letters was written October 6th, the other November 3rd, a month apart, the subject matter of the first letter was requesting Brother Franklin to take up with the other organiza-

tions affiliated with the R. E. Department, a question relative to calling off the strikes on the I. C. & Harriman lines and to put out a referendum vote in our Brotherhood to that effect.

You will note that there was nothing said in this letter about strike benefits, as anyone might know if the strike was called off the benefits would be discontinued. This letter was requested published, however, there was no objection to its being published in the Journal, but if he wanted it published, why didn't he publish it in the November or December issue of the Journal, but instead he waits until he gets the other letter a month later, then runs them in the Journal, and speaks of the inconsistency contained in the letter of November 3rd, which I cannot see, and I don't think anyone else can conscientiously see, as one might be in favor of calling off the strike, but not in favor of discontinuing the strike benefits until it was called off, and that is exactly the position that the members of No. 220 took that was in favor of calling off the strike, they wanted steps taken to call it off, and that is what prompted the protest letter of November 3rd, for the ballot itself when sent out conveyed the fact that the strike benefits would be discontinued on Dec. 1st, 1914, and the members was opposed to discontinuing the benefits until the strike was called off or finally settled and there is nothing inconsistent about that and is plain enough it seems to me for the ordinary intelligent to understand.

If Brother Franklin had a feeling of criticism in his heart and felt in a writing mood he should have taken up A. O. Wharton's letter, as there is a wide field for criticism in his communication, almost every paragraph is open for severe criticism, as in many places he makes absolute false statements, in fact his whole article sounds like the dictations of the railroad companies.

But I will not say anything further upon these subjects and will leave them to the judgment of the rank and file.

With best wishes for a prosperous new year, I am,

Yours fraternally,
I. J. CUNDIFF,
Lodge No. 220.

Ft. Worth, Texas.

Dear Sir and Brother:

By special request I am writing to give you a little news regarding a little stunt that was pulled off by a bunch of the members of Lodge No. 96, who have been erecting a fifty-five thousand barrel steel tank at Kennadale, Texas, for the Magnolia Petroleum Co.

This gang has been selected from the men who have been employed on the erection of the refinery being constructed here by the Magnolia Company to build tanks in various places in the state, which, when completed, will form a chain of tanks from here to the Gulf of Mexico.

While working in Kennadale, the men conducted themselves in such manner as to gain the friendship and respect of all the citizens. Whenever there was to be a social affair of any kind the men all received an invitation. To say that they enjoyed themselves would be putting it very mildly. They enjoyed themselves to the limit and to show their appreciation, they decided that when the job was completed they would return the favors shown them.

With this in view they appointed a committee of three to make the necessary arrangements. However, the whole gang, twenty-nine men, decided that the occasion demanded the attention of all concerned, so they lit into it with a will and the ultimate result was one of the most unique as well as one of the most entertaining social events ever pulled off in this section of the country.

Part of the committee secured feeds of all kinds, including a good supply of oysters and the necessary trimmings to go with them. Fruits and candies and everything else to make the eating part of the occasion complete were secured and the committee deserves special credit for their efforts.

The banquet hall was the tank that had just been completed. The tables were laid in the tank and all the citizens invited.

The doorway to this banquet was a thirty-six inch manhole, which, all who attended the banquet were compelled to negotiate.

The writer not being present cannot speak from experience, but from all accounts there was some excitement attached to the taking of the password and admitting those qualified to a seat in the hall.

However, when all had arrived it is said that there was not a man, woman or child, who resided in this vicinity who was not in the hall. Of course some of the fat folks had a rather strenuous time getting in and after the banquet they had a worse time getting out.

Some of the ladies objected to this mode of entering and retiring but being assured that there was no other method except to go over the top by way of a block and fall they all slid in.

The committee had borrowed an organ and as there were several musicians in the crowd they were well able to entertain the crowd.

Several speeches were made by various members of the organization thanking the citizens for the courtesies extended.

The citizens through their representative men and women responded and after one of the most enjoyable events of the season, the guests and hosts departed about midnight to their homes, the guests with a better understanding of what a bunch of organized men really are.

The papers of Ft. Worth had a representative on the job and their staff photographer who made a flashlight picture of the whole bunch.

I am sending you under separate a cut of the picture which we hope you will be able to reproduce in the journal.

Will further state that this section of the state is one hundred per cent organized and if you are coming this way have your ticket in good shape.

Thanking you in advance, I remain,

Yours fraternally,

L. A. FREEMAN.

Pittsburg, Pa.

Dear Sir and Bro.:

At the last regular meeting of Lodge No. 154 the following preamble and Resolutions were unanimously adopted:

Whereas, humanity in general, and the labor movement in particular has suffered a distinct loss in the passing to the Heavenly Throne of our late veteran I. S. T. Bro. Wm. J. Gilthorpe, and

Whereas, We recognize the many years of faithful service of Brother Gilthorpe was a great factor in bringing the recognition and influence exercised by our craft today, and

Whereas, We realize that the achievement of Brother Gilthorpe constitute a movement more durable than any of stone or bronze, so be it

Resolved, That Local No. 154, Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America extend our sincerest condolences to the bereaved family and beg them to accept the wisdom of Almighty God in calling to His bosom a faithful servant, a loving husband, and father, and a follower of the teachings of the Redeemer, and be it further

Resolved, That a copy of these resolutions be sent for publication in our Official Journal, a copy furnished the bereaved family and a copy preserved for the permanent records of Local Lodge No. 154, and be it further

Resolved, That as a further token of our love and respect that our charter be draped in mourning for a period of thirty days, and the Lodge participate in a service in the memory of the deceased.

FRANK BANN,

President.

BY THE A. F. OF L. NEWS SERVICE.

CONGRESS PASSES IMMIGRATION BILL; IS NOW BEFORE PRESIDENT WILSON.

Washington, D. C.—The Burnett immigration bill, containing the illiteracy test, has passed both branches of Congress and is now before President Wilson for signature.

The bill originally passed the House nearly a year ago—February 4, 1914—by a vote of 252 to 126. Since then it has been in Senate committee or in conference between the two legislative bodies because of amendments. At no time was the illiteracy test questioned, except in the Senate, early this month, when a motion to strike it out received but twelve votes.

On Friday of last week—January 15—the House, by a vote of 227 to 94, gave final approval to the bill. The day previous the Senate accepted the bill by a yea and nay vote. The House won its point to strike from the bill a section inserted by the Senate which would admit Belgians to our shores regardless of all immigration laws.

With the passage of the bill closes one of the most fiercely contested battles of this Congress. Against the proposal was arrayed large corporations and steamship companies, together with every ally these powerful forces could muster.

In the House the bill was debated for five days. An analysis of the vote shows that from twenty-one states every vote cast was for the bill; thirteen states gave a majority for the bill; three split even; six gave a

majority against the bill and only four voted solidly against the bill—Connecticut, New Mexico, Rhode Island and Utah—or ten votes.

In answer to the claim that the south and west favor unrestricted immigration, it is shown that the vote in favor of an illiteracy test was: southern states, 78 to 6; southwestern states, 33 to 9; northwestern states and the coast, 38 to 14, the Pacific Coast alone being 17 to 1.

The struggle to insert an educational test in our immigration laws has been waged for eighteen years. May 20, 1896, the House of Representatives favored a test by a vote of 195 to 26. During these years there have been 19 votes in favor of a reading test. Three of these were votes taken in committee of the whole, and 16 were votes in regular session of either the House or Senate. There have been seven record votes in the House, the average being 192 to 73 for the test; the five record votes in the Senate show an average vote of 52 to 19.

The following legislatures have asked for restrictive legislation: Arkansas (House), California, Massachusetts (House), Nevada, Ohio, Oregon, Pennsylvania, Tennessee, Vermont, Virginia, Washington and Wyoming.

The A. F. of L. has repeatedly declared for a test. At the Toronto convention, in 1909, it was agreed: "The illiteracy test is the most practical means of restricting the present stimulated influx of cheap labor,

whose competition is so ruinous to the workers already here, whether native or foreign." This position has been sustained by the railway brotherhoods and the organized farmers of this country, who have repeatedly declared in their conventions for an educational test that American standards may be maintained. In a recent issue of the National Field, official journal of the Farmers' National Union, a strong editorial in favor of an illiteracy test closed as follows:

"Time was when the generality of people could not read or write in any language. And in that time no shame attached to them, or any one else, except the despotisms which needed ignorance in their business. The same despotic spirit is behind all this piffle about 'the honest, the industrious, the moral' type. Much they care for the real welfare of this type.

"What they want is plenty of cheap laborers. After trustifying the industries through special privilege legislation on one hand, and pauperized labor on the other hand, they are now turning to the blessed vision of 'trustifying' agriculture."

HATTERS' CASE DISCUSSED.

Executive Council States Position of A. F. of L.

Washington, D. C.—At the meeting of the American Federation of Labor Executive Council, held in this city, much time was devoted to a consideration of the judgment of the United States Supreme court against the Danbury, Conn., hatters and the Hatters' Union. Officers of the Hatters' Union were heard and consultations had with attorneys for the A. F. of L. who conducted the case, while consideration was given various suggestions by unionists regarding this matter.

The conclusion reached is as follows:

"The executive council, while feeling that a great injustice has been done the hatters, finds that, despite that feeling, that the American Federation of Labor has neither the means nor the authority to pay the award or the damages, in whole or in part. The suit was brought by the Loewe company against the hatters; later, when the United Hatters of America were financially unable to bear the expense of defending the case in the courts up to and including the appeals to the highest courts of our land, the American Federation of Labor pledged itself to financially aid in the procedure. This pledge, contained in the resolution adopted by the Denver convention of the A. F. of L., has been fully performed. The American Federation of Labor, by its activities, growing out of the necessity as developed in the hatters' case, has secured the enactment of the labor provisions of the Clayton anti-trust law, October 15, 1914. This law precludes the possibility of any similar suit being brought in the federal courts for the exer-

cise of normal activities as performed by the hatters, when such activities have been performed since the enactment of the law, and thus the Federation has performed its full duties to the hatters and to all labor in the premises."

FAVOR COMPENSATION LAW.

Jefferson City, Mo.—In its favorable report on the question of workmen's compensation to the state senate, a commission appointed by that body exempts from the proposed law's operation domestic service, farm labor and employment of three or less employes. The commission says:

"The social principle upon which laws (compensation) are founded is that industry should bear the burden of its accidents and distribute the cost upon the consumers of its products, as it does other cost items. One of the principles of justice upon which this proposition is, that modern industry can be easily, intelligently and universally done. It therefore follows as a corollary, that there should be no compulsion to any employment which is not so organized that it can easily, intelligently and universally distribute this cost."

The commission shows by figures that a compensation law not only has humane qualities, but it possesses merit as a tax-saver. Statistics from California, Wisconsin and Massachusetts are used to illustrate this point. It is shown that in these states there were 84,633 accidents in one year covered by compensation law, and only forty of them reached a law court. The commission makes this comment:

"On the basis of 50,000 accidents a year in Missouri, only eighteen would get into the courts, whereas now such cases constitute more than 10 per cent of all judicial business."

Opposition to a compensation law is assured. Meetings have been held between Kansas City and St. Louis business men for the purpose of making plans to fight the proposal. The familiar claim is made that the law would put "an unreasonable burden on industry."

DANGERS ON GREAT LAKES.

Washington, D. C.—The excursion and passenger boat interests on the Great Lakes are among the most bitter opponents of the seaman's bill now pending in the United States Senate.

Last week a memorial was presented from the Michigan legislature against the seamen's bill, in which it was urged that proposed laws against Great Lakes shipping was unnecessary, as "steamers are passing and repassing each other at very short intervals, so that assistance is always near at hand in the case of any accident."

In answer to this claim, Senator La Follette had inserted in the records last year's report of Chicago public school authorities on "Lake Boat Excursion Dangers," which stated:

"It was found that the boats only carried lifeboats and life rafts to save the lives of 30 per cent of their passengers, and this means that a boat licensed to a capacity of 2,600 to 3,000 passengers during the excursion period—May 15 to October 15—would be able to provide life rafts for less than one-third on board if the boat was crowded to its capacity. These boats are crowded to the rail on holidays and week-end trips. Life preservers are plentiful, but life preservers are not adequate protection for small children. The crews are small, and unless there is amended national legislation to compel excursion boats to increase their lifeboat equipment, personal safety on an overcrowded Lake Michigan excursion boat is a risk in which humanity must depend upon fate as to whether it would be numbered among the 'one-third saved' or the two-thirds that would be dependent upon life preservers. Among the latter would doubtless be many children with only a circle of cork around them to float their frightened souls to rescue."

A WARLIKE SOLON.

Denver, Col.—The Honorable Alphonse P. Ardourel, member of the state legislature, is the latest to offer a remedy against strikes. According to the United Labor Bulletin, this warlike solon will include strikes in the list of things treasonable. The penalty will be death. Mr. Ardourel has it all figured out. At the present time there is no penalty for resisting armed cossacks or private armies in the pay of corporations. By defining this as "rebellion," and making Colorado the first state in the union to provide a penalty for treason against the state, the legislator is confident that agitators will disappear and this commonwealth will become the proverbial land of milk and honey.

HOLLAND TRADE UNIONISTS TELLS STORY OF BELGIUM'S MISERY BECAUSE OF WAR.

Washington, D. C.—At the last meeting of the A. F. of L. executive council it was ordered that the following appeal be printed in the American Federationist and the A. F. of L. Weekly News Letter:

"Nederlandsch Verbond Van Vakvereeningen.

"(Dutch Federation of Trade Unionists.)
"Headoffice: Reguliersgracht 80, Amsterdam.

"Amsterdam, December, 1914.

"To Trade Union National Centers:

"Dear Sirs and Brothers: It is more than four months now since the Belgian people were, against their own will, forced to take part in this war which has set aflame the larger part of Europe. For more than four months the war, with all its horrors, has completely paralyzed the economic life of that little country, plunging the whole population and especially the working classes into the most pitiful misery.

"It will scarcely be necessary to explain to you in detail the general condition prevailing in a country so ravaged by the war. You have, no doubt, learned all this from the daily press of your own country.

"It appears necessary, however, to call your attention to the consequences this war has had for the Belgian laboring classes.

"Work had been stopped in all factories and workshops the first day hostilities commenced, condemning the employes who were not called upon to defend their country, to the terrible consequences of complete unemployment.

"One part of the country after the other has been conquered and occupied by German troops. Wherever battles and other military engagements took place, the inhabitants had to leave their dwellings fleeing to some other city or to some other part of the country, under continual fear that they might soon be compelled to flee anew to some new place of refuge.

"It will be easily understood that under such conditions unemployment has developed to such an extent that the trade unions are powerless and unable to effectively fight the miseries accruing therefrom.

"Everything necessary has been suggested and done by all public boards where the workers are represented, with a view of providing for the maintenance of this unhappy, semi-starved population. Food has been distributed on a very modest scale and, once in a while, money as well.

"All this, however, is in no way sufficient to keep the workers, their wives and children alive. Extreme misery prevails all round and this threatens to become more acute with the approaching winter.

"The Belgian trade unions have used possible means to save their organizations from complete destruction and to support their members during these tragic moments, but there is a limit to everything and the means at the disposal of the Belgian trade unions are entirely exhausted.

"The National Centre of the Trade Unions of Holland (the Nederlandsch Verbond van Vakvereeningen), after thorough examination of this sad state of affairs, has decided to issue an urgent appeal for help on behalf of the Belgian fellow-workers. We have been communicating with the management of the International Federation of Trade Unions (President Carl Legien in Berlin), whom we informed of our intention. Whereupon we received his immediate reply was that he had taken notice of our plan.

"We now approach your organization, dear sirs and brothers, praying that you might render whatever help you can give to the Belgian unions who at the present moment are undergoing the most serious and sinister trial.

"Will you kindly take cognizance of the fact that our Belgian friends have been brought to these trist conditions without

any fault of their own and we are convinced that you will do everything within your power to render practical help to the Belgian working class which desires nothing else but to be permitted to continue quietly their efforts for the improvement of their economic conditions and their struggle for social liberation.

"Will you kindly forward your contributions as early as possible to the above address, to be sent to the Belgian trade union center from here. Let us express our sincere thanks in advance for all you can do.

"Awaiting your early reply, we beg to remain,

"Yours fraternally,

"J. OUDEGEEST,

President.

"On behalf of the Dutch Trade Union Centre."

COAL BARONS RETRACT.

Denver, Col.—President Lincoln's statement that the people can't be fooled all the time is recalled by the action of the Colorado Fuel and Iron company in publicly retracting former declarations regarding moneys expended by officers of the United Mine Workers' Union.

The company stated, several months ago, that these moneys covered a period of nine weeks. When President Welborn was cross examined by the industrial relations commission, he was compelled to acknowledge the statements were untrue. The company has now issued another bulletin, which states that the moneys expended by Vice-President Frank Hayes, Mother Jones, and others were for one year instead of nine weeks.

Having in mind the operators' disregard for state laws, which caused all the trouble in Colorado, unionists are asking what this closing declaration by President Welborn means:

"No company can succeed permanently which does not deserve and receive the confidence of both its own employes and the public. It is the policy of the management of the Colorado Fuel and Iron Company to command this confidence."

MINERS ADOPT NEW PLAN.

Lanford, Pa.—Officers of the United Mine Workers' Union have been notified by state mining officials that their request to appoint a committee of mine inspectors to investigate a colliery at this place has been granted. The mine is owned by the Lehigh Coal and Navigation Company. Seven men lost their lives there recently, and the verdict of coroners' juries in each case was that the cause of death was unknown. The miners, however, have contrary evidence. The law says that enough air shall be circulated in mines so to render harmless and sweep away noxious or dangerous gases. The workers claim that when accidents occur every effort is made to find out who, or what, was responsible for gas ignition,

but never a word why the company permitted gas to accumulate, in defiance of law. The miners are determined that henceforth causes shall be discussed, instead of effects.

ASK UNIONISTS' AID.

Chicago, Ill.—Trade unions are receiving copies of State Insurance Superintendent Potts' report to Gov. Dunne on "Investigation of Fire Insurance Conditions and Rates in Illinois." With the report is a circular which calls attention to an article, published in a newspaper devoted to insurance agents' interests, urging fire insurance men to oppose the theory or state compensation funds for the reason that "if the camel once gets its nose within the tent it will not be satisfied until it has crowded everyone out." Superintendent Potts says he wants to work in harmony with the trade unionists in "securing proper legislation, and they, likewise, can be of very great help to me in securing the necessary legislation for insurance reform."

STATE HAS SAFETY EXHIBIT.

Columbus, O.—Ohio's first annual industrial safety exposition, held in this city last week, was a success and a revelation. The exposition was arranged and conducted by the state industrial commission, the executive body that is carrying into effect the provisions of the workmen's compensation law and other statutes relating to industry. A large hall was secured, and all manner of safety devices were arranged in both. Attendants demonstrated the utility of each device. Railroad companies, large steel concerns, and other Ohio industrial corporations were represented, while other states occupied large booths. The most important feature of the exposition was the "round table" discussions, at which representatives of large corporations and representatives of organized labor discussed the relation of employer and employe and suggested measures to meet the problems presented. President Voll and Secretary Donnelly, of the Ohio State Federation of Labor, took a leading part in the debates. If even one-half of the betterments claimed to have been instituted by the companies is a fact, these concerns have revolutionized their methods in dealing with employes since the organized workmen of this state secured the enactment of the workmen's compensation law. The Ohio Manufacturers' association, at its last convention, declared in favor of co-operating with the labor unions in making the compensation law effective. Members of this organization resisted the adoption of the law.

A STRIKE NO CONSPIRACY.

New York, N. Y.—A strike is not a conspiracy, declared Judge Gibbs, of the Bronx County court, in discharging five strikers who were arrested on complaint of a paving contractor, whose workers struck because

of a violation of union rules. Failing to employ non-unionists, the contractor secured a grand jury indictment against the strikers. Their attorney raised a question of law on the matter of conspiracy.

In dismissing the strikers, the court said: "Labor has a right to organize and use every legal means to protect its own interests, raise wages, shorten hours, and enforce working rules. Labor has the same right to protect itself against outside competition that business has. This was a legitimate strike, called by a legitimate union and there was no criminal conspiracy."

COURT CAN'T DEFINE "MINING."

Hazleton, Pa.—The miners have been defeated in their efforts to make effective the state mine certificate law through Judge McCarrell's refusal to restrain state mine officials from pursuing their present course of issuing certificates to other than practical miners. The miners insist that the law intended that a man shall dig coal before he is qualified as a miner and can secure a foreman's certificate. The court holds that the legislature has failed to define the term "mining." As a result of this decision, the miners say a man who is employed in laying tracks or handling dynamite may receive a certificate which places him in a position most important to the workers' lives. The decision will be appealed.

WILL URGE LABOR LAWS.

Montgomery, Ala.—Organized labor in this state will urge the following laws before the Alabama legislature: A compulsory education bill, mechanics' lien law, taking convicts out of the mines and putting them on public roads work, a compensation law, strengthening the mining and child labor laws, provisions for a state constitutional convention.

POETIC JUSTICE.

Washington, D. C.—The Senate has confirmed Frederick L. Siddons as judge of the Supreme court of the District of Columbia. Judge Siddons was a member of the law firm that defended Messrs. Gompers, Mitchell and Morrison in the contempt proceedings caused by the sentencing to jail of these three unionists by Judge Wright. Later, Judge Wright resigned while charges against him were being investigated by the House committee on the judiciary, and now, with a justice that is poetic, Mr. Siddons succeeds him.

AGAINST CONVICT LABOR.

Washington, D. C.—While the Senate was discussing the District of Columbia appropriation bill, Senator Kern of Indiana, secured the adoption of an amendment prohibiting the sale of brick manufactured at the District workhouse "in competition with the products of free labor, or otherwise to any department or institution of the government of the District of Columbia

or of the United States, or to any public or private corporation, partnership, person or persons."

TO BUILD ALASKA RAILROAD.

Washington, D. C.—Actual construction of the government railroad to connect the Alaskan coal fields with the coast, authorized by Congress last March, will begin during the coming spring, according to federal authorities. Under the law providing for the construction of the railroad the President is authorized to decide on the route, on whether railroads already constructed shall be purchased as part of the line, and other details.

MORE CO-OPERATIVE STORES.

Chicago, Ill.—Two new co-operative stores have been established in this city. The union miners of Cedar Point have started a co-operative store with \$1,000 capital. It is stated that the business of this venture already amounts to over \$70 a day.

HATTERS LOSE CASE IN HIGHEST COURT.

Washington.—Last Tuesday the United States Supreme Court, in a unanimous opinion, decided that the union hatters of Danbury, Conn., must pay \$252,000 to the firm of D. E. Loewe Company, as the result of a strike and boycott started against this firm in 1902.

The firm sued for \$80,000, and under the Sherman anti-trust law was awarded three times this amount. The additional \$12,000 allowed was for attorneys' fees and other expenses. The homes of 186 union hatters have been held under attachment orders for the past several years, and the judgment of lower courts is now finally affirmed.

During the long years of this legal controversy, the American Federation of Labor has supported the hatters in their position that they have the right to ask friends and sympathizers to join with them in withholding patronage from an unfair employer.

This position has been indorsed by the United States Congress by its passage of the Clayton bill, which provides "nor shall such organizations (labor unions) or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the anti-trust laws."

Under the Clayton law judges are prohibited from issuing an injunction against any person or persons from withholding their patronage from any party to a labor dispute, or "from recommending, advising or persuading others by peaceful and lawful means so to do."

In urging the passage of the Clayton law, the unionists showed the unlimited power possessed by the courts, through their interpretation of the Sherman anti-trust law, and the workers have insisted that under this interpretation the homes and savings of toilers were seized as a penalty for exercising their rights.

The United States Supreme court, in its

decision in the hatters' case, has not only verified these claims, but has emphasized the wisdom of Congress in passing a law that will curb the judiciary in its policy of reading into the Sherman anti-trust law a meaning that was never intended.

WORKERS ROBBED BY AGENTS.

St. Paul, Minn.—In the annual report of the state department of labor the evils of private employment offices are shown. It is a common practice for the employment agent to make an agreement with a foreman or superintendent to send a given number of men each month and then divide the fees. In order to make places for the men who are coming in the foreman has to discharge men that he has on, so that it has become a saying with respect to some of these concerns, that they have one crew coming, one crew working and one crew going. It is often difficult to prove the truth of the charge of fee splitting. Foreign laborers in particular are the victims of exorbitant fees. In one case the agent charged the men \$4 for jobs as railroad laborers at \$1.50 a day with the understanding that \$3 of the \$4 would be refunded to the men if the work lasted less than ten days. If the men worked ten days they had to pay the fee of \$4. They paid \$4 for the privilege of earning \$15.

The report recommends that the hours of labor law for women be extended to cover the whole state, instead of merely the three large cities; that street trades should be so regulated as to prevent the employment of small children, and that boarding camps of all sorts should be covered by legislation, regulating ventilation, sanitation and lighting of bunk houses and kitchens, and providing for state inspections of these places.

ECHO OF STOCKTON STRIKE.

San Francisco.—The settlement of Stockton's strike has put an end to the talk in non-union circles that the strike would be spread to this city, or that a similar attack would be made on the organized workers of San Francisco.

The Bulletin makes this editorial comment:

"Congratulations to the union men of Stockton, who have won a victory for organized labor. Congratulations also to the employers of Stockton, who have recognized the one principle on which a just industrial peace is now possible, that of collective bargaining between organized unions and organized employers."

"Organized bargaining, on equal terms, between employer and workingman, is the only basis on which the interests of the community, of the worker, and of the employer himself can be at once justly and sensibly served."

Stockton, Cal.—As the terms of the strike settlement is better understood by trade unionists, they realize to a greater extent

the value of this peace pact which their representatives secured. The strike—or rather lockout—was caused by the unionists' refusal to act favorably on a letter forwarded them June 26 last by the Merchants, Manufacturers and Employers' association of Stockton, which announced that if the workers did not stop a boycott "this association will take immediate steps to protect its members by insisting that the present employers of the members shall withdraw from the union with which they are now affiliated or resign their positions."

Under the terms of settlement the employers agree to withdraw their letter and the unions agree to stop the boycott. The employers abandon their anti-union position and agree to the following:

"That a committee of three from each side be appointed to which shall be referred all questions affecting wages and hours, which may arise between the two parties, the decision of said committee to be binding on both sides; it being definitely understood that no drastic action shall be taken by either side until after said committee has considered the matter and rendered a decision."

OFFERS UNEMPLOYED PLAN.

Chicago.—"The city has failed to develop any adequate, systematic machinery by means of which the manless job and the jobless man may be brought face to face," is one of the views of the municipal markets commission on the unemployed question in a report to the city council.

These recommendations are made:

"Municipal insurance against unemployment.

"Reorganization of state employment agencies.

"Establishment of an efficient municipal employment bureau in the department of public welfare.

"Appointment of an advisory committee of ten business men and ten labor men to study the problem of unemployment.

"The city should pass suitable ordinances strictly regulating private employment agencies in order to eliminate the grave misrepresentation, extortion and dishonest practices frequently complained of and found to prevail.

"Your commission, however, believes that the only effective means of eliminating private employment agencies is by the establishment of efficient and competent public employment agencies in their stead.

"An efficient municipal employment office is the surest method of eliminating private employment agencies with their resulting dishonesty, fraud and unlawful practices.

"The city should promote insurance against unemployment in order to prevent destitution and misery when unemployment cannot be prevented by the operation of a municipal employment bureau, public work for the unemployed and part time work. Provision should be made for the honorable

maintenance at public expense of the surplus laborers.

"Experience has shown that soup kitchens and bread lines for the unemployed are as a rule indiscriminating and do more harm than good.

"Work undertaken by the city as a means of relief or charity should be considered as a last despairing effort to aid the unemployed when it has or knows no better alternative.

"Relief work of this nature, while blameless and unexcusable, as long as human beings are starving and homeless, is almost wholly useless for benefiting the people thus relieved.

"The city council by all means should avoid appropriating money for charitable purpose."

APPROVE OF UNIONS.

Springfield, Ill.—The state board of administration, in charge of all state institutions, has issued the following order as a result of conferences with the organized employes of these institutions:

"General Orders No. III:

"Employes of the state in the state institutions are not to be interfered with by their superior officers because of the fact that they may have joined or contemplate joining a labor organization. Labor organizations in this regard are in the same class as religious and fraternal organizations and no employe is to be handicapped or discriminated against on account of the fact that he is affiliated with them.

"The attitude of the board toward all of these organizations is one of toleration, and in their efforts to better mankind or improve conditions, social, economic, or moral, it is one of sympathy and encouragement, and under no circumstances the reverse. The rule of unrestricted freedom is the policy of the board in this controversy."

SERVICE NOT A COMMODITY.

Little Rock, Ark.—The supreme court of this state distinguishes between "service" and a commodity. The decision was made in the case of the State vs. Frank et al., who, as launderers, had agreed with each other to fix the price to be charged to their customers, and carried on their business under such agreement, and also combined to launder for the city of Malvern at less prices than those charged in Little Rock, where they were located. The state held this agreement was in violation of the state anti-trust law, which prohibits unlawful combinations to regulate or fix "the price of any article of manufacture, mechanism, commodity, convenience, repair, any product of mining or any article or thing whatever." The supreme court held that the agreement did not come within the terms of the provision of the anti-trust statute. The court said that the business of laundering was a mere service done; that an agreement to regulate the price to be charged therefore

was in its last analysis merely an agreement to fix the price of labor or service, and that the legislature had not made such an agreement unlawful.

STOCK FOR EMPLOYEES; U. S. TO TAKE PHONES.

Chicago.—Is the American Telephone & Telegraph company, the patent company of the Bell system, preparing to "unload" stock on employes because of continued agitation for government ownership? The company has announced that employes may now purchase stock in the company for \$110 a share on easy terms.

Washington.—Representative Lewis, a member of the House labor group, is urging the taking over by the government of the various telephone systems in this country. It is proposed that the interstate commerce commission be instructed to appraise the value of the lines, which would then be paid for by the government under this valuation. In a speech last week the unionist made a notable defense of this position which included a history of the world's telephone systems.

NAVY YARD WAGES NOT CUT.

Washington.—Employes of the Washington navy yard have secured a victory by Secretary of the Navy Daniels' reversal of recommendations by a wage board that wages be reduced. The machinists, one of the largest trades at the yard, were hit the hardest by the wage board's decision. In this case a general reduction of eight cents a day was favored. Representatives of the machinists protested and showed that the new rule would wipe out the 7½ per cent increase in their pay granted by Congress two years ago. Secretary Daniels agreed with this point and ordered that wages remain as they are.

NAVY YARD GETS AWARD.

Washington.—The navy department has awarded the Mare Island navy yard the contract for building a torpedo boat destroyer, the first contract of its kind ever given to a government yard. In the bidding for the contract, Mare Island underbid private plants by nearly \$200,000. The navy bureau chiefs do not seem to fancy this condition and declared the contract will not be fulfilled in time. Officers of the yard predict some one is due for surprises, as the boat will be delivered as per schedule.

SUSTAINING TUBERCULAR POOR.

New York.—The burden of institutional care of the consumptive is being shifted from the private purse to the general public purse, according to a report of the National Association for the Study and Prevention of Tuberculosis. In 1914, more than \$20,500,000 was spent in the United States anti-tuberculosis campaign and of this sum 66.8 per cent was derived from public funds, compared with 53 per cent in 1909.

PUBLIC CUP ABOLISHED.

Albany, N. Y.—The state board of health has issued an order abolishing the public drinking cup and the use of the roller towel in public places and fixing sanitary rules to govern barber shops, manicure parlors and chiropodists' offices. The rules regarding the drinking cups and roller towels practically are the same as those enforced in interstate trains.

The order requires that all instruments used by barbers, manicurists and chiropodists must be sterilized. Violation of the order will be a misdemeanor.

REPORT ON IMMIGRATION.

Washington.—According to a report issued by the federal health service there were 41,236 immigrants last year who were found to be diseased to such an extent as to be deportable or reportable under the immigration laws.

More than 100 steamship lines bring immigrants to this country, and in all there are more than 175 avenues of immigrants travel from foreign countries to the United States. These immigrants came from 25 different foreign ports and entered this country at 80 different points, 25 of which were seaports.

SAFETY-AT-SEA PACT FAILS.

Washington.—It is now proven that the London conference on safety at sea was held to no purpose, because the United States Senate refused to accept the treaty agreed upon, and representatives of the world's maritime nations could not be gotten together because of the war. The last day for acceptance was December 31. The United States government made no effort to present its amended ratifications to the nations, in view of present conditions. It is agreed that the shipping trust was at least not opposed to the London treaty, but the United States Senate spoiled the plan when it attached an amendment providing, in effect, that this country refused to surrender to other nations the right to make laws governing shipping and relating to the condition of seamen.

START A CO-OP. BAKERY.

Galveston, Texas.—As a result of the bakers' strike in this city, organized labor has formed a company to conduct a bakery along co-operative lines. It is stated that \$7,500 has been subscribed, and efforts will be made immediately to compete with employers who refuse their workers a shorter work day. Trade union officials have been appointed on a committee to select a location, order machinery and complete other details.

PRINTERS START PAPER.

New Orleans, La.—Printers who have been locked out by three newspapers in this city have started a morning paper—the Southern American. The strikers are confident of

success. Differences first arose over a five day law these workers adopted and which the newspapers objected to. Because the law was not repealed instantly, the publishers presented new demands, which were followed by the lockout order.

WAGES REDUCED BY JUDGE.

Sydney, New South Wales.—Justice Heydon, of the court of industrial arbitration, has suspended wage increases recently awarded railroad workers, and trade unionists now declare: "Wage boards which kept wages down in prosperous times, ought to be able to keep them up when times are bad."

The application for a suspension of rates was made by the chief commissioner for railways and tramways as a result of a hint previously made by Justice Heydon that this could be done because of present industrial conditions. The interested unions were represented by a strong corps of attorneys, who entered vigorous protest against the proposal and who declared the drought that has prevailed throughout the country, and not the European war, was responsible for depressions. The unions' attorneys insisted that another factor was the possibility that railroads were constructed or being constructed in places where they were not paying, and that if decreases were to be made in connection with the development of the country, the men should not be called upon to bear the loss.

The court refused to accept this viewpoint, and said he could not be called upon to criticize the government of its policy of building railroads.

After the court listened to arguments by attorneys representing the workers, the railroads and the government's railroad department, the request for a suspension was complied with.

PUBLIC OFFICIALS "TOO BUSY."

Sydney, New South Wales.—Working men in this city have been notified by Acting Premier Cann that public officials "are too busy" to receive a deputation of laborers who would urge the adoption of resolutions passed intended to remedy unemployment.

Among the suggestions were an amended income tax act starting with ten per cent on all incomes of \$750 per annum; a reduction of salaries of certain public officials; a loan by the Federal government to the States of sums of money to start public works; an act to limit charges of rents.

A committee appointed by the meeting to present these resolutions was then notified the ministers could not see them. A resolution to call "a special conference of laborites to discuss the matter further" was lost and the secretary was instructed to again attempt to secure the premier's consent to receive the deputation.

Among Our Exchanges.

WAR.

What no honest lover of mankind, and furtherer of peace ever dared to anticipate, is now actually a fact. The civilized States of Europe are in the act of tearing one another to pieces, with the most modern, wholesale-destructive machines, in order to bring to an end certain existing uncertainties. For years the prospect of such a mighty conflict has been ever present, like some grim monster, to the consciousness of the peoples of Europe; for years this fearful foreboding has prejudiced trade and commerce, and has restrained the keen, ardent spirit of enterprise. The European weathercock, the Balkans, was a source of uneasiness to the States of Western Europe, led to paralysis of trade and industry, and matured among the organized workers in the shape of great insecurity in the means of subsistence, wide-spreading unemployment, interrupted only by short spells of full-time work. For years Europe has been like a magazine, the explosion of which has been from time to time threatened, with sparks of various sizes. Hitherto such an issue had, however, been prevented, although the apprehensive feelings of the peoples of Europe was an index that they were wandering at the brink of a precipice. It was again the European weathercock which was the starting point, which gave the sign for the storm. It is idle now to inquire whether some settlement of the points at issue was not possible, whether the peoples of Europe could not have succeeded in preserving a so necessary peace. Equally vain is it to ask whether the assassination of the successor to the throne of Austria, in Sarajewo, is a sufficient cause, for the slaughter of a multitude of innocent persons, for the perpetration of such a gigantic murder, in order to secure a requital for one villainous deed. Such questions are idle at a time when the whole of the European peoples are involved in so great a calamity, and it is also at present useless to inquire whether the causes of this present war lie in foreign politics, or arise out of deeprooted economic conditions. But just as the European weathercock, perhaps in consequence of this or that ruthless deed, of a single individual, of a party, a nation or of a government, may seem to point towards war, and attempt to raise up general, universal abhorrence and bitterness, just as this weathercock, is not, as a matter of fact, the weathercock which is really feared, so the assassination in Sarajewo is not the real cause of the present war. "Greater Servian Agitations," "Pan-Slavism," "Revenge," and such like expressions which are bandied about, as the explanations of the reasons why the people have set themselves against one another, are no more than catchwords, which throw

a veil over deeprooted economic influences. Tendencies to expand, to throw down deeper roots, bring nations into sharp opposition, they rob one another of the light which is necessary to all for growth. Just as in the life of a single nation an association or company feels itself in its chains threatened by the existence of another, regards that other with distrust, seeks to prevent that other from making headway, so is it also in the larger economic interests in the life of nations. That the love of power of a few definite groups plays a role, which in some cases may even decide the time of the outbreak of a conflict, does not alter the fact, that it is really economic factors which set the nations against one another and ultimately precipitate a war.

Although the working classes may regard such a conflict as a blow to civilization, and therefore, steadily set themselves in opposition, that does not prevent the organized workers from accepting a given situation, and even to throw themselves ardently into a struggle, because they recognize the preservation of nationality as indispensable, and by such a struggle mean to defend the civilization peculiar to their own land. So it has been in the present struggle, in which almost every country where military service was compulsory, the workers did everything they could to prevent the war, but, when their efforts had failed, brought their mental qualities and culture to the defense and preservation of their nationality, to the arbitrament of the sword, although they knew that in so doing, in entering into such a struggle, they would do grievous harm to the life and spirit of sister organizations in other lands, whose thoughts and feelings were similar to their own. Organized and outspoken workers declare that no other cause except the preservation of their nationality and the civilization peculiar to it, would have justified their appeal to arms. Whether such claims can be justified or not, must be left to the tribunal of history, but today it is a certainty that such claims are held by almost every nation, so far as the mass of the people are concerned, and are the mainspring of their activities. This high flood of Nationalism, which carries with it at present, practically every member of the nations engaged in war, seems at a blow to have severed the international thoughts and feelings of the workers. The international seems but as a corpse before the high flood of national enthusiasm. Is it really so, and shall we ever be able to build up again so powerful an intercommunal life? The answer to this question, too, lies also in the lap of the future. We, who have steadily maintained the standpoint that nationalism and internationalism are not mutually exclusive, that internationalism represents but a further step in the development of the

life of nations, and assumes a firmly established nationality, cannot believe that the unfortunate war now destroying the peoples of Europe, will bring with it a lasting adversity in the international relations of the workers of the various countries. On the contrary, we regret the sacrifices of this war, the terrors and horrors to which it has given birth, deeply, and we are, consequently, absolutely convinced that these very sacrifices, these very terrors and horrors will create a new and large influx of the friends of peace, who will establish peaceful methods of international understanding. We are, however, also convinced, that before such an end can be reached, the co-operation of the peoples in every sphere of civilization is necessary. All those who desired peace among the peoples, who worked to secure this triumph, and whose efforts have now been frustrated, because they were too weak, must not despair of the ultimate victory of the idea of peace. A time of peace will succeed to the time of war—must succeed—because the nations of today are so dependent upon one another. The very destruction of goods, whether they be raw materials, or the products of industry, or creations of the human mind, will draw the enemies of today nearer to one another. The workers also will rediscover each other, as they must have done before, and simply because they must do so.

If hence a permanent burden will not be laid upon the co-operative work of organized labor in the international field, there still remains with us the anxious care, whether or not the chaos of war will not bring in its train a lengthy estrangement of the workers in those countries which have taken part in the war, and thereby postpone the time in which we shall be able once more to co-operate in international matters. The banishment of this danger appears to us a primary duty, the achievement of which will be very difficult, because on account of the war, the intercourse with a part of our affiliated comrades has been cut off, the relations with whom latterly promised to become exceedingly cordial. The preservation of these feelings are very important for our later relations, and we must seek by all possible means to maintain them. To this end our organ, the International Metal Workers' Review, was created. It was brought into being to facilitate intercourse between the Trade Unions of Metal Workers, to make the reports of the committee men of one country accessible to the unions of the remaining countries, to give information about the world's market, about the protection of workers, insurance legislation, and the work of the trade union organizations. In short, it was to bring to light all that concerned the trade union movement of the workers, whether directly or indirectly.

During the time of war we must all put our hands to the plough to see that these duties are carried out. Under the present

circumstances, of course, every possible duty cannot be carried out, not only because existing arrangements render impossible a part of these duties, but also because of the fact that the war influences the economic life not only of those states actually fighting, but affects all remaining nations, which are, or have been until now, identified in buying and selling. Today, in practically every industrial state, the organized workers are suffering from unemployment. The latter already imposes new duties upon peoples and governments, in which we are also interested in a high degree. Increased unemployment must depress trade union organizations, absorb more and more of their funds, reduce the stream of membership, or dry it up altogether. The trade union organizations in those states where compulsory military service obtains, cannot remain uninfluenced through the calling up of members to the flag, while in those countries in which military service is voluntary, the work of the recruiting officer will be visibly affected by the degree of unemployment. All these phenomena are of decisive significance in the life of trade unions. They remove the props from under them, and impose new duties upon the unions, some mention of which is well worth while.

If during the time of war, some care for international relations, in spite of all limitations, is possible, this only can happen through the good will of those interested. In the first place the trade unions in those countries which are maintaining a neutral attitude can render a very useful service by undertaking the transmission of news, and by giving us information as to the occurrences in these lands. Efforts must be made not only to forward reports from neutral lands, but also to obtain material from those countries which are actually taking part in the war. For this purpose, intermediary relations must be established between the international secretariat and the trade unions in the neutral states, so that material can be forwarded to the secretariat from the various lands, which cannot be obtained directly. In this way also, the International Metal Workers' Review will be able to reach those members in countries which are taking part in the war. Only through such co-operation of the members of the International Metal Workers' Federation will it be possible to maintain the International through these difficult times, and prevent the hard work of twenty years from being nullified, work which must be continued so soon as the war comes to an end. If all our past efforts are not to be razed to the ground, but preserved, it can only come about through the co-operation of those whom the outbreak of war has not divided, and who will not allow themselves to be withdrawn from any one of these obligations. To the members in all states which are struggling against one another, we recommend the preservation of an open mind,

and through all the terrors of war, and the wild passions which it lets loose, to cherish the cause of humanity and the solidarity of the workers, and not allow these to be sacrificed.—International Metal Workers' Review.

BOILER MAKERS EXPRESS THEIR APPRECIATION.

Grateful for the Patronage Given Their Annual Dance at Auditorium.

The annual ball of the Boiler Makers at the Auditorium on New Year's Eve was one of the most enjoyable social events of that nature that has been given in Miles City in many a day. Upwards of 140 couples were present. Besides a large number of tickets were disposed of to parties who did not find it convenient to attend, so that financially the affair was as much a success as it was socially. Naturally the boys feel elated over the consideration shown them by the public and through the columns of the Star they desire to thank everybody who had anything to do with its success. Said one of the members to the Star yesterday:

"We want to thank the newspapers and the moving picture shows which advertised the event for us, and last, but not least, the large number of people who purchased tickets. From every viewpoint the dance was a success, and we trust that the people enjoyed themselves."

The Boiler Makers' dance, next to the Engineers' ball, was the largest that has been given at the Auditorium this season.—Miles City Star.

FOR PEACE, JUSTICE AND DEMOCRACY

A world-wide war now demonstrates the failure of the prevailing methods of diplomacy. Secret diplomacy is an anomaly in an age of democratic ideas and ideals. Secret diplomacy is the twilight zone which enabled the "interest" to retain a controlling hand upon the powers of state. The people now demand their right to know what has been concealed. They demand that the element of secrecy be eliminated because the affairs of diplomacy are the affairs of the nation.

America's workers did not shirk responsibilities revealed by the present war. Their sense of duty to the state and to all their fellow workers has been stirred to the depths. Several resolutions introduced in the Philadelphia Convention showed the broad sympathies of the labor movement for the suffering caused by the war, and their longing for constructive measures that would make national relations embody the highest concepts of rational conduct and justice.

These resolutions all proposed definite plans of action that the welfare of the

masses of the people may be impressed upon those who have in their hands diplomatic power. In addition to the endorsement of the Executive Council's report upon international war and peace was the unanimous adoption of Resolution No. 104, the full text of which is as follows:

Whereas, The whole civilized world is torn by the awful titanic struggle which is now devastating continental Europe, disturbing the commercial and industrial conditions of the whole world, submerging the nations of Europe in the shadows and horrors of war, touching sharply our sympathy and stirring the depths of our emotion; and

Whereas, All history has proved that trial by conflict does not result in permanent peace when it does not establish justice as its foundation, while peace promotes the establishment of those agencies which seek to regulate the relations between men that justice may prevail; and

Whereas, Political experience shows that the welfare and the interests of all the people are promoted in proportion as they are represented in the government and the government is responsive and responsible to them, it is necessary that the workers have a will and an effective voice in determining international relations; and

Whereas, The workers of every age have had special and imperative reasons for advocating and endeavoring to secure provisions insuring the maintenance of peace with justice, since upon them fall the burdens of actual warfare and the real fighting in the ranks, while the hardships and the suffering accompanying war and following it are felt most keenly and most palpably by them and those dependent upon them, and the costs of war ever fall disproportionately upon their already inadequate resources; and

Whereas, The workers of all countries have been leaders in protesting against injury and violence to human life in peace as well as in war, and against the cruelty and the waste of needless war, and they have steadfastly endeavored to rouse the general public to realize the enormity of war, thereby rendering public opinion alert and sensitive to the responsibility of all men for the existence of war, and, moreover, the workers have been inspired to assist in constructive movements for the prevention of wars whereby peace may be maintained with justice; and

Whereas, The organized wage workers of the civilized nations have established fraternal relations for the purpose of binding together the trade unions of all countries for the promotion of common interests and ideals, and by frequent and regular communication, co-operation and exchange of representatives have brought about an understanding and sympathy between the organization and their members in the va-

rious countries, relations which are necessary for the inception and the continuance of peace; and

Whereas, Out of the experience of these workers, out of their burden-bearing and their wrongs, out of their hopes and their victories, have developed principles of justice and the conviction that the establishment of these principles as practical forces in the lives of the workers is conditioned upon establishing dependable representative agencies for the realization of purposes and agreements determined upon; therefore, be it

Resolved, That we, the delegates of the organized labor movement of America, express and hereby convey to the organized labor movements of Europe fraternal greetings and our sympathy with their great suffering and distress, and that we express our most earnest hope for the early cessation of the terrible warfare now desolating the lands, destroying the families and impoverishing the nations of our fellow-workers; and be it further

Resolved, That we desire that fraternal relations between national labor movements shall continue with no more interruption than shall be absolutely unavoidable during the war, to the end that our regular intercourse and co-operation shall be resumed immediately at the close of the war; and be it further

Resolved, That the convention of the A. F. of L., in view of the general Peace Congress which no doubt will be held at the close of the war, for the purpose of adjusting claims and differences, hold itself in readiness and authorize the E. C. to call a meeting of representatives of organized labor of the different nations to meet at the same time and place, to the end that suggestions may be made and such action taken as shall be helpful in restoring fraternal relations, protecting the interests of the toilers and thereby assisting in laying foundations for a more lasting peace; and be it further

Resolved, That copies of these resolutions be sent to the International Federation of Trade Unions, to all national trade union centers throughout the world and to the President of the United States.

In compliance with the instructions these resolutions have already been transmitted to the trade union centers of all countries affiliated to the International Federation of Trade Unions, and to the International Federation of Trade Unions. This was done to obtain official views upon the practicability, the wisdom of the proposition for holding a conference as urged by the resolutions. It is the earnest hope of America's workers that the terrible conflict may be ended soon, and ending, effect the establishment of permanent international peace based upon principles of justice, freedom and democracy.—The American Federationist.

OCCUPATIONAL EYE DISEASES.

Many eyes are injured or lost from disease contracted in certain occupations. In some trades absorption of poisons produce serious eye diseases. Among these poisons are tobacco, alcohol, lead, bisulfid of carbon, nitrobenzol, aniline dyes, etc. One of the most dangerous is alcohol. Not the high grade grain alcohol but the cheap wood or methyl alcohol, sometimes masquerading under the names "Columbian spirits," "Colonial spirits," or "Manhattan spirits." This poison sometimes drunk by ignorant people, and not infrequently causes death and blindness. Even ten drops have produced such results in susceptible people. Turkish bath attendants and masseurs sometimes use wood alcohol with bad results, both to the rubber and the rubbed. The inhaling of wood alcohol in such trades as painting and hat making not infrequently produces blindness or fatal results. It is used as a solvent for shellac and if used in confined spaces is very dangerous. In a pencil factory, where wood alcohol was used, a roomful of girls suffered from serious disturbance of vision, which passed away with the removal of the cause. Wood alcohol under this or under any other name should not be manufactured or sold. It is too dangerous. What is called denatured alcohol is just as cheap and comparatively harmless. Another vocational eye disturbance is found where eyes are unduly exposed to very bright lights, such as "blow outs" or "short-circuits," where the light is sudden and intense. Such accidents may, by the overpowering influence on the retina, produce poor sight or blindness, partial or complete, for a variable length of time. Constant and intense electric light produces retinal exhaustion, and an excessive pupillary contraction, which secondarily overworks the muscle of accommodation, and occasions great ocular fatigue. People who work continually on polished surface such as gilders, metal polishers and glass workers experience the same trouble. Factories that are brilliantly illuminated by incandescent gas and electric lights are apt to injure the eyes, as these lights contain much violet and ultraviolet rays which produce an effect on the eye similar to "snow-blindness." These rays may also seriously affect the eye. Stokers, bottle-makers, and glass-blowers, whose eyes are continually exposed to intense heat and light, are very apt to have cataracts and the eye nearest the fire is always the one first affected. Another kind of occupational eye disease can be found in people who are compelled to work for hours at a stretch, on work that requires close inspection of small things. Bookkeeping, drawing, watchmaking, sewing and dentistry, all close work, require a strain of the muscle of accommodation, even if people have normal eyes. Many people have errors of refraction for which glasses should be properly fitted. Even if glasses are properly fitted, there is still an accommodation

strain where the eye is unwisely taxed. This accounts for the headaches, tired and red eyes and nervous exhaustion so frequently seen in those who work long and hard at occupations requiring close visual exertion, and where at the same time perhaps the light is poor and badly arranged.

Shortsightedness is a disease aggravated by the close use of the eyes and is found in students, type-setters, etchers and engravers, in fact, in any vocation where close and continuous use of the eyes is demanded. The proper adjustment of glasses is essential in such cases, as well as health up-building, open-air life, proper lighting and the judicious use of the eyes, for it must be remembered that shortsightedness is a progressive disease and sometimes causes blindness. Shortsighted people should endeavor to secure some occupation which does not require the close and continuous use of the eyes.—Journal, American Medical Association.

TREATING MEN AS MEN.

Such a service to mankind as the Rufus F. Dawes hotel in Chicago is performing when it supplies a man with a room, a good bed and a comfortable meal at a charge of 14 cents is always interesting. It is peculiarly interesting that the Dawes hotel last year came within a little of paying expenses and that it treats its guests as regular hotel guests and not as the recipients of charity. It has shown what it is possible to do in a business way, for a slightly higher charge would have meant a profit on the enterprise.

Better than this, if anything could be better, is the idea on which Mr. Dawes operates the hotel erected in memory of his son. He says of it.

"It is no different from any other hotel except that its charges are lower. It assumes that its guests are gentlemen and appreciative of gentlemanly treatment. The fact that in the operation of the hotel a small deficit results, is not made the excuse for any different treatment of its guests than in other first-class hotels."

In other words, Mr. Dawes realizes that men like to be treated as men and not as an inferior class because they happen to suffer the misfortune of not having much money. They pay for what they get, and if not quite all it costs, it is all they are asked for. And in return they are not made to feel themselves paupers or semi-criminal.

What one man in Chicago has achieved, other men elsewhere will do. The work Mr. Dawes is doing in memory of the son who did not live to carry out his own plans is likely to be better remembered than his service as comptroller of the currency. And the best part of his work is that he looks on the men he wants to help not as "objects of charity." but as fellow men—Milwaukee Journal.

ALIEN LABOR AND PUBLIC WORK.

The efforts of the contractors engaged in building the great subways of the city of New York to have the alien clause in the labor law concerning public work declared unconstitutional presents a characteristic phase of the all-important immigration problem, the exploitation of the unskilled or semi-skilled foreigner by large employers of labor to the detriment of American wage-earners and as a means of lowering those standards of labor and of living which have been built up and fostered by the American trade union movement.

According to figures available there has already been expended on subway work in New York City over \$200,000,000, and there has been some 20,000 men employed since the work began. Of these latter the great proportion of from 80 to 90 per cent were aliens who were content to work at a low rate of wages. The subway contractors have also endeavored to destroy recognized trades in the metropolis by using what are called "handy-men" to do the work of mechanics. These "handy men" are usually aliens who will do mechanical work for wages ranging anywhere from \$2.00 to \$3.50 per day in a city like New York where the standard of living is exceptionally high.

Of late various unions of the building trades have taken a determined stand to put an end to the notorious violations of the alien clause in relation to public work. Strong representations were made to the Public Service Commission and notices were sent to the contractors demanding compliance with the law. When the latter saw that the Public Service Commission meant business they retained two well known lawyers to attract the validity of the law and have it declared unconstitutional as impairing the right of contract, and illegal, as contravening the terms of a treaty with Italy, and other treaties with other foreign countries. As a preliminary step an injunction was secured tying the hands of the Public Service Commission.

Organized labor is preparing to strongly contest this attempt to have this law declared unconstitutional and John Gill, representing the bricklayers', masons' and plasterers' union, has been made a party to suit by consent of all parties in order that organized labor may be represented. The New York trade unions intend to contest the case thoroughly and will carry it to the U. S. Supreme Court if necessary in order to obtain justice for the American working man.

In its narrower aspects it is of vital importance that the provisions of the labor law and the alien clause should be strictly enforced in the city of New York, just now where there are over one hundred thousand wage-earners unemployed. In the building trades alone it is estimated that there are more than 35,000 citizens at present un-

employed, with families dependent upon them, who are able, ready and willing to do this work. It is almost needless to say also that if the contractors succeed in having this law declared unconstitutional or illegal the trades union will have a much harder battle in the future against inroads of alien labor.—The Carpenter.

THE AMERICAN FEDERATION OF LABOR.

Does what all federations of labor unions do, attempts to give solidarity to the labor movement by getting the various sections of the labor army into touch with each other. It refuses to admit that occupation can be a barrier to the community of interest running through the wage-earning masses. From its inception it has taken the stand that while unions of miners, sailors, shoemakers, cigar makers and printers, must each and all be left entirely free to govern themselves within their own borders, yet, that between the members of all these unions there should be a bond as great as that between the members of the same union. The great aim and object of the federation is to strengthen that bond, and its method is, by organization, education and inculcation, to place the labor movement upon a higher and more effective plane. The strength of a chain is in its weakest link, and the Federation, therefore, endeavors to organize all labor, recognizing that while many non-unionists may be sympathetic with unionism, yet that the unorganized are far more exposed to the pressure of unjust conditions than are the organized, and being thus necessarily weaker in maintaining wages, keeping down hours, and resisting other encroachments, are the source of constant danger to the organized as well as to themselves. And there is this that the American Federation of Labor has already done: It has largely swept away the old and foolish jealousy that existed between the skilled and unskilled workmen; it has taught the great lesson that a man is a man, no matter whether he sets type or scales the ladder, whether he sews the garment together or sells it behind the counter, whether he makes the machine that spins the cotton or gathers the cotton in the field. Whatever a man may be, so long as he works honestly and seeks to wrong no other man, or to advantage himself at the cost of another, he is a man. The Federation maintains this and seeks to swing all into line regardless of how they may happen to be employed.

The Federation is opposed to strikes, as are all peaceful institutions; but when struck, it will strike back as best it can. Strikes are barbaric in the act, but highly moral and absolutely necessary when forced by aggressive employers who would curtail the liberties of a portion of the community for the advancement of another, who refuse fair and open conference and adopt arrogance and forceful measures. Though

strikes do not always win, even those that are lost at least induce the employers to forbear in the future and teach them a lesson they do not readily forget, that labor is the most important factor in production, entitled to consultation on the wages, hours and conditions under which labor shall be performed. Strikes pave the way to voluntary arbitration, but that such arbitration shall not be one-sided, labor must be possessed of determination, steadfastness, business methods, and perfected organization, the highest form of which is had in Federation.—The Wisconsin Labor News.

KEEP ON LEARNING.

Lincoln once said, "There is not much to a man who is not wiser today than yesterday." This is universally true. It is only the fool who never changes his mind. The wise man is always endeavoring to add to his knowledge. If what he learns today is different from what he learned yesterday and gives him different views of things, he should keep his mind open to new knowledge. He will not change his opinions for light reasons, but will consider all that comes to him and change when he sees good reasons for changing. If one is not willing to listen to the arguments of others, he need not expect them to listen to his opinions. He gets in a mental rut and sticks there, never improving. The wise man learns something, be it ever so little, from everyone with whom he has to do. Even the fool teaches him to keep his mouth shut when he has nothing to say, and many wise thoughts come from the prattle of a child. No man is so ignorant that he does not know something that may be of benefit to others. Learn something in old age as well as in youth. There is a proverb, "Live to learn and you will learn to live." Keeping the mind active is one way of keeping your youth. Learning at all times and in all ways gives one a cultivated mind. The man who has cultivated his mind is ready to make his knowledge useful to others. Unexpected occasions often arise when knowledge is needed for immediate action. The man with cultivated mind is ready, while the man who has lived in a mental rut cannot adapt himself to the occasion.—Milwaukee Journal.

SUBSTANTIAL PROGRESS.

Despite the small number of states which have held legislative sessions in 1914, several measures which indicate substantial progress in the work of improving labor conditions nationally, have been enacted into law, according to the recent report of the American Association for Labor Legislation.

Noteworthy among these in New York's action in establishing a state-wide system of free employment bureaus within the state department of labor. The special signif-

cance of this measure lies in the fact that it denotes a renewed determination to make scientific provision for meeting the unemployment problem, which at present is undoubtedly the most pressing of all industrial questions.

The recently approved theory that every industry must bear the cost of industrial accidents as well as other operating expenses, is embodied in the workmen's compensation laws which have been passed in Maryland, Kentucky, New York and Louisiana. A number of states—including Massachusetts—have amended their compensation laws to liberalize the provisions of the already existing codes.

Massachusetts is conducting a study of old age and its relations to dependency and is also preparing to initiate inquiries into other forms of social insurance. New Jersey has brought her law for the prevention of occupational diseases to a high standard by adopting measures for the prevention of compressed air illness and lead poisoning. Eleven states legislated for the protection of the child worker. Arkansas, Kentucky, Virginia, Georgia and Mississippi passed entirely new codes, the general trend of which is to raise the minimum age for any employment and for specifically dangerous occupations, to reduce hours of labor for child workers, to prohibit night work and to raise requirements for the issuance of employment certificates.

These are only a few of the things which have been accomplished for the worker. Far-reaching, humane legislation has not dragged in the year which just closed; on the contrary, much that is constructive in the best sense of the word has been done. It has been said that the next decade will see less effort to legislate in the interest of the worker—especially the woman and the child employe. But those who are in touch with sentiment all over the country know that labor legislation which conserves the worker's life and energy and makes him a more efficient producer cannot be refused. The call of business is efficiency, and surely it is no more than good business sense for the nation and the states to legislate for working conditions which make for efficiency.—Milwaukee Journal.

COLORADO MINERS' STRIKE COMMISSION.

The fact that the mine operators of Colorado rejected the agreement proposed by the federal government did not change President Wilson's conviction that the plan was obviously fair and sensible. A sense of duty forbade that he do nothing. He, therefore, appointed the commissioners provided for in the proposed plan of adjustment. The men named are to serve as a committee through which the miners may state their case and to which differences are to be referred for decision. The com-

mission constitutes an agency through which the differences of the employers and the miners can be adjusted. The following experienced men compose the board: Seth Low, president of the National Civic Federation, who has served as mediator in several labor disputes; Charles W. Mills of Philadelphia, a bituminous operator who has acted as mediator for the Department of Labor several times, and Patrick Gilday, president of District No. 2 of the United Mine Workers, who has served as mediator with Mr. Mills on other occasions.

The miners' organization had agreed to the President's plan as conceding many of their contentions. When the President appointed this commission the miners voted to declare the strike off in order not to embarrass or impede the work of the federal commission. Upon that commission now rests the duty to ascertain what is just and to use its good influences for its establishment.

The emphatic condemnation which the mine operators of Colorado have evoked from the American people has not been decreased by their unqualified and unreasonable rejection of all proposals to adjust the mining difficulties that caused the strike.

The arrogance which the mine operators manifested in dealing with the federal government and the nation's interests was a counterpart to the arrogance with which they treated the miners as employes and as strikers. That arrogance has its root in the great power which their property holdings give them—power which enabled them to control not only the working conditions, but the home lives of their employes; power which enabled them to declare any act, social, economic or political, not in furtherance of their financial interests, a violation of their property rights. We have asserted again and again that the fundamental problem, not only in Colorado but in West Virginia and in Michigan, is the tremendous power that results from owning large tracts of land which take on the outward semblance of feudal estates, governed and policed by private individuals and under ownership of absolutism. The problem of preventing private property rights from interfering with social welfare cannot be solved by the federal commission.

The Colorado coal strike has not failed; the miners step aside that the federal commission may have an open field. The Colorado strike has done more to burn the cause of unionism into the hearts and habits of the coal miners than decades of agitation could have done. It has demonstrated that the only power that stands between them and ruthless exploitation by their employers is the trade union organization. The lawlessness, the cynical brutality and disregard for human life have furnished unanswerable arguments for the necessity of organization. Unionism born of such desperate struggles is unionism that endures.

The Colorado strike has given wide publicity to the wrongs and injustice which have been inflicted on the miners. Benefits will come to them because they have demonstrated their power, because employers will no longer dare to continue all the former abuses, since they have been made to understand and feel that financially it

is too costly, and their course stands condemned before the judgment of the people.

The work of organization will go steadily on in Colorado. Collective action is the only defense the miners have against private aggression and exploitation—the only instrumentality of justice upon which the workers can rely.—American Federationist.

News of General Interest.

THE CRIMINAL "SPEEDING UP" SYSTEM MUST STOP.

The recent report of the House Committee on Labor upon the Taylor system of shop management emphasizes the physical effects of "speeding up." Persistent efforts to have this system introduced into the War Department have resulted in its partial installation in the Watertown and Rock Island arsenals. Those establishing this system have concerned themselves principally with "speeding up" the workmen.

The report divides the system under three headings—standardization, systematization and stimulation. The expense incurred for the first and second purposes of the system falls upon the operators; the costs of the third, stimulation, are paid by the workers in their physical health. This the House Committee's report recognizes:

"The Taylor system regards the workman as a machine to be 'speeded up' to its maximum capacity. When this human machine fails to function to the satisfaction of the management it is to be cast aside to make room for the new machine—a fresh workman. The authors of the system do not appear to have concerned themselves about the ultimate fate of the human derelicts who may be compelled to drop out because they cannot stand the pace. Mr. Taylor boasts that when he installed his system in the Bethlehem steel works he purposely made the tasks so hard that 'not more than one out of five laborers (perhaps even a smaller percentage than this) could keep up.'

"That may be the kind of 'efficiency' which produces dividends for the steel trust, but it is surely not the system which a beneficent government should force upon its employees."

The Taylor system endeavors to work men up to the very edge of a breaking strain. Stop-watch observations are used as a basis for setting a pace for workers. Upon the effectiveness of this method the House Committee on Labor quotes from a report made to the Sixty-second Congress. Two members of the present Cabinet, Secretaries Redfield and Wilson, were members of the committee making the report, which said in part:

"By the stop-watch you may be able to determine the time in which a piece of work can be done, but you do not thereby alone

determine the length of time in which it ought to be done.

"The time study of the operations of any machine can be made with a reasonable degree of accuracy because all of the elements can be taken into consideration in making computation. A machine is an inanimate thing—it has no life, no brain, no sentiment, and no place in the social order. With a workman it is different. He is a living, moving, sentient, social being; he is entitled to all the rights, privileges, opportunities and respectful consideration given to other men.

"He would be less than a man if he did not resent the introduction of any system which deals with him in the same way as a beast of burden or an inanimate machine."

The relation between the fatigue caused by speeding up and predisposition to disease has not been generally recognized. Nerve diseases are not generally classified as occupational diseases and yet it is difficult to set limits to the effects of work upon the nerves. A recent book, "The Occupational Diseases," by Dr. W. Gilman Thompson, emphasizes this relation and designates as occupational diseases paralysis, atrophy, neuritis, neuralgia, spasms, neurasthenia, hysteria, sciatica and others that are usually considered diseases of the leisure class. Frequently the occupation is only a contributing cause; nevertheless, the conditions of modern industry necessitate longer rest periods with absolute change of interests. The workers often cannot have proper rest because they cannot pay for proper conditions. In this connection Charles L. Dana, quoted by Dr. Thompson, has said:

"It is not occupations themselves, but the industrial and domestic conditions to which working people are subjected, which cause the mass of nervous and mental diseases. Scientific management, therefore, which speeds up the human machine, must give it longer rest and an absolute change of nervous and mental interest."

Dr. Thompson's statement upon general fatigue is suggestive of many physical results of industrial conditions:

"Fatigue of muscles, nerves and the mind constitutes an important factor in predisposition to disease among many classes of workmen and operatives. Its effects have

become very noticeable of recent years, owing to the practice of 'speeding up' or increase in frequency of accidents from tracts where time-saving is an essential matter. General fatigue is most often met with among mill and factory operatives in the textile fabric industries. In these industries much complicated machinery is employed and the faster it is operated and the longer the hours of work the greater the physical and mental strain and consequent fatigue reaction. These problems have been most comprehensively studied by Josephine Goldmark in her admirable book on 'Fatigue and Efficiency,' comprising the results of studies made under the auspices of the Russell Sage Foundation.

"Potent factors in inducing fatigue found in large factories are incessant floor vibrations, as where many looms are working, constant noise, the confusion resulting from overcrowding, poor air, poor light and monotony of work. Fatigue is known to diminish the quantities of antibodies in the system, and hence to increase its susceptibility and lower its resistance to infectious diseases such as grippe, pneumonia and tuberculosis. General fatigue further acts by inhibiting digestion and ultimately interfering with nutrition. Another important result of general fatigue is in the decided increase in frequency of accidents from machinery which it occasions by lessening the alertness of the operative.

"In many industries, such as those of clothing manufacture, fruit and vegetable canning, etc., the season of the year makes the work periods very uneven, so that the employe may alternate idleness with physical strain and mental worry. For women and children this is particularly bad. Women possess as a rule less reserve strength than men for endurance in such tasks, and owing to the menstrual function frequently becoming disordered under fatigue, they are liable to suffer serious and sometimes permanent impairment of health. They are also more liable to suffer from constipation, digestive disorders and anemia, especially of chlorotic type.

"In some industries, such as work with blast furnaces, men are sometimes required to work in twenty-four-hour shifts, although of late years this has been found to be an economic disadvantage and is, therefore, less common than formerly. Engineers of fast trains are liable to the strain of long hours of concentrated work and attention, and the fatigue thus induced so lowers their power of alertness that serious accidents have in the past resulted from it.

"Continued fatigue results in muscular tremor and weakness, somnolence or sometimes insomnia, and has a marked tendency to lessen the activity of the digestive functions. If greatly prolonged it results in neurasthenia, hysteria and a variety of functional nervous disorders. Neuralgias also are induced by it. Very similar to the effects of physical fatigue are those of worry

which are more or less associated with occupation. Among these must be reckoned the fear of losing work, inability to complete allotted tasks on time, and a host of domestic anxieties, most of which resolve themselves into the matter of low wages and the consequent inability to secure adequate food and housing."

The discussions of specific diseases will be very helpful to those studying so-called scientific management. Every local and international union should make it a particular duty they owe to their membership in the trade or industry to secure the fullest and most reliable information upon the important question of safeguarding the health and the lives of the workers in their respective jurisdictions. In addition, the information is a refutation and indictment of the claims of the "speeding-up" system.

Only an orientation has been made into the study of occupational diseases. The study does not reveal new diseases, but search for preventive methods reveals casual relations between industry and diseases. The workers themselves are primarily interested in this phase of medical progress and must avail themselves of all information that will help them to protect their lives and health. It is as necessary to heed the warnings which modern science gives of impending dangers from disease as warnings of impending accidents.—Samuel Gompers, in the American Federationist.

"FIRST TIME IN HISTORY."

Exploits of John Paul Jones Recalled as Being Yet "Unparalleled."

"The first time in history" is a dangerous phrase to play with. How the country has been misusing it The Philadelphia Public Ledger recalls thus:

London correspondents who describe the German raid upon a British port as "unparalleled in English naval history" have not read much history.

Any American boy could tell them about John Paul Jones, and how he sailed into Whitehaven, spiked forty guns of the fort and later cruised all around the British domain, capturing or destroying dozens of ships. Dashing into an enemy's harbor was one of his commonplace stunts, and he didn't do it in any submarine, either.

Why, a crew from his bold Ranger even went ashore and sacked the home of the Earl of Selkirk. Jones gallantly sent back to Lady Selkirk the silver plate his men had stolen from her castle.

The smartest German submarine will have to travel at a furious clip to match the record of destruction around Great Britain wrought by this most daring of all American sea rovers.

Yes, John Paul Jones did not do business with any sneaky little submarine. He sailed in, above water, as bold as brass. His exploits along England's coast are still "unparalleled in English naval history."

HYDRAULIC RIVETING THE STEEL STRUCTURE OF THE WHITE STAR LINER "BRITANNIC."

By Frank C. Perkins.

The new White Star liner, "Britannic," has a length over all of about 900 feet and breadth of about 94 feet, while the moulded depth is 64 feet 3 inches, and the total height from keel to navigating bridge measures 104 feet 6 inches.

The gross tonnage of the "Britannic" is said to be about 50,000 tons and it has a load draft of 34 feet 7 inches, with a displacement at load draft of over 53,000 tons.

This great ocean liner is propelled by reciprocating engines of 32,000 indicated horse power and a steam turbine of 18,000 horse power.

keel is formed by a single thickness of plating $1\frac{1}{2}$ inches thick, and a flat bar $19\frac{1}{2}$ inches wide by 3 inches thick. The bottom plating is hydraulic-riveted up to the bilge, the strakes being arranged clincher fashion for this purpose; and the frame bottoms are joggled, to avoid the use of tapered packing pieces. To reduce the number of butts and overlaps to a minimum, plates of large size are adopted. The shell plates generally are 6 feet wide and about 30 feet long, with a weight of $2\frac{1}{2}$ to 3 tons. The largest shell plates are 36 feet long and weigh $4\frac{1}{4}$ tons each.

There is a cellular double bottom, extending right out to the ship's sides, with floors on every frame, and this double bottom is 5 feet 3 inches deep, and is increased 6

WHITE STAR LINER BRITANNIC, SHOWING ARRANGEMENT OF WEB FRAMES.

The Britannic was designed to carry a crew of 950 men and 2,500 passengers. There are eight steel decks amidships—the boat deck, promenade deck, bridge deck, shelter deck, saloon deck, upper deck, middle deck and lower deck—while at the ends there is an extra deck, known as the orlop deck—making nine decks in all.

It is pointed out that the main structure of the vessel extends to the bridge deck, which is carried for 550 feet amidships, and the superstructure at the ends of the ship consists of a poop 106 feet long, and a fore-castle 128 feet long. All of mild steel the

feet 3 inches in the reciprocating engine room. The subdivision of the double bottom into separate tanks is arranged to provide ample facilities for trimming the vessel, or for correcting any list due to unequal disposition of coal or cargo. The double bottom is divided into four compartments transversely by the water-tight center keelson and water-tight longitudinals on each side, 30 feet from the center line, the subdivision being completed in the usual manner by transverse water-tight floors. The subdivision into four tanks transversely is also of benefit to the stability of the ship,

owing to the limited width of the free water surfaces in the tanks used for the boiler feed water and for the passenger water service. Besides the continuous tank girder mentioned above, there are five intercostal tank girders amidships on each side of the center keelson, and additional girders are fitted beneath the engine rooms.

It is of interest to note that the spacing of the frames is 3 feet amidships, reduced to 24 inches forward and 27 inches aft. The frames are of 10-inch channel sections, except at the extreme ends, where a built section of frame and reverse bar is adopted. The channel frames extend from the tank top to the bridge deck, some of these bars

bulkheads, of which there are sixteen in all, and a number of other bulkheads forming the cross bunker ends. The decks have a camber of 3 inches. The beams of the bridge, shelter, saloon and upper decks amidships are supported by four longitudinal girders, which are in turn carried by solid round pillars spaced 9 feet apart. Below the middle deck in the boiler rooms round pillars are also adopted, 9 feet apart, in conjunction with strong beams carried across at the lower deck level in way of each web frame. In the case of the inner rows the pillars are spaced out so that they do not interfere with the working passage. In the engine rooms and holds the pillars

HYDRAULIC RIVETING ON THE WHITE STAR LINER BRITANNIC.

having a length of about 66 feet and weighing nearly one ton. An inner skin is fitted from the tank top to 3 feet 6 inches above the middle deck, a point well clear of the water-line, and it extends the length of the engine and boiler spaces. It is composed of steel plating, with 6-inch channel frames spaced 3 feet apart, and 5 longitudinal stringers running right fore and aft, well connected to the shell and inner skin. The beams of the main structure are of channel section, 10 inches deep amidships, the largest being 93 feet 6 inches long and weighing about $1\frac{1}{4}$ tons.

The beams are connected to the frames by bracket knees. The transverse strength is also maintained by the watertight

below the middle deck are wide spaced and of circular built section, the deck girders being increased in strength to suit the longer span.

As the ship gets narrower at the ends the number of rows of pillars is reduced. Bilge keels, 25 inches deep, are fitted for about 300 feet of the vessel's length amidships, to minimize rolling in a seaway. The two decks forming the superstructure of the ship and the navigating bridge are built to insure a high degree of rigidity. At the sides they are supported on built-up frames in line with the hull frames, but at wider intervals. The deck-houses are specially stiffened by channel section steel fitted in the frame work; and where, as on the boat

deck, the public rooms pierce the deck, heavy brackets are introduced to increase the resistance to racking forces when the ship is steaming through a heavy seaway. The boat and promenade decks are increased to 96 feet wide, to enlarge the promenade space. Exposed decks are sheathed with wood, but inside deck-houses and decks not exposed to the weather are covered with composition.

In order to insure the best workmanship, hydraulic riveting was adopted whenever possible. Nearly the whole of the double bottom—including the bottom shell plating up to the turn of the bilge, and the top side shell and stringer plates and doublings—have been riveted by hydraulic power. The seams of the bottom plating are double riveted, and of the topside plating treble and quadruple riveted. The butts of the bottom plating are overlapped and quadruple riveted, as are also the butts of the side

The firebars are of the Campbell type and all boilers have Blake's patent furnace bridges. The shells of the single-ended boilers are formed in one strake, the double-ended boilers having, as usual, three strakes. All the shell plates are of mild steel, 1 11-16 inches thick. The arrangement of uptakes, by which the smoke and waste gases are conveyed to the funnels, is of an elaborate nature, no less than twenty branches being required to one funnel in the case of boiler rooms 3 and 4. The branches from adjoining boiler rooms are united immediately above the water-tight bulkhead separating the rooms, the bulkhead thus forming a valuable support to the uptakes and funnel above. There are four funnels which have an elliptical cross section, and measure 25 feet 6 inches by 19 feet 9 inches. Their average height above the level of the furnace bars is 160 feet. The bunkers consist of a 'tween deck space

WHITE STAR LINER "BRITANNIC" AFTER BEING LAUNCHED.

plating, except in the way of the topside shell and doublings, where double traps are adopted.

The boiler plant includes altogether twenty-four double-ended and five single-ended boilers designed for a working pressure of 215 pounds, which it is anticipated will be maintained under natural draught conditions. The aftermost, or No. 1 boiler room, contains the five single-ended boilers; boiler rooms No. 2, 3, 4 and 5 contain five double-ended, and the foremost, or No. 6 boiler room, contains four double-ended boilers. Owing to the great width of the ship, it was found possible to arrange five boilers abreast, except in No. 6 boiler room, where only four abreast are fitted. Each of the double-ended boilers is 15 feet, 9 inches in diameter and 21 feet long, and contains six furnaces; while the single-ended boilers, which are of the same diameter as the double-ended, but are 11 feet 9 inches long, contain three furnaces, so that the total number of furnaces is 159. The latter are all of the Morison type, 3 feet 9 inches inside diameter, and are provided with fronts of the Downie "boltless" pattern.

on each side of the ship, between the lower and middle decks, into which the coal is first shipped, and from thence distributed into the cross bunkers extending the full width of the vessel in each boiler room. The stokers obtain the coal from doors in the cross bunker end bulkheads at the stockhold level, immediately opposite the furnaces, an arrangement which reduces the amount of handling of the fuel for each boiler to a minimum. A further advantage of the bunker arrangement is that no water-tight doors are required in the bunker ends, as each set of boilers has the necessary coal supply provided in the same water-tight compartment, the water-tight bulkheads dividing the boiler rooms being placed at the center of the cross bunkers. Six Underline Ash Expellers are used, one in each boiler room, and in addition there are four ash hoists for use when the vessel is in port. Ash hoists of this type have proved remarkably free from wear and tear, and require a very small supply of steam, a ¼-inch pipe only being used for the steam inlet. There is no forced draught provided, it being the practice of

the White Star line to have forced ventilation only to the boiler rooms of their ships. For the latter purpose, twelve Sirocco fans, two for each boiler room, have been supplied by Davidson & Co., of Belfast, fitted with Allen motors. The fans are placed at the middle deck level, and draw in air through ventilating shafts from the boat deck, supplying the same through trunks led down the bulkhead to the level of the furnaces.

U. S. DEPARTMENT OF LABOR CHILDREN'S BUREAU, WASHINGTON.

"Infant Care" is the title of a pamphlet just issued by the Children's Bureau of the United States Department of Labor. It is the second of a series of popular pamphlets for the use of mothers on the care of children. The new publication takes the baby from birth through its second year, dealing with such questions as feeding, clothing, bathing, sleep and exercise, or in other words, with the questions which all mothers must face, sooner or later, in the care of the baby. The book is written in simple, non-technical language, easily understood by the average American mother. Special mention is made, also, of the care of American babies in the tropics. It contains 84 pages, is illustrated with a number of plates, and pictures and includes an appendix and a useful index. The appendix gives a list of other government publications regarding matters of domestic economy, such as milk, foods, home sanitation, and other subjects of importance in the work of making the home suitable for the rearing of children.

The pamphlet will not, of course, take the place of the advice of a physician, but it includes a section on how to keep the baby well, which describes the minor ailments of babyhood and the symptoms indicating the onset of more serious illness. Special emphasis is placed on the danger to infants of whooping cough and measles.

The pamphlet was prepared, under the direction of Miss Julia C. Lathrop, Chief of the Bureau, by Mrs. Max West, who also prepared the pamphlet on Prenatal Care, which was the first of the Care of Children Series. Infant Care, like all the other publications of the Bureau, may be obtained free of charge by addressing a postal card request to the Chief of the Children's Bureau, Department of Labor, Washington, D. C.

"EUROPEAN TOUR" CONTEST."

Los Angeles Union Labor Temple Association Offers Two Trips to Europe.

A trifle less than eleven years ago a mass-meeting of the representative officers of the labor organizations in the city of Los Angeles, Cal., was called for the purpose of discussing the advisability of erecting a Labor Temple. The members present commended the idea unanimously, and

shortly thereafter a Board of Directors was elected and a state charter secured. The By-laws provided that to be eligible as a director a person must belong to a bona-fide labor organization, own stock in the association, and that no two directors should be selected from the same craft. Thus, briefly, was the project launched to erect a Labor Temple in the city of Los Angeles.

A site centrally located was selected, plans perfected, and in a few years a magnificent seven-story building erected—80 feet front by 125 feet in depth—admittedly the most imposing structure ever erected by Organized Labor in this country. The value of the property is conservatively estimated at \$350,000. Approximately, 100,000 shares of stock have been issued to labor organizations and individual members. To date, the property has been economically managed and is in first-class condition, notwithstanding the assertion made by the union-wrecking Los Angeles Times that "The laborites were not competent to handle the Los Angeles property, and that it would soon pass into the hands of the stable citizenship of the community."

Construction of Building.

The construction is of steel and brick, with hollow tile partitions, maple floors, except in toilets, which are tile. There are drinking fountains on each floor with an ice coil on the top of the building. The building is equipped with a first-class ventilating system provided with large fans on the roof. No money was spared in providing proper fire escapes and adequate exits. The building is equipped with two electric elevators and is steam heated. There are fourteen meeting halls, a banquet room and kitchen, one extra-large hall for dancing and mass-meetings, a large auditorium for entertainments, conventions, etc., and eighteen office rooms. On the ground floor are two rooms which at the present time are rented for commercial purposes, but which are expected to be utilized for banking purposes in the near future. There is also a barber shop, billiard hall and reading room on this floor. Provision has been made in the basement for the installation of machinery to generate light and power.

There is an outstanding indebtedness of \$120,000 at the present time, and the Board of Directors have determined to cancel this indebtedness by selling the remainder of the stock at \$1.50 per share in connection with a popular voting contest.

Immigration Problems.

Assuming that the opening of the Panama Canal will attract the major portion of the immigration of the world to the Pacific Coast, and that unless some steps are taken to educate our brothers and sisters across the water to the necessity of coming to this country in a prepared state, much suffering will follow. The Union Labor Temple Association purposes to send two representatives—one a woman—to the Continent of Europe for the purpose of getting in touch

with prospective European immigrants and acquainting them with conditions which will confront them upon their arrival if they come in an unprepared financial state.

Eligibility of Contestants.

No doubt the honor of representing Labor in such a meritorious undertaking, and the further incentive of the opportunity it will give to study conditions in the Old World, will cause intense rivalry and bring forward a large number of aspirants. Any member of a bona-fide labor organization (directly connected with the American Federation of Labor, or indirectly through a Central Labor body), or the wife, daughter, sister or mother of such a member, is eligible to enter the contest. The voting power will be based on the number of shares of Union Labor Temple stock sold and credited to the contestants.

At the present time the Temple is carrying an interest-bearing burden that will cease to exist just as soon as the remainder of the stock is floated, when every share of stock will pay a handsome dividend, probably as large as any legitimate investment on the market today. Unions or individuals could not make a safer or better investment.

The Association has opened headquarters in Room 203, Union Labor Temple, Los Angeles, Cal., and a vigorous campaign will be conducted until the last share of stock is sold.—Bulletin issued by Los Angeles Labor Temple Association.

A NEW CANADIAN CONSOLIDATION LOCOMOTIVE.

By Frank C. Perkins.

The accompanying illustration shows a new Canadian consolidation locomotive recently constructed at Kingston, Ontario,

tives weigh in working order 190,000 pounds, and are of the usual type of consolidation engines, with semi-wide fire box over frames. A complete installation of flexible staybolts are applied; also the latest type of Schmidt fire tube superheater, capable of producing steam continuously at an average temperature of 600 degrees Fahrenheit. The oil burning equipment is of the C. L. Co. standard design used in connection with the Von-Roden-Ingles type of oil burner.

It may be stated that the Walschaert valve gear is used with self centering valve stem. Radial bugger is fitted between the engine and tender. The headlights are electric front and back, as are also the classification and marker lamps, as well as those inside the cab, electricity being furnished by a turbo generator set, placed on top of the boiler in front of cab. Outside steam pipes are used, incased within an airtight jacket secured to cylinder and smoke box. This arrangement eliminates most of the obstruction in the smoke box met with the inside steam pipes. The feed water enters in the top of the boiler near the front tube sheet through a combination check valve of the C. L. Co. standard pattern. Hard grease lubricators used on all driving journals.

It may be maintained that the tender tank holds 6,000 Imperial gallons of water and 2,700 Imperial gallons of oil. The frame is built of 10" and 13" heavy steel channels. The truck is of the outside equalized type with a cast steel bolster, cast steel wheel centers with open hearth steel tires bolted on. The Canadian Westinghouse Air brake is used and duplex air pump. The following data is of interest: The tractive effort is said to be 36,300 lbs., while the weight of the engine in working order is about 190,000 lbs.

The weight of engine and tender loaded is

Canada. There were four oil burning locomotives of this type placed in operation on the new Pacific Great Eastern Railroad. This road runs out of the city of Vancouver, British Columbia, and when completed will connect up that city with the Grand Trunk Pacific Railway.

It is of interest to note that these locomo-

held to be 343,000 lbs. The wheel base rigid, measures 15 feet 6 inches, while the total wheel base engine 23 feet 9 inches, while the cylinder diameter and stroke is 22x28 inches and piston valves are employed, 12 inches in diameter.

On this engine the boiler pressure utilized is 180 lbs. and the boiler has a diameter at

the first ring of 66 $\frac{1}{2}$ inches, while the fire box length is 120 inches, and the width is 40 $\frac{1}{2}$ inches. The boiler has 183 tubes of 2-inch diameter each.

A WESTERN MARYLAND HIGH POWER LOCOMOTIVE.

(By Frank C. Perkins.)

The accompanying illustration shows a new western Maryland high power locomotive of interest. Its cylinders have a diameter of 25" and a stroke of 30". The driving wheel diameter is 52". The boiler has a diameter of 84 $\frac{1}{2}$ " and a pressure of 200 lbs. The firebox has a length of 110" and a width of 80 $\frac{1}{2}$ ". It has 36 tubes 5 $\frac{1}{2}$ " in

the chlorin content of untreated flour may run as high as 576 parts per million, chlorin-treated flour will contain over 600 parts per million. Chlorin-treatment increases the acidity of the flour. The gluten tests run practically alike for the bleached and unbleached flour. The baking experts report that there are no differences in loaf volume; but the bleached flour gives a loaf having an objectionable color and texture. In nearly every case the bread made from the unbleached flour graded better. The chlorin-bleaching cannot be defended on the ground that bread-making qualities of the flour are improved.—Journal of the American Medical Society.

diameter with each a length of 15' 3", and 239 tubes 2 $\frac{1}{4}$ " diameter.

The driving wheel base is 16' 8" and the engine wheel base is 26' 2". The weight in working order of the engine is 244,500 and of the tender 177,000 lbs.

The fuel used is soft coal and the boiler has a total heating surface of 3147.8 square feet and a grate area of 61.3 square feet. The maximum tractive power is 61,300 lbs. and the factor of adhesion is 3.54. The tender has a capacity for water of 9,500 gallons and for fuel, 14 tons.

CHLORIN-BLEACHED FLOUR.

Since the bleaching of flour with the oxids of nitrogen has been forbidden in the United States under the Food and Drugs Act, there are signs of the introduction of other processes intended to produce similar changes in the wheat product. In one of these chlorin is the bleaching agent employed, the anhydrous gas being diluted with an inert gas and then used to "mature and whiten" the flour. Without commencing at this time on the legal aspects of the matter, we may fairly ask whether the new process confers any advantages on the cereal which will render it superior to the ordinary unbleached patent flour. Mere appearance need not be taken into consideration here. Experiments conducted in connection with the pure food work at the Kansas State Agricultural College in Manhattan have shown that although

THE INFECTIONS OF IMMIGRANT SHIPS

Under present regulations, ships having on board such diseases as scarlet fever and measles are not held at the maritime quarantine stations. Williams says in The Survey, that this is especially unsatisfactory with reference to immigrants arriving by sea, among whom the children often develop infectious diseases while on shipboard. Many persons are then exposed to the contagion, are landed and later develop these diseases in communities to which they go. Of the immigrants arriving at Ellis Island, for instance, many (in 1913, 87 per cent) land and proceed at once to their destinations. Among those detained for various reasons it is found that infectious diseases frequently develop, a majority falling ill within the period of incubation of these diseases as calculated from the date of landing, indicating that they were infected on shipboard. These outbreaks occur so regularly that it seems reasonably certain that the same thing happens among those not detained. For the year ended June 30, 1913, out of 834 patients with measles admitted to the Contagious Disease Hospital at Ellis Island, 576 were taken from ships on the day of arrival, and 258 additional cases developed among detained immigrants subsequent to arrival. Of the latter number, 167 fell ill within a period after arrival indicating that they had been infected on board. These 167 cases developed among the 13

per cent of immigrants detained. At the same rate among the 87 per cent not detained there would have occurred 1,117 cases of measles, distributed wherever these immigrants scattered themselves, each case becoming a possible focus for the further spread of the disease. Fifty-six cases of scarlet fever developed among the 13 per cent of detained immigrants, which, with a like calculation, would give 375 cases among the 87 per cent of those not detained. The

possibilities of the spread of these dangerous infections from this source are therefore great. Williams suggests as a remedy the proper isolation and handling of the cases on board ship, which is not at present carried out. Of the 576 cases of measles referred to, only 70 per cent were "manifested" on the ship surgeon's report, while the other 30 per cent were discovered only on examination at Ellis Island.—American Medical Society Journal.

Smiles.

ALL THERE.

The Pennsylvania Dutch have the reputation of being very economical and very careful in watching the details of domestic affairs, no matter how small.

"Heiny!" called the father.

"Vat?" answered the son.

"Run and count dem geese again, Heiny."

Heiny went; Heiny returned.

"Heiny!" said the father.

"Did you count dem geese again, Heiny?"

"Yes."

"How many vas dey, Heiny?"

"Vun."

"Dat's right, Heiny."

A small boy seated on the curb by a telephone pole, with a tin can by his side, attracted the attention of an old gentleman who happened to be passing.

"Going fishing?" he inquired, good-naturedly.

"Nope," the youngster replied. "Take a peek in there."

An investigation showed the can to be partly filled with caterpillars of the tusssock moth.

"What in the world are you doing with them?"

"They crawl up trees and eat off the leaves."

"So I understand."

"Well, I'm fooling a few of them."

"How?"

"Sending 'em up this telephone pole."—Judge.

One Sunday morning, a deacon observed a boy industriously fishing. After the lad had landed several, he approached and said: "My son, it is very cruel to impale that poor, helpless beetle upon that sharp hook."

Said the boy: "Oh, say, mister, this is only an imitation! It ain't a real bug."

"Bless me!" replied the deacon. "Why I thought it was a real bug!"

The boy, lifting a fine string of fish, said: "So did these suckers!"—Judge.

A country editor wrote: "Brother, don't stop your paper just because you don't agree with the editor. The last cabbage you sent us didn't agree with us either, but we didn't drop you from our subscription list on that account."—Boston Transcript.

A group of San Francisco stevedores were lunching in a sheltered nook on a wharf. One of them went across the street for a plug of tobacco, and during his absence another substituted for his tin of pale coffee and milk his own tin of milkless black coffee.

When the first stevedore returned to his lunch he could hardly believe his eyes.

"Well," said he, "I have heard of clever thieves, but to swipe the milk out of a guy's coffee is sure going some!"—"Everybody's."

Scene—Editor's sanctum. Printer (rushing in excitedly,—Here's a fine go! Giggigg, the murderer, has just been found innocent, and the Government has telegraphed a pardon. We've got the whole account of the hanging set up, with illustrations, and the form is on the press.

Editor (coolly—Don't get excited, man. Put over the account, in large capitals, "Giggigg" pardoned. Full account of what he escaped."

Tom Ochiltree, having been hurt in a railway accident, brought suit for damages. Walking with the aid of crutches some months afterward, he met a friend, who inquired:

"Can't you get along without crutches, Tom?"

"The doctor says I can," said Ochiltree, "but my lawyers says I can't."

THE CONVERSATION VERBATIM.

From Tit-Bits:

Counsel—I insist on an answer to my question. You have not told me all the conversation. I want to know all that passed between you and Mr. Jones, on the occasion to which you refer.

Reluctant Witness—I've told you everything of any consequence.

"You have told me you said to him, 'Jones, this case will get into the court some day.' Now I want to know what he said in reply."

"Well, he said, 'Brown, there isn't anything in this business that I'm ashamed of, and if any snooping, little, yee-hawing, four-by-six, gimlet-eyed lawyer with half an ounce of brains and sixteen pounds of jaw ever wants to know what I've been talking about, just tell him.'"

Lodge Notices

Notice.

All Brothers of All Organized Labor:

Anyone giving any information as to the whereabouts of my father, S. W. Hill, will notify me, at the address below, and will say I will appreciate same.

S. W. HILL,
507 Taylor St.,
Davenport, Ia.

Mason, Reg. No. 70238.

J. T. Mason, Reg. No. 70238, correspond with secretary of Lodge No. 499, J. D. Allen, and will save him trouble. Sapulpa, Okla.

Dear Sir and Bro.:

I wish you would publish in the next issue of our Journal an apology to Bro. H. Czatlenski, Reg. No. 64923 from Lodge No. 32. This Brother didn't beat this room rent in Armourdale, but some other boilermaker that had stolen his card and book did it. I have already written the brother a letter and sent it to him at Ottumwa, Iowa.

WALTER E. DWYER,
Secretary Lodge No. 32.

Tupen, Reg. No. 64677.

Herman Tupen, Reg. No. 64677, please correspond with Charles Loeb, Tulsa, Okla., care Frisco Shops.

HUGGINS—MARSHALL.

C. W. Huggins is requested to correspond with the undersigned.—J. B. Marshall, 1114 So. Frisco, Tulsa, Okla.

Thompson—His Wife.

Anyone knowing the whereabouts of Brother Thomas S. Thompson, Reg. No. 5942, formerly a member of Lodge No. 11, will please notify Mrs. Thomas S. Thompson, 1508 East Twenty-sixth Street, Minneapolis, Minn., who states she and the three small children are cold and hungry, as he has not provided for them in months.

NOTICE, TEXAS UNIONS

Want address of Frank Farley, boiler maker, recently from Mexico, to clear land title. J. M. Daniel, Laredo, Texas.

In Memoriam

MEMBERS.

Rudolph Polite, Reg. No. 97662, of Lodge 37, age 25, New Orleans, La. Fell 40 feet into the river on December 2, 1914. Single.

J. H. Wingo, Reg. No. 95558, of Lodge No. 4, Birmingham, Ala. Was born in South Carolina. Killed on December 15, 1914, by being caught in a shaft.

W. L. Wurzbach, Lodge No. 45, Newport News, Va.

ROWAN.

Brother John Rowan, Reg. No. 43141, of Lodge 15, Dubuque, Iowa. Died January 7, 1915, by being run over by an engine while on the way to work. Age 59.

GILTHORPE.

Wm. J. Gilthorpe, of Lodge 32, Kansas City, Mo., died January 9, 1915, of Pneumonia. He was born in Dublin, Ireland, June 5, 1844; age 70. Until recently International Secretary-Treasurer.

Thomas Scheler of Lodge No. 463, Balboa, Canal Zone, Panama.

RELATIVES OF MEMBERS.

Mrs. Anderson, wife of J. F. Anderson, c. Lodge No. 14, Chattanooga, Tenn.

Mrs. Mollie Brannom, sister of Brother J. C. Sentell, of Lodge No. 143, Knoxville, Tenn., died at her home, 131 West Fourth Avenue, December 14, 1914. Age, 28 years.

Mrs. J. M. Hansell, sister of Brother W. T. Harris, of Lodge No. 143 Knoxville, Tenn., died at her home, 1112 Lutrell Street, December 27, 1914. Age, 48.

Master Roy Lee Pack, age 3, son of Brother and Mrs. R. L. Pack, died at their home, 1523 Van Street, Knoxville, Tenn., December 15, 1914. Brother Pack is a member of Lodge No. 143.

Charles Flick, Sr., age 55, father of Brother Charles Flick of Lodge No. 37, New Orleans, La. Mr. Flick was murdered with a sledge hammer on December 24, 1914.

Mrs. Nervesta McNeil, mother of Charles McNeil, of Lodge 143, Knoxville, Tenn., died January 10, 1915, of Pneumonia. She was born in Clairborn Co., Tenn., April 10, 1862. Age 53 years, 9 months.

THE ABOVE PHOTO SHOWS THE REMAINS OF FORMER INTERNATIONAL SECRETARY-TREASURER GILTHORPE AND SOME OF THE

WM. J. GILTHORPE

Mr. Wm. J. Gilthorpe, a highly esteemed and prominent resident of Kansas City, Kansas, died suddenly Saturday, January 9th, at 6:15 P. M. at the home of his daughter, Mrs. A. B. Campbell of Minden, La., where he and his wife were visiting for the winter.

Mr. Gilthorpe made no complaint until Thursday night, and no thought of death entered anyone's mind. Mr. Gilthorpe was in his 71st year and an almost life-long resident of New Orleans, having come to Louisiana when a boy. He was born in Dublin, Ireland, June 5, 1844. His parents were both natives of Dublin. The foundation of his good solid education was laid in Ireland.

Throughout his younger manhood, Mr. Gilthorpe was a boiler maker and for years worked successfully at his trade. In 1890 he organized the International Local No. 42, in New Orleans and became its first president, later the consolidation of National and International Brotherhood became Lodge No. 37 of which he was president.

In 1891 at the convention in St. Paul, Minn., he was elected International Secretary-Treasurer. After this consolidation the Brotherhood established headquarters at Kansas City, Kansas, and Mr. Gilthorpe and his family made their home in Kansas. He was 23 years Secretary-Treasurer. At the last convention of the Brotherhood held in San Francisco, June, 1914, the delegates in recognition of his untiring and valuable service of the Brotherhood, and believing that he should be permitted to spend the balance of his days in ease and away from care and worry, which the office of secretary imposed, retired him upon an annuity of one hundred dollars (\$100.00) per month. The first time this has been done in the history of organized labor. In New Orleans his friends are legions and his worth was fully recognized in Kansas, his home for twenty years, as well as all over the United States in labor circles.

James Waters, a boiler maker and a life-long friend, accompanied the family with the remains from Minden, La.

Lodge 328, boiler makers of Shreveport, La., held a special meeting and a delegation was at the depot to meet the remains, as also a delegation of the Knights of Columbus, where a requiem mass was said Sunday morning at the Jesuit Church, celebrated by Rev. Father Filliger, who delivered a beautiful sermon over the remains.

The funeral took place Wednesday morning, the 13th, from his home, 831 Tauroomee avenue to S. Mary's Church, Kansas City, Kansas, at 9:30 A. M. at a solemn Pontifical Mass celebrated by Bishop Ward of Kansas City, Kansas, assisted by Father Michael as deacon, Father McKenna as sub-deacon, Father Cajetan, O. F. M., and Father McDonald, O. S. B., as deacon of honor. Father Vallia as master of ceremonies. The sermon was preached by Father Jennings, pastor of St. Mary's Church, and who gave such a tribute to the mortal remains of Wm. J. Gilthorpe, that only his Father confessor could speak.

By celebrating mass for Mr. Gilthorpe, Bishop Ward said his first mass for a layman since consecrated bishop. The funeral was largely attended by relatives, friends and business men, as well as a large delegation of his own and affiliated crafts. Burial in St. John's cemetery, Kansas City, Kansas.

The pall-bearers were chosen from the boiler makers and Knights of Columbus:

Charles McDonald, Lodge No. 32, Kansas City; J. J. Murphy and John Coots, Lodge No. 322, St. Louis, Mo.; Thos. Donegan, Judge M. E. Manning and F. Hauber, Domain Council, K. of C. Lodge No. 826.

Floral designs were sent from "The Executive Council of the Brotherhood, Lodge No. 32, Kansas City; Lodge No. 25, San Francisco, Cal.; Lodge No. 322, St. Louis, Mo.; Lodge No. 328, Shreveport, La.; Lodge No. 422, New Orleans, La.; Lodge No. 66, Little Rock, Ark.; Industrial Council and Organized Labor of Kansas City, Mo.; Geo. R. Stoll, Grand Junction, Colo.; Domain Council No. 826, Knights of Columbus, St. Vincent de Paul Society, Kansas City, Kansas. his employees who were under his charge and numerous friends.

Surviving him are his most devoted and faithful wife, who was Miss Catherine O'Keefe of New Orleans, his son Harry J. Gilthorpe, superintendent Station "D" Post Office, New Orleans, La., and his daughters Mrs. Andrew L. Reiling of Kansas City, Kansas; Mrs. A. B. Campbell, Minden, La., and only sister, Mrs. Richards of San Antonio, Texas.

No tribute beyond the good moral life of Mr. Gilthorpe is necessary to keep his memory forever fresh in the hearts of those who knew him.

Poetical Selections.

MEDDLER'S ITCH.

I guess we are all of us knockers,
In a delicate way, to be sure;
And we meddle with other folks' business
In a way that is hard to endure.
There's Smith, down the street, bought an
auto,
A car to make any man glad.
Poor man, he's a salaried person,
And at once you can bet he's in bad.

Old Crocker, a rheumatic banker—
A tightwad for fifty good years,
Purses up his fat lips and expresses
His doubts and also his fears.
"These young men are gettin' too speedy,"
He declares to his trembling spouse,
"Look at Smith in that devilish auto!"
"I suppose he has mortgaged his house.

"And one of these days he'll be comin'
To me to afford him relief,
And I'll tell him, to my way of thinkin',
He's about on a par with a thief."
Miss Jane, a slim maiden lady,
With most of her years gone before,
At once takes a crack at the auto,
And finds it a thing to deplore.

She's sure the Smiths can't pay the grocer,
And it makes her withered heart bleed
To see the Smith boy going barefoot,
A victim to gasoline speed.
The Smith girl, a peachy young creature,
She knows can't afford a new hat,
And the old maid mumbles her false teeth,
And asks what you know about that.

As for Smith, he laughs, "I should worry,"
Take the missus and kids for a run,
And speeds them away to the country,
A load of real rollicking fun.
He's healthy, contented and happy,
And though he'll never be rich
Can afford to be sorry for neighbors
Afflicted with Meddler's Itch.

—A. M. Hopkins.

THE STUMBLER.

There is none so wise or great,
But has faltered in his gait,
Left the pathway that is straight,
And been humbled.
And in every great man's wake
There is many a mistake,
That his courage tried to shake
When he stumbled.
Just because you've lost one fight
Do not cease to seek the right,
Battle on with all your might,
Fame will crown you;
Yesterday is passed and gone,
Its mistakes don't dwell upon,
If you'll only struggle on,
They can't down you.

—Detroit Free Press.

THEY'VE GIVEN PA A RAISE.

Say, you ought to hear ma singin'—she's as
happy as a lark.
And her smile stays on from mornin' till a
long time after dark;
She's been buyin' rugs and gettin' a new
costly switch to wear,
And she takes a cab whenever she goes
callin' anywhere;
She has bought herself a dimund, and you
ought to see it blaze;
Ma's as cheerful as a robin—they have giver.
pa a raise.

Sister's busy gettin' dresses that'll cost an
awful pile,
And the hats that she's been buyin' are the
very latest style;
She's to go abroad this summer with people
named the Cooks;
Is she happy? Well, I guess so! You can
see it by her looks;
She goes hummin' songs and dancin' and in
forty thousand ways
Let's us know that she is cheerful since
they've given pa a raise.

Pa still works the same as ever and he's
smokin' stogies yet
Wears the suit he got last summer, and I
guess he's still in debt;
Anyhow he starts off early and comes home
fagged out at night,
And his forehead's gettin' wrinkled and his
hair is turnin' white;
Can't, somehow, help feelin' sorry as I sit
and watch him gaze
With a vacant look at nothin'. Yes, they've
given pa a raise.—S. E. Kiser.

ALL IS WELL.

And all is well, though faith and form
Be sundered in the night of fear;
Well roars the storm to those that hear
A deeper voice across the storm.

Oh, yet we trust that somehow good
Will be the final goal of ill,
To pangs of nature, sins of will,
Defects of doubt, and taints of blood;

That nothing walks with aimless feet;
That not one life shall be destroyed,
Or cast as rubbish to the void,
When God hath made the pile complete;

That not a worm is cloven in vain;
That not a moth with vain desire
Is shriveled in a fruitless fire,
Or but subserves another's gain.

Behold! we know not anything;
I can but trust that good shall fall
At last—far off—at last, to all,
And every winter change to spring.

—Tennyson (In Memoriam).

DON'T STOP AT THE STATION DESPAIR.

We must trust the conductor, most surely;
 Why, millions by millions before
 Have made this same journey securely
 And come to that ultimate shore.
 And we, we will reach it in season;
 And ah, what a welcome is there;
 Reflect then, how out of all reason
 To stop at the Station Despair.

Ay, midnights and many a potion
 Of bitter black water have we
 As we journey from ocean to ocean
 From sea unto ultimate sea,
 To the deep sea of seas, and all silence
 Of passion, scorn and care—
 That vast sea of Eden-set islands—
 Don't stop at the Station Despair!

Go forward, whatever may follow,
 Go forward, friend-led or alone;
 Ah me, to leap off in some hollow
 Or fen, in the night and unknown—
 Leap off like a thief—try to hide you
 From angels all waiting you there!
 Go forward, whatever betide you
 Don't stop at the Station Despair!
 —Joaquin Miller.

THE VERDICT.

Puck, a-sitting on the hill,
 Spied two lovers by the rill,
 Doing things that lovers do
 When their love is fond and true;
 Just a pressure of the hand,
 Flash of eyes—and you understand.
 Glancing toward the couple, he
 Cried: "What fools these mortals be!"

Later on he spied a pair—
 Strephon strong, and Phyllis fair;
 Deep affection in each heart,
 Yet their ways ran far apart!
 He'd no courage for the test,
 She deemed coldness for the best.
 Puck observed impatiently:
 "Oh, what fools these mortals be!"

I don't know what can be done
 For to please this jeering one,
 If we do, or if we don't;
 If we fail, or if we won't;
 Spite of how we play the game,
 Still the verdict is the same.
 Hard to such a fate to bow—
 Guess we're all fools, anyhow!
 —John Kendrick Bangs, in Aainslee's.

WHAT'S THE USE?

Weep and you're called a baby,
 Laugh and you're called a fool,
 Yield and you're called a coward,
 Stand and you're called a mule.
 Smile and they call you silly,
 Frown and they'll call you gruff;
 Put on a front like a millionaire,
 And some guy calls you bluff.
 —Stockton Review.

"IT CAN'T BE DONE."

The man who misses all the fun
 Is he who says, "It can't be done."
 In solemn pride he stands aloof
 And greets each venture with reproof.
 Had he the power, he'd efface
 The history of the human race;
 We'd have no steam nor trolley cars,
 No streets lit by electric stars;
 No telegraph nor telephone.
 We'd linger in the age of stone,
 Where when some keen barbaric brain
 Of life's conditions dared complain,
 And planned a wheel on which to roll
 That ever scoffs at what is new.
 The load his arms could not control,
 Sneers rose from all the mighty crew
 The world would sleep if things were run
 By men who say, "It can't be done!"

By Insisting Upon Purchasing Union Stamp Shoes

You help better shoemaking conditions.
 You get better shoes for the money.
 You help your own labor position.
 You abolish child labor.

Do not be misled by retailers who say: "This shoe does not bear the union stamp, but is made under union conditions." This is false—no shoe is union made unless it bears the union stamp.

Boot and Shoe Workers' Union

No. 3.

THE DANGER OF SHIFTING DUTIES.

By Samuel Gompers, in the Federationist.

Two methods have been devised for dealing with the wrongs and injustice that have been imposed upon the workers. Some have put their faith in party political action and have trusted the solution of labor problems to legislation. Others have based all action upon the principle that free workers must never delegate to outside authority ultimate control over determining conditions and terms of personal relations between employers and employes, but the workers themselves must assume responsibility for their own welfare.

Those who advocate the first method are the parliamentarians who propose to secure reforms through enacting laws to establish desired purposes. The laws must be made by the official lawmakers and enforced by the administrative agents of the state. The people vitally affected by the legislation have indirect control, if any, over the formulation and enforcement of the regulation. Responsibility for ultimate results is shifted.

Those who advocate the second method are the trade unionists who subordinate political action to economic activity. They hold that the key to industrial freedom, which is real freedom for the working people is maintenance of strong, virile, resourceful organizations, aware of their power and using it most effectively. They hold that unions which let go ultimate control over industrial welfare, stultify initiative, weaken the fighting force of the trade unionists, and hence undermine their power physically, politically and socially.

Events during the past year prove that legislation does not "settle" things, that legislative action not only is not final, but increases the difficulties that confront workers in controlling matters affecting their own interests.

The members of the organized labor movement of the state of Washington have been consuming their energies in efforts to have the economic demands, rights and privileges taken care of by state legislation. But now the president of the Washington State Federation of Labor, Mr. E. P. Marsh, laments the fact that the state now has the most reactionary legislature which it has seen in years. He states that labor is unable to take advantage of an unusual opportunity to establish a state system of em-

ployment agencies and makes this significant assertion: "We are going to have to fight as well to hold labor legislation now upon the statute books and to make our initiative machinery more workable than it is at present." These exponents of legislative action to secure the demands of workers, are finding out that a law secured at one session of the legislature may be absolutely undone at the next, and that many vexatious and vicious restrictions may be imposed upon workers by scheming politicians who, as officeholders in the legislature, are able to follow their own reactionary ideas or are susceptible to the blandishments of the oppressors of labor.

What the Washington workers have experienced has been the experience of the workers of Massachusetts. Only a few weeks ago Governor Walsh of Massachusetts had the temerity to recommend that the labor laws of Massachusetts be suspended so as to enable the industries to take advantage of the unusual opportunities afforded by the terrible European war. In order to serve the interests of the manufacturers the governor of the state urged the revival of the ancient practice that the Stuart rulers of England exercised under their claim to the divine right of kings.

When necessary and humane laws are threatened with repeal by reactionary legislatures and with suspension by reactionary governors, it is a vain hope to trust the industrial welfare of the wage-earners to legislation. And this has been the experience of the workers of all ages.

Turn the pages of the history of England back to the Fourteenth Century, when Parliament adopted the policy of fixing wages, hours of labor and conditions of work by legislative enactment or judicial decree. Nowhere are the facts concerning the Statute of Laborers or the effects of the statutes presented more forcibly or convincingly than in a statement made by Mr. Paul Scharrenberg, secretary of the California State Federation of Labor, before the joint committee of the senate and assembly of the California State Legislature, which had under consideration several bills providing for minimum wage for women. Mr. Scharrenberg brought out clearly the dangers and the difficulties of attempting to regulate by law conditions of work for employes. The English statutes, of course, fixed maximum

standards, but Mr. Scharrenberg very properly concluded that there is no difference in principle between fixing maximum and fixing minimum standards.

He showed that England found it impossible to enforce legislative or judicial regulations of wages, hours or conditions of work in opposition to the desires of the workers or the employers. Violations of the Statutes of Laborers led to legislation declaring that a combination to raise wages or reduce hours of labor was a conspiracy. There was extension of the judicial machinery to enforce these laws and punish the "offenders." The powers of the courts were increased. Punishments for violating the laws were made increasingly drastic—but in vain. The economic laws of industry and enlightened self-interest prevailed over every effort to impose restrictions and burdens upon the wage workers. But those restrictions and burdens made progress many fold more difficult—needlessly difficult.

The English workers found that organization into aggressive, virile trade unions was necessary to free the workers from the fetters that legislation had fastened upon them, and to enable the workers to secure for themselves better conditions of work, higher wages and a shorter workday.

The lessons of English history, as well as the recent happenings in American states, raise fears as to the future of those workers who put their trust in laws to secure for workers higher wages, a shorter workday and better conditions of work.

The trade union movement of America has just finished one great stage in the effort to free the workers of America from legislation that hindered their efforts and activities to protect and advance their own interests and to work out their own welfare. The labor sections of the Clayton Act secure to the workers industrial freedom and give them the legal right to collective economic activity.

Is it wise then for the workers to jeopardize that industrial freedom by seeking to secure legislation establishing hours of work or minimum standards of pay? Administration of law is entrusted to political agents. There is no guarantee that standards or administrative acts determined by political agents will always be for the best interests of the workers. On the other hand, there is reason to fear that they will jeopardize the best interests of labor.

Free, enlightened men and women cannot submit tamely to that which they know will injure them and those who shall come after them. Does it take any great imagination to foresee that machinery for coercion will follow upon the footsteps of legislative or administrative determinations of the conditions of work and relations between employes and employers? May not combinations to secure changes in minimum standards be judicially declared "conspiracies" just as were combinations against maximum standards? Is there any guarantee that reactionary lawmakers or lawmakers subservi-

ent to the interests will not endanger the welfare of the workers by vicious legislation of that nature?

Let the workers keep in their own hands and under their immediate control regulation of matters that vitally affect industrial welfare. Organizations of workers aware of their own interests and alert to further that which promotes their own welfare are more capable of steadily securing wider opportunities and better things than any outside agents to whom this responsibility can be delegated. The way to industrial betterment and progress and freedom lies in our well-tried policy—Educate! Agitate! Organize!

TO FIGHT TUBERCULOSIS AMONG WORKINGMEN.

Realizing that the problem of the control of tuberculosis is closely linked with the problems of the workingmen of the United States, The National Association for the Study and Prevention of Tuberculosis has inaugurated a movement for closer co-operation with labor unions.

A committee has been appointed with Dr. Theodore B. Sachs of Chicago as chairman, to formulate plans for immediate and future action. Other members of the committee are Mr. Samuel Gompers of Washington, Mr. George W. Perkins of Chicago, Mr. John Mitchell of New York, Mr. Austin B. Garretson of Cedar Rapids, Iowa, Dr. William Charles White of Pittsburg, and Dr. David R. Lyman of Wallingford, Conn.

As the first step in the campaign, a special health bulletin has been prepared for the labor papers, and will be sent out monthly in co-operation with the members of the International Labor Press Association. These bulletins will contain articles of interest relative to the co-operation of labor unions in the anti-tuberculosis and public health movements; notes concerning the prevalence and prevention of certain diseases, especially those of an industrial character; and rules and suggestions on personal and community health.

A second step in the plan is an investigation into the various special experiments of co-operation between workingmen and the anti-tuberculosis campaign that have been carried on. Such work as that of the Tuberculosis Relief Association in Hartford and other Connecticut cities; the Trades Union Sections of Buffalo and Newark Anti-Tuberculosis Associations; the Tuberculosis Pavilion of the Albany Federation of Labor; and other similar efforts will be studied and reported upon.

At the recent Philadelphia meeting of the American Federation of Labor, a resolution (No. 51) was adopted endorsing the educational work of The National Association for the Study and Prevention of Tuberculosis and calling upon all officers and unions to help in promoting this work. The International Typographical Union adopted a similar resolution (No. 76).

THE BOILER MAKERS' JOURNAL

Official Organ of the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America.

A Monthly Publication Issued the First of Each Month from Room 8, Law Building, Kansas City, Kansas.

JAMES B. CASEY, Editor and Manager.

Subscription Price.....\$1.00 Per Year in Advance

ADVERTISEMENTS.

Advertising Rates Will be Furnished Upon Application to the Editor-Manager. No Reading Space Will be Sold for Advertising Purposes Under Any Circumstances.

All New Members Must Have Their Name and Address Sent in Through the Secretary of Their Lodge. After That They May Have Changes Made in Their Address by Filling Out Blank Form in Back of Book and Forwarding to the Editor.

All Copy Must be Received by the Editor by the 15th of the Month to Insure Publication in the Following Issue.

All Contributions and Correspondence Relating to the Journal, Should be Addressed to J. B. Casey, Editor, Room 8, Law Building, Kansas City, Kansas.

Entered at Postoffice, Kansas City, Kansas, as Second Class Mail Matter.

MORE FINANCIAL BENEFITS NEEDED.

While the policy of our organization for the past few years has been to increase the amount of financial benefits paid to our members and enlarge the scope or character of benefits provided, still there is another kind of benefit needed and that is sick benefits. Quite a number of incidents have come under our observation recently which unmistakably shows this necessity. For instance, many of our members become incapacitated for work through sickness or disease; they need the services of a doctor or possibly a surgeon; they should go to the hospital and take a regular course of treatment, and through one thing or another they have failed to save up anything for a rainy day. Under these circumstances it would be a great benefit to our members to be entitled to six or seven dollars a week. Were such a benefit available at the present time, we know of a number of cases in different sections to whom it would prove a real boon.

Therefore, our members should begin to study out a workable plan between now and our next convention. If such a feature should be adopted it would have to be guarded by positive laws and regulations as too often our members show a disposition to burden the Grand Lodge with a claim for one thing or another, which they would not think of asking of their local lodge. In other words they seem to think the Grand Lodge is something separate and apart from them, and therefore a fit subject to be mulced whenever possible. This, of course, is a fallacy; it is the combined strength and resources of all lodges and what affects its financial condition will speedily affect all of the lodges and through these the members.

It might be well for our members in a brief way to give an expression on the subject of benefits. At least as far as the general principles of sick benefits are concerned. We are not limited as to the possibility or extent of our benefits, our members can continue to add to those we have already provided until we provide against every adversity that may overtake us.

A LARGE AND SUCCESSFUL ENGINEERING FEAT COMPLETED

Associated Press dispatches recently announced the completion of a tunnel through the Cascade Mountains in Washington, which was cut through two and one-half miles of solid rock. The job was started back in 1912 and since the job started not a single life was lost. This is the most remarkable part of the whole feat, as jobs of this kind in the past was usually accomplished at the sacrifice of scores of lives.

The tunnel is on the Milwaukee Railroad, forty miles east of Seattle, and is known as the Snoqualmie. It has a concrete lining throughout and cost \$2,000,000. The completion of this tunnel will greatly reduce snow troubles and lower the cost of operation by lessening the grade, and consequently the number of extra engines previously required to negotiate a 443-foot rise and fall in sixty miles of track. Those in charge of the job are deserving of much praise for the efficient manner in which the job was completed.

AN UNWARRANTED DECISION.

The Supreme Court of the United States recently declared the Kansas anti-blacklist law unconstitutional. This law had for its purpose the protection of men who belonged to trades unions and prevent their being victimized by railroads because of their membership. This law was invoked in behalf of a switchman in the employ of a certain road in Kansas which ordered him to give up his membership in the Switchmen's Union under pain of dismissal. The road was convicted of violating this law, and appealed the case until it reached the Supreme Court with the above result. These wise Solomons no doubt tried to establish some new principles of law. They evidently, or at least, a majority of them did not grasp the principles for which organized labor stands, or its necessity for the protection of workingmen. However, we need not be surprised, as it was this same court which only recently upheld the verdict of the Federal District Court in awarding triple damages to a Danbury hatter because his employes went on strike against his unfair dealings, and it was this same court which a little further back tried to write into the anti-trust laws the word unreasonable a clear usurpation of power, as Congress did nor intend such a limitation.

The trouble with this court is the same as with the other Federal courts, the manner of their appointment and for life. They must be selected in a different manner and for a stated period, if their decisions are to be made responsive of the people's opinion. Under the present laws, after these judges are appointed by the president and confirmed by the Senate they are not amendable to any one, not even those who appointed and confirmed them, and the only way to discipline them is to impeach them by the House with the Senate acting as a court. It seems to us these decisions are rendered in order to arrest the growth and power of trade unionism. However, they can only arrest its progress, they cannot prevent its ultimate success. Another way will be found to protect men in their right to join unions.

A CONGRESSMAN CHARGES GOVERNMENT WASTE IN BUYING ARMOR.

According to Congressman Tavenner the U. S. Government is wasting millions of the people's money in buying armor and supplies from contractors rather than manufacture these by the Government. He charges that in 1913, 7,000 4.7 inch sharpnel shells were purchased at a cost of \$25.26 each, while at the same time these shells were being manufactured at a government owned plant for \$15.45 each, a difference of nearly ten dollars on each shell.

However, it is in armor plate that this Government has been held up and unmercifully robbed, the contractors can charge what they please for we have no government owned armor making plant. It is estimated that in the last twenty years the Government has spent \$175,000,000 for armor. If a Government plant had been in operation, one-half of this amount could have been saved. The present administration seriously talked of putting up a plant a couple of years ago, but nothing came of it, and we are still being robbed of millions by these contractors.

SOUTHERN PACIFIC MUST SELL SHIPS.

According to a recent press dispatch from Washington, the Interstate Commerce Commission has renedered a decision to the effect that the Southern Pacific Railway must sell its stock and holdings in the Pacific Mail Steamship Company, within sixty days or the latter must cease operating its vessels through the Panama Canal.

The Commission rules that it would be illegal for the ships of this company to operate through the canal, because a part of its stock and bonds are held by the Southern Pacific. It seems this company not only has a monopoly of the traffic on land along the Pacific coast, but that it also has nearly the same condition on water.

THE UNITED STATES SHOULD BE PREPARED.

We are among those who sincerely hope that eventually mankind will find some means of preventing warware being engaged in between civilized nations and that all will prevent any nation from taking any advantage of another nation, and that peace, good will and prosperity will reign on indefinitely throughout the world.

The awful conflict that has raged unceasingly since last August among most of the European nations, in which millions of men have been killed, wounded or captured, and millions of others have endured all kinds of tortures, and for what? Nothing! Each one blames the others, nevertheless they are engaged in a death struggle and neither will give in until completely exhausted. This is likely to have a far reaching effect, not only on the nations engaged, but the other white races of the world by destroying the equilibrium of the nations, and as a result tempt the hordes of Asia to again seek the conquest and supremacy of the world, as it did from the beginning of ancient Grecian civilization, on down through the different periods of the

Roman republic and into the fifteenth century when the Turkish hordes swept over half of Europe and finally spent its force around the Bosphorus and the Balkan peninsulas and established itself in Constantinople as its capital.

We see signs in the far East that prompts us to believe history will again repeat itself unless its development is arrested. With most of the larger nations of Europe at each other's throat, they have not the time or means to watch for distant dangers or enemies and the United States would have to bear the lion's share of a contest of this kind should it arise.

Furthermore there is a serious condition of anarchy existing to the south of us in revolution swept Mexico. This is another serious condition fraught with danger, then the possibilities of becoming involved in some way with the warring nations of Europe is plainly evident. Therefore, we believe it is but the part of wisdom for this nation to make preparations necessary to meet any eventuality that may arise, for in modern warfare, the nation which is prepared would come near destroying their opponents before they could get started. We do not believe in raising a large standing army, but our navy should be added to and strengthened until we could cope with any nation in the world on sea, and much larger quantities of ammunition, supplies, equipment, cannon and other arms should be gotten together and kept ready for use at short notice.

Some claim the organization of our army is very imperfect and that it has grave deficiencies, whether this is true or not, remains to be seen, but they should be promptly investigated and if necessary, a remedy applied, and a plan should be worked out for the building up of a reserve army that could be mobilized on short notice if necessary.

A policy of preparedness would, in case of war, save hundreds of thousands of lives, for a trained army of men would be available who would know how to fight and defend themselves, without needless loss of life, as would be the case if green recruits were sent to battle against a trained army. The latter were taught the science of warfare in time of peace, while the untrained army would have to learn the matter under fire, and while thousands of their comrades were being slaughtered around them.

Let us by all means avoid war if it can be done consistent with our honor and interests, but let us diligently set about getting prepared to meet any danger that may arise. If nothing arises that will require the use of our supplies or preparation we will be compensated by the sense of security it will give us, and will compensate us for the extra efforts made in getting them ready.

WE SHOULD DO MORE THAN ESTABLISH EMPLOYMENT BUREAUS.

While the Department of Labor and Federal Industrial Commission have promised an elaborate plan for connecting the man and the job, still it

seems to us we should go further than this and arrange for insurance against non-employment and sickness, for at best the free employment bureaus will only aid a portion of our people in times of depression in trade and in acute and protracted cases like we have been going through for some time, employment agencies have not been of much assistance, and thousands have been looking for work in vain. A matter of this kind could only be handled by the National Government. We believe a scheme of this kind could be worked out and made almost self-sustaining.

Let us hope our law makers will take up this problem and endeavor to solve it.

RAILROADS STILL TAKE HEAVY TOLL IN KILLED AND WOUNDED.

According to a Commerce Commission report for the year 1914, 9,893 persons were reported killed and 79,388 persons were reported injured by railroads last year. There were 13,806 railroad wrecks during the same period, in which 605 persons were killed and 11,437 were injured, and a property loss of \$10,965,181 was sustained. This seems to be an awful price to have to pay in order to have our railroads run for a year; and this too, after the safety first campaign has been so widely advertised, and the number of safety appliances that have been put into use, these should have reduced this army of crippled and maimed persons. At this rate how long will it take to make us a nation of cripples?

CONGRESS SEEKING TO PREVENT CHILD LABOR.

Organized labor has for years been pleading before state legislatures for legislation preventing the working of children of tender years in mine, factory or workshop. While some legislatures have at last given reluctantly some laws in reference to this matter, in no state is it effective, and such laws as they have regulating child labor seemingly is violated with impunity. However, Congress seems inclined to take a hand in the matter, as the House recently passed the Palmer bill which makes it "unlawful for producers, manufacturers or dealers to ship or deliver for transportation in interstate commerce the products of mine or quarry made wholly or in part by children under 16 years of age, or products of mills, canneries, workshops, factories, manufacturing establishments made by children under 14 years of age or those between 14 and 16 who work more than eight hours a day or more than six days a week or after 7 o'clock at night."

Let us hope the Senate will pass this measure also, for while it may not be perfect, still it will go a long ways towards eradicating this evil, which in some sections of the country threaten to sap the vitality of future generations.

FLUCTUATIONS IN EMPLOYMENT THE PROBLEM OF TODAY.

One of the most potent factors responsible for the extensive dissatisfaction and misery that prevails today arises from unemployment, fluctuations in the demand for workmen brings this about, and this dread of being thrown out of work—the uncertainty of continuous employment has a deadening effect upon the industry of the people. It is one of the great problems that confront mankind at the present and which must be solved before we can have permanent peace and prosperity.

Many investigations along different lines are being made with the hope of finding the correct solution. All these give hope of better conditions for the future.

Of course we are passing through a tremendously abnormal condition at the present time, due to the European war. There was never a time before in the history of mankind when the devastating hand of war extended over such a great expanse of territory or involved at one time so many millions of people. This condition was not long in destroying commerce and trade and paralyzing industry in all things except war supplies and engines of warfare. While business is gradually adjusting itself to the changed condition, still it is a long way from normal.

It seems to us the government—national, state, county and city—which contemplates doing work any ways soon should hasten to start without delay. Now is the time when new work, no matter of what nature, will do good towards relieving unemployment. However, government agencies should continue to search for a remedy. Steady employment for everyone is necessary for prosperity and contentment. If continuous employment cannot be guaranteed to everyone, we can at least arrange some form of insurance that will guarantee us against the evils of unemployment. If this is accomplished, it will result in removing dissatisfaction and increase industry and thrift; more and more would be induced to save in order to acquire a home and a little to lay aside for a rainy day.

THE STRIKE IN THE OIL FIELDS.

From all reports, there is no material change in the strike situation in the oil fields since our last report. Some of the contractors have tried to introduce strike breakers, but without apparent success. No competent men have been secured, and as a consequence what work was done has been condemned by the inspectors.

A number of conferences with the Labor Commissioner of Oklahoma have been held. President Franklin visited the field for that purpose, but so far no tangible results have been accomplished, due to the vacillating policy of the contractors. However, we believe most of the contracts unfinished have a time limit placed upon them and the contractor will soon be forced to come to terms.

A TALK WITH OUR MEMBERS.

We have been having for some time a gratifying increase in our correspondence. It is a healthy sign, as it shows our members are interested in the Journal; that they read what others write and take the trouble to write themselves. We hope our members will continue to take an ever-increasing interest and that a still larger number will write for it. However, there is a request that we desire to make, and that is to avoid personalities and subjects that will cause a controversy and argument. We have so far been free from all such and we hope to continue along this line. When we took hold of the Journal as editor, it was our ambition to build it up to a high standard of usefulness to our members as an educator and a disseminator of news of interest to the members of our trade. We determined to make it a valiant defender of the interests of our members, our organization and the trade-union movement in general, and that nothing would be printed that would in any way wound the feelings of anyone, or anything of a smutty or questionable nature. We have rigidly adhered to that resolve and we believe it has produced good results. We are continually getting information that shows our members are interested in the Journal and are anxious to get a copy of each issue. Men in isolated points in every part of the country write for the issues they have missed. Many of them say, "Please send me the Journal; I am lost without it." One of our most efficient organizers wrote recently to request a bundle of Journals to be sent in time for a meeting he had arranged for the purpose of organizing a bunch of men, and remarked, "I repeat what I have said before: 'There is an awful lot of interest being manifested in the Journal.' I find it of much benefit in my organizing work." We mention these incidents not in a vain or conceited manner, but to show our members that our policy in keeping the Journal on a high plane has produced good results in helping to build up our organization and to show the importance of keeping on the same plane for the future.

A few of our members seem to think because the Journal is the property of the Brotherhood and they are members, that they are privileged to write and have published anything they may wish without let or hindrance from the editor, good, bad, indifferent or worse. While our organization may meet at stated periods and adopt laws and policies, these few members seem to think they are privileged to use the pages of the Journal to condemn what was done and to vilify and abuse those who were selected as International officers. Surely they cannot hope to accomplish any good by such a course; they would help to pull down rather than build up. Fortunately this kind of members are few in number and we hope they will grow less. If we would be successful as an organization, we must not lose sight of the fundamental principles upon which we are organized. The trade union is organized upon a neutral platform; it is an economic movement and has a well defined platform of principles upon which the members stand and it also has specific plans and policies for putting its principles into execution. Our membership is composed of men of all political and religious faiths.

None of us surrender our opinion on politics or religion when we join organized labor, nor are we asked to. All we do is to agree to conform to the platform and principles of organized labor. The organization that is wise will not attempt to pass beyond this neutral platform. In consonance with these principles the Journal was established for the purpose of advocating the principles of trade unionism and promoting the organization of our trade's and our members' welfare. Let us all show a united stand in this matter. We may not agree as to what our policies should be, but once adopted, we should all agree to abide by them until they come up again for review.

A few seem inclined to want the Journal opened to the discussion of political principles, and we might as well say now as any other time that so long as our laws concerning the Journal remain as they are at present, no discussion of partisan politics will be allowed, as our laws expressly prohibit it. Personally, we have no objection to our members belonging to any political party they desire, but as a member we would object to having our organization furnish the means of exploiting the ideas of any political party.

QUOTATIONS.

Hunting after arguments to make good one side of a question, and wholly to neglect those which favor the other, is wilfully to misguide the understanding; and is so far from giving truth its due value, that it wholly debases it.—Locke.

Goodness answers to the theological virtue charity; and admits no excess but error; the desire of power in excess caused the angels to fall; the desire of knowledge in excess caused man to fall; but in charity there is no excess; neither can angel or man come into danger by it.—Lord Bacon.

Were we as eloquent as angels, yet should we please some men, some women and some children much more by listening than by talking.—Colton.

Intellectual education now, to be worthy of the time, ought to include in its compass elements contributed to it in every one of the great epoch's of mental energy which the world has seen. In this respect, most especially, we are, if we know how to use our advantages, inheritors of the wealth of all the richest times; strong in the power of the giants of all ages; placed on the summit of an edifice which thirty centuries have been employed in building.—Whewell.

The man who will live above his present circumstances is in great danger of living, in a little time, much beneath them.—Addison.

It is almost as difficult to make a man unlearn his errors as his knowledge. Mal-information is more hopeless than non-information; for error is always more busy than ignorance. Ignorance is a blank sheet on which we may write; but an error is a scribbled one on which we must first erase. Ignorance is contended to stand still with her back to the truth; but error is more presumptuous, and proceeds in the same direction. Ignorance has no light, but error follows a false one. The consequence is, that error, when she retraces her footsteps, has farther to go, before she can arrive at the truth than ignorance.—Colton.

STRIKES NOW IN FORCE.

Mechanical Department.

To lay out an oblong receptacle having tapering sides and ends. Fig. 1 gives the side elevation and Fig. 2 shows one-half of plan view. To lay out template for sides and ends, to be made in two pieces, with seams on ends, proceed as follows:

Lay out size and shape of one-half of

vessel, as shown in Fig. 2. Erect vertical lines, which divide sides from ends; erect side elevation, showing length and height, as in Fig. 1; bring down the line which marks end of vessel in Fig. 1 until it strikes vertical lines, as shown by dotted line, where the two lines cross is the apex of the cone

of which the end of vessel is one-half of frustrum. Strike the upper straight line of Fig. 3 between the two vertical lines; set trams to reach from B to O, place one point J and strike line at U, with point set at U strike circular line J N. Proceed in same manner for the opposite end; find length of curve line H-N, Fig. 2, and mark

off from J to M and I to Q, Fig. 3, strike lines M, S, U and Q, T, R; set trams at O and extend to D, Fig. 2. Place one point at U and strike curve line L S; strike similar line on opposite end, and strike straight line from K to L. This will complete the template. If the joints are to lap, add sufficient material.

Pattern for a three-piece elbow, the middle piece being a gore;
 A-B-C-D-O-E-F-G, A, Fig. 1, shows the outline of elbow, and B-C-X-B shows the outline of section 2, the gore. Section 1 and 3 are the same and are laid off as follows: Strike a half circle at end of section 1 and divide it into ten equal parts, from these divisional points strike lines parallel with the sides of the section and continue them until they strike the division line F-X; next

mark off template, one-half of which is shown for sections 1 and 3, divide the half into ten equal parts and strike lines parallel with the ends. Next take the points where the divisional lines in section 1 cut line E-X, and from these points strike lines at right angles to the divisional lines, continue them through template, and where the two sets of lines cross each other, trace a line as shown, which will be the cutting line, for sections 1 and 3, from X to F.

Now, in laying out section 2, we have to obtain a correct section from X to Y; to do so we have to lay out Fig. 2, which shows correct outline; it will be noticed this is less than half of the diameter of elbow. To mark off Fig. 2, proceed as follows: Strike base line 1-C-1, erect a right angle line at C, then with one point of dividers at X, place the other point at the first cross line, and transfer this to Fig. 2, from C up, then get the distance from X to the second cross line and transfer to Fig. 2, and continue until reaching Y, and transfer to vertical line Fig. 2, and through these points strike lines parallel with base line 1-C-1.

Next take the distance from 0 to 6, Fig. 1, and transfer on each side of C; next take the distance from 7 to the center line and mark it on each side of the center line, on line 2, continue until all lines are covered, and through these points trace the semi-circle—this will be the true length of template for the gore. To lay out same, strike center line and divide it into the same number of parts as are contained in half circle, Fig. 2, which is ten; strike right angle lines and transfer the distance from center line X-Y, Fig. 1, to the sides of gore, through these points, trace a line and add lap all around, as shown.

International Officers' Reports.

REPORT OF INTERNATIONAL VICE-PRESIDENT MERRIGAN.

To the Officers and Members of the Brotherhood, Greeting:

At the conclusion of my last report I was in Winnipeg, September 2. Arriving in Winnipeg on the latter date I arranged to attend regular meeting of Lodge No. 126, in the evening. The following evening I was in a position to report to the president and secretary of Lodge No. 451 regarding my travels over the Canadian Northern Railway, as I had made a special visit over said road in the interests of Lodge No. 451, and our organization in general.

September 4 I left for Montreal, to investigate the methods being practiced by McFetrich, who was secretary-treasurer of District Lodge No. 30. This I had been requested to do, at my earliest convenience, as several lodges and the District President had complained of not receiving any attention to their requirements.

Arriving in Montreal on the 6th (Labor Day), I proceeded to the place where the parade started from, expecting to meet with the officers and members of Lodge No. 134. However, later on I was informed that at a regular meeting of Lodge No. 134 it was decided that the lodge would not participate in the annual Labor Day parade, for reasons better known by members who regularly attended meetings. The day was ideal for the parade. Several new unions were in the line. Owing to the outbreak of the European war the unveiling of the Charter Memorial was postponed. The bust of the father of Confederation being delayed in arriving from somewhere in Europe. The usual sports were held at Dominion Park in the afternoon, under auspices of the local T. & L. C.

After making inquiries of the local officers of Lodge No. 134 regarding McFetrich, I was informed that Brother Chadburn, District President, had been in Montreal during the latter part of the month of August, and had a meeting with McFetrich, and upon finding that the latter was not attending to his duties, Brother Chadburn collected all books and paraphernalia be-

longing to the District and returned to Winnipeg, taking charge of same. Later, information was received from Brother Chadburn as to his trip to Montreal.

While in Montreal, I received a communication from International President Franklin, to the effect that Lodge No. 134 had requested the Fidelity Department to foreclose on the bonds of McFetrich, who was Financial Secretary of Lodge No. 134, and to take action against McFetrich to recover any shortage in his accounts. I immediately placed the case in the hands of an attorney, with a view of hearing from McFetrich. Further inquiries were made, but no reply was forthcoming.

On the 18th, I left for St. John, N. B., to attend the thirtieth annual convention of the Trades and Labor Congress of Canada. The convention was called to order at 10:30 a. m., in St. Andrew's Rink, by Bro. J. L. Sugrue, president of the St. John, Trades and Labor Council, who extended the hearty welcome of the organized workers of the convention city, to the delegates assembled from all parts of the Dominion, and Fraternal delegates from across the line. He believed that the convention would tend to give an uplift to the organized workers of the Province of New Brunswick, and that everything would be done to make pleasant and profitable the stay of the delegates.

Brother Sugrue then introduced Mayor James H. Frink, who was present to extend the welcome of the city of St. John. He said that in behalf of the city it was his pleasure to extend the cordial and hearty welcome of those attending the convention. He recognized the importance of the Trades and Labor Congress of Canada in the Dominion and as Chief Magistrate was delighted to know that the Montreal convention had decided to hold their succeeding gathering in the New Brunswick city. He knew that the big cities of the west, such as Montreal, Toronto and Winnipeg, where there was all that goes to make life worth living, had a better chance to secure such a convention than the less pretentious city and while they were not as wealthy as the

cities of the West and had nothing disgustingly rich, they had none so poor that they could not get the necessities of life; and if there were, the municipality would see that they did not starve. He said that in the West there were many grave problems for which there could not be found a very ready solution. "You are only on the fringe of these problems that confront humanity," said Mayor Frink, "and I hope you will do all you can to unravel and dissect them so that those who work may get a reasonable share of the reward for their labor. These problems are more acute in the large centers but they are also beginning to develop here. There is a branch of your organization in this city beginning to grapple with them and in their efforts they are by no means discouraging the great body of which they are a part. There has been an arbitration with reference to a recent trouble which we had in this city and I am pleased to state a satisfactory settlement to all parties was reached. I realize that men banded together can do more than when they stand alone. They are able to submit and enforce their demands, not from an individual standpoint, but collectively. Having branches all over Canada, you can make your influence felt. I have observed that influence and feel that it will be stronger in the future. It is not my intention to enter into an address on capital and labor. Everybody recognizes that labor must have its due and fit reward. It is a matter of education and as conditions arise they will have to be intelligently coped with. Children educated at our free public schools are fit to enter any university on the continent. They know what comfort is and what want means. They feel that they have a right to live comfortably and equitably with their neighbors and while there may be an outcry that too much is spent in educating the masses, this outcry is altogether falacious. Conditions have materially changed in the past twenty-five years and these changes will continue to go on until a greater proportion of betterment has been accomplished. It has been charged that this congress wishes to embarrass capital in its operations, but I understand that it is your desire to give a fair day's work for a fair day's pay. (Applause.) You are not inclined to give them all for dividends with nothing for yourselves. I might enter into a discussion of such questions as child labor, war, and arbitration, but you do not expect me to do so in the time allotted to me. Although a public man, I read and observe a great deal and there is nothing attracts my interest so much as the labor problem. Everything we have is the result of labor; and we cannot get away from that fact. Those who have never had their hand to the plow cannot recognize the worth of such an organization as yours. It is my hope that the time will come when men who retire from industrial activity will feel that they are something more than a worn out chattel

and will have something more in store to enable them to enjoy in old age. I believe that there are much better times ahead." (Applause.)

Mr. F. L. Potts, one of the city commissioners, was then introduced by Chairman Sugrue. He said that it was a great pleasure to have the privilege of addressing the delegates. Up to the eleventh hour he did not know whether he would be at the convention. "I must say if there is one member of the council in sympathy with labor, I am that one," he continued. "I ran my election recently on the question of land tax and I won out as the representative of the people. I require the assistance of all the labor organizations in my endeavor to fulfill the promises I made to the electors." He concluded in saying, "I would advise you to get rid of the politicians who work merely for themselves. Have men come out on the platform and tell you what they will do if elected and if they do not fulfill their promises turn them out at the next election. The day is coming when there will be no power to swing our legislature but the power of Labor." (Applause.)

The Hon. John A. Wilson, Chairman of the Executive Council of the Legislature of New Brunswick, presented the welcome of the Legislative Assembly. He said he thanked the congress on behalf of the government of New Brunswick for the kind invitation extended, and was not surprised that the government should be recognized. He thought the relation between the government and labor organizations had been very satisfactory for many years, and while the government had not been able to place all the legislation on the statute books that had been asked for by organized labor, he could sincerely state that the government had endeavored to enforce all the good legislation on the statute books. In conclusion he said, "I hope your deliberations will be profitable for those you represent and I will always be ready to co-operate with you to bring about that for which you are striving." (Applause.)

Chairman Sugrue stated that the Hon. Thos. W. Crothers, Minister of Labor, had expressed his intention of being present at the opening of the convention, but he had received a letter from the Minister stating it was impossible for him to be present at the opening, but would take the opportunity of addressing the delegates at the Tuesday or Wednesday sessions. He then vacated the chair and introduced President J. C. Watters, who fittingly acknowledged the welcome extended by representatives of Labor, the Municipality and the Province. He said he had no doubt the delegates would carry away with them the most pleasant recollections of their visit to St. John, and would thoroughly appreciate the words of welcome extended by those who had preceded him. He emphasized the fact that the delegates were assembled for a common purpose and while there might be differences of opinion, he hoped such differences

would not degenerate into personal animosities. He said the convention was recognized as an open forum, where every delegate had the right to speak, but would be under the obligation to respect the right of other delegates. He warned the delegates not to occupy the convention in useless repetition and said it was not always what a man said but frequently what he didn't say that carried the most weight. "We want to expedite business and get home as soon as possible," said the President. "You all look alike to me; I have no friends and hope to have no enemies. Equal privilege will be extended to all delegates." President Watters then declared the convention open for business. President Watters then stated that he was pleased there was one fraternal delegate present and introduced Brother Mortimer M. Donoghue from Butte, Montana, the fraternal delegate of the American Federation of Labor, who was received with hearty applause, supplemented by the singing of "It's a long way to Tipperary." Brother Donoghue stated that the chorus just rendered by the delegates had a peculiar interest to him, as he had married the descendent of a former resident of Tipperary. He expressed his appreciation of the honor conferred on him by the American Federation of Labor in his election as fraternal delegate to the Congress Convention. He stated that he understood that he was not expected to make a long speech at that stage of the proceedings and would later deliver the fraternal message which he had come to give to the delegates. He would also tell of some of the conditions obtaining on the other side of the boundary line. Before sitting down he thanked the delegates for the kindness extended to him since his arrival at the convention.

In responding to the magnificent address delivered by the fraternal delegate, President Watters said that the American Federation of Labor had sent many excellent speakers as fraternal delegates, but never had the congress heard a better exponent of the aims of the American Labor Movement. He expressed the wish that a verbatim report of the address could be put in the hands of every citizen of Canada, and that more sermons would be preached in the pulpit that would be as expressive of as much good. Turning to Brother Donoghue, President Watters said that the delegates would always remember the words of wisdom and encouragement that had fallen from his lips.

Miss O'Reilly, the fraternal delegate from the National Women's Trades Union League was introduced the following day by President Watters and was given a hearty reception as she arose to address the convention. "Brothers, comrades, friends and especially women," said Miss O'Reilly, "I am glad that there is a handful of women here. They are in the position of the lad on the island who was fearful of the opposite sex. His daddy never let him see a little

girl. One day in crossing from the island the boy saw a little girl and asked his daddy what it was. The boy was informed that it was a goat. "Then I want a goat for myself," said the boy." (Laughter.) "Women are goats," said Miss O'Reilly, "and I want them for myself." We will get it over yet. When you really want to fight bring in the women. In New York I am known as 'Fighting O'Reilly.' Just as soon as you line up with the labor movement in New York you have got to understand that it is a fight to a finish. Miss O'Reilly spoke on many matters of interest to the workers. She referred to the splendid work of Miss Henty, the editor of Life and Labor, the official organ of the National Women's Labor League, and urged the delegates to subscribe for the paper. She gave a graphic description of the Triangle fire in New York City, where the lives of one hundred and sixty girls were lost because of the indifference of the employer to the needs of the employes. She emphasized the fact that when the workers sell their labor-power they sell themselves. She closed her address by thanking the delegates for the opportunity of addressing them and was tendered a great ovation as she sat down.

The fraternal delegate of the British Trades Union Congress, Brother Jos. Cross, Accrington, Eng., was unable to attend.

Credentials were received from the following: Fraternal Delegates, 3; Federation of Labor, 1; International Representatives, 17; Trades and Labor Councils, 23; International Local Trades Unions, 105. All were seated. The various committees were appointed. Reports were received from the Executive Council of the Congress. Provincial Executives, Legislative Lobbyist of New Brunswick, Immigration, by W. R. Trotter: Fraternal Delegate to the A. F. of L., G. Franco; Parliamentary Representative, J. C. Watters; President J. C. Watters; F. Bancroft, Vice-President; Organizer J. L. Sugrue; Organizer W. R. Trotter; Delegates to the Social Service Congress: James Simpson, on the Royal Commission on Industrial Training and Technical Education; P. M. Draper, Secretary-Treasurer, showed total receipts from all sources, including a balance from the previous year of \$9,396.05, was \$23,713.14. Total expenditures were \$12,762.10, leaving a balance of receipts over expenditures September 15, of \$10,951.04. The membership directly affiliated and paying per capita tax was 80,094. In addition to this forty-six Trades and Labor Councils, three Provincial Federations of Labor and eighteen Federal Labor Unions were chartered. Trades and Labor Councils chartered by Congress, forty-seven. Provincial Federations of Labor, three.

On the fourth day, morning session, the Hon. T. W. Crothers, Minister of Labor, was introduced by President Waters. The Minister spoke at length on many matters in connection with his department, and in part said: "That pride was not the noblest

element in human character, but the man who hadn't anything of which he was proud did not amount to very much. He said he had many things of which he was proud, one was that his father and mother were Irish and another was that he was born poor. "Abraham Lincoln was born poor," said the Minister, "and I am proud of the officer who sits on the cash box of the Congress because he is Irish. It is a guarantee that there will be no leakages. I am also proud that in my judgment the best speech of the convention came from the little Irish girl from New York." He said every workman should be a member of the appropriate organization in the locality where he lives, because it requires organization for human betterment. What chance has an individual workman to secure his rights if he goes and says his pay is not sufficient? His employer will perhaps tell him to go and get his time. If he is backed by thousands of fellow workmen his employer will say, "I am busy now, but call around later." That is the difference. He said he had in hand resolutions presented, fifty-four in number, and that he could not find a single word of appreciation of the Labor Department at Ottawa. In conclusion he wished all success to the Trades and Labor Congress of Canada, get all the men you can into your organization; and the men who do not join you are taking something they are not justly entitled to. (Applause.)

At the afternoon session Delegate Foster of Naniamo, and Brother Frank Farrington were given the privilege of the floor to explain the strike situation on Vancouver Island from its inception to the calling off of the strike. Following their representation of the case the Hon. T. W. Crothers, Minister of Labor, was given an opportunity to reply. Both sides were given a respectful hearing by the delegates and the opinion of the convention was expressed in a resolution submitted later to the convention.

About 65 resolutions were presented, dealing with matters pertaining to the welfare of the workers in the Dominion.

The Convention was in session September 21 to 26, and adjourned with three cheers and the singing of "Auld Lang Syne." The Congress Executives were re-elected. Vice-Presidents were elected for the Provinces. Delegates Rigg and Lodge were nominated for Fraternal Delegate to the Convention of the A. F. of L. Delegate Rigg was elected.

Invitations were received from the Mayor of St. Catharines, and the Trades and Labor Council, and from the Mayor of Vancouver, and R. P. Pettipiece of the B. C. Federationist, to hold the Congress Convention of 1915 in their cities. Vancouver was chosen as the Convention city for 1915.

After the adjournment of the Convention I visited McAdam Jct., Moncton and Riviere-du-Loup, and had meetings with the officers and members of Lodges 379, 378 and 398, respectively. This will conclude

my report up to October 1. With very best wishes to all, I am,

Yours fraternally,
J. P. MERRIGAN,
I. V. P.

COMMUNICATIONS FROM INTERNATIONAL SECRETARY-TREASURER REINEMEYER.

Kansas City, Kas.

To the Officers and Members of All Subordinate Lodges, Greeting:

Gentlemen and Brothers: I wish to make an explanation, through the columns of the Journal, in reference to the fourth quarterly report, under the head of "Support of Business Agents."

In making up this quarterly report, beginning with the name of D. J. Markham, of District Lodge No. 2, we dittoed the other districts all the way down to the name of Robert Rosbottom, and through an error of the printer he omitted the ditto marks, and as we had several inquiries as to an explanation of this kind, we thought it necessary to make a publication in the Journal to make this correction, in order to make it clear. If the members will check up the quarterly report with the district roster, they will find that these names in the quarterly report are the secretaries of the respective districts and are the official representatives to receive the money for the support of business agent.

Trusting this will set the members clear in reference to this error, with best wishes and kindest regards, I beg to remain,

Yours fraternally,
F. P. REINEMEYER,
International Secretary-Treasurer.

Kansas City, Kas.

To the Officers and Members of All Subordinate Lodges, Greeting:

Gentlemen and Brothers:

It has come to my notice that there are a great many of our secretaries who are not complying to the constitution in reference to sending in the clearance cards received and accepted by the local lodges, which is in Article 10, Section 3, page 62, and which reads as follows: "As soon as a clearance card is received and accepted by a lodge the local secretary shall write thereon the number of the lodge, the date of its deposit and attest same with his signature, and within ten days thereafter, he shall forward this card to the International Secretary-Treasurer for the purpose of recording in the Grand Lodge. Failure of the local secretary to forward any of these cards within the specified time shall subject him to a fine of \$2.00, which shall be collected by his lodge and forwarded to the Grand Lodge, on complaint of the International Secretary-Treasurer."

We have received several inquiries in reference to some of our traveling brothers, and if these clearance cards are not forwarded to the office within the specified time, we are unable to give the whereabouts

of these members, for the reason that the local secretaries do not send in the cards, and they are not traced until the report is checked up under the card index system, then occasionally we run across the member that someone is looking for.

Now, if the secretaries will co-operate with us in sending in these cards promptly, we can make a success of this card index system, but if the secretaries do not co-operate with us, it will be a big failure.

I also wish to inform the secretaries that it is not necessary to write a communication or anything, all they have to do after the card has been accepted by the lodge is to put them into an envelope and mail to this office.

Trusting that all Secretaries will comply with this part of the constitution and forward these cards immediately after the meeting, with best wishes and kindest regards, I beg to remain,

Yours fraternally,
F. P. REINEMEYER,
International Secretary-Treasurer.

PROPOSED AMENDMENT TO THE CONSTITUTION.

Livingston, Mont., Jan. 22, 1915.

Mr. J. A. Franklin,
International President,
Kansas City, Kas.

Dear Sir and Brother:

The following is a "Resolution," unanimously adopted at last regular meeting, and whereby I was instructed to send you a copy of same, requesting that you have it printed in our official Journal in the proper manner, so that the rank and file may vote their sentiment on the question embodied therein:

RESOLUTION.

An act to amend Article V, Section 3, of the Grand Lodge Constitution.

PREAMBLE.

Whereas, The San Francisco Convention increased the salary of the Grand President at a time when conditions of the trade, country and Grand Treasury did not justify it, and

Whereas, Conditions of the country and trade are growing steadily worse; and

Whereas, We believe the increase unwarranted, and excessive, as compared to the earnings of the average boiler maker or ship builder; and

Whereas, We believe the membership as a whole are not satisfied or would not have granted this increase, but that it was granted by a "machine controlled convention," with the majority of the members not represented; and

Whereas, The next convention will not meet until 1917, that this great wrong may be righted, and honesty and justice to all may prevail, we, the members of Subordinate Lodge No. 123, in regular meeting assembled, do hereby demand that the Grand President order a referendum vote on the question to strike out the words "twenty-four hundred dollars," in Article V, Section

3, lines 10 and 11, of our Grand Lodge Constitution, and insert the words "eighteen hundred dollars" in lieu thereof.

Fraternally submitted by

LODGE No. 123,
Theo. W. Evert, C. and F. S.

Kansas City, Kas., Feb. 19, 1915.

To the Officers and Members of All Subordinate Lodges, Greeting:

Gentlemen and Brothers:

In reference to the foregoing letter and resolution from Lodge No. 123, of Livingston, Mont., proposing an amendment to Article 5, Section 3, of the Grand Lodge Constitution, you will be governed by Article 3, Section 1, in considering this proposition.

Inasmuch as the law requires that a proposition for legislative enactment shall be published in the official Journal for two months, which notice must expire at the end of the month in which it was published, and in accordance with this provision all votes must be in the hands of the International Secretary-Treasurer not later than the tenth (10th) day of May. In the event the resolution shall be 20 per cent indorsement, the proposition will then be submitted for a referendum vote.

In voting on this, remember this is a lodge vote and requires majority of the lodge, either for an indorsement or rejection of the proposition. The vote is to be returned to the International Secretary-Treasurer in accordance with Article III, Section 1.

I regret very much that the fourth "whereas" in the foregoing resolution contains such a glaring misstatement of facts, and it becomes my duty to challenge the statement that the action of the San Francisco Convention was controlled by a machine. No more bare-faced falsehood or misrepresentation of facts could be made by anyone.

I refrained from placing International officers who were regularly elected delegates upon any committee as far as possible, and to my knowledge no undue influence was used or attempted with any committee. I did not personally appear before any committee at any time except when requested to do so by the committee themselves.

It appears that there are those among our members who, when unable to secure favorable action upon propositions favored by them personally, or to defeat matters proposed by others, immediately become disgruntled and, through a lack of any logical reason resort to slander and a misrepresentation of facts.

I feel that as a matter of justice and in order that those of our members who may not have read the proceedings of our convention, with reference to the action taken in amending Article V, Section 3, that after the amendment was carried by practically a unanimous vive voce vote, and hearing some objections on the part of a few of the delegates, I voluntarily threw the mat-

ter open for reconsideration on the floor of the convention, and, after a free and unlimited discussion, a roll call was taken, which resulted in a vote of 167 in favor and 87 opposed.

I desire to further call attention to the fact that the question had been disposed of and could not be reopened under parliamentary law, and that my action in placing it again before the convention was purely voluntary.

I regret that it becomes necessary to mention these facts, but in the face of the gross misrepresentation made in this resolution, also in other articles from the same source, these statements could not consistently be permitted to go unchallenged. The records of the convention will bear out every statement contained herein.

Assuring you, one and all, of my kindest regards, I am,

Fraternally yours,

J. A. FRANKLIN,
International President.

PROPOSED AMENDMENT TO THE CONSTITUTION.

Winnipeg, Man., Can.

Mr. J. A. Franklin, Kansas City, Kas.

Dear Sir and Brother:

Please find inclosed resolutions drawn up by Lodge No. 126, which I hope you will give your kindest attention.

With best wishes and kindest regards, I beg to remain,

Yours fraternally,

A. B. PAGE,
Cor. Sec'y. Lodge No. 126.

Whereas, The Constitution of this Brotherhood does not make ample provisions for the removal of Grand Lodge officers unless charges are preferred against them, and

Whereas, Causes sufficient for the removal of an officer, does not necessary provide grounds for charges being made, N. B., incompetency, etc., and

Whereas, The time set for holding conventions having been extended from two to three years, we think that provisions should be made whereby the rank and file will have some control over Grand Lodge officers between conventions; therefore, be it

Resolved, That Perseverance Lodge No. 126, place before the Brotherhood the following recall provisions as an amendment to the constitution for their approval.

Recall Provision.

(a.) Any subordinate lodge in good standing in this Brotherhood shall have the privilege of proposing the recall of one or more Grand Lodge officers through the referendum, by submitting to the International President a proposition naming the officer, or officers, whose recall is desired, giving specific reasons for the issuance of such recall, who, on the receipt of same, shall at once order it published in the official journal for two (2) months, which notice must expire at the end of the month in

which it was published. Lodges may vote up to the end of that period.

(b.) All lodges voting must make return of their vote in ten (10) days after the close of the voting limit, and if twenty (20) per cent of the lodges in good standing and voting at the time do indorse it, the International President shall immediately notify the officer, or officers, whose recall is proposed, said officer or officers, shall have the privilege within ten (10) days of receipt of such notice, to submit to the International President a written statement in his own defense, such statement shall not exceed three hundred (300) words, who shall order it published in the Journal at the same time as he issues the ballots for the recall of said officer, or officers, to all the subordinate lodges in good standing for their suffrage.

(c.) If the proposed recall receives a majority of all valid votes cast and returned within sixty (60) days, providing that the total vote cast shall be equal to at least fifty (50) per cent of the members in good standing as shown by the preceding quarterly report of the International Secretary-Treasurer. The services of the officer, or officers, whose recall has been decided on, shall immediately terminate, and his or their successors shall be appointed as per Article 5, Section 5.

Reasons Why We Should Have the Recall.

In view of the fact that it is only recently that this Brotherhood held its convention, a short explanation as to why Lodge No. 126 desires a constitutional amendment at this time, will not be amiss.

According to our constitution and the verdict handed down by the executive council at their annual meeting held in Kansas City, October, 1914, to Lodges No. 126, No. 451 and No. 529, an officer cannot be removed unless convicted of certain charges, inefficiency does not constitute a charge, so it does not matter how incompetent an officer may be, unless charge of dishonesty, etc., can be brought against him, the organization is compelled to carry him on the pay roll, until he can be legally removed at the next regular convention, which does not take place until September, 1917, or by the calling of a special convention, which would be too costly a procedure for the removal of probably a single officer.

When conventions are held at such long intervals as ours, it is essential that provisions should be made for the removal of officers when deemed necessary.

The extension of the time between conventions was considered after the referendum had been disposed of, the recall was not even discussed, or probably it might have been inserted in the constitution at that time. Be as it may conditions have arisen in this part of the country that evidently can only be removed by inserting a recall provision in the constitution, or by waiting another three years and once again attempting to get the desired change, and we do not feel inclined to wait that length of time.

The growth of the organization is being retarded, and it is imperative that something should be done.

Let us consider the question from the viewpoint of democracy; we are supposed to live in a democratic country, and we gradually see a determined desire on the part of the people to gain more and more control over public officials, and the means to that end is through direct legislation, referendum and recall, etc. Very, very few workers, especially members of organized labor, are opposed to the recall of public officials, and due to that fact we have provisions for the recall of public officials on the statute books of many cities, counties, states, etc., and many of the trade unions have followed suit; it had proved a success in cases too numerous to mention, that we see no reasons why it cannot be successfully worked out in our Brotherhood.

Then again through the referendum and recall you have a far better representation of the intelligence of the members in the organization, which in the last analysis is the real intelligence of any organization.

The oft repeated argument against the recall, is that only a small percentage of the membership take advantage of it. While it is true to some extent, that although every member is entitled to vote, they never do so, we must remember that any proposition enacted by referendum requires a voting power of at least fifty per cent of the total members in good standing before it can become law. So it does not matter how low the voting figures in favor of a certain proposition go, there is a limit beyond which it can't go and become law, and the lowest possible figures is higher than that required at conventions for the enactment of laws.

Let us see what percentage of representatives we have at conventions, taking the last convention as a criterion. We had three hundred and forty-two (342) lodges in good standing according to the September report; out of that number eighty (80) lodges were represented at the convention, roughly figuring, one hundred and twenty (120) delegates represented the eighty lodges. We have somewhere around sixteen thousand (16,000) members, which gives us the following percentage: Eighty (80) lodges out of three hundred and forty-two (342), twen-

ty-two (22) per cent, one hundred and twenty (120) delegates out of a total membership of sixteen thousand (16,000), less than one per cent. So it can readily be seen where the correct expression of the organization lies.

This is not a kick from a few disgruntled members, but is the unanimous verdict of all the lodges in this city, and we are prone to believe that if the grievances turned down by the executive council, as being not based on facts without any investigation on their part, were placed before all the affected lodges in Canada, that they could substantiate all the claims that we have made and properly add a great deal more to them.

We ask you to give this amendment every consideration, if the recall is not the proper method for the removal of an officer when deemed necessary between conventions, then please enlighten us as to the proper method. We have tried every other means within our knowledge and failed. Hence the reason for this resolution and proposed amendment to our Constitution.

Respectfully submitted,

C. DAVIS, President.

A. B. PAGE, Cor. Sec'y.

KANSAS CITY, KAS.

To the Officers and Members of all Subordinate Lodges:

Greeting:—The foregoing letter and resolution received from Lodge No. 126, contains a proposition to amend Article III, Section 1, and is published in accordance with Article III, Section 1. In considering this matter you will be governed entirely by Article III, Section 1, and all votes from Subordinate lodges must be in the hands of the International Secretary-Treasurer not later than the 10th day of May. Any votes received after that date will not be counted. You will remember, when voting on this proposition that it requires a majority vote of your local to indorse or reject and if the result should be a twenty per cent indorsement of all lodges in good standing, the proposition will then be submitted for referendum vote. With very best wishes, I beg to remain,

Yours fraternally,

J. A. FRANKLIN,

International President.

Correspondence.

Chicago, Ill., January 28, 1915.

Mr. A. O. Wharton,
Ghlo Building,
St. Louis, Mo.

My Dear Wharton:

Your esteemed favor of the 25th inst. received. On September 18, 1913, I addressed the Twelfth Convention of the B. R. C. of A. in Milwaukee, Wis. I directed the attention of the convention to the passage by the

Sixty-second Congress of a bill creating a Commission to be known as the Commission on Industrial Relations. I pointed out that President Wilson had, on June 26, 1913, appointed the members of this Commission; that the Commission was given power to hold public hearings, compel the attendance of witnesses and enforce the production of documentary evidence; that the Commission was directed to seek the underlying causes of industrial discontent and its ef-

fect upon public welfare, and report its findings and conclusions to Congress.

Realizing that publicity is the greatest corrective and that this Commission furnished organized labor an opportunity to place its side of the case before the American people, I urged that the Commission be petitioned to take up in public hearings the very serious controversy between the Illinois Central and Harriman Lines and their 35,000 locked-out employes, constituting the I. C. R. R. and Harriman Lines System Federation.

On November 12, 1913, I addressed the Convention of the American Federation of Labor in Seattle, Wash. Again I pointed out the advantage of asking the Commission to take up in a public hearing the I. C. and Harriman Lines controversy. While in Seattle you convened the Executive Council of the Railway Employes Department for the purpose of taking up in conference my suggestion.

While there was nothing in the act creating the Commission and defining its powers which prevented the Commission from granting such public hearings, it was feared by some that the body might not grant such a request. Our conferences ended in Seattle with the understanding that, before making the application, we would try to find out the attitude of the Commission toward such a hearing.

On April 13, 1913, I addressed the Railroad Employes Department in Kansas City, Mo. While in that city the plan of procedure was discussed and it was decided that application should be made to the Commission for a hearing.

Messrs. Ryan, Kline and yourself conferred with me later in my office in Chicago, and I was retained to represent the Department. It was agreed that I should receive \$2,000.00, out of which I was to pay all the expenses incident to gathering, preparing and presenting the evidence in the case for the Commission. This amount was to cover everything, including the fee for my time and services.

In May of 1914 you asked me to meet you and other members of the Executive Council in Washington, D. C. I complied with your request. President Johnston of the Machinists, Ryan of the Carmen, yourself and I called upon Chairman Walsh of the Commission. We were promised a hearing. Mr. Walsh suggested that we go on to New York for the opening session of the Commission and see Mr. Thompson, counsel for the body, and complete our arrangements with him. We went to New York, attended the opening sessions of the Commission, conferred with Mr. Thompson and were assured by him that the case would be heard in Chicago.

Learning through the daily press that the Commission would meet in Chicago on July 21. I wrote to the secretary and its counsel, William O. Thompson, for information regarding the date of the promised hearing of the System Federation controversy. Neither answered. The Commission met in Chi-

ago on July 21, 22, 23, 24 and 25. I called upon Mr. Walsh and he informed me that the present program of the Commission was to make a preliminary survey of industrial conditions and that controverted causes, such as ours, would be taken up in later public hearings. He assured me our case would be taken up among the first. I attended every session of the Commission in Chicago. The Commission left Chicago for points in the West, when I learned through the newspapers that the Commission had completed its preliminary survey, I wrote to the secretary of the Commission, with headquarters in Chicago, reminding him of the promise to hear our case and asking for a hearing at an early date. In reply to these letters I was informed that I would be notified of the date as soon as it was decided upon. Not hearing from the Commission again, I sent one of the Burnside men to the office of the Commission and he reported to me that he had been told that our case would be heard soon, and that I would be notified.

In October, 1914, Carl Person and myself met Mr. John B. Lennon, a member of the Commission, in Bloomington, Ill. He told us the Illinois Central and Harriman Lines case would be taken up early in January, 1915; that Chicago, Macomb, Miss., and Memphis, Tenn., were three places in which public hearings would be held on the Illinois Central.

To get our evidence in shape I drafted a "question sheet," containing fifty interrogatories. Sixty thousand of these were printed. I sent 40,000 to the grand lodge headquarters of the organizations involved, the balance were distributed through the Strike Bulletin and my office.

I requested the assignment of Grand Lodge Vice-Presidents for work of special investigation. My request was complied with. Conferences with the men sent to me were held in Chicago. I gave them special instructions as to the investigations I wanted made and sent them out over the lines. As the filled-out question sheets and the reports of the special investigators came in, I used a force of clerks to make a card index of the evidence. The classification of the evidence and the making of a card index was a slow and painstaking job.

I am waiting to hear from the Commission. I do not know why the Commission has not kept its promise. For printing, for clerk hire, for postage, for traveling expenses and hotel bills, I have spent a considerable portion of the \$2,000 agreed upon. I have spent time as well.

Now, I am waiting for a reply to my last appeal to the Commission to keep their promise to us. My last letter was written in triplicate, one addressed to Mr. Frank P. Walsh, chairman of the Commission; one to Mr. William O. Thompson, counsel, and one to the secretary.

I have been deluged with letters from all over the strike zone, each asking for the

cause of the delay. I am as much in the dark as anyone when it comes to the cause. The facts are as I have stated them.

As to the investigation, I shall try to secure an early answer from the Commission.

With best wishes, I am,

Fraternally yours,

Signed: FRANK COMERFORD.

ST. JOSEPH FRATERNAL WEEK ASSOCIATION.

When? March 1 to 6, 1915.

Where? St. Joseph, Missouri.

You are invited. Who? Everybody. Are you coming? Yes, of course you are, and so is your neighbor. Why? Because it is going to be the greatest event from a fraternal standpoint that has ever been known.

There will be something doing every minute, including two grand street parades, drill team contests, for which \$2,000 in cash prizes are offered, including band contests.

Speaking by leading fraternalists of the country will take place every afternoon and evening, interspersed with band concerts and vaudeville acts, including other special entertainments for our guests.

During this week the "City Worth While" is ours, and in turn we are giving it to you. No expense will be spared to make this the event of events. No entrance fee will be charged teams entering the contest.

Thirty thousand fraternalists of St. Joseph will meet you with a glad hand, and their lodge and club rooms will be open to you.

Fraternal Week is a home coming of the best people in the world, and we want to know you. First write us, and then come.

Address all communications to

W. A. KING, Secretary,
Sixth and Jule Sts.

REPORT OF INTERNATIONAL DEPUTY ORGANIZER REED.

Portland, Ore., Feb. 8, 1915.

Editor-Journal:

At the conclusion of my last report I was in Portland, where there was considerable work at the Willamette Iron and Steel Works, in connection with a large ship repair job. I was successful in reinstating twelve and initiating ten from this job; and also made arrangements for our members to go to Le Grande and erect some oil tanks. Also got in touch with a job on a pipe line at Preston, Idaho. Mr. C. Seaburg, of Portland, is in charge of the job and took three of our members with him, and promised to run a fair job. I notified President Franklin, who in turn notified Brother Dunn, corresponding secretary of Lodge No. 198, and I was under the impression that the job was running all right until I received a letter from Brother Dunn a few days ago informing me that he had been successful in placing boiler makers and rivet heaters on the job, but complained that they were using farmers as holder-ons. Now, we all know that conditions of this kind happen far too frequently on field work in connection with

our business, and I maintain that the fault lies with the men on the job. I feel sure on the job in question it was only necessary for the boiler makers and rivet heaters, who are all card men, to make a stand, and they would have got organized holder-ons on the job. I advised Brother Dunn along these lines, and if this stand has not already been taken, I hope it will be.

I left Portland for Seattle, where I met Brother Atkinson, Fifth International Vice-President, and together we visited several shops, and also attended meetings at Tacoma and Everett, Wash.

I was requested to go to Auburn, Wash., where there was a small gas holder in course of construction, and all the men on the job but two were members of Lodge No. 104. The brothers had tried to have them put off the job, but were told to quit if they were not satisfied. I took up the matter with the foreman, and he agreed to let them go, and the job was finished without any further trouble.

I left the Seattle district and went to Vancouver, British Columbia, and attended a meeting of Lodge No. 194, where I am glad to report they are having large attendances at these meetings. I was requested to go to Prince Rupert, British Columbia, where there is under construction a large floating dry dock. I had previously made arrangements for this job to be done by our members, and the men were to be furnished through Lodge No. 194, and that first class transportation would be allowed, but, in spite of this, some of our members paid their own fares and got on the job. Now, the brothers that were loyal and willing to take their chance of getting a job, when applications came for men, did not think they were getting a square deal, and as applications for membership were coming in from the job, they decided to entertain no more applications from that quarter. On reaching Prince Rupert I called a meeting of the brothers on the job and, after a long discussion, they decided that there would be no one allowed to start on the job except they came through the lodge. I talked the matter over with the foreman and he agreed to hire no one that the shop committee objected to. Under the conditions, as I left them, there is no reason why the job should not be completed without any further trouble. On my leaving I was requested to send four boiler makers and three helpers up. On reaching Vancouver we held another meeting, and everyone seemed satisfied with the arrangements made. Now, in connection with Lodge No. 194, I wish to take this opportunity of congratulating the members on their choice of officers. In Brother Campbell as president they have one of the best union men in the country, and the same can be said of the vice-president, Brother Jack McCall; and Brother Fraser continues as secretary, an office he has held for a number of years, and it can be said of him that he has the confidence of every member of the lodge.

Leaving Vancouver I returned to Seattle, and the same day went to Everett and visited the Great Northern shops and talked with several delinquent members, and three of them promised to come through. On returning to Seattle, I found a telegram requesting that I go to Victoria, British Columbia, where I went and met several of the brothers, including Brother Stewart, who arranged a special meeting, which was very well attended, and I am sure that when work picks up in Victoria we will be able to increase the membership considerably. I was requested to take up a matter of compensation on behalf of one of the brothers who had met with an accident about ten months ago, and they had kept him going and coming for months, promising to make a settlement, but the money was never there. I took the matter up and am glad to say that I was successful in getting a cash settlement that was satisfactory to all concerned.

Leaving Victoria I again returned to Seattle and assisted Brother Atkinson in arranging a special meeting of the members of Lodge No. 489, for the purpose of bringing about the consolidation of that lodge and Lodge No. 104. Unfortunately I was not able to be present at the meeting, but I have been informed that it was agreed to consolidate. I feel sure that this is the best thing that could have happened in Seattle.

This concludes my report to February 1, 1915. Hoping the same will be satisfactory, with best wishes, I remain,

Fraternally yours,

JOE REED,

International Deputy Organizer.

CINCINNATI, OHIO.

Dear Sir and Brother:

Just a few lines to inform you of the fact, that through the efforts of our worthy Brother, John F. Schmitt, our ninth I. V. P., who was very ably assisted by Brother Nolte, of the Carmen, that we have formed a boiler makers district and, of course, we belong to the System Federation, which was recently formed on the C. H. & D. Railroad.

We had our district meeting in this city on January 18th of this year, at which meeting Brother Schmitt presided, and as we went through the regular routine of business we naturally elected our officers for the ensuing year, of whom are the following brothers: Brother W. J. Redmond, president, Indianapolis, Ind.; Brother A. K. Greisheimer, vice-president, Lima, Ohio, and your humble servant as secretary-treasurer.

I really believe this bit of news will be gratifying to a number of brothers, who have passed through this section of the country at one time or another, to see how the boys on the C. H. & D. are at last awakening to the good results that are to be derived by this get-together movement. Now brothers, I don't desire to take up too much space in our very valuable Journal, as this is my first attempt in this line, but I will say just a few more words in regard

to the brothers along the line.

I feel very confident that all the boys along the line are heart and soul in this very important movement, and if I am to judge the caliber of the rank and file, from the actions of their delegates, and the sentiments these delegates voiced while in this city, then I can truly say without fear of ridicule, that the Boiler Makers will have a very success district on the C. H. & D., and that as a whole they can be fully relied upon as staunch supporters of the System Federation.

Hoping to see this in the next issue of our Journal, and thanking you in advance for your kind favor, therefore, I beg to remain,

Yours fraternally,

WM. J. MCGEE, Jr.

FORT WORTH, TEXAS.

Dear Sir and Brother:

Inclosed please find a memorial to Brother Wm. J. Gilthorpe, our personal friend. We wish to have it published in the Journal.

Hoping this will be favorably considered, we remain,

Yours respectfully,

MR. and MRS. C. T. BURKE.

IN MEMORIAM, WM. J. GILTHORPE.

He is sleeping, but not forever,
There will be a glorious dawn;
We shall meet to part, no, never,
On the resurrection morn.
From the deepest caves of ocean,
From the desert and the plain,
From the valley and the mountain
Countless throngs shall rise again.

He is sleeping but not forever,
In the lone and silent grave;
Blessed be the Lord that taketh,
Blessed be the Lord that gave.
In the bright eternal city
Death can never, never come!
In His own good time, He will call us,
From our rest to Home, Sweet Home.
To our dear departed friend.
From Mr. and Mrs. C. T. Burke.

PARSONS, KAS.

After perusing the Boiler Makers Journal, I sat for a while thinking. I allowed my thoughts to drift. They drifted back a number of months with many happy recollections, wondering what had become of the ones who partook in those happy times. I could hear a voice here, and one there, say, "I wonder what has become of L. A. No. 7." When I heard those voices, I arose and said: "We are very much alive and doing well, thank you."

So we wish to let you know through the Journal that we are progressing very nicely and still growing. We have had numerous disappointments, such as loosing a large number of members, by their husbands having been laid off at the shops which, of course, makes it hard for the faithful few who are left. Those have been working hard, however, in behalf of the L. A. all

the while, never forgetting that "all work and no play makes Jack a dull boy."

Will give you an account of a social eve, which will let all former members of No. 292 and L. A. No. 7, know that what few are left are all alive and doing well. On Kansas Day, Friday, January 29, 1915, Mr. and Mrs. D. M. Thompson entertained the L. A. No. 7 and their husbands in honor of the past and new president.

Old Pluvius tried to discourage us by getting out his last year's water wagon and sent us a very rainy and disagreeable eve; however, a large number braved the storm to spend the evening with Brother and Sister Thompson. It being Kansas Day the house was tastefully decorated with the Kansas flower, also several very appropriate songs were sung.

The evening was spent in various games and contests, some causing much merriment, especially along the line of artists and spirits. A bounteous and most delicious cafeteria lunch was served. At a late hour all departed for their respective homes, voting Brother and Sister Thompson ideal entertainers.

MRS. LUELLE VAN VLECK.

FORT WORTH, TEXAS.

Dear Sir and Brother:

Inclosed please find some pictures of

A GROUP OF MEMBERS LODGE No. 96.

JOB AT 10-MILE STATION, FROM JACKSBORO, TEXAS, IN THE JUNGLE.

ONE OF THE STRUCK JOBS, TEXAS OIL FIELDS.

some of the gang and some of the work they were erecting when they were called out on strike.

This work was being done by one of the oil field firms that refused to come across but I am happy to state that they are not having any luck getting the work finished.

The jobs are just as the men left them when they quit work and there doesn't seem to be much prospect of having them finished right away. This job is under the jurisdiction of Lodge No. 96 and the gang are all members here.

With best wishes I remain,

L. A. FREEMAN,
Cor. and Fin. Sec. No. 96.

MISSOURI VALLEY, IOWA.

Dear Sir and Brother:

At a special meeting of Baldwin Lodge No. 145, B. of B. M. and I. S. B. & H. of America, the following resolutions were unanimously adopted:

Whereas, It has pleased Almighty God, in His infinite wisdom, to remove from our midst our worthy brother, John Halley, from his earthly home, Missouri Valley, Iowa; therefore, be it

Resolved, That we, his fellow brothers, offer our sympathy to his bereaved wife and family in this, their hour of affliction, and commend them to our Heavenly Father, Who doeth all things for our good; and be it further

Resolved, That a copy of these resolutions be given a separate page upon the minutes of this meeting, and a copy be sent to the bereaved wife and family; also a copy be sent to our official Journal for publication.

JOHN V. RICHARDSON,
ROBERT WARNOCK,
JOHN J. CHALOUPKA,
Committee.

FROM THE RAILWAY EMPLOYEES' DEPARTMENT.

St. Louis, Mo.

For the information of the membership at large, and particularly those who have been responsible for the misleading articles appearing in the Strike Bulletin and Railway Federationist, I am herewith submitting two letters for publication, which I trust will be the means of disabusing the minds of those who may have been lead to believe that either the officers of the Railway Employees' Department, or the Council members (composed of the General Presidents of all affiliated organizations), have been anything other than heartily in favor of having the Harriman and Illinois Central strikes investigated by the Industrial Relations Commission, and until informed to the contrary, we shall continue to believe that the Commission intends to hold the hearings, although we have no reason to assign for the delay.

Fraternally yours,

A. O. WHARTON,
President Ry. E. Department.

St. Louis, Mo., Jan. 25, 1915.

Mr. Frank Comerford,
905 Ashland Block,
Chicago, Ill.

My Dear Comerford:

I am taking the liberty to write you in regard to the arrangement we made with you last May in reference to your preparing for and representing the organizations involved in the Harriman and Illinois Central strikes, in presenting the entire subject matter before the Industrial Relations Commission.

You, no doubt, recollect the meeting we arranged for in Washington, D. C., during the month of May, at which you were present, when we talked this matter over with Chairman Frank P. Walsh, and on his advice we proceeded to New York to meet a Mr. Thompson, the attorney for the Commission, who, we were informed, had in charge the making of the Commission's itinerary. We met Mr. Thompson, I believe, on the 21st of May, 1914, and in my presence he assured you that our case would be heard when the Commission visited Chicago. Since that time I believed that the Commission would surely hear our case; we have left the matter entirely in your hands, believing that you would let us know if there was anything we might do to assist you, should occasion arise; for several months past articles have appeared in the Strike Bulletin and the Railway Federationist intimating that the Railway Employees' Department and the Council members thereof had, to say the least, become indifferent as to whether or not this case was heard. This, I believe, you know to be absolutely unfounded. We are, as stated to you on several occasions, particularly anxious to have this hearing held, and if you think that we can be of any assistance to you in this matter, we would be pleased to have you suggest what we can do. I can assure you

that we are absolutely at your service in this matter, and I trust that you will not be in the least offended because of my writing you on the subject, the matter having been left in your hands, we felt that you would call on us, if we could be of any service, not having done so, and feeling that something ought to be done, owing to the Commission having almost completed their hearings, I have, in conformity with the wishes and previous action of the Council, taken it upon myself to write you.

With best wishes, I am,

Sincerely yours,

Signed: A. O. WHARTON,
President Ry. E. Department.

SILVIS, ILL.

Editor-Manager Journal:

From time to time articles and letters appear in our official organ relative to industrial unionism or the one big union, but these articles are usually of a vague character and do not convey to the mind of the average reader as an intelligent analysis of this vexed question if—as it appears—to many of our members are interested in Industrial Unionism, let us carry on through the medium of the Journal a clean intelligent discussion, pro and con, let the members study this phase of the labor movement from every angle in a fair and broad-minded manner and let us have the results of their findings. The trouble has been heretofore, that some worthy brother would have a brain storm relative to some question, and before giving the matter second thought wanted to rush into print a long tirade of abuse and vilification of our grand lodge officers, which could not be permitted, or it would have a tendency to undermine and disrupt the organization and consequently, as some would have you believe, Brother Casey keeps the pages of the Journal under lock and key.

The writer is fairly well acquainted with our editor and I am of the opinion that anything that is in the advancement of the labor movement will gain ready admission to the pages of the Journal, as Brother Casey knows that the Journal is the mouth-piece of the members and as such it is maintained. I am fairly well convinced that the pages of our publication could be used to much better advantage than for a recital of what kind of an entertainment lodge so and so held, and how Bill Smith sang "Casey Jones," etc. These things are very nice and your humble servant likes his share of pleasure, but they fall dismally in telling us how to get a greater share of the products of our toil so that we can provide ourselves and those dependent on us with the necessities of life and a few of the luxuries.

Some of our members are condemning our Executive Council for rejecting the offer of the I. A. of M., for amalgamation. I fail to see how they could have done otherwise as our organization never has to my knowledge gone on record as favoring amalgamation with the Machinists, and when we do our officers will carry out the mandates of

the members as one of your delegates to the recent A. F. of L. convention. I had a good opportunity to study Industrial Unionism and hear the arguments of the proposers, which I may give later, but at this time I do not intend to go into the question any further than to say that I think the time will come when our individual craft unions will outline their usefulness as the gradual evolution of the world takes place institutions which fail to keep pace with the times go under so it behooves us to be ever on the alert and never let an opportunity go by to build up and strengthen our organization from time to time as in our good judgment we may deem necessary, but watching for the rocks and shoals and shaping our course accordingly.

Trusting to see this in print and many more along the same lines, I am

Yours fraternally,
CHAS. MACHOWAN.

PORT ARTHUR, TEXAS.

Dear Sir and Brother:

Your letter in reference to names I sent in for Journal under date of January 20th received, and will state that these names are to be added to those already in your office. I will endeavor to reconstruct our mailing list at an early date, but there will be some of these men here for possibly two months yet, that will be gone in that time.

Brother Casey, I am inclosing you two photos of the Sabine Netches Lock Gates which are now under construction six miles up the canal from here.

This work is being done for the government by contract, and the Chicago Bridge &

would give this work to our members, and that he had full charge and what he said went with the company, but in the face of all of his promises to us, when this work started he placed men on the job that he had imported here from Chicago for that express purpose. He never at any time intended to give our members this work. This firm, we have been able to learn, have run scab jobs all over this country, and was

never known to pay the scale of wages. The strike situation here at this time stands about as it did after the first week of the strike. P. I. W. Co. are hiring scabs and we get them away from them about as fast as they come in. Scab A. M. Johnson, foreman, he secured the names of every man that he could before the strike took place and also their home address, and after the strike was called he rode around in his automobile and tried to get them to come out to work, some of these men he had been promising a job from day to day, as he expected every day would be his last day with the union men he started the job with, but when the men found that he only wanted them to come out and scab for him many of them refused and the others are coming off when they are informed by our pickets that the job is a scab job. No white man with love for his wife and children and his dear old mother at home would scab for such a corrupt outfit as the P. I. W. Co., when they are informed that the disgrace and shame of it will follow them and their children through life.

Iron Works have the contract. Local No. 305 has exhausted every effort to have this company employ our members and pay the union wages on this job, all to no avail, as this company has imported men in here from Chicago to do the work, and at less wages than the boiler makers and helpers here receive. Mr. T. J. Manley is the foreman of the job. Now Local No. 305 has declared this job unfair and efforts to get the men to come off the job have failed up to this date. This scab foreman, Manley, informed I. V. P., Jos. P. Ryan, a committee from Local No. 305 and B. A., who had several meetings with him before this job started, that he

I am also inclosing you one of the little cards that the Trades and Labor Council of this city are sending out to other central bodies in this and other states, notifying the different trades and laborers to stay away from Port Arthur, that all trades and classes of labor are overcrowded at the present. This is being done because the local papers and the Board of Trade are continually advertising all over the country that work is so plentiful here and what grand opportunities working men can find if they would only come here, when in reality, after the poor working man comes here and spends the last dollar to get here, he finds that he gets arrested for vagrancy and either has to work the streets to pay his fine, or walk

out of town, for the job he expects to find is not here, and he will find himself with hundreds of others looking for the same job.

I would appreciate it very much if you would reproduce this card in our Journal and keep it there for at least three issues.

The Reeves Brothers have made no effort to place scabs on their job here yet and the work lays just as it was left by our members.

Now we want to request all of our members to stay away from Port Arthur during this trouble, and we will put up a fight that will be a credit to the entire Brotherhood. Our cause is just and we are out to win and we will win, with the moral support of other organizations, and the keeping away from Port Arthur of all crafts. I am mailing you in today's mail under separate cover a copy of our labor paper. Hoping that you will be able to use part of this letter at least for the information of our members, and with best wishes to the editor of the Journal, I am,

Fraternally yours,

T. O. RILEY.

C. S. & B. A. Local No. 305.

RESOLUTIONS ADOPTED BY DISTRICT LODGE No. 15.

WHEREAS, There is a bill pending in the Senate and House of Representatives at Washington, D. C., known as (S. 6, 165), which bill is an amendment to "Boilers Inspection Law," and which, if enacted, will seriously effect the efficiency of this law as the inspectors have more work now than they can do justice to, and further, that a man may be qualified to inspect tenders and machinery, and not be qualified to inspect boilers.

Therefore be it resolved, That the convention of Boiler Makers and Helpers of District No. 15, now assembled, being held at Milwaukee, Wis., October 1, year 1914, demand that the Senators and Congressmen do all in their power to defeat said bill.

And be it further resolved, That practicable boiler makers be appointed as boiler inspectors.

GRANT BURGOYNE, Chair. No. 145.

WARREN WHEELER, No. 440.

ARTHUR EVANS, No. 589.

Committee.

NEWPORT NEWS, VA.

Editor of Journal,

Dear Brother:—

As President of Lodge No. 55, and one of many friends, I desire to express my most heartfelt sympathy through the columns of the Journal for the family of our late secretary and treasurer, Brother Wm. J. Gilthorpe, as well as my most sincere tribute of respect to his memory. His unexpected death was a shock to his many friends in Old Virginia.

The Brotherhood has lost a staunch and royal member, whose honesty was never questioned in the affairs of the organization. His name will go down in history of

the American labor movement as the Grand Old Man, courageous to a fault. When the interest of the Brotherhood, or its membership was at stake, his private life was above reproach; his official life was one of unquestioned integrity in the history of up-building of the Brotherhood of Boiler Makers from Ship Builders and Helpers of America."

He died in the work he loved so well; he fulfilled his mission in the cause he gave his life efforts to. I say farewell to his ashes, and trust that the members of the Brotherhood will erect a monument to his memory, on which the following words will be inscribed.

"William J. Gilthorpe, faithful until the end. Brotherhood of Boiler Makers from Ship Builders and Helpers of America. May he rest in peace.

Fraternally yours,

W. H. HEALY.

WAYCROSS, GA.

Whereas, It has pleased the Almighty God in His divine wisdom to remove from this world of trials and sorrow our former International Secretary-Treasurer, Brother W. J. Gilthorpe; therefore be it

Resolved, That we, the members of Lodge No. 425, extend to his relatives our heartfelt sympathy in this their sad hour of sorrow and may their sorrows be lightened by the thoughts that his spirit has departed to a higher and better world; and be it further

Resolved, That a copy of these resolutions be placed on the minutes and the charter be draped for thirty days.

C. W. SCHULTZ,

S. D. STALLINGS,

L. J. FLOHR,

Committee.

SILVIS, ILL.

Brother Casey:

Please insert the following in the next issue of our Journal:

Mr. John Koenig:

Our Dear Brother—The officers and members of Lodge No. 377 extend their heartfelt sympathy to you and your family in your hour of sadness, occasioned by the death of your only beloved son. May God help the mother bear her burden.

Resolved, That while we lament with sorrow we must submit to the will of our divine Maker who doeth all things well.

C. R. Kizer, C. S. L. 377.

CINCINNATI, OHIO.

Dear Sir and Brother:

Your favor of the 15th inst. at hand, and I wish you would please correct my article for the Journal and the roster which I sent you since I wrote you last. Brother Arthur Hileman, our vice-president, has secured a position at the C. & O. shops in Covington, Ky., and he was compelled to resign and take his card and deposit in Local No. 537. He was one of the best members we ever

had, a union man from head to foot, and never missed a meeting; so Brother John Davis was unanimously elected in his place as vice-president. He is an old war horse and will make good, as he has held various offices previously.

Wishing you success, I remain
Yours fraternally,
D. L. O'BRIEN, Secretary.

CHICAGO, ILL.

Dear Sir and Brother:

At our last regular meeting, January 20, the officers and members of Central Lodge No. 220 extended their heart-felt sympathy to Mrs. William J. Gilthorpe and family, in their hour of sadness, and join them in their hour of sorrow and pray that God will give them strength to bear their sorrow occasioned by the death of your beloved husband and father, and a brother who was one of our faithful and conscientious workers for the betterment of our organization.

Be It Resolved, That a copy of these resolutions be spread on the minutes of our meeting and a copy sent to our official Journal for publication, and a copy to the bereaved family, and the charter be draped for a period of thirty days.

JOHN KANE,
JOHN McDUGAL,
A. G. SMITH.

ROSLINDALE, MASS.

At a regular meeting of Norwood Lodge No. 281, the following resolutions were adopted:

Whereas, it has pleased Almighty God, in His infinite wisdom and power, to take to his reward our esteemed brother, William Sloan; therefore be it

Resolved, that while we bow to him above, we deeply lament the death of our worthy brother. We, his fellow brethren, extend to his bereaved wife and family our most profound sympathy, and may the Divine Ruler of the universe, who giveth and taketh away, give to them the strength and Christian fortitude to bear up under this great sorrow.

"A precious one from us is gone,
A voice we loved so well is stilled;
A place is vacant in that home
Which never can be filled."

Resolved, that a copy of these resolutions be sent to the bereaved wife and family, a copy sent to the official organ of our Brotherhood, and that our charter be draped for thirty days.

A. BENNETT,
W. PATTON,
R. HENDERSON,
Committee.

PORTSMOUTH, VA.

Dear Sir and Brother:

Local Lodge No. 298 held its annual election of officers in Central Labor Hall and afterwards the lodge with Locals 57 and 428 enjoyed a banquet in the private dining room in Hughes' Cafe. Sixty-five

boiler makers and apprentices were present.

The election of officers resulted as follows: M. A. Garriss, president; P. R. Peidmont, vice-president; G. C. Cherry, recording secretary; H. W. Jarrett, Financial secretary; Robert T. Howe, corresponding secretary and treasurer; Milton Claud, inspector; trustees, J. H. Pendleton, Theo. Carsten and J. W. Ford.

At the banquet, Brother A. E. Shultz acted as toastmaster; several short talks were made by members of the organization. It had been originally planned to have our International President, J. A. Franklin, and Second International Vice-President, Thomas Nolan, at the banquet, but owing to the pressure of business they were detained and could not attend.

An excellent menu was served and was enjoyed by all. The menu consisted of Lynnhaven oysters on half shell, fried oysters, chicken and potato salads, celery, sweet pickles, butter thin crackers, French drip coffee, fruit and cigars.

With best wishes, I remain,
Yours fraternally,
ROBT. T. HOWE,
Cor. Sec. Local No. 298.

DECATUR, ILL.

Lodge No. 447 gave its second annual ball February 11, 1915, which proved to be a great success. The advertising was properly handled by the chairman of our committee and his assistants, which resulted in a record-breaking crowd and a joyful time for all present.

The Boiler Makers ball beats them all for a jolly crowd and a good time. It was also a good success financially. Our committee deserves a great deal more credit and thanks than they received.

Boiler makers here are working eight hours per day, five and six days per week. Lodge No. 447 has a fine bunch of brothers and a large membership. If you have a good card you will get a hearty welcome, if you haven't any card stay away. Bill beaters will find rough sailing around No. 447 and you are not wanted; you are a menace to our organization.

CHAS. J. YOUNDER,
Cor. Sec'y.

NEWARK, OHIO.

Dear Sir and Brother:

I am a member of the Boiler Makers Union No. 99, and want to hear from the brothers living in the state of Texas; want to try the climate for asthma and lung trouble. Would like to have them tell me through the Journal of the climate in winter and summer, the price of land and labor of boiler makers, what vegetables and grains are raised there, is the climate a healthful one? Is it dry there in summer?

Would be pleased to hear from brothers living in Big Springs, Tex.

Fraternally,
J. D. BOWNEAN,

A GROUP OF THE DELEGATES TO A CONVENTION OF DISTRICT LODGE 31 (B. & O. SYSTEM) HELD AT PITTSBURG, PA., DECEMBER 1, 1914.

Standing Left to Right—318, T. A. Hudson; 135, T. E. Spence; 579, W. H. Wolf; 332, J. W. Drumming; 5, J. R. Cline; 444, T. Welsh.

Seated—493, D. E. Sturdevant; 79, S. Houser; 79, J. C. Smith, President; 241, M. W. Luke, Secretary and Treasurer.

WASHINGTON, IND.

Dear Sir and Brother:

I am mailing you herewith a picture of the delegates which represented District No. 31, of the B. & O. Railroad, for publication in our Journal. District No. 31 held its semi-annual meeting at Pittsburgh, Pa., December, 1914; delegates present are as follows: Standing left to right, No. 318, T. A. Hudson; No. 135, T. E. Spence; No. 579, W. H. Wolf; No. 332, J. W. Drenning; No. 5, J. R. Cline; No. 444, T. Welsh. Seated: No. 493, D. E. Sturdevant; No. 79, S. Houser; No. 79, President J. C. Smith; No. 241, Secretary-Treasurer, M. W. Luke.

Yours fraternally,
M. W. LUKE.

MIAMI, ARIZ.

Dear Sir and Brother:

Having never written for the Journal, I would like to put in a few lines in regards to Local No. 187, Miami, Ariz., as this local has done fairly well since Brother Dick organized it.

There was a strike here a little while back which was won. It lasted about two

weeks, but was the most peaceful strike I ever saw, and every man walked out except a few who were working for a contractor. He gave the conditions, which was all could be asked.

It started in this way. The men were talking for some time about going after the 10 per cent cut they got last fall, but what put speed to it was:

The master mechanic put a scab in the boiler shop at the Mine Mill. He was notified to take that man out as no one would work with him, but he said no. So it came to a show down; so out we came. Now the carpenters heard this and got busy as they thought the B. M. was after the 10 per cent, though all that walked out said, "might as well ask for the raise," which I must say we got. The boiler makers are getting \$4.25 now and the helpers \$3.25, and we also went up a notch on the outside scale to \$5.00 for boiler makers, \$4.50 for heaters and \$4.00 for helpers. As living expenses are not very cheap here I think we were justified in the demand. Some said we were too hasty, but I don't think so. I believe to strike while the iron is hot or don't strike at all. This

business of fooling around from two to four months giving the master class time to build a stockade around the works, they never give us that much time when they want to get rid of us.

Now what gets me is that I never saw a strike where all crafts went out together like they did here. As a rule each craft looks for its own hungry self. During this strike some work came up that belonged to the boiler makers, but was done by the bridgemen. We went after that work but did not get it. They would not live up to the agreement; said it conflicted too much with their constitution. That constitution I think was edited at Leavenworth, Kas., and rectified at San Quentin. They seem to consider every man a bum union man but themselves. I think their's is a bum organization when they won't live up to the agreements they make with the fellow craft men. There will be a blume flume coming up soon, but think we will have a fight on our hands to get it. I don't think that shows good union principle.

Hoping you will find space for this in the March number, I am

Yours fraternally,

E. J. BUEKLER,

Local No. 187.

Toledo, Ohio.

Buckeye Lodge No. 85 International Brotherhood of Boilermakers, Iron Ship Builders and Helpers of America, at their last regular meeting proposed and passed the following resolution:

Whereas, A certain body of men representing about one-tenth of one per cent of the men of Ohio seem to want the responsibility of making or having laws made for all the people, and to have radical changes made in several departments of the Industrial Commission of Ohio, such as separating the Engineers' Licensing Department and the Boiler Inspection Department from the Industrial Commission of Ohio and creating another Board, not to reduce expenses, nor to increase the efficiency of the departments, but to create jobs, therefore,

Be It Resolved, That this Lodge, in meeting assembled this Feb. 9, 1915, enter their protest against disturbing these departments or their consolidation of the Boiler Inspection Department with any other department; and be it further

Resolved, That we go on record as demanding that only boilermakers with practical experience in repairing, building and testing boilers be considered when vacancies occur in the Boiler Inspection Department; and be it further

Resolved, A copy of these resolutions be sent to all Representatives and Senators of Ohio Legislature for their guidance, and all Boilermakers for their endorsement.

E. RICHARDSON,

Corresponding Secretary No. 85.

CHICAGO, ILL.

J. A. Franklin, International President,
Kansas City, Kas.

Dear Sir and Brother:

The officers and members of Lodge No. 220, by a majority vote, wish to make an appeal to the Grand Lodge officers to restore the strike benefits to the striking members of the Illinois Central and Harri-man lines; said benefits were taken from them on December 1, 1914. Lodge No. 220, in requesting you to do the best you could in the calling off of the strike last October, did not have a thought as to the means you used in trying to have it called off, as she would not have made you that request, as we believe that as long as the strike continues, so long should benefits be paid, more so on account of being sanctioned by the Grand Lodge, and until the Grand Lodge officers call it off without the vote of the rank and file, we believe the pickets should be paid. For if the officers had power to take away the benefits without vote of the rank and file, so have they the power of calling it off.

The rank and file have stood loyally to the guns, and I believe they at least should be fed for so doing, and that is all they could possible do, would be to feed themselves, with the little compensation they would get.

The war in Europe would not last very long if the soldiers had to go very long with an empty stomach—such is the cast with the picket line, and if you think it is useless for them to do picket work any longer, then call it off before taking away what little compensation they received for so doing.

I do not see where the railway department of the Federation of Labor has a right or the power to dictate to our grand officers to violate our Constitution and take benefits away from the strikers. If such is the case then we had better change a few articles in it so as to protect men called on strike, such as the Blacksmiths are doing, for they are still paying benefits regardless of the railroad department of the Federation of Labor or their ruling.

We understand the conditions under which this strike was called, but since then there has been some changes made, one by which a certain amount of per capita tax was set aside in order to pay strikers who were called out by the Grand Lodge or their strike sanctioned by them and as long as there are sufficient funds it should be used for the purpose it was meant for.

Lodge No. 220 requests that a copy be made and placed in the Journal for publication, as we desire to hear from some of the other lodges and we would like to know their sentiment in regards to the paying of strike benefits.

Hoping this will demand your earliest attention, with best wishes, I remain,

Yours fraternally,

A. G. SMITH, C. F. S. Lodge No. 220.

WINNIPEG, CANADA.

The all important question, amalgamation, brought forward in the form of a resolution by President Johnston, of the I. A. of M., at our annual executive council meeting held October, 1914, at Kansas City, appears to have received but scant consideration at the hands of our executive, and the resolutions drawn up stating the reasons for their opposition is, to say the least, childish, and seems to have been drawn up by the committee while in a thoughtless attitude, as it contains absolutely no logic, is inconsistent and contradicts itself. Here is the resolution:

"Resolved, That we do not favor such amalgamation, for the following reasons: First—Past experiences have taught us that such an organization cannot be made a success. Second—We believe that our present form of organization will meet all the requirements of the workers, namely: The Metal Trades Department of the A. F. of L., the Railway Department of the A. F. of L., and the System Federation when perfected. The present forms of organization, not having been thoroughly tried, we are opposed to any movement whatever that will interfere in any way with a fair trial of same, and believe that all true unionists should lend their undivided support to the present form of organization, rather than to encourage new and untried forms, and thereby retard our progress."

This resolution was carried, with Brother Atkinson voting against it.

You will notice that it says, first: "Past experiences have taught us that such an organization cannot be made a success." Past experiences, where? Certainly not in the metal trades; at least, as far as our knowledge serves us; so the past experience referred to must be that of other organizations, and we must admit that we are ignorant of any labor organization that has tried amalgamation and found it unsuccessful. We will take a few labor unions who has tried out the scheme and see what results have been gained: There is the United Mine Workers' of America, the Western Federation of Miners, the Brewery Work and the Timber Workers. These four will suffice for our purpose.

The first two organizations are on the verge of a still closer amalgamation, evidently they don't think their form of organization has been unsuccessful; the fact is, that it has proved a success, so much so that they want a complete amalgamation of all workers engaged in the mining industry. When that becomes an accomplished fact, they will be the most powerful union in the country, if not in the world. As it is, they are at present the highest type of organization in the American Labor Movement. Let us follow: if we cannot lead.

Then there is the Brewery Workers, and Timber Workers. Have they been failures? Hardly. Of course, we do not desire to create the impression that the four unions mentioned are the personification of perfec-

tion; by no means. We are endeavoring to show that amalgamation is a step in the right direction, but many more steps will have to be taken before the workers come into their own, and that these unions having taken that step have benefited accordingly, and that they are more capable of looking after their own interest with their present form of organization, than they were under the past form. Why, the Timber Workers (previously the shingle weaver) have increased their membership over two hundred per cent—since they extended from the narrow craft lines to the broader industrial lines, which took place only some two years ago. So we think that we are justified in asking our executive to explain the first part of their resolution, giving us facts and not mere statements.

The second part of the resolution without re-quoting it, practically means, in fact definitely states, that the present form of organization fills the bill, and that it has not as yet received a fair trial, of course, what constitutes a fair trial is arbitrary, and we respectfully beg to differ with our executives, as to the present form of organization filling the bill. Something is wrong somewhere that requires a little more lucid explanation than the mere statement that we are all right as we are. We have had an overdose of defeats during the past few years, and there is no question but that these defeats are due to the want of solidarity on part of the workers. The feelings of solidarity are there but the present form of organization does not allow, or rather hinders its proper development, and the experiences gained through these setbacks are directly responsible for the present agitation for amalgamation. Have we learned anything from the Harriman, I. C. R. and Pere Marquette strikes, etc.? If so, what is it? We think that it has taught us the necessity of complete amalgamation quicker, and more unity of action—in other words industrial class solidarity. If that is not so, then what does it teach us?

The resolutions finishes up with the appeal not to encourage new and untried forms and thereby retard our progress. We cannot reconcile this statement with the first part of the resolution. "Past experiences have taught us that such an organization cannot be made a success," so we leave those who made the statement to do the reconciling.

Summing up the resolutions it consists of three statements, whose implications are:

(1). That amalgamation in the past has not yet been successful.

(2). That the present form of organization has not yet been properly tried out.

(3). That to encourage amalgamation, is to encourage new and untried forms whose only results would be to retard our progress. The first we have tried to show is a misstatement of facts and will not successfully bear investigation. Second, we contend has been thoroughly tried out and found wanting, and is in fact really the forerunner of amalgamation. The third and last state-

ment is hardly worth considering as it is contradicted by the first statement. Besides System Federation was new and untried forms a few years back. Then came Federation of Federations, etc., and now comes amalgamation. It is only through the adoption of new, the changing from one form to another, that makes it possible for the workers to keep abreast of the times. We have got to adopt ourselves to the ever-changing industrial conditions. The craft form of organization has served its purpose as far as the metal trades are concerned. The forming of the System Federation is an acknowledgement of that fact, that form being a great deal stronger than the individual craft, still through bitter experience we are finding out that even Federation is too weak to successfully combat the well-developed, thoroughly organized industrial masters, hence the demand for greater solidarity which we think can be accomplished through amalgamation. We do not think that the resolution issued by our executive council express the sentiments of the rank and file of our Brotherhood. Therefore we ask other lodges for their opinion of this important question, through the pages of the Journal.

Respectfully submitted,
C. DAVIS, President.
A. B. PAGE, C. S. Lodge No. 126.

KANSAS CITY, KAS

To the Officers and Members of all Subordinate Lodges:

Greeting:—I feel that it is hardly necessary to reply to the statement contained in the foregoing article from Winnipeg, Canada, upon the question of amalgamation, as I am fully convinced that the sane and sound judgment of the membership of our Brotherhood has long since passed judgment upon this question and that "Trades Unionism Versus Amalgamation or One Big Union" needs no defense at my hands. There are, however, some statements contained in this article that ought not to be permitted to pass without some correction.

In the first paragraph they claim that the resolution drafted by the Executive Council stating their reasons for disapproving of the proposition submitted by the International Association of Machinists was "childish and seems to have been drawn by the committee while in a thoughtless attitude." Now, I regret that it is not possible for our entire membership to place the authors of this article side by side with the members of the Executive Board and from the comparison between the two, draw their own conclusions. It might be well to add at this time, that there are members of the Executive Council who were affiliated with the labor movement, giving the very best that was in them in the interest of our movement when the authors of this article were in swaddling clothes. If such statements were not disgusting to men of sober thought they might be considered funny.

Now, in their comment upon the resolution, in the third paragraph, they state as follows:

"First: 'Past experiences have taught us that such an organization cannot be made a success.' Past experiences where? Certainly not in the Metal Trades."

They then admit that this is true, at least as far as their knowledge serves them. Well, this may be true; we will not question that fact, and I have very little doubt but that they have spoken the truth, but because of their knowledge being limited in matters of this kind, it does not signify that the statement of the Executive Council is incorrect.

As a matter of suggestion, and in order that they may become more familiar with the history of our movement, let me suggest that they go back to the earliest days and ascertain for themselves what form of organization we first had in this country, of the metal trades, what it consisted of, what degree of success it attained and whether it is not a fact that real success only began to come to the different trades when they organized in their craft unions. Then all down through the history of our movement in this country, as well as in others, we find that every movement that has sprung up, gathered into its folds a conglomeration of trades and started out to revolutionize the industrial conditions of the country has gone on the rocks and been torn to pieces. Then, if amalgamation is the proper solution will our friends please advise us why it has not proved a success in the past? It is a wonderful thing to dream dreams and to see visions. They remind us of the boy with the clay pipe and the pan of soap suds, blowing bubbles in the air and watching them soar for a while, only to burst and scatter to the winds.

Now, let us deal for a moment with the organizations to which they have called attention, as an evidence that their contention is correct: They call your attention to the United Mine Workers of America, the Western Federation of Miners, the Brewery Workers and the Timbers Workers. Now, we desire it understood that we haven't one word to say in opposition to any of these organizations; we glory in the success they have made and in the fight they are making for industrial freedom; but let us see to what extent these organizations are amalgamated, as pointed out by the authors of the foregoing article: It is true that the United Mine Workers control all men in and around the mine. Now let us see to what extent they have amalgamated with other trades: We will take for instance a mine employing from four to five hundred men and we will find, outside of the miners, the men employed in the mine, and the laborers around the top, possibly two or three blacksmiths, an engineer, one or two firemen and not more than two carpenters, and we ask that a comparison be made between the number of men who might be eligible to other trades, with those who would not be eligible to any other organization except the

Miners. The same is practically true of the Western Federation of Miners as well as the Brewery Workers.

Another point that must be considered is that in most instances these men, who would be eligible to other trades are so isolated that it would be almost impossible for them to maintain a local union. Now, we leave it to any fair-minded man to judge as to whether or not the argument advanced by citing the four above named organizations has any bearing whatever upon the proposition of amalgamating the metal trades into one organization.

We claim today that we have amalgamated to as great a degree as have any of the four above named organizations because of the fact that we have in our organization, the boiler maker, the ship builder, the tank builder, the helper, in other words all the men employed in the industry in which we are engaged.

The point is made that still further amalgamation is contemplated by bringing together the two organizations of Mine Workers and I am agreed that this is the only logical conclusion for the men engaged in the mining industry to arrive at, if the membership of those two organizations decide that it is the desirable thing, for the reason that those men are all engaged in mining and we see no reason why there should not be consolidation or amalgamation, that can only take place when the majority of the membership of both organizations are agreeable, and believe that their best interests can be conserved by uniting the two organizations.

The question is asked as to whether or not these two organizations have been a failure, and we agree fully with the writers that a great work has been performed by all of these organizations, but we disagree with them in the contention that they can be properly considered amalgamated organizations.

With reference to that part of the resolution which states "that the present form of organization, not having been thoroughly tried out, we are opposed to any movement whatever that will interfere in any way, with a fair trial of these organizations" and maintain now, that that statement is absolutely correct. We have the Metal Trades Department, which is, in every sense of the word, in its infancy and provides every opportunity for co-operation to the very fullest extent. The same is true of the Railroad Department and our System Federations. If it is impossible to secure co-operation and support, one for the other, through these departments it would undoubtedly prove a total failure to attempt to amalgamate or place all of these craft unions in one organization. It has been demonstrated (and we challenge contradiction of this fact), that there are some of these trades that are advocating amalgamation of craft unions into one organization, that have found it impossible to consolidate locals of their own individual organizations—and I refer to locals that are composed of men em-

ployed exclusively in contract shops with those composed of men employed in the railroad industry, and if it is impossible to consolidate locals of one trade, we contend it would be impossible to consolidate locals of all the different trades under one charter.

It is our experience that those who are finding the most fault with our present form of organization are those who either fail to co-operate with or to put into effect branches of the Metal Trades or System Federations, as they should be organized and handled in order to bring success to the membership of the different crafts involved.

We are told by those who advocate amalgamation and one big union, that in the event we were organized in accordance with their ideas we would still have to maintain separate branches or locals of the men employed at different trades, but that they would all be under one head; then we hear the advocates of this form of organization criticising and claiming that every one is inconsistent and insincere who differs in opinion and who still maintains that the trade union movement in its present form, with the different departments we have at this time, providing means for co-operation and unity of action, is the most scientific form of organization that the world has ever known.

The foregoing article winds up with the statement, "We do not think that the resolution issued by our Executive Council expresses the sentiment of the rank and file of our Brotherhood." We are perfectly agreeable that the membership shall decide this question for themselves, but we do not agree that one here and there, who happens to make considerable noise about this question is voicing the sentiment of what they term the rank and file, and we believe that we have been in as close touch with the membership and know possibly as much about their sentiments and views on this subject, as those who claim to voice the sentiment of the rank and file.

Much more might be said with reference to this attempt to criticise and condemn the organization that has proven itself to be the greatest factor in the emancipation of the workers from the industrial evils of any agency that has been known up to the present time, but we are content to leave it to your judgment to decide for yourself.

Assuring you, one and all, of our best wishes and kindest regards, I am,

Yours fraternally,

J. A. FRANKLIN,
International President.

HUNTINGTON, W. VA.

Dear Sir and Brother:

I hereby trust that you will allow a short space in the Journal for these few lines.

Local No. 249 held a banquet on January 13, 1915, which proved to be a booming success, and from the appearance of things all brothers seemed to be very well satisfied.

An interesting address of welcome was delivered by our president, John Myers. We had with us on this occasion our shop superintendent, Mr. Brown, who gave a very fine address on the progress of today and the drawback and hardships in time of war, which the inhabitants are now enduring in the European countries. Our general foreman, S. M. Carroll, also attended and talked very interestingly on the latest improvement of mechanical education; that is, the advantage the apprentice boys obtain over the older heads, by means of the mechanical school which has recently been established.

Now comes our assistant foreman, Brother Buffington, whom it seems had partaken of a little too much supper to give much of a speech, and the boys were somewhat disappointed, as he is very talkative while at work; however, they were much pleased to know that he had his fill of a good, square meal, at least on one occasion.

Several other well formed addresses were delivered, including that of Buck Waugh, who proved to be a better dancer than spokesman.

With the last year Local No. 249 has had some hard ups and down, but with the opening of the new year the boys have all gotten their heads together once more, and prospects look more promising.

Help! is the cry of the thirsty in West Virginia. How can we get it home from the depot? That is the question now troubling the thirsty ones.

At present we are working only seven hours a day; a great number of us are striving to keep out of the poorhouse, while others are striving to get in.

All the brothers are extremely sorry to learn of the death of Brother Wm. J. Gilthorpe, our former I. S. T., and extend our most heartfelt sympathy to the bereaved family; nevertheless we realize that it was the will of God to take him from among us.

With kindest regards and with best wishes, I am,

Yours fraternally,
EUGENE BRENNAN,
Secretary No. 249.

EAST BOSTON, MASS.

Dear Sir and Brother:

Lodge No. 585, in common with the rest of the Brotherhood, heard with great regret of the passing away of the former International Secretary-Treasurer, Brother Wm. J. Gilthorpe, whose career was actuated by the loftiest principles of truth and honesty, and who, although retired from active participation in the workings of the organization, never lost his interest for the welfare of the members of his craft, and was always willing to lend his voice and efforts in their behalf.

On February 4 Miss Margaret Foley, one of the most eloquent and convincing leaders of the Massachusetts Women's Suffrage Association, addressed the members of Lodge No. 585. She said in part:

"We are grateful for the opportunity to talk to the voters of Massachusetts, for, on November, 1915, the male voters of this state will decide on the question of the constitutional amendment to grant the right of voting to women, and we are confident that when the men hear our arguments, they will vote to grant the right of suffrage to women, which has already been granted in Australia, New Zealand, Finland, Isle of Man, Denmark, the British Isles, Canada, Wyoming, Utah, Colorado, Idaho, Washington, Arizona, Oregon, Kansas, Illinois, Montana and Alaska.

The solid West with us proves that equal suffrage must have worked well, for those great states copy each others success, not their failure. Women in the Western states have been voting from two to 46 years back, which ought to prove to every fair-minded man that they have been given a square deal. The trade unions of the country have brought our cause to the front, and we have started here in Massachusetts, where begins the battle for the abolition of human slavery, the crusade for the emancipation of women from the chains of political slavery, which now binds her! This is an opportunity for any working man to stand by the working women. Here in Massachusetts the right to vote was first given to men of a certain religion, then men of all religious beliefs were allowed to vote, then the taxpaying qualification was struck out, and finally all mentally qualified white and "black" men were allowed to vote. We want the word "male" stricken out from our constitution as a qualification for voting! The cry went up when suffrage was granted to male wage earners of Massachusetts—if we (the aristocrats) give the working men the right to vote, they will corrupt the government, but the political history of our country proves that it has been the rich and mighty, and not the poor working men, who have tried to corrupt the government, and so we are told if women are allowed to vote in Massachusetts, what will become of their homes and their children? Let me tell you men, in reply to that query, that I am a trustee of the Children's Institutions of the city of Boston, and I have under my care hundreds of innocent children who have been neglected by their fathers. We are human beings, and we believe every white woman in Massachusetts is as good as any black man! We want a chance to frame legislation for the adequate protection of women and children in our factories and shops, which is woefully deficient at present.

"We have 24 health inspectors here for about 50,000 establishments! We do not agree with those that tell us that voting is a man's business. Wherever a man earns his bread, that is his business. One hundred years ago woman's place was the home, for she left it hardly more than three times—to be christened, to be married and to be buried! Today women are engaged in every industry, except the army

and navy, telegraph, etc., construction and about nine other industries.

"We have in Massachusetts today 379,775 women wage earners, of whom 91,000 are married, and three-quarters of these mothers who are feeding and educating their sons to be respectful citizens, have an average of four children apiece, and they have a right to participate in the system of government. We must face the situation as it is. Women are in industrial life to stay. We must use Twentieth Century tools to do Twentieth Century tasks! Every fair-minded man must see that 'the government' is us, we, the people; not men alone, but men and women together. By men and working women together, we shall have a just and true democracy, and as Abraham Lincoln says: 'One that does not exclude women.' We are pleased to see that you have followed the example of the Massachusetts State Branch of the American Federation of Labor, in supporting our cause, and we thank you for the same."

Miss Foley received an ovation on ending.

President Wm. E. McNabb reported that the annual ball of Lodge No. 585 would be held on the night of April 9, at Sumner-Lyceum Hall, East Boston, and the committee in charge, which is striving hard to make the dance a big success, consists of Brother W. E. McNabb, Thos. Farmer, F. Gardis, D. B. McInnes, J. Vincent, Dan Higgins, Chas. Smith, Bernard McDonnell, Chas. Jenkins, Ed Scorvin, John Cartright, Wm. Clouter, Robert Mills, John Warnock, James Brogan and Generson.

Several new members due to the persistent hustling of our business agent, Brother Generson, were added to our list, and we are glad to note Brother Generson is working in perfect harmony and in accord with the sensible ideas of Sixth International Vice-President John J. Dowd, in promoting the cause of trade unionism in our craft in this part of the country.

One of our old members, Brother John Welsh, died the early part of this month after two days' illness of pneumonia. He left a wife and small children in hard circumstances, and President McNabb, in behalf of poor Jack's widow, wishes to thank all those who, by their sympathy and financial assistance to her in the day of tribulation, proved themselves friends in need, which was only proper, because big hearted, good natured Jack Welsh was always responsive himself to such a worthy cause.

Fraternally,

DANIETL B. MCINNES,
Lodge No. 595.

WINNIPEG, CANADA.

Dear Sir and Brother:

At our last regular meeting the following motion was made and carried, namely:

Whereas, Trade has had a decided slump through the effects of the European war and has caused unprecedented unemployment and short working hours for many of our brothers, we desire that the pages of

the Journal be used to discuss the advisability of lowering the Grand Lodge per capita tax, during this period of depression only.

While asking this, we do not believe in low dues, and the resultant assessments, but from our present experience the high dues are making previously good members fall behind.

Trusting this will be in order, and hoping to see this in our Journal next month, I beg to remain,

Yours fraternally,

FRANK SNARE,
Cor. Secretary Lodge No. 451.

MILWAUKEE, WIS.

Dear Sir and Brother:

Yours of the 6th inst., in regards to the strike, and will say that everything is going on nicely. The brothers are all on the job and tending to their duties. We still have hope of coming to some agreement as soon as work picks up.

Our Business Agent, Brother Sonnberg, has been following up the outside work and also notifying all the engineers about Milwaukee Boiler Co. We also had it brought up at the Federated Trades Council and are going to bring it up at the Building Trades Thursday night, when we will be installed, which I think will go a long way.

At present the Milwaukee Boiler Co. are only orking eight hours a day, and five days a week. They have only about seven men employed. Some of the men that went back scabbing are also laid off.

Trusting this will be satisfactory, I beg to remain,

Yours fraternally,

R. DALE, F. S.

THOMAS—HIS BROTHER.

Anyone knowing the whereabouts of James G. Thomas, (last heard of was in Salt Lake City, Utah, and expected to go to Oklahoma) will please notify the undersigned, his brother.

J. R. THOMAS,
Burneyville, Okla.

A REPLY FROM PRESIDENT FRANKLIN.

Kansas City, Kas., Feb. 16, 1915.

To the Officers and Members of all Subordinate Lodges:

Greeting:—The foregoing letter from Lodge No. 220, in reference to the I. C. and Harriman lines strike, contains statements that necessitate a full explanation in order that our membership may have the facts in regard to this controversy.

In the first place, our Executive Board, in their October meeting, decided that they were not justified in continuing the picket benefits to men supposed to be doing picket duty on the I. C. and Harriman lines. The Executive Board of some of the other organizations had already taken action along this same line, and inasmuch as this was a Federation proposition, it was finally decided that 30 days' notice would be given to all lodges before the picket benefits were

discontinued, and consequently the notice was issued to all lodges that on December 1, 1914, benefits that the several organizations had been paying for the past three years would be discontinued, as they were all of the opinion that they were not justified in continuing these benefits under the circumstances.

At the time this was done a proposition was put up to the membership—the men who came out on strike on the I. C. and Harriman lines to decide for themselves as to whether or not they desired to continue the strike. This action was taken particularly because of the fact that large numbers of requests had been received asking that steps be taken to have the strike declared off, and one of these requests came from Lodge No. 220.

You will note this letter states they are of the opinion that these benefits should continue as long as the strike continues, on account of its having been sanctioned by the Grand Lodge and until the Grand Lodge officers call it off.

The fact that the Executive Council has power or authority to discontinue the payment of benefits whenever in their judgment an action of that kind is necessary, and for the best interests of the organization, cannot be questioned, as the Constitution is clear on that point.

Again, the writer of this letter from Lodge No. 220 states that they do not see where the railroad department of the Federation of Labor has a right or power to dictate to our grand officers, to violate our Constitution and take benefits away from the strikers. Now, it is just such misleading statement as this that cause a great deal of dissatisfaction unless the facts are placed before the membership. Section 3 of Article VI, reads as follows: "The International Executive Council shall have power, by a two-thirds vote, to withdraw any financial assistance from any lodge on strike for such reasonable length of time as careful investigation and consideration reveals the fact beyond a reasonable doubt that the men cannot be sustained." This answers in full the charge that the Executive Council violated the Constitution and I wish to state, most emphatically, that the railroad department did not dictate to our Executive Board, nor did they have any influence whatever, over them in the action taken. as the Board had decided upon taking this action prior to the meeting of the Executive Council of the railroad department.

In another paragraph of this letter it states that they are familiar with the conditions under which this strike was called, but state further that since the calling of the strike, there have been some changes made, one by which a certain amount of the per capita tax was set aside in order to pay strikers who were called out by the Grand Lodge or the strikes sanctioned by them, and that as long as there are sufficient funds they should be used for the purpose

for which they were meant, and let me state that the strike fund is used solely and exclusively for the payment of strike benefits and for no other purpose.

As to the statement that there have been some changes made in the Constitution with reference to the setting aside of a certain per cent of the per capita tax, this is incorrect and misleading. This was not done since the strike was called except insofar as the law was amended. The provision setting aside a certain percentage for payment of strike benefits was made at the St. Paul convention in 1908, and has no bearing whatever on the question at issue.

Inasmuch as this letter states that they are familiar with the conditions under which the strike was called, I am furnishing herewith copy of a letter sent to all lodges in District No. 20, which was signed by the President and Secretary of the District, also by Vice-President Hinzman, advising the members in advance of their taking a vote that they were only granted moral support, and after reading this letter our membership can be the judge as to whether or not these men were, under our laws, legally entitled at any time to regular strike benefits. This same information was conveyed to all of the men on the Illinois Central and Harriman lines prior to the strike being called. The letter containing instructions to District No. 20 is contained in the following letter:

Waterloo, Ia., Sept. 15, 1915.

To All Lodges Comprising District No. 20,
Greeting:

Inclosed you will find copy of letter drafted by the International Officers representing all of the organizations affiliated with the System Federation on the I. C. Railroad. The letter explains, in a measure, why action has not been taken by the International Officers towards calling the men out. Believing that our members voted on a strike with the understanding that all organizations would act as a unit in this matter, we have insisted that the whole matter be referred back to the rank and file for further consideration. We also wish to inform you, so that each and every member may know, before he casts his ballot, that our organization is not in a position to pay strike benefits, our executive council have voted to sanction the strike and calling out our members, granting them moral support, if they wish to stand by the Federation. By moral support you will understand that the International organization will lend all possible assistance, but is positively unable to pay strike benefits, owing to the large amounts of money expended for this purpose.

We are also forwarding to you, under separate cover, blank ballots to be filled out by our members. In voting upon these propositions your attention is called to Article XII, Section 4, page 45, Subordinate Lodge Constitution. We hope that all locals and members will carry out the provisions of our constitution to the letter, that there

may be no complaint after the ballot is taken.

As soon as the ballot is cast your secretary should forward ballots, with tally sheet, to E. G. Pullen, secretary District No. 20, 503 Columbia Street, Waterloo, Iowa. You will also place the result of the vote for and against upon the minute book of your lodge. You must understand that this is to be strictly a secret ballot. Fill out the blanks on the ballot and make an X in the square under yes or no for each proposition on the ballot, but do not write your name on the ballot. All ballots must be in the hands of the Grand Lodge officers by October 1, and in order to do so, it will be necessary for all ballots to be in the possession of the District Secretary not later than September 25. All lodges should act as promptly as possible on this, so as to avoid any further delay.

Each and every member should vote according to his own dictation and not allow anyone to influence him one way or the other, and no attention should be paid to any rumor or statement of any kind, and act only upon official information and in accordance with the constitution of our organization.

With best wishes and regards, we remain,
Fraternally yours,

A. HINZMAN,
First International Vice-President.
K. H. EICKER,
President District No. 20.
E. G. PULLEN,
Secretary District No. 20.

At our last convention, held in San Francisco, June, 1914, the benefits were discontinued to our membership on the New York Central Lines, and the same action was contemplated with reference to the Illinois Central and Harriman Lines, and the writer had possibly as much to do with preventing this action being taken as any other member, not because he failed to appreciate the fact that the convention had the authority, but because of the fact that the Illinois Central and Harriman Lines was a Federation proposition, and for that reason he did not deem it advisable that any action of that kind be taken at that time.

Every possible effort was made for three years to finance the men on strike on the Illinois Central and Harriman Lines by making donations, as we could not pay regular strike benefits, because of the fact that these strikes were sanctioned with moral support only, and at this time some would have you believe that a great crime has been committed by the executive officers because they have discontinued the payment of further benefits after they were convinced that they were not justified in continuing benefits after December 1, 1914.

Trusting this will give you the facts in connection with this matter, and with best wishes to all, I am,

Yours fraternally,

International President.

BROOKLYN, N. Y.

Dear Sir and Brother:

I, as the Correspondence Secretary of Lodge No. 21 of New York City, do wish you would insert this little item in the next month's Journal. It is as follows:

Whereas, It has pleased the Almighty God in His divine wisdom to remove from this world the little son, three years old, of our worthy brother, Geo. Boylan; therefore, be it

Resolved, That we, the members of Empire City Lodge No. 21, extend to our brother and family our heartfelt sympathy in this their hour of sorrow, and pray that the Almighty God comfort and console them, that they may bear their trial with fortitude; and be it further

Resolved, That a copy of these resolutions be spread on the minutes of our meetings, a copy forwarded to our bereaved brother and family and a copy sent to our official Journal for publication.

PETER SHIPTON,
J. SULLIVAN,
JOHN BYRNES,
JAS. MCGENEY,
Committee.

REPORT OF INTERNATIONAL DEPUTY ORGANIZER SCOTT.

Pottsville, Pa., Feb. 15, 1915.

Dear Sir and Brother:

My last report for the Journal was written in Albany in December, having been ordered there to take up some matters with Lodge No. 73 at Troy. On arriving there I proceeded at once to get in touch with the officers of Lodge No. 73, and was informed by Brother Boyd that the out-laying points on the D. and H. system were in bad condition and sadly in need of attention; that there were thirty-two men working at three different points between Watervliet and Plattsburg, N. Y., and only four of them were carrying cards in our organization. After securing all the information possible, I started out for Saratoga Springs, Whitehall and Plattsburg, the points mentioned by Brother Boyd, and am pleased to state that on my return to Watervliet a few weeks later, when I made my report to Lodge No. 73, I was able to report that we had almost a hundred per cent organization at these points, having secured twenty-seven of the twenty-eight men complained of. We have had Shop Committees selected to look after the men employed at these places, and it is safe to say that the interest of the men, as well as of the Organization, will be taken care of in the future far better than they have been in the past.

From Watervliet I went to Oneonta, by instructions from President Franklin, to take up some work for Lodge No. 414. On arriving there I went down to the shop and met Secretary Lowery, and was informed by him that there were a few men working in the shop who were not members of the Organization, and were determined not to become members. I visited some of these

men at their homes and talked with others in the shop during noon hours, and succeeded in getting one of them to fill out an application. The others promised in the presence of Brother Lowery that they would get into the Organization as soon as possible, but had all kinds of excuses for not going in at that particular time. I attended a meeting of Lodge No. 414 while in Oneonta and found that the members were not taking the interest in the Organization that they should. I have been informed that it is a very hard job to get some of the members to attend a meeting; they are satisfied to allow two or three men to do all the work and imagine they are doing their full duty when they pay their dues—but some of these days something will happen there that will wake those fellows up, and then they will realize, when it is too late, the mistake they have been making. Before leaving Oneonta I went with the shop committee to interview Mr. Halter in reference to a grievance that has existed for some time in Binghamton. We secured a promise from Mr. Halter that the matter would be adjusted at once. Having finished in Oneonta I left for home to spend the holidays with my family.

During the time that I was at home I visited Pen Argyl and Pottsville. The Lodges in both these towns are in bad shape, due to the depression in business that seem to have hit both these localities hard. I did everything I could to help them, but it was impossible to render much assistance at that time. Later on we will be able to get both these Lodges in shape again.

While in Pen Argyl I received instructions from President Franklin to proceed to Middletown, N. Y., and take up some work on the O. and W. system. I attended the O. W. system Federation meeting in Carbondale, Jan. 16 to 18, and then came back to Middletown to take up the work where I had left off. I attended two meetings of Lodge No. 400, and I want to say that they have a good, progressive, fighting Organization in Middletown.

I went from Middletown to Kingston and spent some time trying to organize the men employed by the Ulster & Delaware. There are about six or seven boiler makers, a few helpers, and a few apprentices employed in this shop. The majority of the boiler makers are suspended members, who have been out of the Organization for some years, and it was impossible to do much with them. That \$15.00 looked too big to those fellows. I did, however, succeed in getting one boiler maker's application and reinstated another. Both of them went into Lodge No. 400. We have all kinds of promises from some of the apprentice boys, and I believe that we will get a few of them later on.

From Kingston I went over to Warwick. Among the men on the Lehigh and Hudson I found about twenty-one employed there, and only two of them carrying cards. Through the efforts of Brother Pat Rooney a meeting was arranged and we succeeded

in getting sixteen out of a possible nineteen to make out applications. Chances are good of getting two more in a short time. These men were also put into Lodge No. 400 at Middletown, and a committee from that Lodge consisting of Brothers Springer, Apple, Pollock and Smith attended a meeting at Warwick and assisted in the Initiation Ceremonies. I believe these men will make good. They are all aggressive young fellows, and with a little coaching from Brothers Rooney and Cooney, the two old guards there, the time will come shortly when it will be a case of no card, no work, at Warwick.

I went from Warwick to Maybrook, N. Y., to try and straighten out the men employed at the C. N. E. roundhouse. There are five boiler makers here, and only one with a card. This is a point on the New York, New Haven & Hartford System. I had a little meeting in the roundhouse Sunday afternoon, and I don't think it will be any trouble to get these men, as they are anxious to straighten out. I didn't have time to wait over until they got paid, so I wrote Brother Apple at Middletown to look after them.

Before leaving Middletown I attended a conference arranged by the O. and W. Federation Officers between Superintendent Flory, Brother Harvey Brown of the Machinists, myself, and a Federation Committee, for the purpose of taking up a grievance regarding a violation of our Agreement by Master Mechanic Barry, at Mayfield, Pa. Mr. Barry is a new man on the job, and like all new men, he has a lot of new ideas, one being that he was going to do away with all overtime and cut down the expense. He was going to take advantage of some loopholes he thought he saw in our agreement, and posted a notice Jan. 17, or 18, assigning a machinist, a boiler maker and a blacksmith, together with their helpers, to a ten-hour a day basis. This we claimed to be a violation of the Agreement, as there had been a notice posted previous to that stating that the shop time would be five eight-hour days. It was decided by our committee to allow Brother Brown to handle the case, as he was more familiar with it than the rest of us, and I am glad to be able to report that he succeeded in convincing Mr. Flory that it was a direct violation of the Agreement. We not only had the practice stopped, but also succeeded in getting five hours overtime (according to the Agreement) for every hour and thirty minutes these men worked over eight hours since the time Mr. Barry hung up his second notice.

From Maybrook I came to Pottsville, under instructions from President Franklin, and am now working on the toughest proposition I have had to handle in many moons, but hope to be able in my next report to show a good healthy gain here.

This concludes my report to date, but before closing I would like to extend my sincere thanks to Brothers Rooney and Grant for the assistance they gave me at Warwick and Kingston. Our success in Warwick was due to the efforts put forth by Brother Pat

Rooney more than to anything else. His time and his money were spent without stint in an effort to assist in organizing this shop, and it was no fault of Brother Grant's that we did not succeed in Kingston.

Respectfully submitted,

CHAS. F. SCOTT,
International Deputy Organizer.

Winnipeg, Man., Can.

Dear Sir and Bro.:

At the regular convention of District No. 30, held in Winnipeg last week, the following resolutions were unanimously passed:

Resolved, That the delegates present representing District No. 30, in due session, go on record as desiring a free discussion in the pages of the Journal, whether it be re-amalgamation of the Metal Trades or any other question relating to the welfare of the Brotherhood, without undue interference from International Officers with the freedom of the discussion, and that this resolution be forwarded for publication in the pages of the Journal.

I may say this resolution was prompted by the report of delegates of Lodge No. 126 that a resolution of their lodge had been unduly shelved by you, on the grounds that President Franklin must be given an opportunity to reply to it, (before it has appeared in the Journal) and it was felt very strongly that President Franklin should reply to it after it has appeared, and not unduly prejudice the consideration of it by its initial appearance being accompanied by a counter blast by President Franklin. This is the liberty of the press as understood on this side of the line.

With best wishes, I am

Yours Fraternally,

GEO. F. CHADBURN,
Secretary-Treasurer Dist. No. 30.

A Note from the Editor.

In answer to the above resolution, the Editor desires to say our constitution contains laws for his guidance and regulating the policy of the Journal, which must govern in this matter, regardless of the wish of any of our members, and those laws places a limitation upon discussions and specifically prescribes certain subjects that may not be brought up for discussion. We believe this limitation is wise and in consonance with the very form of our organization, for the trade union movement is based upon a neutral and limited platform of principles upon which all who desire to join in an economic movement for their betterment may stand, regardless of their political or religious affiliations or beliefs. One of the first requisites for its success is unity, and anything that would tend to cause dissensions should be avoided. To allow an unlimited discussion of any and every subject in the Journal, many of which would be at variance with the trade union movement, would soon cause dissensions and therefore should be avoided.

In reference to the communication from Lodge No. 126, it consisted of a criticism of

the Executive Council of our Organization, and in the opinion of the Editor, common courtesy to the men selected to guide our organization as well as loyalty to same, demanded that a representative of the Executive Council be given an opportunity to reply to the article in the same issue in which it appeared. The article and President Franklin's reply to same appears in this issue.—The Editor.

Livingston, Mont.

Dear Sir and Bro.:

I write this for publication in our Journal to explain why Lodge No. 123 started the referendum, published in this issue, to put the Grand President's salary where it was before the San Francisco Convention.

Now I shall endeavor to be fair and just, and abuse no one, but I insist on my right as a member to the use of our Journal to expose what hundreds of our members are dissatisfied with, and it must be rectified if this organization is to endure. The conditions under which the salary was raised is well understood by all who watched the proceedings of that Convention. To begin with, the Convention did not have delegates from over one-half of the Locals in good standing, and several Locals were represented by Grand Lodge Officers who drew their regular pay from the Grand Treasury and was no expense to the Locals they represented.

At this time hundreds of men were out of work, working short time, or on strike. At this time our General fund was nearly exhausted, even after the Grand President had laid off the Deputy Organizers and all but one of the Grand Vice-Presidents for three months because he had used the transportation fund to pay salaries and expenses and had to get the money back, hence no organizers at work when they were badly needed. Yet, in the face of these facts, our Grand President, on the eighth day of the Convention made a speech favoring the increase, and he a candidate for reelection. Well, I should call it immodest at least; we all know that times are worse now than then, strike benefits have been stopped on struck roads and new strikes called with at least 20 per cent of the members idle and over 50 per cent of the rest on short time.

Now, as to the increase being unwarranted, I think the above facts prove that, if it does not compare the earnings of the average Brother with it. I believe we should pay our Grand President as much as we can afford and I believe we were doing so before the raise when you consider his expenses are paid while away from Kansas City, and note also that his hotel bills are not kept to the three dollars per day (\$3.00) but he often charged \$3.50. His own statements of expenses will prove that and it is illegal, as he is not entitled to any more than our Vice-Presidents, and it looks bad to the Boomer riding the side door, or the striker whose benefits are stopped or the striker working short hours and trying to keep his

family from actual want and keeps up his dues, to see our officials so swelled up with false pride, that they think they must imitate the example of representatives of billion dollar corporations in order to do the work they are elected to do. This is wholly wrong and the billion dollar men do not expect it and know we cannot afford it, but what do they care, the more we spend that way the less we have to fight them with.

This vote will show if the membership would have granted that raise by referendum.

Now the unpleasant part, unpleasant to me you may be sure, but some diseases require bitter medicine; the machine controlled Convention read the minutes of that convention, notice the personality of many of the delegates, harken to the voice of First Vice-President Hinzman, "The idea of one man appointing a committee and so forming a machine is ridiculous." How else is a machine made and maintained but by one man power and subservant helpers? Again harken to Bro. Hinzman, "The rank and file are not competent to elect committees to act on these matters." Is that not Machine Politics? I contend the members of the Brotherhood are competent to intelligently handle any question that pertains to their welfare. We hear too much of this bombastic mouthing, on par with Kaiser Wilhelm's "Me and God." We common dubs may be a little off sometimes, but the Divinely appointed also makes mistakes. Now, if the members want this amendment to pass, see that it is endorsed by your local at your next meeting. Don't vote for it if you think the raise honestly obtained and the wish of the majority. Now, you will hear the beneficiaries of the Machine rule howl about this, and we may expect to hear these Deputy Grand Organizers, Business Agents and Vice-Presidents making very plausible arguments against it, saying we are setting a bad example by cutting pay, also the cost of the referendum will be more than the money saved for years, and the facts that some other organizations are paying more than we are to their Executive heads. This, I hold is a poor argument. If a man who cannot afford it wishes an automobile, and sees fit to mortgage his home to get one, I am not compelled to do the same to be in style. We are paying higher dues than most of the Brotherhoods who pay the fancy salaries, but we are not banded together to see who can pay the highest salary, but to better our conditions and pay the Brother who does our business for us a fair wage. There is one thing sure, this petty graft must be cut out. I see that the officials, some of them, must take a Pullman to ride 15 or 25 miles, and we pay it, the small sum of 45 cents, 50 cents, 75 cents. I say Brothers, take a day coach on those short hauls and remember the men who pay the fare for you are freezing and hungry, riding box cars and hoping there is a pie card at the next Terminal.

Now, I trust this will be received in the same spirit it is written, and vote your convictions; if we are defeated, well and good, but we are determined to have a try for what we consider justice, equal rights for all, special privileges for none.

Fraternally yours,

C. J. MAES,
Of Lodge No. 123.

CARD OF THANKS.

Oswego, N. Y.

Dear Sir:

I, Mrs. Mary Anna Ryan, wish to give my heartfelt thanks to the Brotherhood of Boilermakers, Iron Shipbuilders and Helpers, especially to International President Franklin and Secretary-Treasurer Reine-meyer, for their kindness in settling the death benefit of my deceased husband, the late John L. Ryan.

Wishing the best of success for your Organization and all its members, I am

Respectfully yours,

MRS. MARY ANNA RYAN,
East 8th St.

A WASTE BASKET OF STUFF.

Pawhuska, Okla.

Dear Sir:

Incompetent Boiler Inspectors of Federal Boiler Law. I note under head of our gray-headed second vice-president Billy Nolan's report, February Journal—give it to Billy for coming out with just as he thinks and writes. Since this law has been in effect, I have had experience with these paper Boiler Inspectors from Foremanship to box car riding. Now, the question is, how can experienced men of 25 to 30 years at the Boiler making business tell conditions of boilers the way the Paper Federal Inspectors inspect boilers. Example of paper inspectors I have come in contact with are, they see locomotives standing on side track ready for call, steam, fire, coal, oil and all egt. for road, this paper inspector will walk over like a king, pull out a big \$1.50 electric auto trouble lamp, look at all tel-tale bolts, then the blow-off cock springs up in cab, try water glass, left injector, then right side, try gauge cocks (one leaks) lubricator (no shield) right injector (packing nut leaks) crawls down, stands off, see if any holes in stack, also if number plate is on straight, ties engine up until work is done—(that's No. 1). Never look in fire-box—forgets it; now he goes to another engine (fooled by a coat of good black paint) same as No. 1, but ties Eng. up account of cylinder head leaks and machinist has to put in 4 7/8-in.x3-in. standard thread, studs; at same time this engine has a crack from bottom flue-hole to 1—stay bolt of mudring and flues are in very bad condition, still boiler is O. K. Now, he has inspected two engines in twenty-five minutes, almost before an experienced boiler maker can find his inspecting hammer and light. Now, he comes to back shop, just ready to test pair 1/2 side sheets—pressure is up, he sticks his head in door, also that

\$1.50 auto trouble light, looks down left back corner, says to boilermaker what is leaking, (Boilermaker wise) says nothing, is that not water leaking out some place. If he had been boilermaker, not out of paper, why not dart under mudring instead of crawling upon deck to look in fire-door? Well, when this pressure was on 30 old bolts break by the local inspector's hammer and this paper boilermaker was not competent enough to find them after pressure and water was out of boiler; same time he makes out report on Government form, Boiler O. K., with 30 broken bolts found later by local inspector. Now, this paper Boiler Inspector just has to be done away with; we want practical men that cannot inspect 15 to 50 boilers in one day of 8 hours.

Now, this road did not, (when I was working there) have enough boiler makers on system to do running repair and fire boxes and engines were in such condition they could not handle the tonnage they were classed in, but all were in fine shape by the paper Federal Boiler Inspector's report, and of course his knowledge, I have seen cracks in crown sheet from 3 to 8 inches long, he never even found them; at the same time I am writing this, just as well give local Inspectors a rap.

Local inspector is as much to blame for conditions of working in shops as any—panic has hit this, supposed free country—now some will say "Why are we to blame?" You local Inspectors with knowledge, experience and gray hairs—put your name under others right in cab that the boiler is O. K., and so many bolts renewed, at same time, you don't condemn that engine for a crack 1 to 24 inches long or mudring corners eaten completely away, cracked all over fire-box, also cracks in back head

flange that blows to the coal; no you calk them up, laugh and say let the other fellow do it, afraid of your job. Now, the only way we are going to be able to get you one of these Federal Inspector's jobs is for all to visit your senator, get his personal interview, if he does not bring it up to get those paper inspectors out, let us, after this paper guy gets done, inspect this boiler, prefer charges against him for incompetent inspection for this certain engine or boiler; tha tis our only relief from present, as I had a personal interview with one of the leading senators regarding these Paper Inspectors, and he outright told me it would have to come fro man appointed committee, from senators, before he would even mention it on the floor.

Now, I have laid down the boilermaker's hammer, but not my card; am in automobile business, and if I ever pick up another hammer in boiler shop I expect to try my motto if I do get tied up with our supposed free government laws, but I cannot get in any worse than some of the committees I have been on; also I am well known by Grand Lodge officers as well as west of Mississippi. Our past President Wm. Taft could not appoint some shoemaker for Chief Inspector, also senators could not of had chief to appoint his republican friend, as the examination that was taken did not amount to the paper it was written on.

Hoping this will be in Journal and all my old-time Boilermaker friends will see and read same, also your local inspectors try and take a whack at me; I am open for all argument on same.

Wishing the Grand Lodge success, I remain

Yours fraternally,

J. F. WRIGHTMAN.

A Compilation of Labor News.

BY THE A. F. OF L. NEWS SERVICE.

HATTERS PETITION CONGRESS FOR RELIEF.

Washington.—On Wednesday the five United States Representatives from Connecticut each presented a petition to Congress asking for an appropriation to relieve the petitioners from the award of damages made by the court in the case of D. E. Loewe, hat manufacturer of Danbury, against them. The petition recites the history of the controversy and the suit, in all its phases through the courts, and also recounts the general understanding that the Sherman Anti-Trust Law should not have been held to apply to the voluntary organizations of the working people, and that the courts did so hold, and that under the interpretation of the Sherman Anti-Trust Law the hatters of Danbury were mulcted in damages to the sum of \$252,000, with interests and costs, amounting to nearly \$300,000. The petition sets

forth that either the United States Congress in enacting the Sherman Anti-Trust Law erred in failing to make its meaning clear, insofar as that the act was not to be applied to the normal activities of the organizations of labor, or that the courts erred in interpreting the law that it did so apply. And that in either event Congress should make an appropriation to meet the award made by the court and relieve the 161 petitioners who otherwise would have their small savings and investment in humble homes confiscated to satisfy the judgment. The petitioners are the survivors of the 243 who were originally sued, and all of them are of far advanced age.

The United States of America.

To the Honorable Senators and Representatives of the States comprising the United States, in Congress Assembled:

We, the subscribers, residents and citi-

zens of the state and district of Connecticut, respectfully represent:

That we are journeymen hatters and for many years have been members of local associations of hatters; associations formed not for profit, but for mutual protection and advancement; associations of which the membership are justly proud for the reason, among other, that their existence in this country dates back to the period of the Revolution, at which time they were known as "Hatters' Guilds," and by virtue of membership in such associations we have become members of the United Hatters of North America. That your petitioners, the subscribers thereto, are not officers of the United Hatters' Association, or of the local unions of which we are members. Indeed, many of us, by reason of advanced age, are exempt from attending meetings and payment of dues. Nor have anyone of us taken any part, either directly or indirectly, in the doing of the several acts for which we have been cast in judgment in the sum of over a quarter of a million of dollars and under which the judgment-creditor will now take the little savings resulting from a lifetime of work and frugality, a large part consisting of the humble homes in which we have hoped to pass our declining years. The statute upon which has been rested the claim of right to a judgment against us is the so-called Sherman Act, passed by your honorable body and approved on the 2d day of July, 1890, and entitled: "An Act to Protect Trade and Commerce Against Unlawful Restraint and Monopolies."

We are informed that said act was not designed or intended to apply to or affect labor organizations or combinations of working men, and this was stated repeatedly in the discussion of the measure in and by your honorable body prior to its enactment into law, and neither the subscribers nor any other persons had any knowledge that the law could be held to apply to the normal acts of labor organizations until the question had been submitted to and decided by the Supreme Court of the United States, the matter coming to said supreme court from the decision of the trial judge by whom, as a question of law, it was decided that the law did not apply to associations of working men.

Nevertheless, in an action brought by D. E. Loewe and another in September, 1903, against your petitioners, and a number of others, many of whom have since deceased, the plaintiffs have recovered judgment, not only for the full amount of damages sustained, but for a sum which, in the aggregate, is three times the amount of the damages actually sustained by the plaintiffs. The theory of the action is that the defendants conspired together to restrain the interstate trade and commerce of the plaintiffs. The methods employed to that end, it is charged, were (1) a strike by which the union employes of plaintiffs quit work. It is not pretended that the strike was not fully authorized by the law of Connecticut,

or that a single act was committed by any one of the strikers which was not lawful under the law of that state. Indeed, the strikers never sought to even discourage anyone from entering the employ of the plaintiffs. On the contrary, they advised non-union workmen to continue the work. All the strikers did was to go away, never to return. Moreover, not one of your petitioners was an employe of the plaintiffs.

(2) It is further alleged in the complaint and proved that for a number of years prior to the acts complained of the United Hatters' Association had agents upon the road urging the purchase of hats bearing the union label. But this was not illegal. Indeed, sound public policy not only encouraged, but authorized its use, as is shown by the fact that the statutes of forty-one states permit the use of the union label, and the courts protect it from the frauds perpetrated by those who would advantage themselves by the popularity of the label. The theory of the plaintiffs is that, notwithstanding the sanction of the law, the union label can be, and is made an effective instrument of boycott. As it happens in the case a jury has been encouraged by the courts to find that a strike lawfully conducted under the laws of the state of Connecticut, and the use of the union label, and of agents in other states where it is perfectly lawful to do so, together constitute a restraint of the plaintiffs' interstate trade and commerce. Assuming, as we must, now that the court has spoken, that these perfectly lawful acts constituted an unlawful conspiracy to restrain the interstate trade and commerce of the plaintiffs within the intent and meaning of the Sherman Anti-Trust Law, nevertheless, we humbly invite your attention to the fact that we, your petitioners, had no lot or part whatsoever in the doing of any of these things to which reference has been briefly made. We repeat, no one of us was in the employ of Loewe & Co., but were employed by other hat manufacturers, some in other towns than Danbury; no one of us was consulted about it by anyone, officer or employe; no one of us, by word or deed, sought to bring about or encourage the strike; no one of us was an agent on the road urging the use of the hatters' label; nor did he have aught to do with the sending of agents upon the road, nor were we familiar with the work of the agents, and if there were any illegal acts performed, we had no knowledge of it.

Indeed, we were hardworking employes who had been frugal in preserving as much as possible of our earnings for the closing days of our lives. Those savings have been invested, from time to time, in our humble homes.

When the action above referred to was brought, it was commenced against each one of us by the attachment of our several homes, and in the instance where a little savings bank account had been created, in addition to the home, such account was attached. In other words, the selection of

the defendants in this action, which was determined by the counsel for the American Anti-Boycott Society, who were also counsel for the plaintiffs, was based on the ownership of property and not on conduct from which the plaintiffs claim to have suffered injury. Each and everyone of the 9,000 members of the Hatters' Association, wherever over the United States they were residing and having property, could have been selected as defendants upon precisely the same grounds as your petitioners;

That said Sherman Act was not designed or intended to apply to or affect labor organizations or combinations of working men, and this was stated repeatedly in the discussion of the measure in and by your honorable body prior to its enactment into law, and neither the subscribers nor any other person had any knowledge that the law could be held to apply to the normal acts of labor organizations until the question had been submitted to and decided by the Supreme Court of the United States, the matter coming to said supreme court from the decision of the trial judge by whom, as a question of law, it was decided that the law did not apply to associations of working men;

That through the construction and interpretation given to said law by said supreme court a condition has been created and now exists which was not contemplated or intended when said law was framed and enacted, in that labor organizations have been held amenable thereto and the individual members thereof have been subjected to the penalty of triple damages thereby provided;

That the condition above mentioned has grown out of a certain action brought by D. E. Loewe and another, in September, 1903, under the said act, against the subscribers, and a number of others who have since deceased, in which action, the homes and bank accounts of the defendants were attached and held to respond to any possible judgment recovered in said action;

That the homes and bank accounts so attached were the results of work and savings and accumulations of many years spent by the defendants in their occupations as journeymen hatters before the act referred to had been conceived or enacted, and the efforts and accomplishments of their entire lives were affected by such attachment and possible judgment;

That at the time said suit was commenced and said attachments made, the defendants, in many instances, were already old men who had exhausted their earning capacity, and since that time, which is almost twelve years ago, many others of the defendants have ceased to have earning capacity or powers, and of the original defendants, numbering 243, to the number of 82 have passed away, leaving widows and children, whose only inheritance is the little estate of the deceased defendants, incumbered by the burden of said attachment;

That during the period mentioned in the complaint in said action the defendants

were engaged in earning the means of providing for themselves and their families, and had no knowledge that they or the organization of which they were members, or the officers thereof, had done or were doing any act or acts in violation of the Sherman Anti-Trust Law, or of any other law;

That by reason of the decision of the supreme court that the act referred to covered the actions of labor organizations and their members, a judgment has been entered against the subscribers in the action above mentioned and in favor of said D. E. Loewe and another for the recovery of two hundred and fifty-two thousand dollars (\$252,000) and interest and costs, and said judgment and costs, if satisfied by the defendants, must be satisfied through the loss of their homes and bank accounts, and the reducing of many of them and possibly the widows and children of deceased defendants to the position practically of paupers, with the probable consequence of throwing upon the state the burden of their support;

That this situation is due to the construction of the aforesaid Sherman Anti-Trust Law by the supreme court, in giving to it the not intended effect of applying to labor organizations and in not limiting its application to combinations and monopolies by capital and capitalists, as was intended by your honorable body.

That such construction was made possible through unfortunate phraseology in drafting said act, and by the misconception of its scope and breadth; and hardship has thereby been brought upon the subscribers;

That your honorable body enacted a law, approved by the President, October 15, 1914, known as "An Act to Supplement Existing Laws Against Unlawful Restraints and Monopolies, and for Other Purposes," and commonly known as the Clayton Anti-Trust Law, and by the provisions of which labor organizations are exempted from the operation and effect of all anti-trust laws, and such organizations are now permitted to do the things for which, under the act hereinbefore referred to, the supreme court held them and their members to be liable; and said Clayton law now provides specifically for that which was thought and intended to have been provided, though indirectly, in the Sherman Anti-Trust Law, and inferentially vindicates the belief of the defendants, and of the members of the labor organizations generally, that they were intended to be and were exempt from the effect of said act;

That from the hardship brought upon the subscribers through the construction placed on said Sherman Anti-Trust Law by the supreme court, and the loss of their homes and bank accounts through the satisfaction of said judgments, and the evil consequences resulting therefrom, the subscribers have no recourse, no source to which they can look for relief, other than your honorable body;

Wherefore, the subscribers humbly petition your honorable body to take such action

as may be necessary and proper to appropriate from the funds and revenues of the government such a sum of such sums of money as may be required to liquidate and satisfy said judgment, and to relieve the subscribers from the unintended and unjust effect of said Sherman Anti-Trust Law and the unexpected construction given thereto;

We respectfully urge that for obvious reasons your honorable body take immediate action, if in your judgment the subscribers should be relieved, as prayed for in this petition, and as in duty bound, your petitioners will ever pray.

(Signed)

LIABILITY LAW TO STAND.

Columbus, Ohio.—Insurance interests in this state, working through the Ohio Equity Association, have been defeated in their first attempt to have the legislature change the present compensation and liability law by allowing liability insurance companies to operate in the state. The amendment was virtually killed when the house of representatives, by a vote of 74 to 25, accepted the report of its labor committee to postpone the bill indefinitely. The present law does not permit the employer to insure with a private insurance company against liability for accidents to employes. Manufacturers and trade unionists are acting jointly to repel the effort to modify the present law. It is agreed that the present system should be permitted to work experimentally for at least two years.

HOLDS LIFE CHEAP.

Royalton, Ill.—It is stated that the coal company at this place, where fifty-two miners' lives were recently lost by an explosion, has offered \$25,000 for a settlement in full. This is less than \$500 for each of the lives lost. Officers of the State Federation of Labor make this comment on the company's offer:

"This demonstrates most clearly the need for a compulsory compensation law in Illinois. Even under our present unsatisfactory law, if the company had been operating under its provisions, the widows and orphans would have received \$1,500 each, immediately, at the time when they needed it most. The chances are if the women and children collect more under the liability law than the company now offers, it will be years before they get it."

TUBERCULOSIS DECREASES.

Washington.—Deaths from tuberculosis are decreasing, while those from cancer are increasing, says the United States census bureau, in a report just issued. The state of Washington has the lowest death rate from all causes, and New Hampshire has the highest. Suicides decreased in 1913, as compared with 1912. The death rate from tuberculosis declined from 149.5 per 100,000 population in 1912 to 147.6 in 1913. Deaths from cancer rose from 63 per 100,000 in 1910 to 78.9 in 1913.

Automobile accidents for the year caused 2,488 deaths, while 2,921 were killed by horses and in accidents caused by other vehicles, principally those horse drawn.

WOULD RAISE WAGES.

Boston.—Prof. Fisher, of Yale University, told an arbitration board that is considering wage demands of the Bay Street Railway

Company employes that even if a street railway company was suffering under financial stress, and it was necessary to discontinue certain trips, the company should not hesitate to increase the wages of its employes to meet the new conditions because of the increased cost of living. He also said that the working day is too long, both from the standpoint of the employer and the employe, and, in the case of a railroad, from the standpoint of the public as well.

VOTE FOR SUFFRAGE.

Harrisburg, Pa.—By a vote of 130 to 71 the house of representatives passed the resolution proposing an amendment to the Pennsylvania constitution to give women the ballot. If the senate concurs, it will be submitted to the voters next November.

UNIONISTS STATE POSITION.

Jefferson City, Mo.—For the purpose of refuting claims made by defenders of the convict leasing system in this state, that unionists are not a unit on the question, officers of the organized workers have issued the following statement for the benefit of legislators:

"We are, first of all, unalterably opposed to the use of the state prisoners by private contractors for their personal gain. We favor the use of the convicts by the state manufacturing such things as are used by the institutions and political subdivisions. The state has a perfect right to pass a law compelling its municipalities to buy their equipment from the state. If the products of the state prison must be sold in the open market, we would a thousand times rather that the state should manufacture and sell the products and apply a part of the profits to the upkeep of the innocent dependents of the unfortunate prisoner.

"Believing that the intent and purpose of the state prison should be to reform its delinquent subjects, we are strongly in favor of classifying the prisoners, which would prevent those who have committed their first offense coming into contact with the hardened criminals.

"As a beginning of the final abolition of the leasing system, we would respectfully suggest that provision be made for the establishment of a broom factory, a brick plant, shoe and clothing factory, also a factory for the manufacture of school and other furniture used by the state, counties and municipalities. We also heartily indorse the governor's recommendation regarding the purchase of a 1,000-acre farm and the enlarging of the binding twine factory."

PROTEST POSTOFFICE CUTS.

Washington.—In protest against salary reductions of postal clerks and letter carriers, Representative Buchanan, member of the House labor group, has introduced a resolution asking the Postmaster General to inform Congress why the economy plan of the

department is directed against the low-salaried men in the ranks, while the officials with large salaries are unmolested.

The resolution has the indorsement of the National Federation of Postoffice Clerks, affiliated to the American Federation of Labor. In explanation of the need of a congressional investigation into the postal department's method of reducing expenses, Thos. F. Flaherty, legislative representative of the postoffice clerks, said:

"The clerks and carriers are as loyal and as self-sacrificing as any body of men. If the needs of the service demand retrenchment, we will stand our proportionate share, but we object to having the efficient men in the ranks, the hard-working, plodding clerk and carrier, suffer a 20 per cent wage reduction on the plea of economy, while no effort is made to shave the princely salaries of the departmental and service political favorites. If salary reductions are necessary, let them be more equally distributed.

"The situation in Chicago is typical of the entire service. Four hundred clerks and carriers were reduced \$100 and \$200 because of falling revenues, caused largely by placing the catalogues of the mail order concerns into the parcel post classification, which means a \$4,000,000 annual loss to the Postoffice Department. The already sorely tried employes must now suffer wage reductions to make up the \$4,000,000 gift to the mail order houses."

LOW WAGE ADVOCATES SCORED.

Phoenix, Ariz.—In his message to the state legislature, Governor Hunt makes this reference to opponents of the initiative law providing for the employment of only 20 per cent of aliens, which has been annulled by a federal court:

"Perhaps, in view of what has transpired, as a result of the justifiable perturbation of Arizona's workingmen over a denial of their right to legitimate employment, the few individuals who have been so unworthily eager to debase the state's citizenship by the introduction of such foreign labor elements, under conditions of employment which would not be tolerated by an intelligent workman, will draw such observations as may be the precursor of a more upright policy of hiring workers, and of keeping down the costs of mine and railroad operation. At least, it is logical to conclude that such employers as continue to fly in the face of public sentiment will reap the highest calumny and general condemnation which they have merited so completely."

ARE APPLYING CO-OP. THEORY.

Gillespie, Ill.—The Co-operative Society of this place has just issued its seventh quarterly report. The society has declared a 10 per cent dividend on the basis of the purchases of the members. This is about its average quarterly dividend, and means that in the year and nine months of its existence each member of the society has been

paid back 70 per cent of his average three months' grocery and coal bills, equivalent to supplies for over two full months, besides, of course, getting full weight and measure and the best quality of goods.

Odin, Ill.—The local union of mine workers has started a co-operative movement and equipped a grocery and supply store in the best possible manner. It is stated these workers have succeeded in bringing about a very substantial reduction in the cost of living.

Harrisburg, Ill.—The co-operative store has issued a report in which the assets exceed the liabilities to the amount of \$2,778.45. It is announced that a uniform rate of 5 per cent interest will be paid on all paid-up shares.

Farmington, Ill.—The local co-operative society reports substantial progress, and all affairs are in a satisfactory condition.

VOTE INVESTIGATION OF JUDGE DAYTON.

Washington.—The House has unanimously adopted a resolution from its judiciary committee providing for an investigation by the committee of charges against Federal Judge Dayton, of the northern district of West Virginia.

The charges were filed several months ago by Representative Neely, of that state, and provided that the committee inquire whether Judge Dayton, among other things, "had shown marked favoritism to certain corporations having extensive litigation in his court," and "whether he had lent his services as judge to the coal operators of West Virginia by improperly issuing injunctions; whether he has shown hatred and bitterness toward miners on trial in his court; whether he has used his office as judge to discourage and prevent said miners from exercising their lawful right to organize and peaceably assemble under the laws of the United States and the state of West Virginia."

After investigating the charges, the committee reported an investigation was warranted, and in this the House has concurred.

Judge Dayton has attracted nation-wide attention because of labor injunctions which have been issued from his court.

STATE POLICE BILL CERTAIN.

Troy, N. Y.—Says the Legislature Labor News of this city:

"Governor Whitman has agreed to the terms of a bill to create a mounted state police force, to consist for the first year of two troops of 119 officers and men each, to be raised to four troops by 1916. These officers are to patrol the state, and may make arrests with or without warrants. Four hundred and fifty thousand dollars is provided to establish the department.

"The Pennsylvania state police only number 225.

"According to the plan, the members of the constabulary will patrol the highways of the state. They will act in small groups, one always being near a telephone, so the force can be reached immediately in any part of the state should need for them arise.

"The State Federation of Labor is on record in opposition to a state police force, and the local unions of the state are sending in strong letters of opposition."

"PHOSSY JAW" OUTLAWED.

"Phossy jaw," the occupational match-workers' disease, has been outlawed now in every part of America, due primarily to the efforts of the American Federation of Labor in championing the Esch bill, which passed the Sixty-second Congress. Shortly after Mexico issued an administrative order against it; and recently the Canadian parliament wiped the continent clean.

ACCIDENT TOLL GREATEST.

Washington.—That death's toll in war is less than the number of persons killed in preventable accidents in the United States each year, and that a Washington child runs a greater chance of being killed on the streets by a vehicle than he does of dying of diphtheria, scarlet fever or smallpox were two of the points emphasized by William F. Peabody, president of the Washington Safety First Association, in an address in this city.

"As many people were killed in New York during the last three years in street accidents as were killed during the entire seven years of the revolutionary war," said Mr. Peabody. "In the United States in one year two-thirds as many people have been killed in accidents, that could have been averted through the application of 'safety first' principles, as were killed in the entire Civil War."

Among Our Exchanges.

THE COMMUNITY'S DUTY TO THE POOR.

From a Private Letter by Frederick C. Howe, Commissioner of Immigration.

I am very glad to amplify what I said in Cleveland in reference to private organized charity. I do not believe in it; do not be-

lieve that organized society has any right to turn this most sacred of all functions over to any private agency. Even though it might have been justified fifty or a hundred years ago, it is no longer justified when industrial conditions make it impossible for the individual to control his work, own his tools, or create opportunity of any

kind. Charity is a social, not an individual burden, and society itself should maintain all of its relief agencies. Certainly it should maintain the most sacred of all, the investigation, care and maintenance of those least able to care for themselves. It should substitute municipal relief for private relief.

Further than that, I think it is an arrogant assumption for the rich to pass upon the worthiness or unworthiness of the poor. If anyone is to perform this function it ought to be the poor themselves. Christ was very loath to judge; and the judgments registered by organized charity through paid employes do as much to destroy the self-respect of the poor and make them feel that they are charity patients as anything I know.

I am speaking just as strongly as I can about this, because I feel just as strongly as a man could on this subject. I believe in a public police and health department, but I believe far more in a public relief department.

Further than this, we are, so far as I know, the only civilized people who sanction the idea that one class should be endowed officially with the right to look after another class. Foreign autocratic countries perform all their relief through public agencies.

I will even go farther. In my opinion private organized charity is an obstacle in the way of justice. If we had no such organizations men would think of fundamental reforms; they would think of ways and means to abolish the causes of poverty, rather than the consequences of it. I know of many instances where organized charity opposed practical movements, like motherhood pensions, minimum wages and housing reforms. Why? It seems rather hard to say it, but I believe it was because the class which administers charity is the class responsible for poverty. It is responsible through the unjust economic conditions which this class perpetuates. And it is the very halo which organized charity throws around itself that makes it doubly difficult for us to penetrate to the real cause of industrial injustice and put an end to it.

There is nothing radical in what I am saying. Practically all of the poor feel this way; they all feel that their self-respect is undermined every time they have to go to a charity organization society, and they only go to them as a last resort. And we have no right to require this of them. You, I, or anyone else maimed, injured and distressed by the injustice of present-day conditions have a right to go to our fellows, to the city, to the community, and demand that the community itself shall bear the costs of the community's own wrongs or of industry's wrongs, for the wreckage of society today is social; it is no longer personal.

In speaking thus directly, it is with no criticism of any individuals, or any lack of respect for individual men who are engaged in organized charity. It is the sys-

tem that I protest against, just as I protest against the system which permits bankers whom I respect to organize monopolies, or individual railroad men to exploit the community. As individuals I have respect for them, but I do not believe in the institutions which they, in an impersonal way, use for the exploitation of society.—The Public.

FIRST WEEK OF BOILER MAKERS' STRIKE ENDS WITH VERY FEW IMPORTANT DEVELOPMENTS NOTED.

Port Arthur, Jan. 28.—The past week of the strike, being also the first week, brings out only a very few changes of importance. The Petroleum Iron Works Company who have the contract for building stills and water boxes for the Texas Company, have again in Texas, as previously done in Oklahoma, hired scabs to take the places of union men now on strike. Only a few are available here, but the company is using every effort to secure them from other places. Several who went to work after the first few days of the strike came off the job when informed by our pickets that the job was on strike and they were scabbing on our members. While these men are employed by the company, there are none of them who are mechanics, and know nothing of the trade and they will be an expense to the company rather than a benefit, and what work they do will be of such inferior quality that this company will find that scabs doing mechanics' work under a scab foreman is very costly, indeed.

The Reeves Company up to this date have made no effort to cover the job here with scabs, and the job is still as it was left by our members. Regular strikers' meetings are being held every day and pickets are keeping both jobs covered at all times, and no man that goes to work on either job can say that he was not informed that the job was a scab job.

The situation in Oklahoma remains about the same, with the exception that the COMBINE have hired twenty-five more deputy sheriffs to guard their scabby jobs. The outlook for the second week of the strike is very bright, indeed, as the producers want the tanks built, and are willing to give a living wage and conditions and our members have informed these producers that we will build the work for them or anyone else that will pay the wages and give the conditions that we are asking of the combine.

It will only be a matter of time until the producer will get tired of waiting on these companies to build this work, and having what they are doing done in such a poor manner and they will take the work over themselves and give it to men who know how and will build this work in a satisfactory manner and get the work done in time so valuable or that is now going to waste will be saved.

Work on the cutting down job at the tank farm at Nederland pump station for the

Texas Company was declared unfair to our members by local No. 305, as this company is not employing any of our members, and is not giving the wages asked by our members for this class of work, and men are being worked nine hours a day, while the union hours are eight hours per day. Wages on this job as paid by the company at this time is \$3.50 and \$3.00 per day, while the scale asked by the union men for this work is \$4.50 flat for all men on the job with the exception of the foreman and second foreman.

Several men have already quit this job and the local members feel sure that others will be off the job before the week is out.

Government Lock Gates Being Built With Non-Union Labor.

The lock gates on the Sabine-Neches canal, being erected by the Chicago Bridge and Iron Works, is being done with non-union labor and at wages far below the wages paid union men. This scab company has a past record that is as corrupt in regard to wages as any coal mine operator. They were never known to run a union job or pay the prevailing scale of wages.

When this company was first known to have this contract, the secretary of Local No. 305, under instructions from the local, wrote several letters to the head office of this company with the endeavor to get this work for our members, and were informed that the work would be done by men shipped in here from Chicago, and at wages they were already being paid regardless of what the wages were here. Mr. T. F. Manley, who is the erector for this company, arrived in Port Arthur and this matter was taken up with him through a committee of the local and international vice-president, Joseph P. Ryan, and he informed the members that he was willing to pay the scale of wages asked by our members, and was also willing to give this work to our members, and that the work was not ready for erection, as the government did not have all of the concreting done on the supports for the gates, but that when the work did start that he would inform the representatives of the organization and place our members on the job. DID HE KEEP HIS WORD? NO. When this work was ready for erection he placed men on the job he had imported in here from Chicago, who he knew were not members of our organization and who would work under the scale of wages that were asked by our members. Every effort that could be brought to bear on this Mr. T. F. Hanley to have this work done with members of our organization was done, but he informed the committee to the effect that the company had sent him word to continue the work with the men he now has in his employ. He informed the members of No. 305 that he had full power over this job and then after promising them the work he deliberately turned and sent to Chicago for men to do this work for less wages than the members requested. Messages have been sent to our United States senator and

representatives to the effect that the government is giving government work to contracting companies who will not pay the prevailing scale of wages for work performed. When the government tax the American people for money to pay these bills SHOULD NOT THE AMERICAN CITIZENS receive the benefit of the work and receive white man's wages therefor?

It is a disgrace to the great American government that such contractors are allowed to have government work and work under such low conditions.

Our members are being advised everywhere of the action taken by this contracting company and its foreman, Mr. T. F. Hanley. These men coming from Chicago are taking the food from the mouths of our families and doing it for less wages than this work is being done for any place in the south. We ask you in all fairness to stay away from this job and to let it be known all over the United States that the United States government is giving government work to scab contractors. Such actions as these adopted by this company leaves a scar across the faces of the parties who gave the contract to them that will be remembered by every organized worker when they again apply for positions, and the Sabine-Neches lock gates will forever stand as a hideous vulture, and every ship that will in the future pass through its gates will know that it was the work of scabs.

We earnestly request our members and others to stay away from Port Arthur during this trouble. Lend us your support to defeat these firms who would lower wages and lengthen hours, and make peons out of American citizens.

(Signed) EXECUTIVE COMMITTEE,

Boiler Makers' and Helpers' Local No. 305.
—The Labor Dispatch, Galveston, Texas.

EMPLOYMENT BUREAU SHARKS.

Private employment bureaus in themselves offer the best reason for the establishment of the governmentally conducted bureau. The private bureaus have been charged with most every crime save murder—and in effect some of them have been guilty even of that, but about the meanest offense against humanity and decency is that known as "fee-splitting."

The private employment agency man enters into an agreement (tacit) with the foreman of a big plant employment hundreds of men. Under this agreement the employment agent provides a given number of men each month and then splits the fee that he takes from each man so provided, with the foreman of the plant. If the foreman has no positions open he promptly discharges enough men to make room for the new comers.

This process is repeated from month to month and the employment bureau man and the crooked foreman reap an handsome profit monthly.

If there could be a more devilish scheme

for preying upon the unfortunate than this scheme, we have yet to hear of it.

It is gratifying to know that many of the larger cities of the country have organized municipally controlled free employment bureaus. It is more than gratifying to know that it is now proposed to organize state and national employment bureaus.

The Labor Advocate does not hesitate to say that El Paso should have a free employment bureau and that it would be well for some of the candidates now in the field for local office to make known their views upon the subject.

We take it that the widespread establishment of governmentally controlled employment bureaus will go far toward solving the question of unemployment. It will undoubtedly help.—Labor Advocate, El Paso, Tex.

TIMBER FOR SMALL ARTICLES.

It is astonishing what an amount of timber is consumed in the making of such insignificant trifles as dowels, shuttles, etc. More than 800,000 board feet of lumber were used in New York State last year for wooden dowels alone, also more than 900,000 feet of hardwoods for shuttles, spools and bobbins; brushes and brooms consumed 1,500,000 feet; toys used nearly 3,000,000 board feet and handles of all kinds used up more than 6,000,000 board feet. Boxes and crating, for which low grade stock and short lengths are chiefly used, consumed 370,000,000 board feet, equal to about three-fifths of the total annual lumber cut in the state.—The Carpenters' Trade Journal.

THE ADVANTAGES OF HIGH DUES.

Power is necessary to influence. Power depends upon resources. This is true of the trade union as well as of every other organization. The labor organizations that have the greatest power to protect their members and the greatest influence in furthering the needs and the demands of their members are the labor organizations provided with ample, substantial financial resources.

There is only one way to accumulate organization funds—payment of adequate union dues. Organizations have found it a wise policy to increase low dues as rapidly as possible, because increased financial resources at their command give them increased prestige, increased ability to secure better wages and working conditions and increased ability to provide against threatened dangers. There is no investment a wage-earner can make that will bring him greater returns than his union dues. If dues to the union are increased proportionally as the union increases wages, the power of the union to promote and safeguard the interests of its members becomes increasingly effective.

The financial organization of a trade union must be based on sound business principles. Wildcat finances in trade unions will be no more reliable than wildcat banking invest-

ments. Money will not get into the union treasury by miracle or by the wishing process. The protection of a well-filled treasury is possible only for those who are willing to pay the price in dues, management, and foresight. The very existence of a sound financial organization constitutes a defense of its members. Power does not always have to be aggressively used in order to be effective—reserve power is often the most potent. Consciousness that they possess power puts moral courage and confidence into the workers, and it puts fear into the hearts of those who would wrong them. When power exists there is hesitancy to deny the possessors their rights or fair demands. The existence of the power of self-defense prevents many industrial struggles while the weak and the helpless are wronged with impunity.

As union dues are increased it is possible to extend the system of union benefits. These benefits supplement the wages earned and enable unionists to live better and more comfortably.

The views which we advance here have been repeatedly proved correct by the experiences of the different trade organizations. An article by John F. Tobin, President of the Boot and Shoe Workers' Union, published elsewhere in this issue, tells how the boot and shoe workers learned that they could not afford to remain a low-dues-paying organization, and of the cumulative effect of establishing a better financial system.

Labor organizations are constantly preaching the gospel of higher wages. What wages are to the individual, dues are to the organization. The ideal of the American Federation of Labor is to have each organization strong, competent to manage its affairs and to solve its own difficulties. While there is whole-souled sympathy and willingness to help fellow workers in their time of need, yet the best results for all workers can be obtained when each organization is free to protect and promote the rights and interests of its own members and to organize the yet unorganized.

But high dues should not be accompanied by high initiation fee. Indeed the initiation fee should be small, thereby inviting and making it possible for the yet unorganized to join the union and to make common cause with their fellow workers to secure the common welfare of all. High dues regularly paid will inevitably lead to greater self-reliance, mutual interdependence, unity, solidarity, fraternity and federation.—The American Federationist.

MIGHT BE EITHER.

He—Is that new place just opened on your street a tailor's shop or a public spooning parlor?

She—A spooning parlor? What do you mean?

He—Why, I noticed a sign in the window: "Hand Pressing Done Here."

News of General Interest.

HANDLING MERCHANDISE WITH SPIRAL CHUTES.

By Frank C. Perkins.

Gravity is now being utilized in large manufacturing plants to a remarkable extent for conveying products about the factories very largely without necessitating the uses of electric or other power. There is a combined installation of chutes and belts

utilized in a plant at Brooklyn, N. Y., which includes a gravity roller conveyor. While the gravity roller conveyor and power driven conveyors are largely used to advantage, the present article particularly deals with spiral chutes.

The value of a chute is largely dependent upon being built so as to control the speed of packages of various weights. The fol-

lowing memorandum of tests made by Butler Brothers, Jersey City, may be of interest, a 4-foot chute used, 12 feet in diameter:

Size of case, 45x17x16; weight, in pounds, 300; traveled the distance in 29 seconds.

Size of case, 34x11x16; weight, in pounds, 118; traveled the distance in 32 seconds.

Size of case, 26x24x15; weight, in pounds, 115; traveled the distance in 36 seconds.

and Fig. 2, show two forms of these spiral chutes and their simplicity of operation, and indicate the ease with which merchandise can be handled in this manner.

Another form of spiral chute has been installed at the plant of Noyes Bros. & Cutler, wholesale druggists, equipped with ball bearing gravity carriers of the Mathews type, for lowering boxes and barrels from

Same case, iron strapped, traveled the distance in 32 seconds.

Size of case, 28x24x20; weight, in pounds, 110; traveled the distance in 29 seconds.

Size of case, 37x20x4; weight, in pounds, 80; traveled the distance in 30 seconds.

Same case, iron strapped, traveled the distance in 30 seconds.

Size of case, 15x10x9; weight in pounds, 10; traveled the distance in 29 seconds.

Same case, iron strapped, traveled the distance in 30 seconds.

This spiral chute was of the concave bottom type, of galvanized steel, outside diameter, 12 feet, the width of trough being 48 inches, and the pitch 12 feet 9 inches, with a total perpendicular distance of test of 91 feet 9½ inches. The speed control is secured by the concave bed construction of the Haslett type, designed at Philadelphia, Pa.

The accompanying illustrations, Fig. 1

fourth and intervening floors to shipping room, as developed at St. Paul, Minn.

A novel gravity lumber carrier has also been developed. This carrier is designed to convey loose boards of any length, from eighteen inches upward, or two or more boards piled on top of each other. Constructed of solid steel, with center bar and two rows of ball bearing rollers, also of steel. Outer ends of rollers are set slightly ahead of inner ends, thus preventing boards from falling off.

Boards, loose or tied in bundles, cross arms, box shooks, wagon stock and dimension stuff can be handled quickly, effecting a great saving over old methods. It is the only device ever made which will handle these commodities satisfactorily. From three to five per cent fall is required and curves are reversible. It is made of 8-foot lengths and provided with steel adjustable supports.

WOMAN'S TRADE UNION LEAGUE CONVENTION CALL.

Chicago, Ill.

To All Affiliated Leagues, Affiliated Trade Union Organizations and Members—Greeting:

You are hereby advised that, in accordance with the vote of the fourth biennial convention of the National Women's Trade Union League of America, the first biennial convention will be held in New York City, N. Y., beginning Monday, June 7, 1915, at 10 A. M., and will continue in session from day to day until the business of the convention has been completed.

Representation.

The membership of the convention shall consist of the following:

The three officers and the other six members of the executive board, with one vote each.

Each local league shall be entitled to send one delegate with one vote for every 25 members or fraction thereof, up to 500 members, and after that one to every 50.

Each affiliated international union, trade union local, central labor body and state federation of labor shall be entitled to send one delegate with one vote.

Every other affiliated organization shall be entitled to send one delegate with one vote.

In order to encourage interest in forming local leagues, members at large shall be given voice, but with no vote.

Only those leagues and affiliated organizations whose annual dues shall have been fully paid up sixty days in advance of the national convention shall be entitled to vote at the convention.

Credentials.

Credentials in duplicate are inclosed. The original credentials must be given to the delegate-elect and the duplicate forwarded to the secretary, room 1644, 127 North Dearborn Street, Chicago, Ill., not later than April 7.

Purpose.—The facts of women in industry have everywhere to be met with increasing knowledge if we are to achieve an efficient industrial democracy in the United States.

The calamitous effects of the terrible European war are being felt in more or less degree in every civilized country. The United States is already suffering, through the dislocation of industry following upon the partial suspension of the world markets. The problem of unemployment is flinging us a sterner challenge, and this condition of workers idle brings into bold outline the effects of unorganized women in industry. The danger of women being used as underbidders in an increasing number of trades must be squarely faced. There is only one woman among the hundreds of thousands forced to earn a living by grim economic pressure who will refuse to take the place of a man for lower wages. This is the organized woman, who recognizes the fundamental necessity of standing with men in

the demand for equal pay for equal work.

And so the duty of the hour urgently demands that every affiliated organization be represented by its most experienced, thoughtful and faithful members, who will bring to this pressing question of the trade union organization of women a rallying spirit of courage, faith in the future and common sense.

Business.—The president will appoint the following committees from the delegates to assist in transacting the business of the convention:

Credentials, Rules and Order of Business, Organization, Resolutions, Legislation, Committee on Officers' Reports, Life and Labor, Education, Votes for Women, Union Label, Constitution, Special Committee on Training School for Women Organizers.

Accommodations.—The New York League will arrange for the reception and entertainment of delegates.

Note.—The place of meeting will be 43 East Twenty-second Street, headquarters of the New York League, and any further information regarding the convention or traveling arrangements for out-of-town delegates will be communicated in a later circular.

Fraternally,

MARGARET DRIUR ROBINS,
President.

S. M. FRANKLIN,
Secretary-Treasurer.

VALLEY OF WARS.

Washington.—The valley of the Meuse, extending through France, Belgium and Holland, up and down whose course 2,000 years of intermittent warfare has been waged, forms the subject of a statement given out by the National Geographic society.

Above every other valley, that of the Meuse has become a battlefield. At Liege, on the Meuse, the first great battle of the war broke forth, and the struggle blazed and seared all along the picturesque splendor of this wild, rugged-banked stream, directly southward through Belgium into France. According to the day by day dispatches, some of the most fierce efforts are still raging on its banks. Liege, Namur, Dinant, Givet, Sedan, Stenay, Verdun and St. Mihiel—each name recently become familiar to Americans—all lie along its course.

Channel for Flow of Armies.

Three countries share the Meuse. It rises in France, flows northward through Belgium, crosses the Dutch frontier, sweeps westward through Holland, and empties into the North sea. Its journey to the sea is one of 580 miles, of which 460 are navigable.

The valley of the Meuse for ages has been a channel for the ebb and flow of armies. It might be said to drain one vast, historic battlefield. Caesar pursued its path into the unknown, barbaric north. The wild Teutonic tribes pressed down between its banks toward the wealth of Rome. Christian Europe has been settling its differences

along the valley of the Meuse by force of arms down to the present day.

In the forest of the Ardennes, the Meuse flows through a country rich in romances of Charlemagne. Vinelands and hop-gardens lie further along its banks, and then it washes great industrial cities, gathering to itself the ashes, rust and acids of factory and furnace waste. Just before reaching the sea, the Meuse, here the Mass, divides, one branch flowing west, and the other mingling with the Rhine to empty past Rotterdam at the Hook of Holland.

Caused 800 People to Drown.

The camp of the Aduatucl described by Caesar is marked by a citadel on a hill between the Meuse and the Sambre, its largest tributary. At Dinant, Phillip the Good, Duke of Burgundy, is said to have caused 800 people to be drowned in its waters. But the river has long since forgotten the good duke's sprightly slaughter in a present time more stirring, more titanic and far more costly in human life.—The Milwaukee Journal.

WHO DUG THIS CANAL?

Arabistan lies at the head of the Persian gulf, its western boundary being the Shatel-Arab, the great river formed by the combined waters of the Tigris and Euphrates, the right bank of which is in Persian territory, while the left is in Turkish Arabia. Forty miles above where it flows into the Persian gulf the Shatel-Arab is joined by the Karun, and the town of Mohammerah stands at the junction of the two rivers, the former a clear, green stream, the latter thick and red. In ancient times the Karun flowed into the gulf and part of the river still runs along the old channel, but the main stream has been diverted, three miles above Mohammerah, into an artificial channel known geographically as the Haffar canal. It is impossible even to make a guess at the date of this wonderful work, not even a tradition remaining of the ruler whose near-sightedness realized the enormous advantage of joining up the two waterways. Alexander the Great has been suggested, but apparently for no other reason than that he is a convenient and likely person to credit with any ambitious enterprise, and that one of his many Alexandrias was built on the site of the present Mohammerah.—Wide World Magazine.

TERRIBLE OATH FOR PLUMBERS.

Torments Sworn for Violators of Alleged Trust's Secrets.

Des Moines.—An oath of the National Association of Master Plumbers of America containing the sentence, "May all the horrors of the damned be my portion when I retire at night," was declared by Joseph Hagen, Sioux City, to have received his signature, in his testimony at the trial of thirty-six master plumbers charged with violation of the Sherman law.

He was to suffer the "horrors of the

damned" in case he violated the rules of the organization, the witness said.

C. L. Piper, Morningside, Ia., for the government, testified that he had been put out of the association because he refused to go into "certain pools." He admitted on cross-examination that the protection of the association did not amount to a snap of the fingers.—The Milwaukee Journal.

THE CONDITIONS OF INDUSTRIAL ACCIDENTS.

The enactment of laws in various states on workmen's compensation for injuries has aroused increased interest in the statistics and physical and psychic conditions of industrial accidents. The total number of these accidents is almost appalling. The lowest estimate places the fatal accidents to adult workers in the United States at 35,000 a year, with an additional 1,250,000 non-fatal accidents. The Massachusetts Industrial Accident Board, on the other hand, placed the number of workers killed by accident yearly at 75,000, which apparently includes not only adults, but also workers of all ages, while the number of injured of the same classes was placed by this Massachusetts authority at 3,000,000 or over. An earthquake in a foreign country that kills half this number of persons and maims one-fifth of those injured in our United States industries is spoken of as catastrophic.

A greater proportion of accidents occur on Monday than on any other day of the week. Accidents are said to be due often to fatigue. As, after the day of rest on Sunday, workmen should be less fatigued than on other days, some other factor must be sought to explain this feature of the statistics. It has been suggested that the "blue Monday" accidents are really due to the fact that workmen take more liquor on Sunday and thus become unnerved and more liable to accidents during the following twenty-four hours. There is, perhaps, something in this contention, though it has been disputed. In the Massachusetts Industrial Accident Board Reports, in which the official figures are given, there is scarcely more than one-twentieth more accidents on Monday than on Tuesday, while Tuesday is not much above the average in the number of accidents reported for other days. Saturday, of course, shows a noteworthy reduction, because of the half holiday in some trades.

By far the larger number of accidents occur at about 10 a. m. and 3 p. m. This fact is confirmed by the reports of two state boards, Washington and Massachusetts. The tendency to speed up employment has been incriminated, as the predisposing condition for the occurrence of accidents. This desire comes over the workman when he is not yet fatigued, but has been employed for several hours. He starts the morning's work "cold," and as he warms to his work, the danger of mischance because of haste becomes greater. Just when the speeding up reaches a climax in the morning hours, most accidents happen. The same thing is true in

the afternoon. Workmen feel sluggish after their lunch, but after an hour of work warm up again, and by 3 o'clock they are doing their most rapid work, and are at the same time more subject to accident.

With regard to accidents among children, however, there is no hour of maximum. Accidents occur at all times, and they are comparatively much more frequent among children than adults. The United States Bureau of Labor reported that "there is clear evidence of great liability to accident on the part of children. Though employed in the less hazardous work, their rates steadily exceed those of the older co-workers, even when in that group are included the occupations of relatively high liability." This was said with regard to the Southern cotton mills, but the same thing is true of practically all industries in which children are employed.—American Medical Association Journal.

TUBERCULOSIS AND THE WORKING-MAN.

When one single disease, tuberculosis or consumption, causes one-third of all deaths among workmen between 15 and 45, and in certain dusty trades as high as one-half, it seems time that organized labor aroused itself from its apathy and proceeded to do something to down this plague.

The original purpose of the labor union and its predecessor, the trade guild, was protection from outside oppression and an endeavor through collective bargaining to lessen the grip of the employer upon the workingman. While a few unions, here and there, have recognized that there were deadly enemies within as well as without the union, most of the 2,000,000 and more men and women in the ranks of organized labor have never recognized tuberculosis as such a foe.

It is true that increased wages and improved working conditions have a vital effect upon the home-life and thus react favorably in the control of tuberculosis. It is also true that within the unions themselves, education and adequate care for every man or woman threatened with or attacked by this disease is needed. Eight-hour days, maximum wages and sanitary shops will not of themselves control the spread of tuberculosis. Until the individual workingman is taught such lessons as not to spit promiscuously about the shop, to sleep with his windows open, and to guard himself and his children by care of his body against the entrance of infection, consumption will continue to be unduly prevalent in the ranks of labor. Until opportunity is afforded for every man who thinks he has tuberculosis to get an examination free or at a price within reach of his means; and until hospital and sanatorium facilities are adequate to care for every afflicted case, the death rate from this disease will continue to be abnormally high.

Right here, the labor unions can fight the enemy within their ranks. This article and succeeding ones will offer some suggestion

as to methods. The first suggestion is to study the problem in your own ranks. Find out about tuberculosis in your trade and in your individual shop. For example, ask these three questions of yourself or your fellow workers and see what answers you get: (1) How many deaths from tuberculosis and from all other causes were there in your shop during this past year 1914? (2) How many members of your union are now on the sick list as a result of tuberculosis? (3) What peculiar trade or shop conditions, so far as you know, tend to predispose members of your union to tuberculosis? Note such things as dust, gases, fumes, dark rooms, bad ventilation, etc.

These questions will readily suggest others. By answering them you will get some appreciation of the tuberculosis problem as it relates to you.—From a circular issued by the National Association for the Study and Prevention of Tuberculosis.

AMONG OUR EXCHANGES.

The year of 1914 was a most trying one for every trade union, the I. M. U. of N. A. being no exception. Trade conditions were unfavorable when the year began, and there came no improvement as time passed. The year 1913 had not been a favorable one, for the record shows that 57,215 out-of-work stamps were issued, but last year the number increased to 143,337, which indicated that many weeks of idleness by individual members, and more than that number, as out-of-work stamps are not issued until after the first week of idleness, and some members, after receiving thirteen out-of-work stamps were still idle. This number of out-of-work stamps issued during 1914 represents a loss in revenue to the organization of \$57,334.80, and as Finance Metcalf points out, in his quarterly report, with this must be considered the sick and death benefits, which are paid out to members whose good was maintained through the use of out-of-work stamps. In view of this reduction of income, and the payment of \$248,331.60 during the past year in sick, disability and death benefits, and the expenditures of an even larger amount in strike benefits, it speaks well for the organization's financial resources.

Such a record would have been impossible except for a loyal membership and the wise legislation it has adopted for its protection.—International Molders' Journal.

A COMMUNICATION FROM THE A. F. OF L.

Washington, D. C., Jan. 25, 1915.

To A. F. of L. Organizers:

Dear Sir and Brother: With the new year new responsibilities rest upon the working people of America. With new opportunities for the toiling masses comes the necessity of utilizing them to the best possible advantage. With new freedom comes the necessity of its appreciation and exercise.

The enactment of the labor provisions of the Clayton Anti-trust law, October 15, 1914.

by statute law declared that the labor of a human being is not a commodity or an article of commerce; that the normal, natural activities of workmen for the protection and promotion of their rights and interests are lawful, and that the interpretation of the Sherman Anti-trust law, by which its terms were applied to the associated effort of the working people, no longer holds good in law. Thus, I repeat, the opportunities which are presented must be utilized by every honorable effort to organize the yet unorganized workers in every field of honorable human endeavor, and particularly of the working people.

At the Philadelphia convention of the American Federation of Labor a number of resolutions were introduced with the above object in view. These were referred to the Executive Council of the A. F. of L. and in turn by the E. C. referred to the undersigned, with the direction that the organizers, aye, all earnest, active men and women in the labor movement of America, be urged, and I do urge them, to give their earnest, active co-operation in the work of organizing the yet unorganized toilers; to bring about unity, solidarity, and federation among the organized; to do everything within the power of each and all of us to make the lives of the workers more worth the living, and to aid in the abolition of all forms of wrong and the attainment of every right thus far denied.

The particular instructions were to organize stenographers, typewriters, bookkeepers and office assistants;

To organize the elevator operators, porters and janitors;

To organize the unskilled workers in every field of labor as well as skilled wage-earners;

To organize working women employed in homes and known as domestic or household workers;

To organize local label leagues to be part of the Women's International Label League.

While special attention is called to the class of workers above enumerated, the instructions hold good with reference to all workers, regardless of the character of work performed. Organization is the thing, and to that especial attention is called with the earnest hope that the year and its opportunities may land us much nearer the three million mark. This call is for renewed energy, perseverance and persistence in the great organizing work of the American trade union movement, and to attain greater advantages for the wealth-producers of America.

When organizing new unions or when called upon for advice or assistance by unions already organized, you should not fail to keep in mind the amendments to the constitution of the A. F. of L. as adopted by the Philadelphia convention. I refer particularly to the amendments affecting directly affiliated local or federal labor unions. For convenience they are quoted as follows:

Local unions must charge their members not less than 60 cents per month dues.

Each local union must bond its financial secretary and treasurer in such sum as shall be adequate to protect its funds.

The initiation fees shall not be less than \$1.00 or more than \$5.00 and one-fourth of each initiation fee received by directly affiliated local unions shall be forwarded to the A. F. of L. together with the per capita tax, accompanied by a monthly report giving the names of members paid for on blanks to be furnished by the Secretary of the Federation.

Travelling cards issued to members of local trade or federal labor unions shall admit members presenting the same to membership in local, trade or federal labor unions directly affiliated to the American Federation of Labor.

Local trade and federal labor unions directly affiliated shall be prohibited from assessing their members or appropriating their funds for any purpose other than union or A. F. of L. purposes. Each directly affiliated union shall forward monthly to the Secretary of the A. F. of L. a complete statement of all funds received and expended.

No local trade or federal labor union shall disband so long as seven members desire to retain the charter. Upon the dissolution of any local trade or federal labor union all funds and property of any character shall revert to the A. F. of L.

Do not fail to explain the above fully and make it perfectly clear to the newly organized unions, and also, whenever the opportunity is presented, to visit directly affiliated local unions already in existence and instruct them as to the amendments above quoted.

Please report at least once each month any progress made, any success achieved, and, indeed, upon any matter of interest to labor coming under your observation.

With best wishes, I am

Fraternally yours,

SAMUEL GOMPERS,

President American Federation of Labor.

U. S. DEPARTMENT OF LABOR.

(Children's Bureau, Washington.)

The Children's Bureau of the Department of Labor issues today the first report in its study of infant mortality in the United States.

The report emphasizes the fact that this is only the first item in a proposed extended inquiry. While it carefully avoids conclusions, certain conditions are pointed out as coincident with a high infant death rate in the one city under consideration.

It finds that the infant death rate varied in different parts of the same city. In the poorest section, where sanitary conditions were at their worst, the rate was 271 per thousand babies, or more than five times that of the choice residential section of the city.

The deaths of the babies investigated were in inverse proportion to the earnings

of their fathers. Babies whose fathers earned less than ten dollars a week died at the rate of 256 per thousand. Those whose fathers earned twenty-five or more dollars a week died at the rate of 84 per thousand.

The report shows that artificially-fed babies died at a much more rapid rate than breast-fed babies. In the earliest months of the baby's life exclusive breast-feeding appears to be the only safe method. Only 46.6 babies per thousand died under one year of age when breast fed for at least three months, as against 165.8 per thousand who died when fed exclusively on artificial food up to the age of three months.

Where mothers were employed a large part of the time in heavy work babies died at a much more rapid rate. In one group of 19 mothers whose babies all died, 15 had been keeping lodgers, an arduous occupation among the foreign women, where the wife without extra charge often washes and irons for the lodgers and buys and prepares their food.

The city bears its share of responsibility for infant deaths. A high rate of infant deaths was found in coincidence with neglected streets and insanitary housing. The report shows for 135 miles of streets and alley only 41 miles of sewers and 36 outlets, only 64 per cent of the streets paved, and but .11 per cent of the alleys. In houses where water had to be carried in from outdoors, the infant death rate was 198 per thousand, as against 118 per thousand where water was piped into the house.

These findings are based on a report as to infant mortality conditions in Johnstown, Pa. Other cities now being studied are Manchester, N. H., Brockton, Mass, and Saginaw, Mich.

The city of Johnstown was chosen as the first town to be studied because of its interest as a type of town in which there are no large industries employing women, and because its side and its good birth registration permitted a study with the limited staff which the Bureau could at first assign to the work.

In her letter submitting the Johnstown report to the Secretary of Labor, Miss Julia C. Lathrop, Chief of the Children's Bureau, states that the subject of infant mortality was chosen for the first field inquiry because of its profound importance in our national life. According to an estimate of the U. S. Census Bureau, at least 300,000 babies die annually in this country, which means approximately one baby out of every eight under one year of age. Leading sanitarians say that if proper measures of hygiene and sanitation were observed this number could be indefinitely reduced. The Children's Bureau is trying to learn the conditions of life most favorable for American babies.

Every mother of a Johnstown baby born in 1911 was visited by women agents of the Children's Bureau and information obtained about the family surroundings of the baby, how his father earns the money necessary for his care, and how much he earns,

whether his mother works outside the home and how heavy her work is within the home, whether the city streets are safe, the water pure, the milk clean. The subjects considered in this first report: City and street environment, housing, nationality, mother's age, literacy and married history, the feeding of the baby, the occupations of the mothers, the family earnings, etc., show some of the lines along which the Children's Bureau expects to find information leading to a reduction of the high rates of infant mortality in the United States.

The report of infant mortality conditions in Johnstown was written by Miss Emma Duke, one of the women investigators of the Bureau. This report, like the other publications of the Bureau, may be obtained free of charge upon application to the Children's Bureau, Department of Labor, Washington, D. C.

ENTRIES IN LOS ANGELES LABOR TEMPLE CONTEST.

On June last a committee representing the American Federation of Labor, consisting of W. D. Mahon, International President of the Amalgamated Association of Street and Electric Railway Employees, and L. D. Bland, editor of the Street Railwaymen's Official Journal, visited Europe to make an investigation of conditions of street railway workers of that continent and covered the following countries: Germany, France, Switzerland, Italy and the British Isles.

Upon arrival in each country the committee immediately called at the labor headquarters and was taken in charge and supplied with interpreters and guides and given introduction to all parties they wished to meet. A few words of the introductory to the report of Messrs. Mahon and Bland, published in the December number of the American Federationist, which describes the opening up of negotiations in Germany, will give an idea of their reception in all the other countries mentioned. The report begins:

"We sailed from New York on the 16th day of June, 1914, reaching Hamburg, Germany, June 23. We spent two days in Hamburg, investigating the general conditions of the street railway workers in Germany. The headquarters of the trade union movement of Germany is located in Berlin. On arriving in this city we first visited the office of Mr. Herman Jochade, Secretary of the International Transportation Workers, and through him we were introduced to Mr. Baumeister, Secretary of the German Trade Union movement, who cordially received us and pledged us all possible assistance in our work. He tendered us the services of one of his clerks to act as interpreter. We were then introduced to the officers of the Transportation Workers of Germany. Through Mr. H. Rathmann, the tramway representative of the Transportation Workers, we were placed in touch with the conditions of the occupation in their entirety throughout Germany."

From the foregoing it will readily be seen that the representatives of the Los Angeles Union Labor Temple Association will experience no difficulty on the language score when they reach Europe. The Labor Movement of the Old World will see to that.

The Contest Committee continues to receive many letters of inquiry, which proves conclusively that Organized Labor is alive to the situation that will confront it on the

James M. Lynch, Commissioner of Labor of the State of New York, and ex-President of the International Typographical Union, in a recent letter to a member of the Committee, gives his endorsement of the plan. Mr. Lynch says:

"I sincerely trust that you will be entirely successful in the venture you now have in hand. It should meet with favorable consideration by Organized Labor on account of its double purpose—clearing the Los Angeles Labor Temple of all indebtedness, and the selection of two people to canvass the Continent of Europe in Organized Labor's behalf."

The following organizations have endorsed the Los Angeles Union Labor Temple plan and are arranging to place men of international reputation in the field: Local No. 234, Hotel and Restaurant Employes International Alliance and Bartenders International League of America; Local Union No. 311, International Association of Machinists; Local Union No. 72, International Union of Steam and Operating Engineers; Local Union No. 81, Journeymen Tailors Union of America; Local Union No. 47, American Federation of Musicians; Local No. 37, International Union of Bakery and Confectionery Workers of America; Plumbers Local Union No. 78, United Association of Plumbers and Steam Fitters; Painters Local Union No. 267, Brotherhood of Painters, Decorators and Paperhangers of America, and Typographical Union No. 174, International Typographical Union.

Address all communications with reference to the contest to Contest Committee, Room 203, Union Labor Temple, Los Angeles, Cal.

HOW LABOR UNIONS HAVE FOUGHT TUBERCULOSIS.

Organized Labor has not been entirely unmindful of the fight against tuberculosis, although many of the largest unions have paid little or no attention to the plague which is decimating their membership.

The Typographical and Cigar Makers' Unions have been among the pioneers in their appreciation of the problem of tuberculosis in their ranks. As early as 1898, the International Typographical Union opened an annex of 80 beds in their home at Colorado Springs for tuberculous printers. This work, accompanied for years by an educational campaign, has helped to control the spread of tuberculosis in the craft. The Cigar Makers, while they have not opened any institution of their own, have for more

than 10 years preached and practised in many ways the prevention of tuberculosis.

Following the success of the Typographical Union, the International Printing Pressmen and Assistants Union in 1911 opened a home with special provision for tuberculous brothers at Rogersville, Tenn. The International Photo-Engravers Union has for five years given the subject of tuberculosis careful consideration and has devised and enforced many helpful regulations for improving the working conditions in this craft. Tuberculous members of this union are cared for in private and public tuberculosis sanatoria in various parts of the country. In 1909, the International Boot & Shoe Workers' Union recommended that their members ally themselves with the organized anti-tuberculosis campaign in various parts of the country. This action has since been followed up in various ways. The National Brotherhood of Operative Potters, following a careful study of tuberculosis in their industry, has set aside a fund for the care of their consumptive members.

The American Federation of Labor for the last six or seven years, has also repeatedly, by special resolution, indorsed the general anti-tuberculosis campaign or special phases of it. A number of other national and international unions and several locals and federations have also co-operated in special ways with the anti-tuberculosis movement.

LOAN PLAN FOR SMALL BORROWERS.

The Morris Plan of industrial loans, which has just been put into operation in this city with great success, has been tried with good results in a dozen states. It is a credit scheme for the small man, who cannot maintain banking facilities and has as assets only his character and his work. Heretofore he has had to go to a pawn shop or a loan shark if he needed money and could not borrow it as a favor from some friend, or, at best, he has turned to the Provident Loan Society, where he could borrow on goods, receiving honest treatment.

Under the Morris Plan he may make a note, indorsed by two persons of character, and after investigation and approval his note will be discounted. He pays it by depositing weekly for fifty weeks one-fiftieth part of the sum borrowed. Thus he has the privilege of borrowing money at the legal rate of interest, instead of at pawnbrokers' rates, and of paying back the principal in installments.

This is a straight business venture. It is not philanthropy on the part of the stockholders of the company, nor charity to the borrowers. Nevertheless, it is one of the best and surest ways yet discovered to rid any community of the loan shark. It is bound to be a convenience to the person of small means at any time. Just now it might be a veritable blessing to many a hard-pressed father of a family to be able to borrow money in this way to meet a crisis.—New York Tribune.

LABOR REPRESENTATIVES DEMAND COMPENSATION COMMISSION.

The contention of the American Association for Labor Legislation that the interests of the workers can only be served by the creation of a board or commission to administer compensation laws has just received strong endorsement in New Jersey through the filing of a minority report with the governor on this question by the labor representatives on the Employers' Liability Commission. This commission is appointed under the law by the governor to report on the working of the New Jersey Compensation Act of 1911, the first state law of its kind in the country, and to make recommendations for its amendment.

The labor representatives report "While agreeing most heartily with the other members of our Commission as to the desirability of recommending legislation (1) for the adoption of a constitutional amendment authorizing the legislature to pass a compulsory compensation law; (2) for the security of payment of awards through a compulsory insurance system; (3) for the creation of a State Insurance Fund; (4) for the regulation of certain protective clauses in policies of liability insurance; (5) for investigation looking toward the extension of the compensation principle to embrace occupational diseases; and (6) for the purpose of making more nearly adequate the compensation scale—we nevertheless feel that we would be untrue to our responsibility to the legislature and to the people of the whole state if we did not register an emphatic protest against the continuance of the court system of administration and recommend instead the creation of an administrative board with summary powers. As direct representatives upon the Commission of the great body of industrial workers for whose protection the compensation law was enacted, we have perhaps been in a position to observe more intimately than our four esteemed colleagues the points at which our present compensation

system has failed satisfactorily to fulfil its purpose. And our personal observation and our study of the subject lead us to believe that the most serious weakness of the present law is this unfortunate provision for its administration through the courts. We have made as diligent inquiry as opportunity afforded and we have given special attention to this problem of law enforcement."

In a review of their reasons for taking this stand the labor representatives point out that "No state has abandoned the commission form for the court system, while two states which at first followed the New Jersey court plan have already abandoned it as unsatisfactory and have created administrative boards instead."

Reference is made by the labor representatives to the joint report of last year of the National Civic Federation and the American Federation of Labor on the working of compensation laws. As a result of their inquiries on this topic these organizations strongly urged the creation of a commission to administer compensation laws, a view also endorsed by the Chairman of the Workmen's Compensation and Accident Prevention Committee of the National Association of Manufacturers.

Arguments equally emphatic are quoted from the report of the American Association for Labor Legislation on the working of the New Jersey law and from resolutions passed at the Annual Convention of the American Federation of Labor.

The Hon. Wallace D. Yable, Chairman of the Industrial Commission of Ohio, Hon. Joseph A. Parks of the Massachusetts Accident Board, and the Hon. John Mitchell of the Workmen's Compensation Commission of New York are also quoted as authorities who urge the creation of an administrative board.

Mrs. Beat—Tell the gentleman I'm not receiving today, Nora.

New Maid—But he ain't deliverin', mum, he's collectin'!—Puck.

THE DECLARATION OF AMERICA.

We, the citizens of the American Continent, embracing peoples of every race and tongue, affording a true demonstration of the brotherhood of man, being about to commemorate the one hundredth year of unbroken peace along three thousand miles of unfortified boundary, do hereby solemnly publish and declare that the time has come for the peace-loving powers of the world to unite in a League of Nations, founded on such principles, and organized in such form, as shall conduce to the preservation of life, liberty and happiness throughout every quarter of the world.

We hold these truths to be self-evident:

1st.—That "this is assuredly the opportunity for which a people and a government like ours were raised up, the opportunity not only to speak, but actually to embody and exemplify the counsel of peace and amity."—(President Woodrow Wilson in his latest message to Congress).

2nd.—That the great masses of citizens of one nation have no real hatred for the people of any other nation.

3rd.—That there is no dispute that can arise between nations which cannot be sat-

isfactorily settled by arbitration or by the Hague Court of Arbitral Justice.

4th.—That while it should be our constant policy to make provision for national peace and safety, it is essential, in so far as possible, to secure the co-operation of all other nations.

5th.—That the foremost efforts of the American people should now be directed to the task of preventing the recurrence of war rather than to preparations for war.

6th.—That the union of the peace-loving

Smiles.

SOME (K)NEEDS.

An editor of a northern North Dakota newspaper takes notice of this item: "It is reported that one of T—ville's fastidious paper needs bread with his shoes on. The editor makes the following comment: "This incident may seem somewhat peculiar, but there are others. The editor of this paper needs bread with his shoes on. He needs bread with his shirt on. He needs bread with his pants on; and unless some of the delinquent subscribers of this banner of freedom pay up before long he will need bread without a thing on—and old North Dakota isn't any Garden of Eden in the winter time, either."—Exchange.

A MATTER OF CHOICE.

The suburban car was waiting at a turnout for the car going in the opposite direction to come along. "It's shameful," complained an impatient woman passenger, "to have to be stopped here like this."
"Well, ma'am," said the conductor, calmly, "if you want to finish your trip in an ambulance, we can go on and collide with the other car."—Boston Transcript.

LIKELY.

Judge—Officer, what's the matter with the prisoner—tell her to stop that crying—she's been at it fifteen minutes (more sobs).
Officer—Please, sir, I'm a-thinking she wants to be bailed out.—Nebraska Awgwan.

MIRRED.

"And how is Rogers getting on? He always declared that he would leave footprints in the sands of time."
"Yes, but unfortunately he got stuck in the mud."—Boston Transcript.

The cultured young woman from Girton was trying to make conversation:

"Do you care for Crabbe's Tales?" she asked.

"I never ate any," replied her partner at the fancy dress ball; "but I'm just dead struck on lobsters' claws."—Sacred Heart Review.

"John, I simply cannot stand these algebra exercises you bring in," said the teacher. "They are horrible; just full of mistakes. I shall have to write your father about them."

"Papa will be awful angry," said Johnny.

"I suppose he will, but it is my duty to write."

"Better not," insisted Johnny. "Father does all my algebra for me."

"Why, what in the world has become of your watch? The one you used to have had a handsome gold case."

"I know it did, but circumstances alter cases."—Philadelphia Telegraph.

NO HESITATION.

Magistrate (severely)—Horsewhipping is the only suitable punishment for you and your kind. The idea of a man of your size beating a poor, weak woman like that!

Prisoner—But, your worship, she keeps irritating me all the time.

Magistrate—How does she irritate you?

Prisoner—Why, she keeps saying: "Hit me! Beat me! I dare you to hit me! Just hit me once and I'll have you hauled up before that baldheaded old reprobate of a judge and see what he'll do with you!"

Magistrate (chokingly)—Discharged!—London Mail.

A FREQUENT CALLER.

"Have you ever been to this court before, sir?"

"Yes, sir; I have been here often."

"Ha, ha! Been here often, have you? Now tell the court what for."

"Well, I have been here at least a half dozen times to try and collect that tailor's bill you owe me."

FATHER'S ULTIMATUM.

"I think two can live as cheaply as one, sir."

"You can't edge into my family on that theory, young man. I'm willing to keep on supporting my daughter, but you'll have to pay board."—Louisville Courier-Journal.

HAD MORE SENSE.

A country lad found a lost horse in an amazingly short time. Asked how he did it, he replied, "I jes set down and thought w're I'd go if I was a hoss. Then I went there, and there he was!"

"Why, Willie," said the teacher, in a pained voice, "have you been fighting again? Didn't you learn that when you are struck on one cheek you ought to turn the other one to the striker?"

"Yes'm," agreed Willie, "but he hit me on the nose and I've only got one."—Sacred Heart Review.

"A burglar got into my house about 3 o'clock this morning, when I was on my way home from the club," said Jones.

"Did he get anything?" asked Brown.

"I should say he did get something," replied Jones. "The poor devil is in the hospital. My wife thought it was me."—Cincinnati Enquirer.

"Please, sir," said the maid to the head of the house, "there's a gentleman here to see you on business."

"Tell him to take a chair."

"Oh, he's already taken them all, and now he's after the table. He's from the installment house."

Poetical Selections.

THE KICKER.

I am the mutt,
I am the prize jay
Of the universe,
Or worse,
If you can imagine
Such a thing,
By jing!
I am the rube,
The verdant boob,
The empty pated,
Rattle brained galoot
And more
To boot,
Who kicks
And shies the bricks
And mud
With sickening thud
At everyone.
Mud by the ton
I heave when things
Political do not go right.
I fight,
I bite,
I cuss, I swear,
I tear my hair,
When poll returns I read
And they don't suit my need,
I paw, I claw,
The rag I chaw,
I have a grouch—
Ouch!
I criticise,
Call men unwise
For voting as they do.
It makes me sick,
Right quick,
And anger surges
Through my dome
When others vote,
I am the rube,
I am the boob
Who stays at home.
—Electrical Workers' Journal.

AROUND, TROUBLE.

When trouble knocks hard on my shop door,
I don't get up and answer no more.
I set right still until his hands get sore.
Years ago, when I was young and thin,
I used to get up and ask him in,
And listen to all the yarns he'd spin.
And I'd think all day and I'd dream all
night,
Till I didn't have no appetite,
And I couldn't work and I couldn't fight.
Then I woke one day, with an awful start,
With a change of head and a change of
heart,
And I laid for trouble, to play my part.
When he came along and saw my eye,
He turned away out to pass me by.
And I held my head up bold and high.
So when he knocks at my shop door,
I get my hammer, I cross the floor,
But trouble don't hang around no more.
—Selected.

THE SONG THAT REACHED MY HEART

"I sat 'midst a mighty throng
Within a palace grand,
In a city far beyond the sea,
In a distant foreign land.
I listened to the grandest strain
My ear had ever heard—
Enraptured, charmed, amazed I was,
My inmost soul was stirred.

I looked on the singer fair,
My heart was at her feet.
She sang of love—the old, old theme—
In accents low and sweet.
And then she sang a song,
That made the teardrops start;
She sang a song, a song of home,
A song that reached my heart.

"That night I shall never forget;
That night, with pleasure and pain.
I think of the singer—I think of the song
And wish I could live it o'er again.
In fancy again I recall
The scene with its splendor bright;
The mighty throng, the palace grand;
Oh, the mem'ry of that night.

My fancy it may have been,
But never had I heard
A song that thrilled me o'er like this,
Like this, so strangely stirred.
The mem'ries of that night of bliss
Will never from me part—
She sang a song of "Home, Sweet Home,"
The song that reached my heart.

CHORUS.

"Home, home, sweet, sweet home;
She sang a song of 'Home, Sweet Home,'
The Song that reached my heart."
—Julian Jordan.

THE MULE.

The mule, he is a funny sight,
He's made of ears and dynamite;
His heels are full of bricks and springs,
Tornadoes, battering rams and things.
He's fat as any poisoned pup;
It's jest his meanness swells him up;
He's always scheming 'round to do
The things you most don't want him to.
The mule, he lives on anything,
He's got a lovely voice to sing,
And when he lets it loose at noon,
It sounds like buzz saws out of tune.
He stands around with sleepy eye
And looks as if he'd like to die.
But when there's any dying done
It ain't the mule, I'll bet a bun.
Some folks don't treat mules with respect;
They say they ain't got no intellect;
That may be so, but if you've got
To go to heaven on the spot,
And want a way that doesn't fail,
Jest pull the tassel on his tail.
The mule, he tends to his own biz;
He don't look loaded, but he is.

—Exchange.

THE FACTORY CHILD.

By J. J. Galvin.

"O Father in Heaven, be good to me;
Sweet Mother of God, I trust in thee."

Thus prayed the Child of the Factory Town,
A girl of ten, yet broken down
By toll and fear, and a life so sad
The Recording Angel, in pity, had
Written these words, with severest look,
In letters of flame, in the Lost Soul Book:
"The brute who tortures a child will be
Punished in hell through eternity."

"My father was good, and kind, and true,
And mother loved me, as mothers do;
They passed away in the factory's grind,
And left an orphaned girl behind.
I do no wrong, and I do not shirk
The hardest kind of factory work;
But they pile it on me, oh, so high,
That I sometimes wish I, too, could die.

"I hear them talk of the land of the free,
Where each child has the same opportunity;
Yet I never played, like the master's girls,
Or had a doll with clustering curls,
Or a piece of cake, or a candy bear—
But maybe some day, when people care,
They'll change the laws, so ones like me
Will have a chance, as it ought to be."

She lived awhile, in youthful hope—
Like the flower of devotion, the hellotrope.
With childish faith in the heart of man,
Believed, as only children can;
And died with the prayer her mother
taught—

When men forget, God must be sought:

"O Father in Heaven, be good to me;
Sweet Mother of God, I trust in thee."

KEEP THE FURROW STRAIGHT.

Editor Journal:

When a plowin' in de stubbles,
Earnin' ob you dally bread,
Keep a watchin' out foh trouble,
Always lookin' straight ahead.

Life's de fiel' where you am workin',
Massa's watchin' at de gate;
He will punish you foh shirkin'—
Try to keep de furrow straight.

Smilin' gals may call you "Honey,"
But you hab dis work to do;
Doesn't pay to get too funny—
Keep de furrow straight and true.

You may whistle an' be jolly,
As you urge de mules along;
Only shun de ways ob folly,
As you sing your merry song.

Eb'ry day you're gettin' oldeh—
Soon you laheh will be through;
An' de plow may strike a bouldeh—
Knock de stuffin' out of you.

Massa knows de task am dreary,
An' de way am full ob ca'ah—
Dat de mules get worn and weary,
An' will wabble heah an' deah.

He will not expect perfection—
Only do de bes' yo' can;
Try to keep de right direction,
Try to be an hones' man.

All aroun' temptations beckon—
Fix yo' eye upon dat gate;
Massa's watchin' you, I reckon—
Try to keep de furrow straight.

GEORGE W. WOODWORTH.

In Memoriam

MEMBERS.

William Sloan, Reg. No. 5186, age 47, of
Lodge No. 281, Boston, Mass. Was born in
Scotland, February 11, 1868. Died 2:30 P.
M., Friday, February 12, from hemorrhage.
Married, leaving one boy. Charter member
of Local No. 197.

Charles J. Rogillio, member Local No. 305.
Died from attack of appendicitis, at New
Orleans, La., January 9, 1915; age 22; single.

RELATIVES OF MEMBERS.

Mabel Stovall, age 35 years, wife of Brother
Leonard Stovall, was born at Leneoke,
Tex., September 10, 1879. Died November
13, 1914, from pleagelegry.

Mrs. Hennessy, mother of Brother Thos.
Hennessy, died February 8, 1915.

James Ceurry, Jr., age 32, son of Brother
James Ceurry, of Lodge No. 37. Born at
New Orleans, La., in 1883. Died January
17, 1915, at 5:30; Brights disease.

Fred Lutchgens, age 45, brother of Brother
Henry Lutchgens, was born in New Or-
leans, La. Died December 18, 1914; caused
from accident.

Fred Kull, age 78 years, father of Brother
Frank Kull, died Monday, February 8, 1915.

Auditor's Report for 1914

INTERNATIONAL BROTHERHOOD OF BOILER MAKERS, IRON SHIP BUILDERS AND HELPERS OF AMERICA. REPORT ON EXAMINATION OF ACCOUNTS FOR THE PERIOD FROM JULY 17, 1914, TO DECEMBER 31, 1914.

EDWARD J. DILLON & COMPANY,
Certified Public Accountants.
1102-3 Republic Bldg.
Kansas City, Mo., Feb. 3, 1915.

Mr. J. A. Franklin, President International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America, Kansas City, Kansas.

Dear Sir: We have examined the accounts of the International Secretary-Treasurer, Mr. F. P. Reinemeyer, and the Editor and Manager of the Journal, Mr. J. B. Casey, of the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America, for the period from July 17th, 1914, to December 31st, 1914, and herewith submit our report.

The following is a summary of the transactions in the various fund accounts for the period:

	Total.	FUND					
		Strike Benefit.	General.	Death and Disability.	Journal.	Transportation.	Fidelity.
Balance as at July 17, 1914	\$ 58,555.10	\$36,430.76	\$ 2,316.43	\$17,413.15	\$1,211.18	\$1,171.58	\$12.00
Cash Receipts	84,263.15	33,273.45	34,302.56	7,481.87	5,819.20	3,325.07	61.00
Total	\$142,818.25	\$69,704.21	\$36,618.99	\$24,895.02	\$7,030.38	\$4,496.65	\$73.00
Deduct: Disbursements	69,083.10	23,462.94	35,940.23	4,500.00	5,136.83	43.10
Balance as at December 31, 1914..	\$ 73,735.15	\$46,241.27	\$ 678.76	\$20,395.02	\$1,893.55	\$4,453.55	\$73.00

The general fund was credited direct with the amount of the raffle, \$1,049.50, and charged with the same amount when disbursement was made. \$21.00 was properly credited direct to the strike fund, and 61c to the general fund. This accounts for the difference in receipts of these funds.

CASH ACCOUNT.
In Exhibit "A," we submit a detailed statement of cash receipts and disbursements, which may be summarized as follows:
Receipts.....\$84,446.44
Disbursements..... 69,266.39

Excess of Receipts over Disbursements.....\$15,180.05
Balance on Hand July 17, 1914..... 58,555.10
Balance as at December 31, 1914....\$73,735.15

Statement of Funds. The cash receipts during the period under review, after deducting the receipts of premiums in respect of bonds, were apportioned to the various funds in the following percentages:
Strike Benefit Fund..... 40%
General Fund..... 40%
Death and Disability Fund..... 9%
Journal Fund..... 7%
Transportation Fund..... 4%
..... 100%

We checked the cash received from members and verified its distribution to the proper lodges.

The receipts from advertising, subscriptions, etc., as shown by the records of the Journal Editor, were compared with the records of the International Secretary-Treasurer and found correct.

The interest received on bank balances was verified with the bank passbook. We verified that all receipts were deposited in bank. Check No. 431, amounting to \$4.25, covering a deduction for an amount due from a business agent, was not put through the bank but used as a cash receipt. We verified this item and found it correct.

We verified the disbursements with the cancelled checks, receipts and vouchers. In Schedule "I," we submit a statement of payments to the officers of the Brotherhood analyzed according to salaries, expenses and cash advances for which no reports of expenditures had been received at the date of our examination.

Cash Balance as at December 31, 1914—\$73,735.15. This amount was on deposit with the Commercial National Bank of Kansas City, Kansas, in two funds as follows:

Checking Account	\$23,735.15
Time Deposit	50,000.00
	<hr/>
	\$73,735.15

We have reconciled this balance with the balance certified by the bank.

GENERAL.

Balance of Lodge Accounts. In Appendix "I," we submit a detailed list of debit and credit balances of the lodges as at December

31, 1914, of which the following is a summary:

	Due by Lodges.	Due to Lodges.
Boiler Makers' Lodges.....	\$4,066.95	\$14.95
District Lodges	234.85	4.82
Ladies' Auxiliary Lodges..	6.20	3.20
Total	\$4,308.00	\$22.97

The foregoing debit balances, \$4,308.00, are old balances and were all contracted prior to July 17, 1914. With the exception of \$40.65 all stamps and supplies sent out during the period under review have been paid for.

The balances due to all the lodges, July 17, 1914, amounting to \$121.65, were carried forward to the new ledger, and, with the exception of \$22.97 shown in Appendix "I," were absorbed during this period. We have checked all the entries where absorbed credits were allowed and found them correct.

The old net balance due from lapsed lodges, July 17, 1914, amounting to \$783.16, and the old net balance due from Helpers' Lodges, July 17, 1914, amounting to \$1,888.26, were both charged off.

Combined Cash Account. We submit in Exhibit "B" a combined cash account for the period from January 1, 1914, to December 31, 1914. This report was made by combining the cash account for the current period under review with the one furnished us from a prior audit for the period from January 1, 1914, to July 16, 1914.

With many thanks for the courtesies extended to us during the course of our examination, we remain,

Yours truly,
EDWARD J. DILLON & CO.,
Certified Public Accountants.

INDEX.

- Exhibit "A"—Cash Receipts and Disbursements for the Period from July 17, 1914, to December 31, 1914.
- Schedule "I"—General Fund, Salaries and Expenses of Officers for the Period from July 17, 1914, to December 31, 1914.
- Exhibit "B"—Cash Account for the Period from January 1, 1914, to December 31, 1914.
- Appendix "I"—Balances of Lodge Accounts, as at December 31, 1914.

By Insisting Upon Purchasing Union Stamp Shoes

You help better shoemaking conditions.
You get better shoes for the money.
You help your own labor position.
You abolish child labor.

Do not be misled by retailers who say: "This shoe does not bear the union stamp, but is made under union conditions." This is false—no shoe is union made unless it bears the union stamp.

"The goods did not rip at all - glad to say I escaped unhurt." *E. A. Tillery*

A Remarkable Proof of the Strength of Headlight Overall Materials

JACKSON, GA. Jan 27 1915
 Messrs Larned Carter & Co
 Detroit Mich.
 Gentlemen - Enclosing here with a Cold Roll Steel Pulley Key that I had driven in a key-way on a shaft to hold a large gear in position after completing the job and putting the machine in motion an accident happened. I had left a portion of the key extending beyond the end of shaft. I was wearing a pair of Headlight Overalls and by accident the key caught the overalls of my left leg just below the knee. The enclosed key will show you what happened.

Could not refrain from writing and sending you the steel key
 Yours Very truly
 E. A. Tillery
 Jackson, Ga.

JACKSON, GA. Jan. 27th, 1915.
 Messrs. Larned, Carter & Co.
 Detroit, Mich.
 Gentlemen:-

I am enclosing herewith a Cold Roll Steel Pulley Key, that I had driven in a key-way on a shaft to hold a large gear in position. After completing the job and putting the machine in motion an accident happened. I had left a portion of the key extending beyond the end of shaft. I was wearing a pair of Headlight Overalls and by accident the key caught the overalls of my left leg just below the knee. The enclosed key will show you what happened.

The shaft running at a rapid rate of speed twisted the key in the oscillating shape that it is now in, tearing the cloth of my overalls and twisting them up into a knot. The goods did not rip at all and the key will give you an idea of the strength of the goods. Glad to say I escaped unhurt.

Noting the strength and durability of your Headlight Overalls, I could not refrain from writing and sending you the steel key.

Yours very truly,
 E. A. TILLERY

TRADE UNIONISM, PROGRESS AND LIBERTY.

By Samuel Gompers.

A very serious misconception is presented by Mr. Harris Weinstock in an article entitled "Justifying the Minimum Wage," recently published in *The Industrial Outlook*. In discussing the brief by Rome G. Brown in the Oregon minimum wage case, Mr. Weinstock said:

"Mr. Brown points out that organized labor is opposed to the principle of establishing the rate of wages by legislation. I know that to be true but organized labor takes this position, not because it is opposed to the minimum wage, since organized labor itself wherever possible establishes a minimum wage, but it is opposed to such wage being fixed by legislation for the reason that it wants labor to be obligated to unionism for bettering wages rather than to the state. Union leaders have pointed out that if the state is to shorten hours and increase wages, there would be no need for workers to join unions, and therefore union leaders are opposed to the state's robbing unionism of its claim for membership."

This assertion is one of those partial truths that have done so much injustice to the purposes and motives of organized labor. It is intended to create the impression that members of organized labor are actuated by wholly selfish motives when they warn workers against giving control over their working lives into the hands of "public functionaries."

It is quite true that organized labor holds unionism of supreme importance in securing the betterment of the workers. Trade unionists do not underestimate the value of humanitarian legislation, but they hold that things inseparably associated with liberty or properly the subject for voluntary control by those concerned and not state action which represents the collective power of society.

Those things which are a concern and an obligation to society as a whole are properly matters for action by the state. So far as the people are concerned laws should secure them freedom to seek their own welfare and opportunity for initiative.

For workers, the working time constitutes and determines the conditions of their real existence. The prime of their life's vigor,

the fullness of their strength and their creative ability are given to the shop, the factory, and the mine. The hours of labor, the conditions of work, and the pay for work are the keys to controlling the lot of these who toil, for these are the important elements in working contracts.

Under the present organization of industry, individuals have found that singly they are unable to make contracts that secure them protection and fair wages, but that collectively they approach economic equality with employers and therefore secure fairer contracts.

Therefore workers have voluntarily associated themselves in unions. They have worked out demands for justice and have succeeded in having many of these included in work contracts. This they have done by their own economic power without outside assistance. And the doing has not been easy.

In the early days to be a union man was to be a marked man, was to be blacklisted by employers and hounded from place to place. Often it meant being a social outcast, the butt of ridicule and buffoonery. It took courage, red blood, determination, conviction, and consecration to be a unionist in those days.

The unions have been the schools of the workers where they learned the lessons of democracy and independence.

In the unions workers have learned their rights and how to get them.

The workers have learned that betterment comes only through their own efforts and diligence and that to work directly for securing desired purposes is economy of labor.

The power of the unions and the success of their activities have been due to their voluntary character.

What unionism has done for wage-workers is open history. A summary of its achievements during 1913 is found in report to the International Federation of Trade Unions, published in this and last month's issues; a review of the progress of 1914 may be found in the Executive Council report to the Philadelphia American Federation of Labor Convention, and for previous years in former convention reports. The Amalgamated Association of Street and Electric Railway Employes recently published a pamphlet en-

titled, Wage History, showing what unionism has gained for those workers. The September, 1914, issue of the American Federationist contains a symposium of achievements of workers through organization. Other organizations have similar data.

But in addition to results there is another test of unionism—its influence upon manhood and womanhood. There are no more aggressive, resourceful, progressive men and women in the world than those who belong to the American trade union movement. The trade union movement of the United States is the most militant, virile labor movement in the world. The unionists are the embodiment of self-reliant independence, they infuse democracy into all relations of life. They are making sacrifices in the endeavor to induce other workers to join them in the voluntary movement for the betterment of industrial conditions.

Now certain political actionists and benevolent outsiders present to trade unionists the proposition that regulation of hours of work and wages be placed in the hands of political agents—minimum wage and universal eight-hour laws for private industries have been persistently advocated and trade unionists have been denounced because they have not favored them without reservation. Yet the surrender to outside authority of power to determine hours of work and wages means also to place in governmental authority either the enforcement of such determinations or the punishment of those who refuse to yield their freedom.

This change means that agreements and adjustments to meet changing conditions will cease to be voluntary. It means that unionists will lose the right of initiative, hence their fine independent spirit. It means that unionists will lose the right of initiative, hence their fine independent spirit. It means that trade unionists will cease to be an aggressive, determining force in industry, but will become an auxiliary to a bureaucracy under commissions, wages boards, etc. It means that trade unionism will lose its virility and the power to protect the workers.

Can the workers agree to any proposition that will weaken or embarrass unionism?

Can the toilers afford to trust the determination of the terms of their contracts to work to agencies over which they can at the best have only indirect control?

Is human nature so constituted that the workers can trust matters affecting their real liberty in the hands of "disinterested" outsiders?

If the workers surrender their right to determine the terms of contract, are they not endangering also their right to reject terms? If that be true, what becomes of their industrial freedom, the right to control or withhold their labor?

When contracts are determined by governmental agents they take on the character of official state pronouncements, and

a strike against conditions of work becomes a strike against state authority. In order to maintain state authority fines and prison sentences for strikes are the inevitable next stage of development, as is amply manifested in Australasia where such agencies have been most fully tested. Whatever name this may be called, it results in industrial slavery for workers.

Rather than to take one step in that direction, trade unionists maintain that it is far better to endure the ills we have at present, and to continue to work out industrial betterment upon principles that are true and tried.

Labor's progress has not been spectacular, but it has been sure. It has made for wholesome development.

The trade union movement has always accepted the assistance of outside agencies which could advise, educate and make easier the work of industrial betterment, but it has emphatically demanded that determination of personal relations must be held by the workers in their own hands.

The trade union movement has secured the enactment of laws that assure to the workers freedom for working out their own welfare, and has asserted claims to legislation to promote life, health and safety, objects that are outside the province of collective economic action.

Trade unionism has been the great revolutionizing force for industrial betterment and progress. It has been the one protection in which the workers could put their trust. That is why trade unionists oppose a plan to subordinate it to other agencies—the trade union movement is the hope of the workers. Don't you see, Mr. Weinstock?

MR. HILL'S LOGIC.

Louisville Post: Mr. J. J. Hill, in an address calling for ship subsidy, made the following statement the base of his argument:

"Vessels built in the United States cost from 50 to 100 per cent more than the same vessels built abroad; therefore the American merchant marine cannot compete with the foreign merchantmen."

Mr. Hill is the chief of those spokesmen that declare again and again that the American railroads, manned by American laborers, paid higher than any other laborers in the world, are able to carry passengers and freight cheaper than any other nation in the world.

It costs from 50 to 100 per cent more to build the American locomotives and American cars than it does foreign locomotives and foreign cars; therefore, according to Mr. Hill's logic when he is talking about ship subsidies, we ought to be charging from 50 to 100 per cent more for freight and passengers in America than they get abroad.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION OPENS.

The daily press informs us that the Panama-Pacific Exposition at San Francisco opened on schedule time, February 20, under very favorable auspices and a large crowd. The gates will remain open until the 4th day of December, and notwithstanding the disturbed condition of Europe and the depression in industry everywhere the exposition bids fair to make a record for attendance.

The editor desires to acknowledge receipt of a cordial and gracious invitation from the president and board of directors to attend the exposition and to make our headquarters in the building erected for the convenience of the representatives of the press. While we may not be able to avail ourselves of this invitation, we nevertheless appreciate its being tendered, as well as the complimentary tickets of admission which accompanied it.

All those who can should by all means see this exposition, as it is, we believe, a very complete one, and the opportunity to see another first class exposition may not appear again soon.

In connection with this, we desire to remind our members that the strikes are still in effect on the Illinois Central and Harriman Lines and that it is not only our duty not to buy a ticket over any of the lines composing this group of roads, but if we know of others who contemplate going to the exposition, we should ask them to buy their tickets over the roads which are fair and have agreements with our organization, and in doing so we will not only help ourselves but be doing a favor to those we speak to about the matter, as the superior roadbeds, equipment and motive power of these fair roads insure safer travel and more prompt arrival at their destination.

FAKE EMPLOYMENT AGENCIES.

Some time ago a communication was received by President Franklin from a member in Minneapolis, asking information in reference to an advertisement for railroad mechanics for work in Mexico, and offering large salaries. The matter was referred to Lodge 216 at El Paso and from information received from there it seems a man named Taylor was operating a fake employment agency at Juarez, Mexico, and inserted ads in papers in the Middle West, stating that large numbers of all kinds of railroad mechanics were wanted in Old Mexico, and offering positions at large salaries to those applying. The conditions were that one dollar had to accompany the application and it seems those who sent on their money are still waiting for a reply. However, the Mexican authorities have at last convicted this man of using the mails to defraud and he will likely get a good round term in jail.

No doubt other schemes of a like nature will appear and our members should investigate fully before responding, as it may turn out to be another fake ad. Just at the present it seems to us Old Mexico, with its 57 varieties of revolutions, is a good place to stay away from. Neither life or property in this strife ridden country is safe and most of the people can hardly get enough to eat, much less find steady work at big salaries. It is a good policy to take time to investigate advertisements for men at any time, for if they are not a fake just like the one referred to, they are liable to be for work as strike breakers.

FEDERAL INDUSTRIAL COMMISSION TO INVESTIGATE STRIKES.

Notice has been received that the Federal Industrial Commission would give a public hearing at Chicago, commencing April 5, in reference to the strikes on the Harriman Lines and Illinois Central System, at which time all parties in interest will be heard.

Just what it is proposed to bring out at this hearing, or the possible results, we are unable to say. The attorney for the railway department, Mr. Comerford, of Chicago, will likely look after the interests of the men on strike.

Possibly a frank and full discussion on the part of both sides might bring out the fact that no great or fundamental differences exist as a bar to a peaceable settlement. If so, and a settlement was the result later on, it would be a distinct and important achievement of the commission.

NEWPORT NEWS STRIKE SETTLED.

Word was received recently at headquarters, announcing that the strike, which has been on for a long time in the boiler shop of the Newport News Ship Building and Dry Dock Company's plant, was settled.

We have not learned the full particulars, but we believe the terms of settlement was the reinstatement of the men to their former position and no discriminations to be used.

This strike, it seems, was long drawn out, because the other trades failed to respond when they were called on. Had they done so, it would have been settled long since and no doubt the result would have been much more satisfactory.

THE FEDERAL LOCOMOTIVE BOILER INSPECTION LAW AMENDED.

The expected has happened, and the federal locomotive boiler inspection law has been changed, by adding the Goeke amendment to the former law. During the last daily session of the last Congress, at the still small hours of the night (about 5 a. m. on March 4, to be more exact) Senator Robinson of Arkansas asked leave to submit a report from the committee on interstate commerce, and also asked unanimous consent for the immediate consideration of this amendment, and as there was no one to offer objection it was acted upon thus in the last dying hours of Congress, amid confusion and exhaustion of the members. This hasty and illadvised change concerning the inspection of locomotive boilers was passed by the Senate, and as the House had previously approved the bill, and the President soon after approved it, the measure became a law.

The effect of this law is to extend the duties of the boiler inspectors to cover all parts of the locomotive, and all the different classes of inspection covered is to be done by the same inspector. Thus in order to be a competent inspector, one should be a first class boiler maker, machinist, blacksmith and car worker, and fully versed in safety appliances of all kinds. The inspection of all parts of the locomotive, if properly provided for, is all right, but this extension of inspection should have come under the safety appliance law instead of the boiler inspection law, as it was more applicable.

We have no hesitation in expressing our belief that Congress made a mistake in this hasty action amending the locomotive boiler inspection law; furthermore, we believe it will rectify this mistake when the effect of this change is more fully explained to them.

It looks as if Senator Robinson was not dealing frankly with our representatives, when a short time before this he told them there was little likelihood of the interstate commerce committee making any report during the recent session of Congress. Nor was he stating correctly the facts in the case when in answer to Senator Jones of Washington, whether in his opinion the change improved the existing law he (Senator Robinson) replied: "Certainly. I will state that the representatives of a great majority of the labor organizations were heard regarding the bill, and they approved the bill in this form." Senator Robinson was a member of a sub-committee which heard the objections raised by our representatives as well as the representatives of the railway department and others to this measure; furthermore, our objections were unanimously indorsed by the last convention of the American Federation of Labor, all of which were made known to this committee. This does not coincide with the statement contained in the above quotation.

EXPRESS COMPANIES STILL LOSING BUSINESS AND PROFITS.

According to a recent report of the Interstate Commerce Commission, in reference to the business of the principal express companies of the United States for the month of November, 1914, there was a loss of \$182,745, as compared with a large profit in November, 1913.

For the five months ending with November, 1914, the companies' net profit was \$72,951, as compared with a profit of \$1,722,000 in November, 1913.

Evidently the Parcel Post has put an awful dent in the business of these companies and bids fair to put them out of business in a short period of time.

In years gone by, these companies would declare large dividends and pay enormous salaries and still have so much left over that they would have to "slice a melon" of millions of dollars among their stockholders every now and then, but evidently these "melons" have stopped growing and it is not likely any more will be ripe enough in a long time for these companies to "cut."

These huge profits were made by unmercifully gouging and overcharging the shipping public. We can get along very well without the service of these companies—the postoffice will give more satisfaction and at a much less cost. There was no real need for these companies. The railroads should have performed this service and the profits realized go towards maintaining the road rather than the making rich of a few people. In our opinion the next special service on railroads to put out of commission should

be the Pullman and other sleeping car companies. The roads should furnish this service themselves, and the large profits that now go to a few rich owners of these companies could go to help maintain the road. This would be much better than boosting freight rates or passenger fares.

THE TAYLOR SYSTEM FAD ON THE WANE.

For the past two or three years every possible influence has been exerted by interested parties—contractors and others—to have the United States government put in force in its navy yards, arsenals, etc., the Taylor system of so-called scientific management. No doubt for the purpose of boosting this nefarious system among private employers of labor. A number of officers of the army and navy, strange to say, have made themselves very officious in trying to force this system on the men employed in the navy yards and arsenals, but without success in the navy yards. There is no good reason why the government should adopt such an inhuman system in order to drive its employes at a higher speed and squeeze from them a larger task for a day's work. The last convention of the A. F. of L. coincided with this opinion and instructed its executive council "to continue its efforts to have a law enacted which will prevent the introduction of any system of shop management which includes the use of stop watches in connection with workmen's labor, or the application of any system of payment of wages adopted for the purpose of speeding up workmen, and the elimination of such system wherever it exists." In conformity with this action an amendment was placed in the army and navy appropriation bills, which provided that no part of the money therein appropriated should be used for installing or maintaining the Taylor or any other such system of so-called scientific management. This amendment was overwhelmingly adopted by the House, but in the Senate it met with opposition and was rejected; however, in a conference between committees from the House and Senate, it was agreed to allow the amendment to stand, and although some of the members of the Senate objected to the amendment and lauded the Taylor system, they dared not reject the conference report for fear of the appropriations for the maintenance of the army and navy would fail to pass, and the amendment prevailed in both bills. However, Senator Oliver of Pennsylvania seemed to take much consolation in his statement that no such provision hampered the expenditure of the money appropriated for fortifications and therefore the Watertown (N. Y.) arsenal could work the Taylor system. This is splitting hairs and would be a clear violation of the spirit of the law concerning this matter and if any Taylorized system is maintained by money appropriated for fortifications an emphatic protest should be made to the Secretary of the War Department, as this matter comes under his charge as well as the expenditure of the money appropriated for the maintenance of the army.

Senator Root of New York, who is a lawyer and possibly never worked a day in his life at manual labor, made a lengthy talk in behalf of the Taylor system, and among other things, said it was a system with which the

workmen, equally with officers are satisfied, on the demand of AN OUTSIDE LABOR ORGANIZATION, we deliberately interfere with our officers in the expenditure of the public moneys, and in the discharge of the trust which we equally with them rest under. On the demand of AN OUTSIDE LABOR ORGANIZATION because we are afraid of them, because they have votes, we prohibit our officers from conducting the business which we put into their hands on the principles that every well conducted private enterprise in the country applies. Now sir, for my own part, I repudiate any such method of controlling the expenditure of the public funds and the conduct of public business. I am against it and am going to vote against it.

Senators Lippitt of Rhode Island, Weeks of Massachusetts and others voiced their praise of the Taylor system and their opposition to the amendment.

Now, this does not settle the matter, and the fight will have to be continued in future sessions of Congress, if we would prevent the adoption of this nefarious system in our navy yards and arsenals.

The trouble with this matter seems to us to be that our law makers have not given sufficient thought to this matter or the underlying motive and tendencies of it, nor of the ultimate result that would ensue. We should keep up a campaign of education on this matter and endeavor to especially bring it to the attention of the members of Congress and that, too, while that body is not in session, as they will be able thus to give it more attention and thought. We can't believe a majority of the members of either House of Congress would deliberately favor a system that would harass, debase and destroy the manhood of the toilers of our nation, as we believe the Taylor system would eventually do; therefore, we should act upon this assumption and do all we can to bring them to see the ultimate results of the adoption of such a system as we see it.

STATE LAWS CANNOT PREVENT SHIPMENT OF BEER.

The United States Supreme Court recently rendered a decision to the effect that state laws cannot prevent the delivery of beer from another state to within its borders. The court lays down the following doctrine: "Beer is a recognized article of commerce. The right to send it from one state to another and the act of doing so are interstate commerce, the regulation whereof has been committed to Congress, and a state law which denies such right or substantially interferes with or hampers the same is in conflict with the constitution of the United States. Transportation is not complete until delivery to the consignee, or expiration of a reasonable time therefor and prior thereto; the provisions of the Wilson act of 1890 have no application."

We believe this decision is in line with the spirit of our country and its constitution. States may refuse to legalize the sale of beer and whiskey

within its borders, but it should not attempt to say to even a minority of its people: "You shall not drink this or that beverage or liquors." If the state can prevent me from drinking what I want, it can prevent me from eating what I want, and it can prevent me from dressing as I want. This would interfere with our inalienable right to life, liberty and the pursuit of happiness, guaranteed us by the constitution.

PRESIDENT WILSON SAYS THE WORLD COULD DISPENSE WITH "HIGH SOCIETY" AND NOT MISS IT.

"High society" was given a severe jolt by President Wilson at a recent meeting in behalf of a college founded for the purpose of educating the mountaineers of the Southern states. He praised the simple straightforwardness of these people and criticised the airs which "high society" gives itself. Here is an extract from his speech:

"What America has vindicated above all things else," said the president, "is that native ability has nothing to do with social origin. It is very amusing sometimes to see the airs that high society give itself. The world could dispense with high society and never miss it. High society is for those who have stopped working and no longer have anything important to do.

Trees Develop from Roots.

"A tree does not derive its strength from its flower nor from its fruit. It derives all its strength from its roots. It derives all its vital sources of its life from the soil. And so with a nation.

"The nation is not fed from the top. It is not fed from the conspicuous people down. It is fed from the inconspicuous people up, and those institutions which, like Berea, go in to the unexhausted soils and tap their virgin resources are the best feeders of democracy."

This would indicate that Mr. Wilson is not very much impressed with our snobs or their importance. He stated the case very accurately when he said: "High society is for those who have stopped working and no longer have anything important to do." We can see no good purpose this element of our people accomplish, and we believe a large majority of the people heartily concur in the sentiment expressed by President Wilson.

A TALK WITH OUR SECRETARIES.

As a large majority of the secretaries have sent in complete lists of the names and addresses of their members either voluntarily or since we called upon them for these lists, we desire to express our appreciation for their promptness. In this way all of their members are assured of receiving their Journal each month.

There are some secretaries, however, to whom we have written two or more letters and still no complete list has been received from them. We desire to impress upon these the importance of sending in revised lists fre-

quently, for unless they do so we cannot keep the mailing list revised in accordance with the changes that take place in the membership of their lodge. In most lodges changes in membership are constantly taking place. Those who for any reason cease to be members of a lodge, their name should be taken from our mailing list for that lodge, and when their card is deposited in another lodge, the secretary of that lodge should send in their name and new address, and it is the duty of the member so depositing his card to furnish the secretary with their new address and request them to send same in for the Journal. Instead of doing so many write to the editor to send them the Journal. They should realize we are dependent upon the secretaries for a list of those entitled to the Journal, and as it would materially lessen the work here we hope all will follow these instructions. However, if for any reason they do not get the Journal after so doing, let us know and we will endeavor to get the matter straightened out.

Another matter I would like to call the secretaries' attention to is in reference to promptly reporting any changes in the roster for their lodge, as it is essential for the speedy transaction of the affairs of our organization that the roster be kept up to date. Under the present plan of caring for the Journal, we are only making corrections every other month, as we are having electrotypes made of the roster and use these in place of the regular type, thus avoiding the necessity of having to have the roster reset at frequent intervals and considerable cost. We can use these electros two issues, which lessens the cost of keeping roster; however, to make new plates every issue would be rather expensive and if changes are reported promptly we can keep the roster in very good shape. Owing to it being the first part of the year and having a very large number of changes, we did have new plates made for January, February and March Journals. Our next changes will be in May Journal and every other month thereafter. We hope the officers of the lodges will bear this in mind and promptly report such changes as may be necessary, so that they may be made as early as possible.

DEATH OF BROTHER A. E. STRODE'S FATHER.

Word was received at headquarters recently of the death of Mr. George Strode, father of Brother A. E. Strode, at Champaign, Ill., where he lived and was engaged in business. Old age and a general breakdown was the cause of his death, we believe.

We desire to extend to Brother Strode our sincere condolence and sympathy in his affliction.

A NEW ILLUSTRATED CATALOG.

"Faessler Boiler Makers' Tools" is the name of the new catalog just issued by the J. Faessler Manufacturing Company, Moberly, Mo., specialists in boiler tool manufacture. This catalog fully illustrates and describes many types and sizes of boiler tube and superheater flue expanders—sectional and

roller—for hand or power operation. It also shows Faessler's flue cutting tools and machines, countersinking tools, etc.

CHANGES SHOULD BE WELL CONSIDERED BEFORE BEING ENDORSED.

As there seems to be an extensive propaganda campaign being inaugurated in behalf of the proposition to amalgamate some of the metal trades, it might be well to suggest that our members should not indorse propositions of this kind until they have maturely considered the matter from every angle and calculated the ultimate result, because of the far reaching effect it would have upon the future of organized labor and especially our own trade, for if such a proposition was adopted and amalgamation took place, the charters and positions these organizations now hold in the family of trades unions would be surrendered and a new charter taken out which would cover the jurisdiction embraced in the charters of the organizations effected.

Should the effects of this amalgamation later on prove to be disappointing and a failure, no matter how irksome it might become to our members, there could be no escape except by a total disintegration and dissolution of the amalgamated organization, there could be no return to our present positions as independent organizations for we would have surrendered these and accepted membership in the new organization and which would then hold jurisdiction, whether for weal or woe, and this would prevent any other organization being recognized as a bonafide labor organization of our trades. Therefore we should study all the probable results before we indorse the proposition, if we would escape the possible result suggested above, and there is more than a possibility of such a result suggested above, as we have the experience of former promiscuously formed organizations of labor to guide us, they proved a failure in the past because of the inherent weaknesses of this plan of organization, and we may well ask ourselves if history would not again repeat itself if the present proposition was consummated.

Some of these advocating the proposition have tried to arouse the prejudice of our members in favor of the measure and a feeling of antagonism and resentment against the International officers by asserting that they would oppose the matter for no other reason than self interest, this is the methods usually used by those having no argument to back up their advocacy of a proposition and are afraid of the effects of arguments they know can be made against it, and we believe its use in this instance will have no better effect than in all such cases in the past where it proved to be a boomerang instead of a boost.

It seems to us it does not require much argument to prove that Grand Lodge officers who help handle and adjust the business affairs of our organization, who goes from section to section adjusting the grievances and misunderstandings that arise between the different organizations as well as employes and employed, who with representatives of other organizations help to solve the tangled problems that are constantly arising and who hears .he

sentiments and opinions of our members are in a better position to see the result of the adoption of such a proposition than the average member, therefore if such is the case, we should, if we would be honest with ourselves, seek the benefit of this experience rather than denounce it. We hold no brief for the defense of the officers of our organization. However, in justice to them, we will say we believe none of them would allow their personal interests to stand in the way of the real progress of our members and that if it can be shown to them that the abolition of their positions was for the good of our members, they will make the necessary sacrifice. As for the editor, he has always insisted, as a journeyman, on the right to quit his employment whenever he felt disposed to do so and always accorded to his employer the right to dispense with his services at any time, nor would he continue to work for any employer if he had reason to believe his work was not satisfactory, and he feels the same way as an employe of the organized men of our trades.

We regret we cannot discuss at length the merits, if any, of this plan, but space will not permit. However, we may discuss this matter again in a future issue.

We cannot close, however, without pointing to our members that this is not a clear-cut proposition of amalgamation of the metal trades as presented by the machinists, but only a portion of them, and we cannot understand why they should want to amalgamate with the tinner and the sheet iron worker and not seek to amalgamate with the moulders, who are more closely connected with them in their work than probably any other trade. Furthermore, we cannot understand why they should want some of the men employed around the wood working machinery of planing mills and not seek to have the pattern makers also, who have to make the patterns for the moulder to cast before the machine can be put to work. The pattern makers and moulders were not included in this proposition and the others were, so we wonder why.

QUOTATIONS.

Actions that promote society and mutual fellowship seems reducible to a proness to do good to others and a ready sense of any good done by others.—South.

Many men there are than whom nothing is more commendable when they are singled; and yet, in society with others, none less fit to answer the duties which are looked for at their hands.—Hooker.

I respect the man who knows distinctly what he wishes. The greater part of all this mischief in the world arises from the fact that men do not sufficiently understand their own aims. They have undertaken to build a tower, and spend no more labour on the foundation than would be necessary to erect a hut.—Goethe.

The measure that God marks out to thy charity are these: Thy superfluities must give place to thy neighbor's great conveniences; thy conveniences must yield to thy neighbor's necessity, and lastly, thy very necessities must yield to thy neighbor's extremity.—South.

He that does good to another man does also good to himself; not only in the consequence, but in the very act of doing it; for the conscience of well doing is an ample reward.—Seneca.

Just thoughts and modest expectations are easily satisfied. If we don't over-rate our pretensions all will be well.—Jeremy Collier.

What can be a more pitiable object than decrepitude sinking under the accumulated load of years and of penury? Arrived at that period when the most fortunate confess they have no pleasure, how forlorn is his situation who, destitute of the means of subsistence, has survived his last child or his last friend! Solitary and neglected, without comfort and without hope, depending for everything on a kindness he has no means of conciliating, he finds himself left alone in a world to which he has ceased to belong, and is only felt in society as a burden it is impatient to shake off.—Robert Hall.

STRIKES NOW IN FORCE.

Mechanical Department.

TO LAY OUT A MOLDED STACK CAP.

Fig. 1 shows a molded stack cap with is made of several sections, the larger the stack, usually the greater the number. Fig. 2, shows the side elevation for a stack to be made in eight pieces; mark this off the desired size, using mean diameters, that is the distance from the center of iron on one side to the center of material on the opposite side, it will be noticed that the circular parts of this figure are the same, that is the radius for the top half is the same as the other half just below.

Divide these into six equal parts as shown and through the points of division, strike lines down and parallel with the center line A-B, next take trams and with one point at S and the other at 5, Fig. 2, thus secure the radius of the largest part of the stack, place one point of trams at C on line A-B and strike quarter circle from D to B, divide this into four equal parts and strike divisional lines from the first and third points of division A to C extending these lines beyond circle, extend vertical line from D to F where it cuts divisional line, place one end of straight edge at F and just touch circular line at the middle of same, and strike a line from F to E, then strike line from E to B. The triangle

F-C-D-F represents one-half of a section of the cap. Extend line C-D to G, this will be the center line for Fig. 3 which is the template for a section. Take distance from U to T, Fig. 2, and mark it on line C-D-G from 9 to 8, next take the length of quarter circles 8 to 5 and from 5 to 2, Fig. 2, and mark them from 8 to 2, Fig. 3. Divide this length into six equal parts and strike lines through these points at right angles to line C-D-G. Next take points on line C-F, Fig. 2, where vertical lines cut this line and strike lines parallel with C-D-G. Place the same number of lines on opposite side of center line and at the same distance from center line. Where these lines cross each other, is a point in developing template. Take a pencil and trace line through as shown, give the holes for rivets the desired pitch and size, use this as a template and mark off seven more, to complete the circle. A cap made in 16 sections is laid out in similar manner, however, instead of dividing quarter circle D-B into four parts it would be divided into eight and line C-F would be placed midway between F and D and of course the template would only be one-half the width as in the first example, any other number of sections may be used in the same manner as shown.

International Officers' Reports.

A COMMUNICATION FROM THE INTERNATIONAL SECRETARY-TREASURER.

Kansas City, Kans.

To the Officers and Members of All Subordinate Lodges, Greeting:

It has come to my notice that the clearance cards accepted by local lodges to be forwarded to the International Secretary-Treasurer, to be recorded and to make the necessary changes in the card index system, in order to keep track of our traveling membership, are not being filled out by a great many of our secretaries according to the laws of our organization.

We have received a great many clearance cards with probably just the member's name and registered number thereon. The law requires that the card be filled out completely, giving the name and registered number of the brother very plainly, date of initiation and lodge number in which he was initiated, lodge number sending in the card and the signature of the financial secretary upon the face of the card. On the back each item should also be filled out, giving the brother's qualifications, whether he be boilermaker, helper, riveter, apprentice, or whatever he may be, also the identification.

I have before me seven cards received from one lodge and I only find three that are anywhere near correctly filled out.

Now, Brother Secretaries, I trust that you will take the necessary precautions in filling out these cards completely as the law of our organization requires, as it has caused a number of our local secretaries inconvenience in reference to getting the necessary information that should be on this card, especially the date of initiation and the correct registered number.

We have received a great many complaints from the various shop committees who must vouch for a traveling brother in order that he may receive transportation from one place to another, by identifying the brother who presents the card, and if the identification was placed upon the back of the clearance card, it would be much easier for our shop committees to secure transportation for our traveling brothers.

I trust that all secretaries will give us their hearty co-operation in filling out these cards in the manner required by the Constitution of this Brotherhood.

With best wishes, and kindest regards to all, I beg to remain,

Fraternally yours,
F. P. REINEMEYER,
I. S. T.

REPORT OF INTERNATIONAL VICE PRESIDENT MERRIGAN.

Edmonton, Alta., March 16, 1915.

Dear Sir and Brother:—

Conciliation Board About to Reach Basis of Finding, But E. D. & B. C. Objects.

The conciliation board, dealing with the

wage dispute between the shop employes of the Edmonton, Dunvegan and British Columbia Railway; the Alberta and Great Waterways Railway, and the Canada Central Railway, have had several meetings since February 15, and on Saturday morning, Mar. 13, after having failed to reach a satisfactory settlement, decided, with the consent of both parties, to the disputes, to transform the board into one of arbitration.

The board will now hold public meetings, collect evidence and present a verdict.

On November 1, 1914, the J. D. McArthur road put through wage cuts of from 25 to 33 1-3 per cent. The rates prior to November 1, were as follows: Boiler Makers, 48½c; Machinists, 47¼c; Blacksmiths, 47c; Tinsmiths, 30c; Painters, 38c; Carpenters, 30c; Pipe Fitters, 38c; Car Repairers 27c; Boiler Maker Helper, 30c; Machinists' Helper, 25c; Blacksmiths' Helper, 30c; Pipe Fitters' Helper, 20c per hour.

After cut as follows: Boiler Makers, 35c; Machinists, 35c; Blacksmiths, 35c; Tinsmiths, 25c; Painters, 30c; Carpenters, 22½c; Pipe Fitters, 25c; Car Repairers, 20c; Boiler Makers' Helpers, 22½c; Machinists' Helpers, 17c; Blacksmiths' Helpers, 20c; Pipe Fitters' Helpers, 17c per hour.

Upon protests from the men a board of conciliation was appointed, W. MacAdams representing the men; O. M. Biggar the company, and Mr. Justice Hyndman as chairman.

On Saturday, March 13, after several meetings had been held and the board had reached what was thought to be a basis for an agreement, the general manager of the McArthur Construction Company was asked if the company would consent to the changes dating back to November 1, and he refused. The board then asked if it altered its work from that of conciliation to arbitration, would both parties agree. A reply was received in the affirmative and consequently the board will hold public sessions to receive further representation. The first meeting will be held March 18th, Thursday night at eight o'clock. J. W. Hefferman is representing the men and S. B. Woods, Kansas City, the company.

The running trades are also in dispute with this company, and the employes of the Hudson Bay Railway caused the reduction of wages.

We had expected to meet last night and hold our first hearing but I believe for reasons better known by our attorney the hearing was postponed until Thursday night. The Provincial Legislature is sitting, and we expect to have some of the opposition air the matter in the House for our benefit. There is no doubt but what this company is trying every effort to take advantage of the men, claiming that they are short of money, but

that is all rot. The Government has financed them plenty.

With best wishes and kindest regards, I am,
Yours fraternally,
J. P. MERRIGAN, I. V. P.

REPORT OF SECOND INTERNATIONAL VICE-PRESIDENT NOLAN.

Editor Journal:

The following is my report from January 1 to February 28, 1915:

On several matters of much interest to the members of the Brotherhood; one of which will cause, I have no doubt, considerable indignation among the members of our craft, as well as the members of other railroad shops organizations, that is, the passage of the Geoke Amendment to the Boiler Inspection Law, which was enacted February 17, 1911; passed the United States Senate on the morning of March 4, 1915.

The advocates of this peculiar legislation could have only one object in view in securing this passage, and that was: To get absolute control of the Bureau of Boiler Inspection, notwithstanding the fact that the primary object in having federal inspection of locomotive boilers enacted into law was to safeguard life and property on American railroads, in having practical mechanics as inspectors, in order to comply with the law as enacted February 17, 1911.

Therefore, I deem it my duty as a representative of the Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America, to give absolute facts in connection with Geoke Amendment to the Boiler Inspection Law, since it was introduced in the House and Senate of the United States, until its final enactment into law, March 4, 1915.

I do so with a certain feeling of responsibility, in the general welfare of our membership, who are affiliated, and part of the American labor movement, so they may know their position and whom to depend on when vital questions or labor legislation confront them in the future.

After our late convention adjourned in San Francisco, Calif., President Franklin notified the writer that an amendment to the Boiler Inspection Law had been introduced in the House of Representatives by Congressman Geoke of Ohio, and referred to the Committee on Interstate and Foreign Commerce, of which Congressman Adamson of Georgia was chairman.

The representatives of the four transportation Brotherhoods appeared before the above committee, indorsing the Geoke legislation, which requires that each inspector shall be qualified to pass upon the condition of a locomotive boiler, as well as the engine and tender. Under the old law, there were fifty district inspectors of locomotive boilers, seventeen of which were boiler makers, also a few machinists, while the balance of the inspectors were locomotive engineers and others.

Why don't England, France and Germany have paper inspectors in their Bureaus of

Locomotive Inspection: Oh, no, for the law as enacted is generally enforced, as every applicant for the position of inspector must be a practical mechanic of railroad shop experience in order to qualify for such positions, as no civil service government commission can change law when once enacted from the practical to the theoretical, which was the primary object of the boiler inspection law in order to protect life in having practical men and inspectors.

But I am very sorry to have to admit that the beneficial object of locomotive inspection seems to have been lost sight of altogether by the legislative representatives of the four Brotherhoods, in an insane desire to place men in position as inspectors who knew nothing whatever about the construction, repairing and testing of locomotive boilers or engines or tenders.

Circular letters had been mailed broadcast throughout the country by and signed by the legislative committee of the four Brotherhoods, requesting that the organized labor movement indorse the Geoke legislation, that would place inspectors in positions of responsibility without the necessary railroad shop experience, and several officers of the American Federation of Labor fell for the misrepresentation contained in their appeal, even to the extent of indorsing by letter and otherwise the amendment to the boiler inspection law, so much so that the majority of the members of the House of Representatives had the idea that the entire American labor movement was in favor of the Geoke bill. Machinists also indorsed the bill, which appeared in their official Journal, June, 1914, without even consulting the officers of the Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America. This may not have been done intentionally, and trust that in the future that the officers of the legitimate American labor movement will consult with one another before any hasty action is taken by individual organizations on legislation of a national character.

The late convention of the American Federation of Labor held in Philadelphia, Pa., November, 1914, at that convention President Franklin had a resolution unanimously adopted in opposition to the Geoke Amendment, which pledged the American Federation of Labor and its officers to defeat such legislation in the Senate of the United States.

April, 1914, during a convention of the Railroad Employees' Department held at Kansas City, Mo., a resolution was introduced to amend the boiler inspection act of 1911, but after much discussion on the part of many of the delegates, the resolution was defeated through the efforts of Vice-President Heinzman, after a thorough explanation of the fallacy of such legislation; but later on an article appeared in one of the labor journals appealing to their membership in the support of the Geoke legislation, regardless of action

taken at Kansas City, Mo., April, 1914.

On January 12, President Franklin, Brother Wharton, president of the Railway Employees' Department of the American Federation of Labor; President Ryan of the Brotherhood of Railway Carmen, and others appeared before the Executive Council of the American Federation of Labor, Washington, D. C., on matters of general interest to the movement, and during the above meeting the resolution adopted at the Philadelphia convention against the Geoke Amendment was fully and freely discussed by several members of the Executive Council, as well as most of the officers of the Railway Department of the A. F. of L., after which a motion was made that the resident members of the Executive Council located in Washington, D. C., do everything possible to defeat the Geoke Amendment to the Boiler Inspection Law, which was carried unanimously.

January 14th the legal adviser of the International Association of Machinists (Mr. Frank Mulholland) drafted a new bill extending the inspection of locomotive boilers to the inspection of locomotive engines and tenders, which was satisfactory to the officers of the Railroad Department who were present on that occasion, a copy of which was given to the Executive Council while in session.

January 26, Senator Robinson, chairman of sub-committee of the Senate on Interstate Commerce, issued the following notice for hearings before his committee on the Geoke Amendment to the Boiler Inspection Law.

Mr. Thos. Nolan,
Portsmouth, Va.

Dear Sir:

You are informed that the sub-committee on Interstate Commerce will meet in the Capitol in the committee room on Tuesday, February 2, at 2 p. m., for the purpose of having hearings on H. R. 1789, amending the boiler inspection act, at which time you may present your views regarding this subject if you desire.

Very truly yours,

JOE T. ROBINSON,
Chairman Sub-Committee.

On receiving the above notice, I wired President Franklin immediately in order to have a representative from the International office in Washington, D. C., February 2, and later on received answer that Vice-President Heinzman would be present; also President Franklin instructed me to call on President Gompers in order to have the legislative representative of the A. F. of L. present at hearing February 2, and after a conference as per instructions, he advised that I inform President Franklin that a representative of the A. F. of L. would be present, and so instructed his secretary to notify Mr. Holder.

On February 1, Brother Heinzman arrived in Washington, also Brother Wharton of the Railroad Department, Brother Joseph T. Shea, foreman boiler maker New Orleans

Terminal Railroad Company; James H. Noonan, foreman boiler maker, Southern Shops, Knoxville, Tenn.; Joseph E. Holder, boiler inspector, Seaboard Air Line Railroad—all of whom were opposing the amendment of the Geoke Bill, but in favor of extending the inspection to the engine and tender, with practical mechanics as inspectors, having practical shop experience.

On February 2 hearing before the sub-committee of the Senate was held as arranged; Senators Robinson, Cummings and Myers, committee; Senator Robinson, chairman. After the writer had explained to the Senate committee why the boiler makers and others were opposed to the part of the man. After the writer had explained to the Geoke Amendment which made no provision for practical men as inspectors. The first witness introduced was Brother Wharton, president of the Railroad Department of the A. F. of L., who made a strong and forcible argument in favor of practical men as the inspectors of locomotive boilers, as well as the extension of the boiler inspection law to include the engine and tender, advising the sub-committee in the interest of the government, as well as the protection of life and property on American railways and the enforcement of law as enacted in having practical mechanics with railroad shop experience as inspectors.

The writer next called on Brother Holder, the legislative representative of the American Federation of Labor, but his answer was, "I am not prepared."

The next witness before the sub-committee was Vice-President Heinzman, who made a complete detailed explanation of many vital questions of justice, as well as law, and the necessity in bringing about the results intended when the boiler inspection law was enacted February 17, 1911. Brother Heinzman proved from the printed proceedings that H. E. Wills in 1910 and 1911 advocated competent boiler makers when the boiler inspection bill was pending before Congress, as well as Warren E. Stone, chief of the B. of L. E.

On February 4 the hearings on the Geoke bill were continued before the Senate sub-committee, with the following advocates of honest legislation present: Brother Berres, secretary-treasurer of the Metal Trades Department of the A. F. of L.; Vice-President Heinzman; President Wharton of the Railroad Department; Brother Holder, representative of the A. F. of L.; Brother Shea, foreman boiler maker, New Orleans Terminal Railroad Shops; Mr. James H. Noonan, foreman boiler maker, Southern Railroad Company, Knoxville, Tenn.

At the appointed hour, 2. p. m., February 4, Senator Robinson announced in the committee room that the hearing would be deferred one hour on account of important legislation pending in the Senate.

At 3:30 the hearings on the Geoke bill were resumed, with Senator Robinson in the chair. The first advocate of practical

legislation of locomotive inspection was James H. Noonan, who read a very able statement on the question of boiler inspection, why practical men were an absolute necessity in such work, giving his reasons from knowledge gained from years of experience as a mechanic in railroad shops, as well as holding the position of foreman boiler maker in the employ of the Southern Railroad Company.

Next was Brother Joseph T. Shea, foreman boiler maker of the New Orleans Terminal Railroad Company, who also made a detailed explanation of the duties required as well as the necessary qualifications for inspector of locomotive boilers, from the viewpoint of a practical railroad mechanic, and in closing his argument made a strong appeal to the Senate committee for legislation that would safeguard life and property on American railroads.

When Senator Robinson announced a recess just before the convening of the Senate committee, Brother Holder, who was there representing the American Federation of Labor, left the committee room, stating that he would return later to take part in the proceedings, but failed to show up for certain reasons that have not as yet been explained to the writer.

February 7, a meeting was held at the American Federation of Labor headquarters for the purpose of outlining a plan of campaign to defeat the pending Geoke legislation in the Senate, with the following A. F. of L. officers and others present: President Gompers, Secretary Morrison, James O'Connor, Executive Council member of the A. F. of L.; Vice-President Heinzman; Brother Evans, an active member of Lodge No. 450, Washington, D. C.; also Brother Holder, the legislative representative of the A. F. of L. Many suggestions were made during a general discussion of the Geoke bill, but Brother Heinzman insisted on an amendment to Section 2 of the Geoke bill, which provided for inspectors with paractical shop experience in the construction, repairing and testing of locomotive boilers, as well as the construction and repairing of locomotive tenders and engines, which was agreed to, and, further, the representative of the A. F. of L. was instructed to notify each United States Senator of the action taken by the resident members of the American Federation of Labor.

February 10, in company with Vice-President Heinzman, left for Portsmouth and Newport News, Va., for the purpose of attending an open meeting of Lodges 57, 298 and 428, also to meet the management of the Newport News Dry Dock and Ship Building Company, as requested by the members of Lodge No. 55.

On the night of February 11, Brother Heinzman addressed an open meeting of boiler makers and ship builders in the C. L. U. Hall, Portsmouth, Va., with a large attendance present, after which he attended

a special closed meeting of the above lodges:

The joint meeting was called to order by the president of Lodge No. 298 announcing the object of it, etc., which was to give the members of the three lodges an opportunity of hearing Vice-President Heinzman speak on the Brotherhood and other important matters pending at present in many parts of the country, also Washington, D. C. He was given close attention during his remarks and further received a rising vote of thanks as well as an invitation to return to old Virginia.

On February 12, in company with Brother Berres, secretary-treasurer of the Metal Trades Department of the A. F. of L., Brother Heinzman, and the writer called on Mr. Ferguson, general manager of the Newport News Shipbuilding and Dry Dock Company, to talk matters over in connection with the strike of the members of Lodge No. 55, in the boiler department; after quite a prolonged conference we arranged for a committee to meet Mr. Ferguson on Monday, February 15, to talk over the strike situation.

After leaving the office with Mr. Ferguson, Brother Berres, Brother Heinzman and the writer left for Washington, D. C., same evening, February 12, for the purpose of attending to legislation then pending in the United States Senate, arriving there on the morning of February 13.

On the night of February 26, Lodge No. 450 of Washington, D. C., held a reception and banquet to celebrate the ninth anniversary as a lodge of the Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America; invitations had been extended to the Assistant Secretary of the Navy, Congressman Keating of Colorado, Secretary Morrison of the American Federation of Labor, Secretary-Treasurer Berres of the Metal Trades Department of the A. F. of L.; Mr. Bernard P. Donnelly, chief gunner, United States Navy; Mr. C. T. Clayton, clerk, Labor Committee of the House of Representatives; also several boiler shop proprietors, viz., Messrs. Biscoe, Weber & Thomas, Hurley, Frosbery and Boswell, most all of whom responded to invitation of Lodge No. 450.

The Assistant Secretary of the Navy (Mr. Roosevelt) sent his regrets in not being able to attend, owing to official business in Connecticut with the Department.

The President of Lodge No. 450 and his committee promptly at 9 o'clock conducted the officers and members and their invited guests to the banquet hall; before being seated a flashlight picture was taken by a prominent photographer of Washington, D. C., and after which the good things of the season, furnished by the ladies in charge, were fully enjoyed by all present, and hopes are entertained by the officers and members of Lodge No. 450 that in the near future a ladies' auxiliary of the Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America will be organized in the

Capitol City of America. Music was rendered by a select union band, which was appreciated by all present, reminding a few of the oldtimers of the good old days long ago.

The banquet hall was decorated with flags and bunting in a manner which none but ladies could do; cut flowers were in abundance, which gave a beautiful effect to the surroundings as well as a pleasure to look upon.

When the inner man was satisfied and happy and enjoying union made cigars, the speakers who were many, gifted as well as champions in the cause of organized labor, responded to the toastmaster in the order named: Congressman Keating of Colorado, Secretary Morrison of the American Federation of Labor, Secretary-Treasurer Berres of the Metal Trades Department of the American Federation of Labor, Mr. B. P. Donnelly, chief gunner United States Navy, Mr. C. T. Clayton, clerk Labor Committee of the House of Representatives; a representative of the Machinists and Pattern Makers from the Washington Navy Yard, also Messrs. Briscoe, Webber and Boswell, boiler shop proprietors of Washington, D. C.

The addresses made were an able explanation of the past achievements of organized labor of America for the benefit of the men of labor. Congressman Keating, many times during his remarks, gave practical illustrations of what can be done in the future, and especially urged that organized labor educate themselves and get posted on the great economic problems that confront the toilers of America.

In fact, all of the speakers, as well as the proprietors, express the hope that the banquet of Lodge No. 450 would be the means of bringing about the desired results and a better understanding among all concerned in the Capitol City. At the hour of twelve the band rendered America, all joining and leaving for their respective homes well pleased after an evening of genuine pleasure.

A vote of thanks was tendered to the following ladies for their untiring efforts to make the banquet a success: Mrs. H. Le Laurine, Mrs. W. E. Webbers, Mrs. A. Sherrier, Mrs. Geo. P. Smith, Mrs. M. W. Kemmerling and Mrs. J. W. Kemmerling. The committee on banquet, composed of Bros. Webber, Le Laurine and Kemmerling, as well as the committee on speakers and music, Bros. Evans and Mean, did some active hustling in order to make the occasion one of pleasure to their invited guests, and I must say they accomplished their purpose, for a good time is essential once in a while, as it brings the members and their families, as well as their friends in the labor movement, closer together, which has a tendency to promote and foster a better and more mutual understanding for their general advancement. May the good work continue in hopes that the day is not far distant when selfish methods, either in industrial controversies or general legislation

for the uplift of labor will not be tolerated by the rank and file of the American labor movement, for if we desire to be successful in the cause of human rights there must be a spirit of unquestioned co-operation in the interests of all who are affiliated with the legitimate labor movement. Men and women, that is why Lodge No. 450 expects, when Feb. 26, 1916, rolls around, to have a ladies' auxiliary of the Brotherhood in the city of Washington, D. C., to counsel and encourage their fathers, brothers and husbands to stand loyal in interest of another when necessary.

During the closing days of the Sixty-third Congress my efforts were entirely taken up in an effort to have an amendment to Section No. 2, of the Geoke bill, approved by the sub-committee on interstate commerce, which was drafted by Vice-President Hinzman and Bro. Wharton, president of the Railway Employes Department of the American Federation of Labor, and approved by President Gompers, Secretary Morrison and James O'Connell, the executive board member of the American Federation of Labor, after which Bro. Holder, legislative representative of the A. F. of L., was instructed to draw up a circular letter, mailing a copy to each United States Senator, explaining the action taken at the Philadelphia convention of the A. F. of L., as well as the approval of the executive council to carry out the resolution, as adopted at the Philadelphia Convention of the A. F. of L., opposing the Geoke amendment to the Boiler Inspection Law, and indorsing a new bill, which provided for practical mechanics as inspectors of locomotive boilers, also locomotive engines and tenders. Explanatory letters to congressmen and senators serving this purpose as a medium of information and are all right. When the advocates of any particular legislation are notified by a congressman or senator over their signature of their approval and support, otherwise nothing doing, which shows the opposition are on their jobs.

In conclusion, let me say that up to and including March 3 I had every hope that the sub-committee on interstate commerce would not report the Goeke amendment out because of the able arguments made in opposition to it before the subcommittee by Bros. Hinzman, Wharton and Shea, as well as James N. Noonan and others, pointing out to the committee why practical mechanics of railroad shop experience were an absolute necessity as inspectors of locomotive boilers as well as locomotives and tenders, in order to conform the law as enacted, which had for its purpose the protection of human life.

I shall never forget the closing hours of the Sixty-third Congress, remaining in the gallery of the United States Senate until 2:10 on the morning of March 4, with a senator who had hardly ever left the senate chamber up to that time, and thinking on account of so much important legislation then pending before the senate, which was in continuous session for almost two days

and nights, that no action would be taken. I left to get a couple of hours' sleep, but before leaving I looked around the senate gallery in hopes to get some friend in favor of honest legislation in the interest of the railroad shop men of America, and prevent such a grave injustice against them, some one to co-operate with and counsel in getting their senator of their state to object when the bill was reported out; but none was there.

I returned at 8:30 A. M. to the senate gallery, remaining there until 9:30. Was anxious to know if any action was taken on bill, called on the clerk of the senate, who informed me that the Geoke bill had passed the senate about 5 A. M. on the morning of March 4, 1915. And further desire to say that if we had a legislative committee of three active workers on the job, the Geoke amendment to the Boiler Inspection Act would have died the death with the Sixty-third Congress.

Bros. Hinzman and Wharton did good, effective work while in Washington, and if they were in a position to remain, the result would have been different, but were compelled to leave to attend to business that required their prompt attention, leaving the writer to contract the gum-shoe work of a committee of four (as well as help when required), representing the four brotherhoods. Let us profit by our defeat, for the Railroad Department is going to be a power in the future in the adjustment of labor disputes, with a membership of 350,000 railroad shop men at present, and when industrial conditions become normal again there will be many thousands more, and in order to get the necessary legislation, either state or national, we are compelled to have one legislative representative from each craft affiliated with the Railroad Employees Department of the A. F. of L. in order to cope with an organized opposition here in Washington, and which the officers of the Railroad Department are aware of, and intend to apply a remedy in the near future.

With best wishes for future success, and greater co-operation in the American labor movement, when the vital interests of any or all international labor organizations are at stake, is the sincere desire of

Yours fraternally,

THOS. NOLAN.

REPORT OF EIGHTH INTERNATIONAL VICE-PRESIDENT, JOS. P. RYAN.

Editor Journal:

As I have not reported for some time owing to the fact that I have been busily engaged, assisting Lodge No. 592 in their strike in the oil fields of Oklahoma. With the exception of a few days at Van Buren and a short visit at home at Christmas time, I have been continuously engaged here at Cushing, Drumright and Tulsa, Okla., since December 4, 1914, to the present date, March 11, 1915.

The strike in the oil field districts of Oklahoma, Louisiana and Texas came about,

owing to the action of seven of the large tank building firms, namely, Petroleum Iron Works, of Sharon, Pa.; Standard Boiler Plate & Iron Co. of Niles, O.; Warren City Tank & Boiler Co. of Warren, O.; Reeves Bros. of Alliance, O.; Hammond Iron Works of Warren, Pa.; Treadwell Construction Co. of Midland, Pa.; and the Riter-Conley Co. of Pittsburgh, Pa., uniting into an association and declaring for the open shop on all their new contracts beginning January 1, 1915.

The Petroleum Iron Works Co. was the first firm to put the open shop policy into effect. On Saturday morning, January 2, 1915, our members were notified on a P. I. W. job at Dropright, Okla., that they could return to work as new men, but that no organization would be recognized. No job stewards would be allowed, no permit men would be bumped to make room for members of our organization and that the job would be an open shop job from that date on. Business agents, Bros. Wm. H. Dwyer and Jack Thomas, also the job stewards and myself, interviewed the foreman, Mr. Harry English, and failing to adjust the matter in any way, we instructed our members to go to Drumright, and placed three pickets on the job. Several of the non-union men who were on the job, came off and joined our members.

Visiting the next job at Drumright at 4:00 P. M. we learned from the president of the lodge and the other stewards, that they had been notified that morning, that they were working on an open shop job. As the strike vote had been taken and sanction granted, we called out the men on the P. I. W. job at Drumright. Sunday, January 3rd, Business Agent Dwyer and myself drove out to Norfolk to Mr. Van Dyke's P. I. W. job and after discussing the matter with him and learning that his job was to start on the open shop plan on Monday, January 4th. We called the men off the job and advised them to return to Cushing, Okla., as all these jobs were camp jobs and as a strike had been called, they had to leave the company camps.

Prior to the locking out of our members at Dropright on January 2nd, a committee and myself had met with Mr. A. Tabor, superintendent in the field of the Petroleum Iron Works and he informed us that all the seven firms had united for the purpose of forcing the open shop in the oil fields and that the matter was out of his hands. We arranged to take the matter up with Mr. C. G. Todd at Sharon, Pa. Vice-President Dowd was sent to Sharon by International President Franklin. He met Mr. Todd but could not get him to take any action other than a reply that he would be willing to attend a conference to discuss the controversy with representatives of our organization providing the others were also agreeable. From Mr. Todd we learned that Mr. A. G. Reeves was the chairman and secretary of the association and that he was the proper party to see as to a conference.

President Franklin sent Vice-President Louis Weyand to Alliance, Ohio, to interview Mr. A. G. Reeves as to securing a conference to take up the trouble. He advised Brother Weyand to have President Franklin address a formal written request to him and that same would be placed before the various heads of the seven companies. This was done. I also went to Tulsa with a committee of Lodge No. 592 and had a conference with Mr. J. J. Keim of the Standard Boiler Plate & Iron Co. He suggested that we try to get in touch with Mr. Gilbert at Miles, Ohio. We also took the matter up with Mr. Wm. Edwards, Vice-President of the Warren City Tank & Boiler Co. at the Tulsa Hotel, Tulsa, Okla. He advised us of the position all the firms had taken, but promised to wire Mr. Hughes, president of his company at Warren, Ohio, as to his position on meeting our representatives in a general conference. I next had President Franklin wire both Mr. Hughes of the Warren City Co. and Mr. Gilbert of the Standard Boiler Plate & Iron Co. President Franklin having business in Washington, D. C., arranged to have them advise him there as to their attitude in granting a conference.

From January 1st up to Monday, January 18th, our members remained at work on all jobs of the Warren City, Riter-Conley, Treadwell, Hammond Iron Works and the Standard Boiler Plate & Iron Co., pending a reply from the said firms as to a meeting. On the Standard Boiler Plate & Iron Co. jobs at Cushing and Drumright, our members worked with non-union men, under protest, in the hope that trouble might be avoided. The strike vote which I took in person, resulted in a vote of yes—571, No. 2—Total Vote—573. On Monday morning, January 18th, all efforts failing to secure a meeting and as non-union men were being placed to work on the various jobs, a general strike order was issued from headquarters by Vice-Presidents Hinzman, Weyand and myself, a committee of Lodge No. 592 being present at the time. All our members were ordered on strike on Monday, January 18th, on all jobs of the six remaining firms. Every lodge in the Brotherhood was notified either by mail or wire, to the effect that the strike had been called. Six hundred members of our organization responded to the Oklahoma fields. Later our members were ordered on strike against these seven firms at Whiting, Indiana; Dallas, Tex.; Ft. Worth, Tex.; Lynchburg, Texas, and Port Arthur, Texas.

For the benefit of our Brothers throughout the country, let me state that this strike was forced upon our members in the various oil fields. There was no question of wages involved, no working conditions in dispute and no trouble on any of the jobs in course of erection. The seven companies have selected the present time, as a most opportune one, to annihilate our organization, and to take from us the conditions and wages we have built up in the oil fields

in the past years. As a means of forcing the open shop, an organization was incorporated under the laws of Oklahoma at Oklahoma City in November, 1914, and known as the Independent Steel Tank Builders of America. Permit men who have derived the benefit of our conditions during the summer months were organized by representatives of the firms now on strike and when the strike was called these men were pressed into service as strike breakers. They were promised contracts but to date none are forthcoming. Now the Independent Steel Tank Builders of America are going to strike, so we are told, because promises have not been kept by the firms on strike.

So that our membership at large may know, to date, our members on strike in the oil fields, have received in regular strike benefits, the sum of eighteen thousand five hundred dollars (\$18,500.00).

As we have a large number of permit men and members who are not entitled to strike benefits, on strike with us, Lodge No. 592 has issued circular letters of appeal to all lodges in the Brotherhood, same being approved by the International President. The returns from this appeal will be used in caring for permit men on strike, also our members who are unable to receive benefits under our laws.

Since the strike has been on, we have been successful in forcing one of the large companies to return several men to Kansas City, Mo., and pay them wages and transportation to the extent of \$30.50 per man. We had the Labor Commissioner take testimony from these men and rather than stand prosecution under the State Labor Laws, they paid them for five days and transportation back to Kansas City, Mo. The labor commissioner had also endeavored to bring about a conference, but without avail.

At the present time we have in the field some fair firms for whom our members are working, enjoying union conditions, wages and hours. These jobs are all closed shop jobs, and are working under the new agreement. The following firms are now erecting work in the Oklahoma fields and we welcome them, as heretofore they have not entered the oil fields, as the larger firms against whom we are on strike have controlled all of the work. Kennicott Co. of Chicago Heights, Ill.; Wm. Graver Co. of East Chicago, Ind.; United Iron Works of Iola, Kas.; Kansas City Construction Co. of Kansas City, Mo., and the Kaw Boiler Works of Kansas City, Kas. These firms are all fair and are employing our members who have been on strike since January 1st and 18th, respectively.

For the benefit of our membership at large, I wish to state that numerous articles have appeared in the papers throughout this section, that the strike has been settled and that all the strikers had returned to work. I take this opportunity of advising our members that the strike is in full force

and effect; contrary to all newspaper reports. The strike is being advertised in our Journal, also several labor papers and when any settlement is reached, all our members will be notified officially.

Lodge No. 592 is not accepting any clearance cards, pending a settlement of the present trouble and all our members are requested to remain away from the oil fields of Oklahoma, Louisiana and Texas, until further notice.

President Franklin at the present time is trying to bring about a conference for the purpose of settling the present strike. To date all offers upon the part of our organization to meet with the firms against whom we are on strike have been futile. The seven companies on strike have deputy sheriffs on all their jobs but the strike-breakers are being paid according to what they do.

Since my last report, I have collected the following amounts, of which I am submitting an itemized statement. To Reinstatement, \$7.50, I. S. T., and to thirty-one official emblem buttons and one charm, \$32.75.

My correspondence has been neglected owing to the fact that my duties here in the strike zone have taken up most of my time. However, I trust that my correspondents will be lenient with me, until such time as I can resume communication with them.

Since the strike has been on we have mourned the loss of two worthy members of our Organization, Brother J. B. Farrell, Reg. No. 58634, and Brother P. J. McBride, Reg. No. 9938, of Lodge No. 592. Both brothers succumbed to pneumonia after a short period. Lodge No. 592 mourns the loss of two staunch union men and our charter is draped in memory of the departed brothers.

Trusting that my report will prove interesting to the rank and file and that all members will be guided by the above information as to the strike in the oil fields, I remain,

Fraternally,
 JOS. P. RYAN,
 8th I. V. P.

**STATEMENT OF OFFICIAL EMBLEM
 BUTTONS AND CHARMS, SOLD BY
 JOS. P. RYAN, 8TH INT. VICE-
 PRESIDENT, JANUARY 1ST
 TO MARCH 1ST, 1915.**

Wm. H. Dwyer, \$1.00; Jack Thomas, \$1.00; Fred Herford, \$1.00; Harry Smith, \$1.00; Richard Rutherford, \$1.00; C. D. Huckaby, \$1.00; Manuel Navarro, \$1.00; G. L. Baker, \$1.00; Peter Gittere, \$1.00; William Carey, \$1.00; Edward Hood, \$1.00; Bert Lemaster, \$1.00; J. T. Bain, \$1.00; J. P. Kane, \$1.00; Edward Sheehan, \$1.00; Harry Moody, \$1.00; Chas. Bouthwell, \$1.00; J. E. Dixon, \$1.00; W. B. Maxwell, \$1.00; Frank Callopy, \$1.00; M. S. Brown, \$1.00; Wm. F. Lambie, \$1.00; W. T. Rogers, \$1.00; J. L. Heath,

\$1.00; A. J. Shindledecker, \$1.00; Edwin Pease, \$1.00; N. Snively, \$1.00; Chas. E. Houghton, \$1.00; George Gardner, \$1.00; Frank McMullen, \$1.00; Jack Thomas, \$1.75; Jos. P. Ryan, \$1.00. Total, \$32.75.

To one reinstatement fee, Brother C. H. Jacobs, Reg. No. 44796, of Lapsed Lodge No. 91, H. D. to I. S. T., \$7.50. Total collection \$40.25.

Respectfully Submitted,
 JOSEPH P. RYAN,
 8th I. V. P.

Cushing, Okla., March 11, 1915.

**REPORT OF NINTH INTERNATIONAL
 VICE-PRESIDENT SCHMITT.**

To the Officers and Members of the Brotherhood, Greeting:

At the conclusion of my last report I was in Indianapolis, Ind., November 12. On the morning of the 13th endeavored to locate Brother Frohlinger and learned he was out of the city; I then met Brother Geyer and with him went to the headquarters of the Structural Iron Workers, to take up with them the question of a tank being built by their members on the Ford Building. We met their International Secretary-Treasurer and he agreed that the work rightfully belonged to the boiler makers, and further informed us that their men had been ordered off of the work, but refused to obey the orders, and that charges would be preferred against the lodge for insubordination. Brother Frohlinger and I went up on the building, but were unable to accomplish anything. I later went to the work again and the men refused to relinquish the work, and then learned of another tank job in an office building, with Brother Frohlinger and the B. A. of the Steam Fitters went to look after this, but getting to where the job was, learned that it had been completed. I then went to the C. H. & D. shops and arranged a meeting of all crafts for the purpose of taking up the question with them of forming a system federation on this road; the next day held this meeting, and the sentiment of the men was for forming the federation. In the afternoon, with the shop committee, met the boiler shop foreman in regard to the discharge of Brother Burke. We were unable to get much satisfaction from him, and then arranged a meeting with the master mechanic, which meeting took place the next day and we were assured that an investigation of the case would be made and would inform the committee of his findings.

On the 20th left for Cincinnati; the 21st went to the Ivorydale shops of the C. H. & D. and arranged a meeting of a committee of each craft for Sunday afternoon. At this meeting the question of forming a system federation was thoroughly discussed, and each craft decided to take up this question at their next regular meeting.

On the 23rd left for Lima, O.; on arriving here, arranged a meeting for that evening of all crafts, and explained to the brothers the object of forming a system federation,

which met with favor of those present, having visited Toledo in October in reference to this, concluded all the points on the system; then wrote letters to all the lodges of the various crafts on the system, notifying them of a meeting to be held in Cincinnati, November 29, and to have delegates at this meeting.

On the 24th I returned to Cincinnati to attend a meeting of the General Labor Council, being informed by Brother O'Brien that at this meeting it was expected that the question of placing the Casey-Hedges Company of Chattanooga, Tenn., on the unfair list would be brought up by the Metal Trades, this company having had a contract to build four boilers for a Cincinnati brewery, and because of their not being made by union boiler makers were compelled to cancel the order after having two completed. I endeavored to organize this plant at the time but the company positively refused to consider this, and their not being able to place these boilers was largely due to the activity of the members of Lodge No. 105. The company, because of being unable to place these boilers discharged what few union machinists they employed.

On the 25th I went to my home where I remained until the 27th, when I returned to Cincinnati to prepare for the federation meeting of the crafts on the C. H. & D. Ry. on the 29th. This meeting was a success as all crafts were represented from all points on the system, a temporary organization was formed and constitution and by-laws were adopted, and another meeting arranged for on the 19th of January.

On the 30th and December 1st, Vice-President Nolte of the Railway Carmen and myself got out copies of the minutes of the meeting and the constitutions and by-laws for each lodge of the crafts on the system, also for each of five International Offices and the Railway Employees Department, 24 copies in all of 11 pages each. Evening of December 1st I left for Louisville, Ky., to meet with the president of the Kentucky and Indiana Terminal Railway Co., to complete the negotiations for a new agreement and an increase in wages, which we were unable to secure in our negotiations with the superintendent early in November.

On the 2nd, I, with the committee met the president of the Company and were successful in getting with some slight improvements the old agreement and an increase of one cent per hour for the boiler makers and helpers, who at the time were only working seven hours per day.

On the 4th, Brother Nolte of the Carmen and I left for Princeton, W. Va., arriving there the next morning where we met Brother Davison, general organizer of the machinists. In the evening we met several of the committeemen of the various crafts and arranged for meetings with the federated committee to learn of the grievances, these meetings were held each eve-

ning until the 10th, when Brother Nolte of the carmen and Brother Davison of the machinists and I left for Norfolk, Va., to meet the general manager of the Virginian Railway. We had a conference on the 11th with the general manager, and superintendent, of the motive power and superintendent shops. At this meeting the grievances were gone over, we having numbers of them in writing and finally a meeting was arranged for on the 16th, in Princeton, W. Va., of all officials from the superintendent motive power down and the federated committee, at which we were to lay down a policy to be carried out by the officials and employes. On the 12th we left for Washington where I met Brother Nolan and we called upon the congressman from my home district and Senator Pomerene, in reference to the proposed amendment to the boiler inspection law.

On the 15th we left for Princeton, W. Va., arriving there on the morning of the 16th. In the afternoon the meeting as arranged by the general manager was held, some 15 officials and 18 committeemen being present, and superintendent motive power stated the object of the meeting and turned over the same to us. A stenographic report of the meeting was taken and each foreman and lodge on the system was furnished a copy. We took up all grievances of both sides and placed the responsibility of the existing conditions on the foreman as well as on the employes. We then defined a policy by which the officials and the men were to work and abide by in the future, failure to carry out this policy by either the officials or the men would be subject to dismissal from the service of the company. We then held a federation meeting and explained to the brothers what had been done, and up to the 21st held craft meetings instructing them in reference to handling grievances in the future. Before leaving the city one of the carmen was caught violating the rules laid down for carrying tales to the foreman and was discharged immediately, this being one of the features that was causing most of the trouble in the shops.

On the 21st I left for my home for Christmas, arriving there on the 22nd. On the 26th I left for Keyser, W. Va., to straighten out the financial affairs of Lodge 579, on my arrival notified Secretary Dougherty and requested him to call at the hotel in the evening which he failed to do. The next day at noon I met the president of the lodge and he informed me where the books were and the trouble they were having. I got the books that afternoon and in the evening went to Piedmont and met several of the brothers. On the 30th and 31st and January 1st and 2nd, I worked on the books which had not been audited for over two years and were very badly kept, and on evening of the 2nd held a meeting in Piedmont and on Sunday held another meeting in Piedmont. At this meeting two helpers were obligated, also reported the condition

of the books and finances. On Monday, consulted a lawyer and showed him the books. He was of the opinion that it would be doubtful if a case could be made in court and advised that an effort be made to get a settlement otherwise, so I sent for the financial secretary to call at the hotel and he failed to call. I then sent him a notice to meet me the next morning by 11 o'clock. Failing to do so would prosecute him. The next morning he came and I went over the books and the report I had made out showing him to be short in his accounts \$115.80 as I had worked it out. He did not deny the statement. I finally made a settlement with him allowing his monthly dues for his services for 29 months, amounting to \$43.50 and \$50.00 in cash, giving him a receipt for same. In the evening held a meeting and made a report of the settlement made and the brothers were very much pleased at the outcome as it was more than they expected. As several of the brothers had paid their dues, an order was drawn for \$64.70 for stamps and supplies, bringing all the brothers in good standing January 1st.

On the 7th I left for Cumberland, Md., to take up the work of reorganizing Lodges Nos. 332 and 577. On Sunday evening held a meeting in South Cumberland which was well attended for the first meeting of B. & O. men, at this meeting 33 signed up to affiliate and pay their fee on the 29th which was their pay day. On the 11th met a committee of the brothers from the Western Maryland shops and arranged a meeting for the evening of the 12th. At this meeting, 7 boiler makers and 2 helpers paid their reinstatement fee and forwarded same to the I. S. T. for supplies.

On the 13th met committee of the B. & O. shops.

On the 14th I went to Keyser to attend meeting of Lodge No. 579 and initiated two helpers at this meeting. On the 15th left for Cincinnati to attend meeting of the C. H. & D. Railway System Federation which was to meet on the 19th and the various district organizations were to meet the day previous to draft their special rules. The federation was in session the 19th and 20th, at which good business was done adopting general and special rules, electing officers and affiliating with the railway employes department. Brothers Garvey and McGillivray of the southeastern federation were present at this meeting and spoke in behalf of system federation and explained the workings of the federation and what it had done for the railway employes of the southeast. Also attended meeting of Lodge No. 91 on the 19th.

On the 21st, with other international officers I left for Lima, O., for some organization work. On the 24th we went to Peru, Indiana, to attend the C. & O. System Federation meeting which was in session on the 25th, 26th and 27th, and was a very good meeting and a great deal of good work done. Brother Garvey also attended this

meeting. On the evening of the 26th, Brother Garvey and I attended the meeting of Lodge No. 384, which was well attended and doing good business. At 10 p. m. I was compelled to leave for Lima, having had arrangements made for a conference with the general foreman the next day concerning the question of seniority which he agreed to adjust. Lodge No. 259 has a wide-awake shop committee and are always looking after the interest of the lodge and its members and deserve the undivided support of all the members.

That evening I left for Cumberland, Md., arriving there on morning of the 28th. In the evening I reorganized Lodge No. 577. At this meeting two more boiler makers reinstated and two helpers were initiated. On the 29th held a meeting in South Cumberland at which 16 boiler makers, 1 apprentice and 1 helper paid their reinstatement fee and 8 new applications of helpers were received and forwarded to the I. S. T., \$94.80 for supplies.

On the 2nd of February went to Keyser made out the new due books and opened out the ledger, attended meeting in the evening and instructed officers in their work; much interest was displayed in this meeting and it is to be hoped that the same spirit will continue and the lodge will prosper. On the afternoon of the 3rd I held a meeting for the night men of the B. & O. shops at which 9 were present who signified their willingness to affiliate and agreed to pay their fee the following day. On the 5th attended a meeting of Lodge No. 577. While this is not a large lodge I am of the opinion that it will be a very good business lodge and will profit by the error made in the past which caused its suspension. On the 8th I held a meeting of Lodge No. 332 and reorganized same, electing a good set of officers who I believe have the interest of the movement at heart and will make a success of the lodge. On the evening of the 9th met the financial secretary at his home and instructed him in his work.

On the 10th I went to Hagerstown, in the evening met several of the committeemen and arranged for a federation meeting. On the 11th attended the meeting of Lodge No. 578, which was well attended and meeting conducted on business lines. On the evening of the 12th addressed federation meeting. On the 13th returned to Cumberland to attend the Western Maryland Railway System Federation called for the 13th and 14th. At this meeting a new schedule was drawn up and considerable other business transacted. On the 15th held another meeting of Lodge No. 332. Up to this time 11 additional members being added to the list, making a total of 39 members, leaving about 15 that have as yet not affiliated. On the afternoon held a meeting for the night men. Those present assured me that all the night men would soon be in line.

On the 17th I left for my home arriving

there on the 18th, where I got out copies of the new schedule for each of the five international offices, railway department and the secretary-treasurer of the system federation, and forwarded \$28.40 to the I. S. T. for additional supplies for Lodge No. 332.

On the 22nd I left for Lima, O., to try and get the men in the Lima Locomotive Works interested in organization. On the 23rd attended meeting of the Central Trades Council. On the 25th attended meeting of Lodge No. 259, at which many matters of vital importance to the lodge were brought up and a special meeting was arranged for Sunday, March 7th. The lodge gave a dance at the auditorium on the 24th which was a success in every way, and the committee in charge is to be complimented in the way they conducted the affair.

On the 26th I left for Louisville, Ky., to attend a hearing held by the Executive Board of the Central Trades Council on the 27th, in regards to the actions of the business agent of the council and the business agents of the Building Trades advising a brewer that it would be all right for him to let the contract for two boilers to the Henry Vogt Machine Co., one of the most unfair firms in the country against organized labor. Last November I secured an affidavit from this brewer to the above facts. About four hours' time was consumed in the hearing and about 12 witnesses were heard. The executive board is to report its finding at the next meeting of the council, March 9th.

March 1st I returned to Lima, O., to take up my work there again. This concludes my report to March 1st.

With best wishes and regards, I am,

Faternally yours,
J. F. SCHMITT.

A COMMUNICATION FROM THE SECRETARY OF THE AUSTRALIAN SOCIETY OF BOILER MAKERS.

Note.—The following interesting communications from Mr. John O'Toole, secretary of the Federal Council of the Federated Society of Boiler Makers and Iron Ship Builders, were received by the Editor and are reproduced for the benefit of our members. The work mentioned in the last communication refers to a blast furnace gotten out here and being erected in Australia.—The Editor.

Office, 81 Darby St.
Newcastle, Jan. 26, 1915.

To James B. Casey, Esq.,
Editor-Manager Boiler Makers and Iron Ship Builders, etc., of America.

Dear Sir and Brother:

I have to acknowledge receipt of your letter dated December 2, 1914, also of your three Journals and the copy of your Constitution, all of which I have read with considerable interest, and for which I desire to express my sincere thanks.

I also have to thank you for your intention to put me on your mailing list, a compliment which I shall not forget.

I think I mentioned in my last letter that we were having our rules revised to bring them up to date, and I am now in a position to forward you a copy of the draft which is being placed before the members for adoption.

The photographs of the various Labor Day celebrations of your members is interesting. In this country instead of having one day set apart, each of the important centers have a celebration of their own, held on different dates, the day being known here as Eight Hour Day. The usual procedure is to have a large procession of the workers all marching behind their respective trade banners, with artistic and working displays incidental to the trade or occupation that the respective members follow. Then follow a sports program, at which everyone can have a good day's fun, Political speeches are also an order of the day. A committee of all the trade unions in the district where the celebration is to be held arrange all matters in connection with these demonstrations.

Prizes are given for the best displays and to the unions having the largest number of members in the procession, and for having the greatest proportion of members present, this latter arrangement gives a small union the same chance of securing a prize as the large ones. I am pleased to say that my branch at Newcastle secured the prize last demonstration for having the largest number of members in the procession, this being an item which is keenly contested each year.

There is one peculiar thing in connection with these celebrations and that is, that we have not had an Eight Hour Act placed on our statute books yet, although the majority of us have an eight hour working day, or rather a 48-hour week.

I believe that four or five eight hour bills have been through our State Parliament and have been thrown out by the upper house.

There is another one ready now to run the gauntlet. I see no account of the membership of your organization in any of the Journals; it must be very large, judging from the great number of locals you have.

The ladies' auxiliary lodges seem to me to be a great idea, with their winning ways they should be able to assist the organization considerably.

Up to the present we have not had any control over our helpers, they having a powerful organization of their own, but we intend to take the feeling of our members on the question of amending our Constitution so as to take them in.

I inclose the back portion of the envelope covering your last letter, with an inscription placed thereon by the postoffice officials, the postage to Australia being 2½d per ½ ounce; this would be equivalent to your 5c stamp.

Trade is a bit easy in Australia just at present, although we have nothing much to complain of in that respect, a great number of laborers are, of course, unemployed and some hardship exists among them.

I shall be glad to correspond with you regularly and to afford any information regarding local conditions which might interest you.

With fraternal greetings from Australia,
I am, Yours faithfully,
JNO. O'TOOLE,
Council Secretary.

Office, 81 Darby St.
Newcastle, Feb. 8, 1915.

To James B. Casey, Esq.,
Editor-Manager Boiler Makers' Journal,
Kansas City, U. S. A.

Dear Sir and Brother:

Under separate cover I am forwarding you some copies of the balance sheet and annual report of my society for the year 1914.

I am further pleased to report that trade continues good with us and no hardship consequent upon unemployment has been reported so far.

I think I mentioned in my last letter that we had a large iron and steel works under construction in this district, and in this connection I am forwarding you portion of one of our newspapers containing some illustrations of it, which may be of interest, seeing that the whole, or practically the whole, of this work was made in the United States of America and imported here for erection.

There are at the present time about 1,100 men engaged on the works, so that you will see that it means a good deal to a place like this. My men were receiving 16/- per day up to the war condition setting in; they now receive 12/4, the previous wage being the highest recorded in N. S. Wales. They expect to be running metal next month; the finished plant represents four furnaces, so there is plenty of construction work ahead of us yet.

With best wishes to yourself and brethren.
Yours fraternally,

JNO. O'TOOLE.

PROPOSED AMENDMENT TO THE CONSTITUTION.

Livingston, Mont., Jan. 22, 1915.

Mr. J. A. Franklin,
International President,
Kansas City, Kas.

Dear Sir and Brother:

The following is a "Resolution," unanimously adopted at last regular meeting, and whereby I was instructed to send you a copy of same, requesting that you have it printed in our official Journal in the proper manner, so that the rank and file may vote their sentiment on the question embodied therein:

RESOLUTION.

An act to amend Article V, Section 3, of the Grand Lodge Constitution.

PREAMBLE.

Whereas, The San Francisco Convention increased the salary of the Grand President at a time when conditions of the trade, country and Grand Treasury did not justify it, and

Whereas, Conditions of the country and trade are growing steadily worse; and

Whereas, We believe the increase unwarranted, and excessive, as compared to the earnings of the average boiler maker or ship builder; and

Whereas, We believe the membership as a whole are not satisfied or would not have granted this increase, but that it was granted by a "machine controlled convention," with the majority of the members not represented; and

Whereas, The next convention will not meet until 1917, that this great wrong may be righted, and honesty and justice to all may prevail, we, the members of Subordinate Lodge No. 123, in regular meeting assembled, do hereby demand that the Grand President order a referendum vote on the question to strike out the words "twenty-four hundred dollars," in Article V, Section 3, lines 10 and 11, of our Grand Lodge Constitution, and insert the words "eighteen hundred dollars" in lieu thereof.

Fraternally submitted by

LODGE No. 123,
Theo. W. Evert, C. and F. S.

Kansas City, Kas., Feb. 19, 1915.

To the Officers and Members of All Subordinate Lodges, Greeting:

Gentlemen and Brothers:

In reference to the foregoing letter and resolution from Lodge No. 123, of Livingston, Mont., proposing an amendment to Article V, Section 3, of the Grand Lodge Constitution, you will be governed by Article III, Section 1, in considering this proposition.

Inasmuch as the law requires that a proposition for legislative enactment shall be published in the official Journal for two months, which notice must expire at the end of the month in which it was published, and in accordance with this provision all votes must be in the hands of the International Secretary-Treasurer not later than the tenth (10th) day of May. In the event the resolution shall be 20 per cent indorsement, the proposition will then be submitted for a referendum vote.

In voting on this, remember this is a lodge vote and requires majority of the lodge, either for an indorsement or rejection of the proposition. The vote is to be returned to the International Secretary-Treasurer in accordance with Article III, Section 1.

I regret very much that the fourth "whereas" in the foregoing resolution contains such a glaring misstatement of facts, and it becomes my duty to challenge the statement that the action of the San Francisco Convention was controlled by a machine.

No more bare-faced falsehood or misrepresentation of facts could be made by anyone.

I refrained from placing International officers who were regularly elected delegates upon any committee as far as possible, and to my knowledge no undue influence was used or attempted with any committee. I did not personally appear before any committee at any time except when requested to do so by the committee themselves.

It appears that there are those among our members who, when unable to secure favorable action upon propositions favored by them personally, or to defeat matters proposed by others, immediately become disgruntled and, through a lack of any logical reason resort to slander and a misrepresentation of facts.

I feel that as a matter of justice and in order that those of our members who may not have read the proceedings of our convention, with reference to the action taken in amending Article V, Section 3, that after the amendment was carried by practically a unanimous *vive voce* vote, and hearing some objections on the part of a few of the delegates, I voluntarily threw the matter open for reconsideration on the floor of the convention, and, after a free and unlimited discussion, a roll call was taken, which resulted in a vote of 167 in favor and 87 opposed.

I desire to further call attention to the fact that the question had been disposed of and could not be reopened under parliamentary law, and that my action in placing it again before the convention was purely voluntary.

I regret that it becomes necessary to mention these facts, but in the face of the gross misrepresentation made in this resolution, also in other articles from the same source, these statements could not consistently be permitted to go unchallenged. The records of the convention will bear out every statement contained herein.

Assuring you, one and all, of my kindest regards, I am,

Fraternally yours,

J. A. FRANKLIN,
International President.

PROPOSED AMENDMENT TO THE CONSTITUTION.

Winnipeg, Man., Can.

Mr. J. A. Franklin,
Kansas City, Kas.
Dear Sir and Brother:

Please find inclosed resolutions drawn up by Lodge No. 126, which I hope you will give your kindest attention.

With best wishes and kindest regards, I beg to remain,

Yours fraternally,

A. B. PAGE,
Cor. Sec'y. Lodge No. 126.

Whereas, The Constitution of this Brotherhood does not make ample provisions for

the removal of Grand Lodge officers unless charges are preferred against them, and

Whereas, Causes sufficient for the removal of an officer, does not necessary provide grounds for charges being made, N. B., incompetency, etc., and

Whereas, The time set for holding conventions having been extended from two to three years, we think that provisions should be made whereby the rank and file will have some control over Grand Lodge officers between conventions; therefore, be it

Resolved, That Perseverance Lodge No. 126, place before the Brotherhood the following recall provisions as an amendment to the constitution for their approval.

Recall Provision.

(a) Any subordinate lodge in good standing in this Brotherhood shall have the privilege of proposing the recall of one or more Grand Lodge officers through the referendum, by submitting to the International President a proposition naming the officer, or officers, whose recall is desired, giving specific reasons for the issuance of such recall, who, on the receipt of same, shall at once order it published in the official journal for two (2) months, which notice must expire at the end of the month in which it was published. Lodges may vote up to the end of that period.

(b) All lodges voting must make return of their vote in ten (10) days after the close of the voting limit, and if twenty (20) per cent of the lodges in good standing and voting at the time to indorse it, the International President shall immediately notify the officer, or officers, whose recall is proposed, said officer or officers, shall have the privilege within ten (10) days of receipt of such notice, to submit to the International President a written statement in his own defense, such statement shall not exceed three hundred (300) words, who shall order it published in the Journal at the same time as he issues the ballots for the recall of said officer, or officers, to all the subordinate lodges in good standing for their suffrage.

(c) If the proposed recall receives a majority of all valid votes cast and returned within sixty (60) days, providing that the total vote cast shall be equal to at least fifty (50) per cent of the members in good standing as shown by the proceeding quarterly report of the International Secretary-Treasurer. The services of the officer, or officers, whose recall has been decided on, shall immediately terminate, and his or their successors shall be appointed as per Article V, Section 5.

Reasons Why We Should Have the Recall.

In view of the fact that it is only recently that this Brotherhood held its convention, a short explanation as to why Lodge No. 126 desires a constitutional amendment at this time, will not be amiss.

According to our constitution and the verdict handed down by the executive council at their annual meeting held in Kansas City, October, 1914, to Lodges No. 126, No. 451

and No. 529, an officer cannot be removed unless convicted of certain charges, inefficiency does not constitute a charge, so it does not matter how incompetent an officer may be, unless charge of dishonesty, etc., can be brought against him, the organization is compelled to carry him on the pay roll, until he can be legally removed at the next regular convention, which does not take place until September, 1917, or by the calling of a special convention, which would be too costly a procedure for the removal of probably a single officer.

When conventions are held at such long intervals as ours, it is essential that provisions should be made for the removal of officers when deemed necessary.

The extension of the time between conventions were considered after the referendum had been disposed of, the recall was not even discussed, or probably it might have been inserted in the constitution at that time. Be as it may conditions have arisen in this part of the country that evidently can only be removed by inserting a recall provision in the constitution, or by waiting another three years and once again attempting to get the desired change, and we do not feel inclined to wait that length of time. The growth of the organization is being retarded, and it is imperative that something should be done.

Let us consider the question from the viewpoint of democracy; we are supposed to live in a democratic country, and we gradually see a determined desire on the part of the people to gain more and more control over public officials, and the means to that end is through direct legislation, referendum and recall, etc. Very, very few workers, especially members of organized labor, are opposed to the recall of public officials, and due to that fact we have provisions for the recall of public officials on the statute books of many cities, counties, states, etc., and many of the trade unions have followed suit; it had proved a success in cases too numerous to mention, that we see no reason why it cannot be successfully worked out in our Brotherhood.

Then again through the referendum and recall you have a far better representation of the intelligence of the members in the organization, which in the last analysis is the real intelligence of any organization.

The oft repeated argument against the recall, is that only a small percentage of the membership take advantage of it. While it is true to some extent, that although every member is entitled to vote, they never do so, we must remember that any proposition enacted by referendum requires a voting power of at least fifty per cent of the total members in good standing before it can become law. So it does not matter how low the voting figures in favor of a certain proposition go, there is a limit beyond which it can't go and become law, and the lowest possible figure is higher than that required at conventions for the enactment of laws.

Let us see what percentage of representatives we have at conventions, taking the last convention as a criterion. We had three hundred and forty-two (342) lodges in good standing according to the September report; out of that number eighty (80) lodges were represented at the convention, roughly figuring, one hundred and twenty (120) delegates represented the eighty lodges. We have somewhere around sixteen thousand (16,000) members, which gives us the following percentage: Eighty (80) lodges out of three hundred and forty-two (342), twenty-two (22) per cent, one hundred and twenty (120) delegates out of a total membership of sixteen thousand (16,000), less than one per cent. So it can readily be seen where the correct expression of the organization lies.

This is not a kick from a few disgruntled members, but is the unanimous verdict of all the lodges in this city, and we are prone to believe that if the grievances turned down by the executive council, as being not based on facts without any investigation on their part, were placed before all the affected lodges in Canada, that they could substantiate all the claims that we have made and properly add a great deal more to them.

We ask you to give this amendment every consideration, if the recall is not the proper method for the removal of an officer when deemed necessary between conventions, then please enlighten us as to the proper method. We have tried every other means within our knowledge and failed. Hence the reason for this resolution and proposed amendment to our Constitution.

Respectfully submitted,

C. DAVIS, President.

A. B. PAGE, Cor. Sec'y.

KANSAS CITY, KAS.

To the Officers and Members of All Subordinate Lodges:

Greeting:—The foregoing letter and resolution received from Lodge No. 126, contains a proposition to amend Article III, Section 1, and is published in accordance with Article III, Section 1. In considering this matter you will be governed entirely by Article III, Section 1, and all votes from subordinate lodges must be in the hands of the International Secretary-Treasurer not later than the 10th day of May. Any votes received after that date will not be counted. You will remember, when voting on this proposition that it requires a majority vote of your local to indorse or reject and if the result should be a twenty per cent indorsement of all lodges in good standing, the proposition will then be submitted for referendum vote. With very best wishes, I beg to remain,

Yours fraternally,

J. A. FRANKLIN,
International President.

Correspondence.

FROM THE RAILWAY DEPARTMENT. St. Louis, Mo.

The question of formulating a plan of organization that would insure united action among the railway employes has been under discussion for many years, several experiments were in a manner tried out and while not wholly successful, each in its turn contributed to the upbuilding of the present day organization.

In the early eighties the plan of organization as exemplified by the Knights of Labor and applied to railroad employes was given a thorough trial, but for reasons with which all students of the labor movement are now quite familiar, this plan failed of success. Then for a brief period early in the nineties two plans were tried out, the first, resulting in a compact being entered into by the machinists, boiler makers and blacksmiths, three of the craft organizations which again came into existence as a result of the K. of L. failure. These crafts perfected a federated plan of organization on two of the largest western railways and as a result of their efforts to improve the conditions of employment, became involved in strikes in May of 1893, both of which were successfully conducted, resulting in substantial concessions being obtained; about this time the second plan commenced to gain headway in the form of an industrial organization under the name of the American Railway Union, and for a short period flourished, only to meet the fate of the K. of L. in the great railway strike of 1894. This movement had gained such headway that its collapse almost resulted in the complete disintegration of the craft organizations of the shopmen, as well as seriously affecting the transportation organizations, the result being that the adherents to the plan of craft organization were again in the ascendancy, and from that time on have grown steadily; for a number of years they have continued to prove their value, as evidence of which we point to the many concessions obtained in the form of improved working conditions and rates of pay for their respective members, but at no time were these organizations free from agitation within their ranks for closer affiliation. The success of the joint craft action of 1893 had not been forgotten, early in 1905 these organizations began to form what were termed voluntary system federations, under the sanction of the General Officers, during this period the railroad officials were also getting closer together and finally organized under the name of the American Railway Association.

The transportation Brotherhoods also formed a federation, but neither the engineers, firemen or trainmen's organizations became affiliated to the American Federation of Labor, while just the reverse was

true of practically all the other organizations.

In 1908 the sentiment for closer affiliation among the railway men had grown to such an intent that it resulted in the question being discussed by the general officers of the following organizations: International Association of Machinists; International Brotherhood of Boiler Makers; International Brotherhood of Blacksmiths; Switchmen's Union of North America; Brotherhood of Railway Clerks; Order of Railroad Telegraphers; Brotherhood of Freight Handlers; Brotherhood of Maintenance of Way Employes, and several others who were in attendance at the A. F. of L. Convention, held in Denver, Colo., Nov. 1908, which resulted in the tentative formation of the Railroad Employes Department.

The aims and objects of the Department as set forth in the resolution presented to the Twenty Eighth Annual Convention of the A. F. of L. and indorsed by the presidents of the above organizations, was for the purpose of enhancing the welfare of all railroad employes, and to seek to affiliate the unaffiliated with the American Federation of Labor; to further the interests of the employes by means of legislation, and to take such action as might be necessary to protect their interests. The resolution was carried by unanimous vote of the convention.

The first convention of the Department was held in Denver, immediately after the close of the American Federation of Labor Convention, and as the preliminaries could not be finished there, an adjournment was taken to meet in Chicago, January, 1909. A constitution was framed and adopted and the following officers elected: H. B. Perham, chairman; A. B. Lowe, vice-president; D. W. Roderick, secretary-treasurer.

For several years the officers devoted their spare time to disseminating literature describing the Department and its aims, and creating sentiment in favor of organization and federation.

While the Department had so far performed its functions in a way proportionate with the limited time and attention the officers were able to devote to its advancement, inasmuch as their services were gratuitous, it had failed to meet the growing demand of the memberships for a more militant form of organization in keeping with the requirements and to conserve the best interests of a majority of the affiliated crafts, the best evidence of which was found in the increasing number of voluntary system federations organized outside and independent of, and declining to affiliate with the Department. This could be accounted for in no other manner than that the policy of the Department up to this time had not fulfilled the desires of the rank and file

who were evidently determined to bring about the formation of an organization, which in addition to its educational and legislative functions, should extend its scope to include joint action in all its offensive and defensive activities, at the same time recognizing craft autonomy.

In the southeastern states, the members of the railway shopmen's organizations were particularly active and the idea of forming system federations reached a point that led to the formation of an organization known as the Southeastern Consolidated Federation of Railway Shop Employes, which embraced practically every railway system in the southeastern states and was the first of its kind ever organized by the railway shopmen.

The sentiment for this change had grown so strong that it culminated in a meeting being arranged and held in Milwaukee, Wisconsin, May, 1911, by a number of representative men from one craft, on the lines running west of Chicago. A resolution was drafted and sent out to all local lodges of the Machinists, Boiler Makers, Blacksmiths, Brotherhood of Railway Carmen and Sheet Metal Workers, requesting that they instruct the delegates to their next International Convention to vote and work for the indorsement of a plan to call a convention for the purpose of forming a federation that would meet the insistent demands of the members. This plan was maturing as rapidly as the International Conventions were being held, and by September 1911, the three organizations holding conventions had approved the proposition.

In the meantime a very serious situation had arisen on what was known as the Harriman and Illinois Central Systems comprising some eleven roads. The shop crafts on these systems had recently formed one of the many voluntary federations, then in existence, and on presenting a proposed joint agreement had been met with a flat refusal by the officials who declined to either meet or treat with a joint committee. This resulted in what has been termed as a lock-out of some twenty-eight thousand men. The term lock-out is used because the officials had taken the position that they would not meet a committee selected by the men, and if this position had been accepted, the question would revert to what kind of a committee the officials would meet and if the employer was conceded the right to dictate the personnel of the employes committee, the usefulness of the employes' organization as a means of protection had passed. This resulted in the men being forced to fight for the right to maintain the form of organization they deemed necessary to their success.

As a result of this unlooked for situation affecting so many thousands of the members and primarily for the purpose of rendering all possible assistance to the locked-out men on the Harriman and Illinois Central Lines, a conference of craft

representatives of all Western Lines was called by the general officers of the interested crafts to meet in Kansas City, Mo., in April, 1912. This conference was composed of representatives from System Federations, and craft district organizations, some forty systems of railroads being represented. The conference remained in session almost two weeks and among the many important matters acted upon was the adoption of a constitution and by-laws for an organization to be known as the Federation Federations.

This plan of organization was entirely different from that adopted by the Railroad Employes Department, in that it provided for a delegate convention composed of representatives elected by the respective members, salaried officers who should devote their entire time to the Federation of Federations, and a complete change in defensive and offensive tactics; whereas the Railroad Department, as organized at the Denver Convention of the A. F. of L. suggested only voluntary joint action of the affiliated crafts and provided for educational and legislative propaganda.

This meeting being brought about as before stated, together with the fact that the merging process that developed later was unforeseen was responsible for the failure to at that time extend a general invitation to all lines to participate.

The following officers were elected: A. O. Wharton, president; G. W. Pring, vice-president; John Scott, secretary-treasurer.

The delegates instructed the officers, including the Executive Council Members, to meet with the Executive Council of the A. F. of L. at the earliest opportunity for the purpose of securing a charter; the desired result was obtained in November, 1912, at the regular convention of the R. E. Department in Rochester, N. Y., by adoption of the laws drafted at Kansas City, with but few changes. The officers elected by the Federation of Federations were again elected by the reorganized department to avoid any technicalities.

With the adoption of new laws and acting in conformity with the rulings of the American Federation of Labor, the Department was confronted with many problems; First, to acquaint the

To be continued in next month's Journal).

SAPULPA, OKLA.

At our last regular meeting February 22, 1915, Creek Lodge No. 449, of Sapulpa, Oklahoma, the following resolutions were adopted:

Whereas, It has pleased our Heavenly Father to take unto Himself the beloved mother of our esteemed brother, F. R. Vest, be it

Resolved, That we, the members of Creek Lodge No. 449, extend to Brother Vest and family our most sincere sympathy, and may the memory of her faithful Christian life and loving mother care comfort and console

them in this sad hour of bereavement And be it further

Resolved, That a copy of these resolutions be sent to our bereaved brother, a copy spread upon our minutes and a copy forwarded to our official Journal for publication, and our charter draped for thirty days.

D. A. CLIFTON,
IRVIN SHIPMAN,
Committee.

CUSHING, OKLA.

To the Officers and Members of All Subordinate Lodges, Greeting:

At a special meeting held in Cushing, Oklahoma, March 3, a motion was made as follows:

Moved and seconded that on and after March 2, 1915, no more clearance cards will be accepted by this lodge until the end of the strike and conditions are again normal. Grand Lodge to be notified accordingly, so that they can advertise through the next issue of the Journal and otherwise keep members on the outside away from here. (Carried.)

This does not include traveling brothers who want to pay us dues and leave here again.

Trusting this is satisfactory and with best wishes, I am,

Yours fraternally,
WALTER CARRIGAN,
Recording Secy., Lodge No. 592.

Pittsburgh, Pa.

To the Editor:

Brother C. J. Maes, who is the author of an article in the March Journal favoring a reduction in salary of our President prefaces his article by using the following:

"Now I shall endeavor to be fair and just," therefore, my deduction of this paragraph would leave the inference that the writer is deviating from his former practice, also that he will only endeavor to be fair and just. He is not positive that he can be. The undersigned quite agrees, after a careful perusal of his article, that he would have to use great efforts in order to adhere to the lines of fairness and justice, for the following reasons.

First. He attempts to voice the sentiments of the rank and file prior to giving the rank and file an opportunity to voice their own sentiments. Our referendum laws will permit the membership to voice their sentiments, and then, and then only, will we be able to ascertain their sentiments relative to the reduction in wages.

Second. In order to bolster up his sentimental arguments he attempts to voice the sentiments of the unfortunate tourist who sometimes uses the side door palace car and who invariably is classified as a boomer. Does the writer speak authoritatively when he includes the boomer as being dissatisfied with the salary and expenses of our President? If so, he has very little conception of the principles of the boomer.

The boomer is always found booming and boosting, and never knocking. He realizes what a national officer has to contend with. He knows the amount of money he has to spend from time to time, which cannot be put in his expense account, but must be taken from his own pocket. He is also not unmindful of the fact that a President of a National Organization, who has the ability to meet in conference the officials of large corporations, who receive \$20,000 a year as salary, and plead the case of the boiler makers in an honest and intelligent manner, is entitled to far more than he is receiving at the present time.

In looking over the expense account of our National President, together with his salary, I find that it is less than 25 cents per member per year. Will Brother Maes, whose heart bleeds so for the poor boomer and the men on the picket line, petition by referendum a reduction that would mean 3½ cents a year less for the membership?

Our organization is known as the cheapest organization in the country when it comes to pay salaries to its employees, as very nearly every International President is receiving from \$2,400 to \$10,000 a year, except our President. They are also allowed liberal incidental expenses.

It would be real nice to see our President riding all night in a day coach, striking a bean wagon in the morning for his breakfast, washing his face in the station and then proceed to the office of large corporations and pitting his brains against those receiving \$20,000 a year, in his efforts to defend our interests.

Why doesn't Brother Maes present a resolution asking for a referendum vote to amend our constitution so that instead of electing officers we can advertise for the lowest bidder who would be willing to serve in that capacity at the lowest possible cost, but in so doing, let him voice his own sentiments, not the sentiments of the men at the picket line, boomer or the rank and file, because the rank and file believe there is nothing too good for our organization. They do not believe in second-hand goods nor second-hand officers. Cheap officers, cheap organizations, result in poor conditions.

With best wishes, I beg to remain

Yours fraternally,
T. H. FLYNN,
Member of Local Union No. 154.

Brainerd, Minn.

Dear Sir and Brother:

It is obvious that the action of our executive council in disposing of the question of amalgamation without serious consideration has resulted in the very situation evidently sought to be avoided—study and free discussion of this much mooted question.

Now, brothers, whether amalgamation would be beneficial or harmful is something that experience alone can prove. But nothing but good can be derived from careful

study and free discussion of this and all other topics that are within the sphere of the labor movement. Sarcastic and contemptuous statements do not enlighten us and they should be strictly avoided by the officials and members. I regret that our President should ridicule the position of members on this question. It is of no benefit to us to hear that so and so was in the movement when somebody else was in swaddling clothes. What we want is sane and revelant argument.

Now, brothers, if our organization is not subject to the laws of evolution, if it is steadfastly anchored for all time to the "pure and simple" individual craft organization, then it is a waste of time to discuss progress, but we all know that this would be utterly absurd, for nothing stands still. We must either advance or retreat. This being an axiom, it is very proper for us to map out a plan of advancement along proper channels and to keep pace with the developments of industry.

One fact, my brothers, has been sufficiently demonstrated to us, and that is, as an individual craft we cannot force any railroad company to grant our demands. Is that not so? It is, for we have been compelled to federate in order to accomplish anything. Now by system federation, we take a step in the direction of amalgamation, but it is not enough. We must go on.

Under federation a number of crafts agree to act together for a common purpose, but the unity of action is very limited, for it only applies to numbers, the important factor is overlooked, FINANCE. This is fully demonstrated in the federated strikes now on. The organization with strong finances back of it is better equipped for the struggle. Now in these strikes we combine numerically, which leads to final amalgamation. Why? Because if it is expedient to combine or unite in part, the same principle extended means greater power and larger benefits to be derived. Why should we strike together for a common end and still persist in wasting the greatest factor in determining the result of the struggle.

Take our "Metal Trades Crafts" alone. Say ten crafts go out on a federated strike. They maintain a set of federation officers and all the necessary equipment and at the same time they maintain ten international lodges with innumerable officers and all the necessary equipment, all totaling up an enormous, wasteful expenditure. I think \$100,000 per year would be a conservative estimate of grand lodge office salaries, not to speak of the numerous organizers, and it probably costs us considerably over \$500,000 a year to pay all officers, rent, Journals, etc.

I suggest these figures to illustrate. Now this is all duplication and a serious waste. We are crippled so financially by this system of organization that we have never been able to properly finance a strike. Is

this necessary? Cannot one set of grand lodge officers, offices and other necessary accessories perform the same amount of work more efficiently and at a greatly reduced expenditure? I fail to see why not.

This is the day of concentration and efficiency. If the same duplicating system were used in any of the great manufacturing plants it would mean chaos and bankruptcy. I care not what trade a man has, his interests are identical with his brother craftsman, and, therefore, the difference of trade lines are superficial and are not the insurmountable obstacles that we have been led to believe. Why, brothers, we fight our brother craftsmen and they fight us in the A. F. of L. and "Metal Trades Department" much more bitterly than we do the common enemy.

The "pure and simple" trades union of the past does not meet the requirements of today and those who insist that we perpetuate it are either blind to the changes that are taking place or else they act from selfish motives. So long as we remain split up into several parts so long will we be wasting our energies in jurisdictional disputes, dissension, strife and will end in ultimate defeat. Capitalists waste nothing on such foolishness as this.

There are a plentiful supply of sophists in our organization and they will attempt to check this tendency towards solidarity. Let every brother just think it over for himself. You have all had the experience and that is the best teacher of all. We all have an instinct that outreaches our intelligence or that of our teaching class, the instinct that we, as workers, are bound together in one common destiny, that the struggle for the future is one, and that there is no possible hope for us, save in our banding together into a solid phalanx. Solidarity of the workers. Therein lies our hope. Amalgamation is the next step. Shall we move up or keep slipping down grade? Which?

Faternally yours,
J. G. BROWN.

Parsons, Kaa.

At a regular meeting of Sunflower Lodge No. 7, Auxillary to the I. B. of B. M., I. S. B. and H., the following resolutions were adopted:

Whereas, God, Supreme Ruler of the Universe, has deemed best to call home the father of Sister Kate McMullen, be it

Resolved, That we extend to our sister our sincere sympathy for the loss of her beloved father, and we bow our heads in humble submission to the will of God, who knoweth all things best, and pray that he will comfort and console her; be it further

Resolved, That a copy of these resolutions be sent to Sister McMullen, one to the official Journal, and a copy filed among our records.

MRS. SMITH,
MRS. HOWELL,
MRS. WILLISIE,
Committee.

Cushing, Okla.

Dear Sir and Brother: I am mailing you three pictures Lodge No. 592 and myself would like to see reproduced in the April issue of the Journal.

We are desirous of letting the Brother-

hood know that while we are fighting seven of the largest tank building companies in the country against their open shop ideas, that we also have some fair jobs, strictly union and with bonafide members employed on same.

MEMBERS OSAGE LODGE No. 592, CUSHING REFINERY, FAIR JOB.

KENNICOTT'S CREW, MEMBERS OSAGE LODGE No. 592, CUSHING, OKLA., STRICTLY UNION JOB.

MEMBERS OF LODGE No. 592, ON STRIKE AT CUSHING, OKLA.

One of the pictures marked No. 1 shows a group of the members of Lodge No. 592 who are on strike against the seven large firms now employed at the Cushing refinery, Mr. McCabe, superintendent. The picture shows four large condenser boxes and a battery of stilles.

Pictures Nos. 2 and 3 show one of the large 55,000-barrel storage tanks being erected by the Kennicott Co. of Chicago Heights, Ill. Foreman, James Martin and

day, March 1st, we initiated three new members and balloted favorably upon three candidates, and in view of the fact that we have not lost one member through suspension during all those hard times, which shows very conclusively that the members of Lodge 318 are built of the right material and our officers from President Mertz down are working diligently for our interests.

To celebrate our success in maintaining our membership the entertainment commit-

KENNICOTT'S JOB, CUSHING, OKLA., ONE OF THE FAIR FIRMS.

Bro. Mike Conroy. This tank was all hot riveted.

The group in No. 2 picture are all members of Lodge No. 592, also including President J. E. Dixon. This job is now complete but Kennicott has considerable more work here now waiting on rivets.

Trusting you will give us space in April issue for same I am

Faternally yours,

JOS. P. RYAN,
Eighth I. V. P.

Pittsburgh, Pa.

Editor of Journal: Perhaps the most conspicuous characteristic of Lodge 318 is our modest and retiring disposition, as in the past we have been content to do the very best we could to better working conditions on the B. & O. system, and in our own lugging way try to keep up with the procession, without the aid of a brass band.

We have decided to get away from the blushing debutante attitude of the past, bust into print occasionally, and let the Brotherhood at large know that we are on the union labor map, and not only holding our own but we are building up our local, despite the business depressions and the fact that we are idle three or four days a week.

Our organization committee is working the way an organization committee ought to work and at our last meeting held Mon-

tee arranged an enjoyable luncheon and smoker to take place after our regular meeting last Monday night. Practically our entire membership was in attendance and in addition a committee from Smokey City Lodge 154 was invited. Our International Vice President, Bro. Mike Maher, was unable to attend owing to pressing business elsewhere and his absence was a keen disappointment to our members, who hold Bro. Maher in the highest esteem and greatly appreciate his fatherly advice upon matters pertaining to our organization. Addresses were made, however, by Bro. Jas. P. Carr, business agent of Lodge 154, and Bro. Joseph Flynn, Joe Noble and James G. Sause, representing Lodge 154, and as a result it is believed a more fraternal feeling will exist between the two Pittsburgh lodges.

Pres. W. F. Mertz presided at the meeting and acted as chairman of the smoker in which dual capacity he acquitted himself in a manner highly appreciated by the members and visitors. The headliner on the program of entertainment, however, was our old friend, J. H. Scott, whose comical portrayal of Irish and German characters contributed greatly to the success of the entertainment and won round after round of applause.

It is our intention to give these entertainments occasionally as we feel that they enable the members to become better ac-

quainted and create a greater interest in our local among the non-union boiler makers and helpers in this vicinity.

In conclusion, we would advise all boiler makers and helpers to stay away from Pittsburgh, as 75 per cent of the card men in this vicinity are idle at the present time with no immediate prospects of better times coming.

The many friends of Bro. T. H. Flynn, general organizer for the A. F. of L., who has been seriously ill with pneumonia, will be glad to hear that he is slowly recovering.

Yours fraternally,
PRESS CORRESPONDENT.

Denver, Colo.

A condition has arisen in the metal industry which compels attention.

Labor saving machinery, together with system, is everywhere displacing skilled labor and substituting therefor the machine operator or specialist.

Specialization, made possible by the machine, increases the efficiency of labor many fold. Ten men, working as specialists and under systematic conditions, will take the place of several times as many men, working as craftsmen, each completing his own work. This means fewer men employed and a correspondingly larger number of unemployed, a condition very gratifying to the employer, hence his tendency to compel specialization and adopt systematic methods.

The result of these three industrial forces: machinery, specialization and system, is that craft lines are fast being obliterated. In place of machinists we have lathe men, boring mill men, drill press men, etc. In the place of boiler makers we have flangers, patchers, flue setters and so on. All the other metal crafts face the same conditions.

The most striking case is that of the acetylene and electric welders. They can not be classed in any craft group though they do the work of many. Another case is the flue welder—is he a boiler maker or a blacksmith?

Before the advent of the machine, when industry was carried on by the small individual capitalist, the individual workman was of comparative importance to his employer. They were personally acquainted with one another, often working side by side in the shop. His skill was a necessary part of his employer's business and he himself was, to a certain extent, independent, but when machinery was introduced and industry grew, the individual employer was succeeded by the stock company and corporation. The individual worker became relatively of less and less importance. The result was, that the individual worker was forced to unite with his fellow workers in the craft union in order to successfully combat the increased power of the employer. He was no longer working for a man, a human being like himself who knew and

liked him, or at least respected him, he was working for a company.

Again industry took a step forward. The modern ~~that~~ took the place of the company, the crude machine became the modern labor saving device and the skilled worker is steadily being displaced by the specialist who must speed up to keep pace with the machine he operates.

The workers' form of organization alone remains stationary.

The employers are organized as employers to protect their interests as employers and it behooves the workers to organize as employes and cease to allow themselves to be split up in craft unions, supporting as many headquarters in as many different cities as there are craft organizations.

For these reasons the following resolution was adopted by No. 179 I. B. of B. M. I. S. B. and H. of A.:

Whereas, The interests of the workers in the metal trades demand a closer affiliation of the metal trades, and

Whereas, The I. A. of M. has, by referendum vote of the membership, indorsed the proposition of amalgamating the metal trades; therefore, be it

Resolved, That we, Local No. 179 I. B. of B. M. I. S. B. and H. of A., go on record as indorsing the movement and render whatever aid we can in bringing about such amalgamation. And be it further

Resolved, That a copy of these resolutions together with our reasons therefor be forwarded to the executive council and to Local No. 47 I. A. of M. and published in our Journal.

GEO. GAUSS,
President.
H. SHAFFROTH,
Secretary.

Cincinnati, Ohio.

Dear Sir and Brother: To the members of the Brotherhood, greeting:

In reading the March issue of our Journal I took particular notice of the communication from Local 123 inserted therein. Regarding their resolutions to the proposed amendment of Article V, Section 3, lines 10 and 11, of our Grand Lodge Constitution:

Now such matters as this ought to be of great interest to every brother who is affiliated with our organization, inasmuch as it refers to our Grand President whom we should at all times give our earnest cooperation not alone in such matters as this, but in every way we possibly can.

I have never had the honor or the pleasure of attending one of our international conventions, but I feel certain that they are always well conducted and I also feel sure that everything that was done at our last convention in San Francisco was performed in a legitimate manner, and it strikes me that Local 123 is making a very broad statement when they say that it was a "machine controlled convention," which if not true,

may cause no end of trouble, because such assertions as this only tend to retard our progress by causing internal troubles. And in Bro. Franklin's reply, he states that under the parliamentary rules, he was not compelled to do so, but he did "voluntarily" open up the matter for reconsideration, and I think that this action alone on the part of Bro. Franklin, regardless of anything said to the contrary, ought to convince the rank and file of our organization very conclusively that this matter was open and above board, and could not have had the slightest tinge of deception attached to it. Personally, I can't see where Bro. Franklin is receiving one cent too much for his salary. We should place our organization in the light of a business proposition, and pay our executives in proportion to the work attached to their positions. Just stop and try to think for a minute the amount of work that must naturally devolve itself upon the Grand President and also think of the number of things he must have on his mind, one trying to crowd the other out, I dare say they are very seldom of a pleasing nature, they are more apt to cause loss of sleep and gray hairs. Now in my estimation, the number of our Vice-Presidents is too great, and I would suggest if it would be orderly for me to do so, that while times are so hard, as they are at present, that we cut down the number of our Vice-Presidents to five, and in that way we would be able to reduce the expenses of our Grand Lodge treasury to quite an extent, and if the occasion should present itself that we need a man in the capacity of a Vice-President why then our Grand President could appoint a man for that purpose until the matter was completed.

Now the matter of reducing our Grand President's salary is to be taken up by all the subordinate lodges, and every brother should vote according to his own convictions. Brothers, I am not writing this article in defense of our Grand President, as I don't think that Bro. Franklin needs any defense at my hands, nor do I wish to start a lengthy discussion of this matter through our Journal as a medium. I am only stating my personal views on this all important subject, and earnestly hope it shall not be the cause of any ill feeling among the Brotherhood, so hoping this letter will be received in the same spirit which prevails while I am writing it, I wish to submit same to our valuable Journal.

With best wishes and kindest regards to all, I am
Yours fraternally,

W. J. McGEE, JR.,
S. T. Dist. 29.

Valley Junction, Iowa.

Dear Sir and Brother: Local 491 would like to have the following brothers communicate with it:

John Crawford, Reg. No. 62321; John Peters, Reg. No. 80223; Jas. Regan, Reg. No. 95180; A. J. Wagner, Reg. No. 67150, and J. M. Morgan, Reg. No. 91068.

The following ones have left bills unpaid and should be shunned by desirable citizens: W. J. Mills, No. 98504 H. D. with ~~withdrawal~~ card out of Local 145, Missouri Valley, \$6.40, unpaid; C. A. Riley, no card H. D., paid \$2.00 for first payment for initiation. About 32 or 35 years old, 5 ft. 6 in., weighs 160 or 170 lbs., smallpox marks, talks rather fast. Keep your hands on your pocketbook should you see such lurking around. Think he is in the oil fields. Bill \$4.25. Geo. B. Lewis, No. 99351, H. D. from Harrison, Ark.; come clean, George. Bro. C. E. C. Bruks who was in Boone, Ia., last heard of and left here about Sept. 17th. Please raise your feet. A. J. Connelly, number unknown, here in July, 1914, please write.

Local 491 fully expects the return of courtesy when she so liberally shows same, so kindly communicate before we have to advertise you again.

Fraternally yours,
JAS. J. CARROLL,
F. S. L. 491.

RESOLUTIONS.

Whereas, a communication has been addressed to the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America by the International Association of Machinists advocating the amalgamation of the various metal trade crafts of America, and

Whereas, this idea has been approved by a referendum vote of the machinists' organization, and their officers have been instructed to make known their sentiments to the different crafts of the metal trades, and

Whereas, said communication has not been submitted to our organization as a body, nor has it been published in our official Journal as requested, but our executive council has taken it upon themselves to decide this important question without the knowledge of the rank and file, and

Whereas, an editorial appeared in our Journal in the December issue ridiculing this suggestion of amalgamation, and showing gross discourtesy and ill-will to our brother craftsmen, also insidiously attempting to poison the minds of our members against our fellow workers, therefore

Be it resolved that we, the members of Lodge No. 116, hereby strenuously denounce the methods adopted by our officers in disposing of this important suggestion of amalgamation. We deny them the power to finally determine the policy or the future steps of advancement of the boiler makers' organization. We feel that their action is an usurpation of the power fundamentally vested in the whole membership, namely, power to determine our future.

Be it further resolved, that we strongly protest against the suppression of said communication as an injustice to the intelligence of our members and especially do we condemn the attitude taken by the managing editor of our Journal as being inimical to the good feeling existing between boiler makers and machinists and tending to pre-

vent harmonious co-operation between the two crafts. We repudiate the reflection cast upon our brother union men and deprecate the bigoted views officially expressed in our Journal regarding this question, and

Be it further resolved, that we hereby call upon our international president to have said communication published in our Journal in full so that our members may intelligently comprehend its object. We also feel that an apology should be made by our Journal for the unjust reflections cast upon our brother union men.

Be it further resolved, that a copy of these resolutions be submitted to all lodges comprising the Northern Pacific system for their consideration and that they be published in our official Journal.

J. G. BROWN
J. W. GABION
J. B. WILMAR
Committee.

NOTE FROM THE EDITOR.

In reply to the above, the editor would like to suggest that our members should first endeavor to ascertain the authenticity of the statements they make before rushing into print, they owe it to themselves as well as our members, so that no injustice shall be done any one.

The first preamble starts out with the statement that "a communication has been addressed to the International Brotherhood of Boiler Makers, etc., by the International Association of Machinists" advocating amalgamation, etc., when as a matter of fact this communication was addressed to J. A. Franklin, J. W. Kline, John A. Haynes, J. E. McClory, Jas. Kirby, T. Daly, J. F. McNulty and John Alpine.

These were requested to give an expression of their opinion concerning the matter, however, instead Brother Franklin referred the matter to our executive council for action, we believe this is in line with the laws of our organization. Our delegates meet in convention and adopt policies and laws for the guidance of our officers and members, and our laws confer upon the executive council the judicial and executive authority of the organization between conventions. Their passing upon this communication from the machinists did not alter our policies or laws in the least, these were passed by our convention at San Francisco only a few months before. If the conclusions reached by the executive council does not meet the views of all members, those entertaining different views have the privilege of having the matter further considered by the next convention.

Now in reference to apologizing for the editorial complained of, will say it is not the desire or intention of the editor to wantonly wound the feelings of anyone, and if it can be shown that we did anyone an injustice in this instance, demands for an apology will not be necessary, for we will willingly make the "amend honorable,"

however, if the statements contained in the article were true, then we see no reason why we should apologize for telling the truth, which in this case was for the purpose of warning our members against some of the dangers liable to arise from the adoption of the amalgamation proposition, and not for the purpose of "poisoning the minds of our members against our fellow workers" as these resolutions state. In this editorial in December Journal we stated among other things that the amalgamation proposition originated at a conference of machinists' officials held last spring at St. Louis and that at this same conference, plans were laid to try to secure the positions of boiler inspectors under the Federal Locomotive Inspection Law instead of boiler makers, by having the law amended; no denial of this matter has been brought to our attention so far, although we spoke of the matter more extensively in the August issue. If any of our members doubt the accuracy of our statements in this matter let them secure a copy of the Machinists' Journal for June, 1914, and they will find the matter set forth on page 603.

We disclaim any desire to disturb the harmonious relations between the different organizations, on the contrary we are anxious to maintain such and believe our past record will show that we have been consistently friendly and conciliatory and especially so with the members of the machinists, hundreds of whom we know personally and have worked with in the general labor movement of the past. However, we do not believe our friendships for others should interfere with our duty to our own organization and when we feel anyone is trying to put something over on it, we are sure to let it be known. We believe the writers of these resolutions were hasty in drawing conclusions because of their not being fully informed and that they will agree with us in this conclusion after they have investigated the matter more fully. Furthermore in their haste to condemn a seeming discourtesy on the part of the editor they to a still greater extent employed that which they condemned in by hurling envenomed of condemnation and repudiation at him. We believe they could with profit, take a liberal dose of the harmonious unity medicine they prescribe for the editor, and thus help to cultivate more harmonious unity in our own ranks.—The Editor.

East Boston, Mass.

Dear Sir and Brother:

At our last regular meeting it was voted to give a rising vote of thanks to Brother Edward Scrivin who has brought a large number of new members into Lodge No. 585, thereby ably co-operating with our resourceful and persevering Sixth International Vice-President John J. Dowd, and our enterprising deputy organizer and business agent, Brother Daniel N. Generson in the

skillful campaign those gentlemen are conducting in this section of the country, in the interests of the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America! Brother Generson's progress in the difficult task of unionizing the craft in this vicinity has been given a decided impetus by our worthy International President Joseph A. Franklin and the grand lodge by bestowing on Brother Generson the official credentials designating him as a real bonafide organizer in our branch of the greatest trade union body in the world today—the American Federation of Labor.

Our hustling president, Brother Wm. E. McNabb states that the widow of the late Brother John Welch expresses her gratitude to all those who responded to the subscription lists circulated in her behalf by Brothers John Warnock, John Farrell and Wm. E. McNabb, the sum of \$82.00 being realized.

The third annual ball to be held April 9th at Lyceum Hall, East Boston, promises to be a great success, as the officers and the committee in charge are working hard in that direction and many of the old time boiler makers of Greater Boston are expected to be present.

Yours fraternally,

DANIEL B. McINNES,
C. SL. 585.

Denison, Texas.

To the Officers and Members of all Subordinate Lodges "Greeting":

We, the officers and members of subordinate Lodge No. 209 of Denison, Texas, in regular session unanimously voted to reject the amendment proposed by local No. 123, also the one proposed by local No. 126, they being proposed amendments to our G. L. Constitution as published in March, and will again appear in April Journals.

And we hereby take the pleasure to give our reasons for rejecting them and discuss the propositions with you.

First, we will take the one offered by Local No. 123 which provides (if it should become law) the very thing that we are organized to combat, namely low wages or in this case which is still worse the reduction of wages. Now just a word to the brothers of Local No. 123: We will suppose that you had just signed up an agreement with your employer, we will say on the first of this year for three years and you had received an increase of pay and now they should post a notice that they would have to reduce your wages 25 per cent, would you willingly submit to it or would you ask for one of the international officers?

Again, suppose this amendment should carry and become a law, how would you like to act on a committee that was to go before the management asking for more money and have them to tell you about cutting the pay of your own officers?

Now, Brothers, how many of you would object to an increase of pay just now or at any other time, well if you like it yourself, why object to the other fellow getting it, is it simply because you don't happen to be the "other fellow?" Now, if No. 209 ever needs the assistance of one of the international officers we want one that will make a good impression both mentally and financially, that is, we don't want him to smoke any "three-fers" while in the presence of our superintendent of M. P. or M. M., neither do we want him to have on a pair of trousers that have been reinforced where it can not be noticed while he is sitting down.

And when we think that he should be in town we will look over the register of the two best hotels but if he should happen to be stopping at a cheap rooming house he will have to look us up.

Therefore, we are going to do our utmost to uphold their wages or salary in order that we can get the kind of "dignity" that we think will have some influence with our officials.

And now just a word to the brother (whoever you may be) that first introduced this resolution into Local No. 123, you that accuse the Eleventh Consolidated Convention of being a "machine controlled convention" I personally must say that you seem to be a pretty good "machine man" yourself. Just keep it up Brother and I am sure you will be at the next convention if you keep in good health, and if you can operate your machine as good there as you have with No. 123, in getting them to indorse a resolution like yours and put it before the Brotherhood. "Well," you may be the next president so now let us quit chewing the rag about the president's salary because you know you would want it raised again as soon as you were elected.

And now just a few words in regard to why we object to the amendment offered by Local No. 126. We think the recall is a good thing and if properly gotten up so as to give everybody a fair and impartial hearing would be a good thing to make our international officers be good and do their best, but we do not think that No. 126 has the proper thing yet.

Note paragraph "B" they only want the accused officer or officers to have ten (10) days in which to prepare his or their defense and that defense to be limited to 300 words. Now Brother, you know there is no justice to that.

It seems that No. 126 has an officer in view that they wish to recall on the grounds of inefficiency, as they themselves admit that is the only thing they cannot prefer charges for, then who else could it be except their own representative, Brother J. P. Merrigan who has been on the job about four or five years. Now Brother, it has taken you a long time to discover his inefficiency and if he has fooled you this long I believe you should let him go until

the next "machine" controlled convention is called to order in 1917.

Yours for the good of the Order,
S. E. HARRIS,
Cor. and Fin'l. Sec'y.

Livingston, Mont.

Dear Sir and Brother:

I write this for insertion in the April Journal in reply to Grand President Franklin's comments on the referendum called for by Lodge No. 123. He takes exception to the fourth "Whereas" and challenges the statement therein, also proceeds to call us a lot of liars, only in polite terms. Now calling names is no argument and tends only to weaken a case in the minds of serious-thinking men, no matter how flowery is the language used.

Now we are the accusers, and consequently the burden of the proof is on us, so let us look and investigate and see if we have made a "glaring misstatement of facts," or "bare faced falsehoods," as accused by President Franklin. Now I will endeavor to do so, with no abuse or calling of names, as that is only resorted to by a person who has no good argument and tries to bury his opponents in a flood of invective and abuse.

Let us get a few figures from that convention in regard to the vote cast. We find that out of a total vote of that convention that 52 votes are cast by Grand Lodge Vice-Presidents, Deputy Grand Organizers and Business Agents, receiving their salary in whole or part from the grand treasury, and this out of a total of 254 votes. Some of these men hold their jobs by virtue of their obedience to the Grand President and every one of them voted for the increase. And I contend that those salaried officers who represented locals and at no expense to the local, but drew their regular salaries as officials, were not really representing the local, but were representing the wish of the Executive Council, and the Grand President is the head of the Council. Locals were represented thus, that would not have had a delegate otherwise. I know of one Grand Vice-President who transferred his card to such a local in order to represent it and be a delegate at no cost to them. Now Lodge No. 123 pays its own delegates and expects them to obey the instruction of this lodge, but it seems we are helping to pay Vice-Presidents to represent other lodges and vote against our interests and the interests of the lodge which gave them credentials and are responsible to no one but the Executive Council.

Read page 336 of the minutes of the convention and see how that raise was railroaded through; but the President after more thought saw he had gone too far, and hearing the strenuous objections of more than a "few" delegates, again brought up the question the next day for roll call, knowing he had sufficient strength to put it over, with the 52 solid Grand Lodge votes behind him.

Now as to President Franklin appearing personally before any committee, that is not necessary as we know of political machines that the head of which is seldom seen. It was openly charged on the floor of the convention that it was machine ruled and that laws were being made to help machine rule. Now we are not "disgruntled" as we have no axe to grind, although we did try to get laws passed that we believed would benefit all. That convention did another thing that looks queer to me; by changing the 10 per cent from the strike fund to the general fund, in spite of the overwhelming vote cast against it shortly before the convention. Although that referendum did not get a sufficient number of votes to make it legal, a convention with less than 22 per cent representation changed it even against the protests of several delegates not in the ring. These are cold facts and no amount of hot-house air can change them. It appears we have brains enough to earn the money to run the union but not enough to dictate what shall be done with it. As to its being necessary to have so many Grand Vice-Presidents to make agreements and prevent strikes, I believe it works the other way. The writer had the honor of being on the first two committees to make an agreement with the Great Northern Railway, and we were accorded good schedules, the best in the Northwest at that time, without any trouble or any Grand Lodge officers to assist us, and we had no trouble on the road til Grand Lodge officers mixed in.

Now we do not consider we are cutting pay, but we are trying to get back what has been wrongfully taken from us, by a convention that did not represent the rank and file. This resolution is no insult to the independent delegates of the convention who voted their honest convictions on any question as the ratio of voting power held by Grand Lodge officers could throw the result either way as their interest lay, on any question, and honest delegates do not always agree. To these we need make no apology, to the others we have none to offer, and the rank and file may judge by their vote. We are willing to trust them if our Grand Lodge officers are not.

It was asserted on the floor of Lodge No. 123 by one of our helpers that a Vice-President told him if he would get elected as delegate to the convention he would have him elected as a Grand Vice-President, and yet they have the nerve to tell us there is no machine and that the delegates controlled the convention. Why should we raise salaries when our finances do not justify it and when so many members are out of work and on strike? The only argument advanced is because some other unions pay more; if they are able—well and good; that is their affair, this is ours. We have to work alongside of men who receive more than we do, also some who receive less. Do we respect them any more, or any less, because of that? Can the Grand President

give us better efforts because of more pay? If so, I have so far failed to see them, and we are entitled to his best efforts as long as he holds the job, regardless of the salary. Now let us see why we should raise the salary. A raise is most generally given for increased efforts or greater efficiency. Has that been the case with our Grand President? Our order is weaker than four years ago, and yet we are spending a great deal more money now than then, through our Grand office. There is carelessness or incompetency somewhere. What business had the Executive Council to give fifty dollars to the Liberator from our strike fund? I believe the Liberator O. K., but the money should come from the general fund, as the Grand President, Executive Council or no one else has a right to take from the strike fund except for strike benefits. It is their thin entering wedge to get at that fund on one excuse or other, and if no protest is made, the next will be \$500 and the next \$5,000, till all is spent for some plausible purpose, and then when we strike we will find our fund exhausted and we will be informed we can receive moral support only. Now you supporters of machine rule, fire your heaviest guns, let loose your invective and see if you can fool the brothers this time. We believe we will receive the largest majority ever cast on a referendum vote of this union.

Fraternally yours,
C. J. MAES, of Lodge No. 123.

Danville, Ill.

Dear Sir and Brother: At our regular meeting of Lodge 22, the following resolutions were adopted:

Whereas, It has pleased the Almighty God in His Divine wisdom to remove from our midst our esteemed and worthy brother, Samuel Davis, therefore be it

Resolved, That we, his fellow brothers, extend to his bereaved wife and family our most heartfelt sympathy, and pray that the Almighty God may comfort and console them in their hour of bereavement and sorrow, and be it further

Resolved, That a copy of these resolutions be sent to the Journal for publication, a copy spread on the minutes and a copy sent to the bereaved family.

H. ROGGENDORF,
F. JARGENS,
Committee.

Danville, Ill.

Dear Sir and Brother: I was instructed to write you in regard to brothers coming to Danville, Ill., looking for work. We would like to get this in the Journal for next month if there is any chance at all, notifying all brothers looking for work to see the business agent or shop committee before they sign up for work.

WM. J. IRWIN,
C. S. L. 22.

Ludlow, Ky.

Dear Sir and Brother:

No doubt you have heard of the terrible accident that occurred to Brother Rebstock of Lodge No. 80 of Anaconda, Mont. After receiving a letter and telegram from Brother James W. Hogan, C. S. L. 80, Local No. 105 took charge of the remains and a considerable number of them laid off on the day of the burial. Four of the members acted as pallbearers, all wore their mourning badges and his brother was very well pleased with the way we conducted the funeral. Lodge No. 80 sent a sum of money which we expended for a beautiful floral piece.

With best wishes, I am

Yours fraternally,

D. L. O'BRIEN,

Note: In connection with the above brother mentioned as having met with an accident. The particulars in the case are, we believe Brother O. Rebstock was employed at Anaconda, Mont., and was killed while at work, by a car getting loose in the yards and running over him while passing through the shop.

The body was prepared for burial and shipped to Cincinnati by Lodge No. 80 of which the deceased brother was a member.—The Editor.

Elkins, W. Va.

At a regular meeting of Lone Tree Lodge No. 278, the following resolutions were adopted:

Whereas, It has pleased the Almighty God in His Divine Wisdom, to take from this world of trials and sorrow, the beloved son of our worthy brother, C. H. Godwin, therefore be it

Resolved, that we his fellow brothers extend to him and family our heartfelt sympathy in this hour of sorrow, and be it further,

Resolved, that these resolutions be inserted in our official Journal, recorded and transmitted to the family of the deceased.

A. R. POE,
C. L. CASKEY,
F. G. MAYBURY,
Committee.

San Francisco, Calif.

Dear Sir and Brother:

At the last regular meeting of Lodge No. 410 the following members were suspended and their names ordered published in the Journal:

S. I. Mears, Reg. No. 39295; Michael Carr; Thomas Coulthurst, Reg. No. 40816; Charles Strain, Reg. No. 13628; William Williams, Reg. No. 14006; Charles Gardener, Reg. No. 13620.

Hoping you will give this notice special attention, I am

Yours fraternally,

L. KEVIE,
Lodge No. 410.

Dear Sir and Brother: In answer to your letter in the March Journal in regard to pipe-line job at Preston, Idaho, will state that there are three helpers on the job that are not card men, and do not think that your letter gives the men on the job or Mr. Chas. Seaburg justice, as Mr. Sea-

Now, we do not see where the job is unfair and do not think that the men on the job or Mr. Seaburg are at fault, as he, Mr. Seaburg, is paying above the scale for these men, \$4.00 for holding on, \$4.50 for heating, provided they stay until the job is done, and \$4.00 if they quit before; \$5.50 for boilermakers for 9-hour day, and will state that there has not been a card man who came out to the job that was turned down without being given a chance to make good.

Inclosed you will find pictures of the pipe and men. We wish these published in the April Journal, together with this letter to correct the error in March Journal on page 184. Yours fraternally,

(Signed)

JOHN MULLIGAN, Reg. No. 100077.

PIPE LINE AT PRESTON, IDAHO.

burg has sent out calls for union helpers and could not get them. Also has his correspondence from Brother Harrison, Lodge 103, and from Brother Dunn, Lodge 198, stating that they could not furnish helpers.

A GROUP OF MEN WORKING ON PIPE LINE AT PRESTON, IDAHO.

Possibly Brother Dunn does not know the conditions on the job, as there has been only one representative on the job. That was Brother Kuentz and he was only here a short time, and there has been no one else since.

WORK FOR PIPE LINE AT PRESTON, IDAHO.

Richmond, Va.

Dear Sir and Brother:

I wish to express my approval of your editorial in the last issue concerning the need of establishing a sick benefit fund. I believe it would do lots of good and help to build up our organization and bind our members more closely to it.

Now in reference to suggestions concerning the sick benefits, I believe when a brother is sick or unable to work, he should receive four dollars per week sick benefits, provided he furnishes a doctor's certificate and the approval of the lodge of which he is a member.

Second, whenever a brother becomes delinquent in his dues he shall not be debarred from his death benefits, but shall be debarred from his sick benefits for thirty days after paying up in full.

I hope that all brothers will make some suggestions along this line for the benefit of our brothers who become sick and are unable to work; however, we have a long time before us until our next convention meets.

Respectfully,

R. L. KING,
 President Lodge No. 170.

Kansas City, Kas.

Dear Sir and Brother:

It is not very often that I take up the valuable space of your Journal and my only reason for doing so at this time is in self-defense.

In looking over the March issue of the Journal I find, on pages 201 and 202 an article written by C. J. Maes of Lodge No. 123. Livingston, Mont., in which an attempt

is made to convey the impression to the rank and file of our Brotherhood that our organization is controlled by machine politics. In his attempt to produce an argument against the increase in salary granted the president of our Brotherhood at our last convention, he seeks principally to poison the minds of our members and to prejudice them especially against those who have been selected as officers and organizers to carry into effect the laws laid down by the members of our Brotherhood and to promote the best interests of our organization. To say the least, I consider his attempt not only misleading but malicious.

It would seem that the writer of the article would favor disfranchising members of this Brotherhood who are elected officers and because of the fact that a member did accept an office that he should be deprived of the rights that are guaranteed to each and every member. Citizens of the United States are elected as members of congress and state legislatures but their right to vote upon all questions as citizens of our country is not questioned. They are elected as representatives of the people and yet retain their rights as American citizens. Then why should anyone seek to disfranchise those who are selected as officers to represent the lodges and members of our Brotherhood, or to prevent them from representing the members of their locals in conventions? It is my judgment that if the intelligence of the man who is elected justifies his election by a convention of the Brotherhood he should retain the same rights and privileges of membership as belonged to him before his election.

He states that "Our Grand President, on the eighth day of the convention, made a speech favoring the increase and he a candidate for re-election." Oh, what a terrible crime! And further states, "Well, I should call it immodest at least." I don't suppose the dear brother would term it immodest to make a request or a demand upon his employer for an increase in salary if he felt that he was not receiving ample compensation for services rendered. My experience for many years has been that increases in salary are few and far apart that are not asked for. The members of our Brotherhood, throughout the length and breadth of our entire country have been making requests and demands for increased wages for several years past and yet, the dear brother would lead the rank and file to believe that the mere fact that the president of our Brotherhood made a speech in favor of an increase in the president's salary, that it was immodest. "Oh, consistency, thou art a jewel!"

On page 202, the seventh paragraph of the article referred to begins: "Now, the unpleasant part; unpleasant to me you may be sure." And the eighth paragraph winds up the article by saying, "I trust this will be received in the same spirit it is written." I want to say that as far as I am personally

concerned, it was received in the same spirit in which I believe it was written and I am attempting to reply in that same spirit. He says, "The machine controlled convention; read the minutes of that convention; notice the personnel of many of the delegates; harken to the voice of First Vice-President Hinzman." And then comes what I consider a rank injustice, for he supposedly quotes my remarks at the San Francisco convention, but instead of quoting my qualifying statements, he simply quotes about two lines of what I said and then proceeds to comment upon same and endeavors to use this as proof of a machine controlled convention. If the brother wanted to be fair (inasmuch as he saw fit to charge me directly, with machine politics) and if the task of writing such an article was so unpleasant to him, why did he not quote me fully from the proceedings of our late convention and not quote only two lines, leaving the rank and file to guess at the rest? Even the printed proceedings of the San Francisco convention does not give fully the qualifications of those statements as made at that convention, yet had he seen fit to quote that part which was printed in the proceedings, no doubt he would have thrown a different light upon the subject.

I am satisfied that the qualifications of my statements at that convention met with the approval of ninety per cent of the delegates in convention, as the vote upon the question before the house, at that time is conclusive proof of same. So that the rank and file may know, as near as possible what I did say, instead of quoting one or two lines from the proceedings, as quoted by Brother Maes, I herewith submit an exact excerpt from the proceedings of the afternoon session, June 16th:

Brother Hinzman interposes that the adoption of such an amendment would be a reflection upon the intelligence of the delegates assembled in this convention. The idea of one man appointing a committee and so forming a machine that is going to take away the intelligence of the delegates to the extent that they will not vote their honest opinion, is ridiculous.

Discussion again resumed by Hinzman to the effect that this Brotherhood would go backward with the adoption of such a resolution. The rank and file is not competent to elect committees to act on these matters. "Select a commission if you desire to appoint them; if you want to take the power away from the president, but I do not want to see it left wide open so that anyone can be selected to pass upon the most important matters to be acted upon by this Organization.

The convention had under discussion at that time, a resolution providing for the election of the law committee and credential committee by referendum vote, which contemplated taking from the president of our Brotherhood the appointive power of

these very important committees. While I made the statement that the rank and file was not competent to elect these committees, I gave a detailed explanation of my views upon this subject which does not appear in the printed proceedings, which were, in effect, that the members of our Brotherhood being so widely separated and not being closely acquainted and familiar with the qualifications of the members in different sections of the country, and that through a lack of knowledge of the qualifications of all members, to act upon matters of this kind, they were unable to do justice to such a matter by a referendum voting system, and I felt that if it was the desire of the delegates assembled in convention, to relieve the president of those appointive powers, it would be better to select a commission, composed of several members who are well acquainted throughout the country with the membership and know the qualifications of the different members to act on matters of this kind, rather than to leave it in a position where practically nobody would be responsible for the selection of those committees.

I invite honest criticism at all times, but resent misrepresentation and untruthful statements. I may be termed a machine politician by some who desire to criticize unjustly, but as long as I am able, I shall speak the courage of my convictions regardless of time or place as an officer of this Brotherhood or as an individual member. I believe that honest criticism of officers and members is good for any organization; but dishonest criticism, misrepresentation and untruthful statements will destroy a good organization quicker than anything else.

It would seem that the brother is ready and willing to jump at conclusions; to ridicule and vilify the officers of our Brotherhood. To accomplish his purpose, he even goes so far as to endeavor to close the doors behind him after making the untruthful charges which he has made. He speaks of the "bombastic mouthing on par with Kaiser Wilhelm's "Me and God" and says we hear too much of it. I am satisfied that the rank and file, after reading his article will be in a position to readily decide where the "bombastic mouthing" is coming from. He warns the readers of his article that "You will hear the beneficiaries of the machine rule howl about this" and I presume that his object was to lead the readers to believe that any one who might dare to reply to his scurrilous statements was a party to the machine rule, and in his lambasting, he does not seem to be content with his attack upon the officers of the International Brotherhood, but extends its scope to practically all men in our Brotherhood, who have ever taken an active interest in its affairs, going so far as to include deputy organizers and business agents. I am surprised that he did not include the officers of all subordinate lodges.

The following is taken from a letter to President Franklin, under date of February 8, 1915, over the signature of the Secretary of Lodge No. 123 and the seal of the lodge:

"I meant to state before that as for the officers voting for the increase for your salary, as shown on the minutes is where the machine controlled convention is taken from."

I am content to leave this question entirely with the rank and file to decide as to whether or not the officers of an organization, voting for or against any proposition, is proof of a machine controlled convention. It appears the inference is made that because of the fact that those delegates, representing subordinate lodges, who happened to be holding office, were benefited by voting for the increase in salary for the president, or that they would not honestly and conscientiously vote their sentiments and convictions the same as any other delegate in the convention, I feel this is a very unjust position to take. The officers of our Brotherhood, at the San Francisco Convention, who voted upon this and all other subjects, were regularly elected and accredited delegates from the subordinate lodges in which they hold membership; and if the members of those lodges were not satisfied with the actions of their delegates it was their duty to complain and not the affair of any one not directly connected with those lodges.

Another article will appear in this month's issue of the Journal, over the signature of the same brother, in which he states that President Franklin, in commenting on the referendum called for by Lodge No. 123, takes exception to the fourth "Whereas" and proceeds to call them a lot of liars only in polite terms and then states that calling names is no argument and tends only to weaken a case in the minds of serious thinking men. I presume that the brother must have changed his opinion since writing his article for the March issue of our Journal, so let us apply this same reasoning to his article in the March Journal, as he now desires to apply to President Franklin's comment and criticism upon the resolution from Lodge No. 123. Take the third paragraph of his article, in which he says: "Now, I will endeavor to do so with no abuse or calling of names, as that is only resorted to by a person who has no good argument and tries to bury his opponents in a flood of invective and abuse." Let us apply this same paragraph to his entire article in the March Journal.

Then note, particularly the fourth paragraph of his article in this issue of the Journal in which he states, "We find that out of a total vote of that convention, 52 votes are cast by grand vice-presidents, deputy grand organizers and business agents, receiving their salary in whole or part from the Grand Treasury." If the brother is not familiar with the facts, then I

don't believe that he should attempt to prove anything by a mis-statement of facts. The records of this Brotherhood will show that all organizers' services had been dispensed with at least three months prior to the convening of the convention in San Francisco, and were not on the pay roll of the grand lodge in whole or in part. The further fact is that those delegates at the convention who were formerly organizers, were regularly accredited delegates from their lodges and their expenses to the convention were borne by their lodges. The records of this Brotherhood will also show that no business agents received any part of their salary from the grand lodge for at least eight months prior to the convening of the San Francisco convention and those business agents who were delegates at the convention were regularly accredited delegates from their subordinate lodges and their expenses were borne by the subordinate lodges.

The further statement that some of these men hold their jobs by virtue of their obedience to the grand president and that everyone of them voted for the increase, certainly is proven to be an untruthful statement by the facts just given and the further fact that none of the organizers or business agents were receiving any financial assistance from the grand lodge, nor had they been receiving any for some time prior to the convention and were independent to vote and do as they pleased, which I honestly believe they did and would do the same thing again had they an opportunity to do so.

The brother states that the grand vice-presidents, deputy grand organizers and business agents, who were receiving their salary in whole or in part from the grand treasury had 52 votes and then proceeds to point out how these 52 votes behind the president controlled the convention. I feel that the facts given above, in reference to the organizers and business agents not receiving salary or financial assistance in any manner from the Grand Lodge should eliminate them entirely from this comparison. The ten officers of the grand lodge were regularly accredited delegates to that convention; but when we investigate the records of our Brotherhood, we will find that eight of the vice-presidents had been off the pay roll of the grand lodge for at least two months prior to the convening of the convention in San Francisco, but for the sake of argument let us count up the total vote of the grand lodge officers in the San Francisco convention, and we will find that it amounted to 19½ votes. Had all the grand lodge officers voted against the increase in salary for the president, the vote would have stood 147½ for and 106½ against, still leaving a majority of 41 votes in favor of the increase. The total vote by roll call, as shown by the Proceedings of that convention was 167 for and 87 against. It appears that the brother, in order to bol-

ter his argument and to support his contentions of a machine controlled convention must necessarily include organizers and business agents who had absolutely no connection with the Grand Lodge whatever. Judging from the vote cast by the delegates in convention, I am satisfied that those delegates knew what they wanted. This is clearly proven when we find that by eliminating the entire vote of the Grand Lodge Officers, and placing it to the credit of the opposition to the increase there would still have been a majority of 41 votes in favor of the increase.

In the fourth paragraph of this article in this month's issue, he states, "It was openly charged on the floor of the convention that it was machine ruled and that laws were being made to help machine rule, yet he does not attempt, in a single way, to show where any such charges were proven. To make such a statement and to furnish evidence in proof of same are two different propositions; the one referred to as being made on the floor of the Convention at San Francisco is exactly in line with the one made in the article referred to in the March, as well as this issue of the Journal, no proof whatever being submitted, yet because somebody else said so and so, he considers it as proof.

Reference is made in his article in this issue to the small percentage of members represented at our last convention. I feel sure that every member of our organization fully realizes why there was not a larger representation. We all know that owing to the convention's being held in a city situated at such a great distance from the location of many lodges, which would necessarily create a very large expense, the attendance was not as large as it should have been. However, I feel, inasmuch as our laws now provide that future conventions shall be held in the headquarters city, which is centrally located, and further provide that the expenses of at least one delegate from each lodge shall be borne by the Grand Lodge, will insure a full representation at our future conventions, and the percentage of attendance has nothing whatever to do with what it will be in the future. I would especially invite the brother to compare the percentage of attendance at our last three or four conventions with the percentage of our membership voting upon all matters under the referendum system which was in effect in this Brotherhood for ten years, from the year 1896 to the year 1906, and, after he has done so, please advise the readers as to how the percentages compare.

And while the brother accuses me of manipulating machine politics, I just have this to say: Were I seeking a political mentor, or an instructor in political ethics, I should call upon the dear brother from Livingston, as a man, in my opinion, who claims to champion the cause of all discordant and disgruntled elements and is capable of inducing seventy-five members of

his own lodge who are obligated to uphold the fundamental principles of organized labor, to indorse a resolution to reduce wages is possessed of eminent qualifications for a machine politician and should be an expert instructor in political ethics.

Even though he holds it is a poor argument to advise against reducing wages, he does not, for one moment, advance a single argument that is logical and sensible; in his mere opinion, this argument is a poor one. The fact that our San Francisco convention saw fit, by an overwhelming vote, to grant the President of our Brotherhood an increase in salary, has not increased the dues one penny on the members of this Brotherhood and it has not, up to this time, in the least, affected our Brotherhood in any way.

Possibly he has forgotten his argument before the Railroad Department of the A. F. of L. at the convention held in Kansas City, Mo., from April 13 to 23, 1914, at the time when he was advocating "One Big Union," or, in other words, the "Amalgamation of Kindred Trades," and speaking in favor of a resolution to submit the question to the rank and file of all organizations affiliated with the Department for a referendum vote. He said, in part, as follows:

"I believe the rank and file would settle this question and if this organization (meaning the Railroad Department of the A. F. of L.) took hold of the matter in proper form it would insure LOGICAL AND EXPERIENCED MEN TO HANDLE THIS CHANGE IN THE FORM OF ORGANIZATION, and be done in a way that would create no hardship to the present organizations; but if we refuse to go to the rank and file on this question, it would EVENTUALLY END IN REBELLION AND DISRUPTION OF THE ORGANIZATIONS, AND INCAPABLE MEN WOULD GET HOLD OF THE REBELLING ORGANIZATION AND EVENTUALLY bring things into a chaotic condition."

It would appear, from the article referred to that some one is endeavoring to bring about the threatened rebellion and disruption and further to place the officers of our Brotherhood in disrepute, and, by so doing, permit the incapable men referred to to take advantage of affairs and "bring things into a chaotic condition." Just note the argument here, and the admission that if the officers of the several organizations, composing the Railroad Department of the A. F. of L. adopted his plan and his views that everything would be lovely; and, then note the veiled threat that if they did not adopt his views and his ideas, rebellion and disruption of our organizations would take place and that incapable men would get hold of the rebelling organizations. Then talk about the "bombastic mouthings, on par with Kaiser Wilhelm's "Me and God."

Now, brother, my advice to you is to lay that little hammer of yours aside and if you cannot boost a little for a stronger and better organization, don't do so much knocking. There are many matters of interest to

the members of our organization which can be taken up in lodge rooms, discussed and action taken which will result very beneficially to our members. The matter of agreements with employers, boiler inspection and the perfection of our organizations are subjects which would bring a great deal more good to the rank and file of our members than to be applying our time trying to reduce the salary of our officers and lambasting and abusing, writing and re-writing mis-statements, misleading a number of our members. I am indeed sorry that it becomes my painful duty to reply to the article referred to, but the readers may rest assured that when I, as an officer of this Brotherhood, or as an individual member of our organization, am unjustly accused, I shall endeavor to set forth plain, cold facts, not with a desire to abuse or criticise any one, but in defense of myself.

With very best wishes to one and all, I am
Yours fraternally,

A. HINZMAN,
First International Vice-President.

Springfield, Mo.

Dear Sir and Brother:

The March issue of our Journal was to my thinking one of the most interesting ones that we have had for some time and the correspondence from the various lodges shows an awakening of the membership that is gratifying. The article from the pen of Brother McGowan from Silvis, Ill., asking for a fair-minded discussion on the question of amalgamation through the columns of the Journal is at this time the proper thing and the writer of this hopes to see a response from all quarters. To my mind the amalgamation of kindred crafts is proper and would be a big step in economy to the dues-paying membership. However, it is a step that must be approached very carefully, and after much thought and deliberation. I am free to admit that at this time the consensus of opinion is overwhelmingly against it and am not sure that after an exhaustive discussion of the question its adoption will be any too popular. Now I take it, this amalgamation means the joining of forces under one head of all kindred crafts, but that each craft retain their individual work, of course it could be no other way because it would be foolish to expect a machinist to undertake to do our work, or us theirs because of the inability of each to perform the required tasks with anything like present skill displayed by the practiced artisan in each line today. Even if such a thing is contemplated, I prefer to believe that we would each stand on neutral ground as a craft and it would not mean any lessening of jobs.

The employing class would, however, find such a deterrent in this sort of a plan that they would be (and justly so), very much opposed to it. Of course if the movement was approached gradually, that is by train-

ing the boys to become all around mechanics they would accept the scheme readily enough. However, the main point is that each organization is at present maintaining a corps of officers whose duties are to attend to the business of their respective crafts, each are actuated by the same motives, i. e., the acquiring of better working conditions and a greater share of the wealth created. Now why could we not eliminate the waste and expense and energy and have one corps of officers to attend to all the business, surely I as a boiler maker, could have no complaint if a machinist secured better conditions and wages for me while acting as officer of my labor organization or vice versa with the machinist. Under such a plan the inquiry to one would in fact become the concern of all because of the diversified personal of not only the grand officers but shop committees business agents, etc.

This plan will only come by education of the great rank and file and after a dying out of the present petty jealousy and suspicion existing between the various crafts today. However, let us have this discussion without insults or personalities and talk to the other craftsmen when the opportunity presents itself and maybe we will begin to see ourselves in our true light, that of brother, each striving for a common goal.

R. A. LINES.

Ft. Worth, Texas.

Editor of Journal:

The official Journal for March is of more than usual interest from the fact that it brings to our attention several matters that are of the most vital interest to this organization.

Brother McGowan has dwelt very reasonably on a question that is going to be one of the most important, that we, as a craft have to consider. This is a matter that can not be dealt with in a slip shod manner but requires the most serious thought and careful study. Whether we are ready for it in the face of the fact that we have the system federation and have only recently adopted the railway department, is a matter to which all should give the most careful thought in order that, in our haste to do something we should not destroy that which we have been years building.

The system federation has brought about results that a few years ago seemed impossible of attainment. Yet there is much to accomplish through this medium that has not even been tried.

What the railway department will accomplish remains to be seen as it has never been given an opportunity to demonstrate what is lying dormant in that line.

However, it does not seem to me that the evidence in favor of amalgamation is strong enough at this time to tempt us to take it up. One of the reasons we are not ready for it is not on account of international jealousies, but local differences that

we must learn to overcome before we are able to cope with a question as large and as far reaching as this.

There are many points in connection with this question that we have got to eradicate as locals before we can hope to work in harmony.

In this connection I might cite you to a controversy that arose on a railroad in this vicinity, where there exists a system federation.

The machinists had formerly held all round house foremanships. The federated agreement provided that any man, regardless of craft, whose seniority entitled him to the job might have same when it became vacant. A boiler maker bid for and was assigned to one of them. The machinists held meeting at several places along the line and threatened to make a grievance of same and if necessary take the matter to the general manager, because they had always held these jobs.

Such work and some others could be cited that tend to show that we must first become educated to the things we now have and learn to work along harmoniously with our brother crafts, before we try to go too strong on this line.

However, I believe that the time will come when the order of the day will be industrial unionism, but I do not think that the time is now.

As for abusing our grand lodge officers and accusing them of every crime under the sun that is only one more way of causing discord and discontent among the half-hearted members, which makes the work harder*for those who will work and try to do something. The sooner this kind of business is done away with and discouraged, the sooner we quit knocking and go to work, the sooner we will be able to accomplish something worth while.

In regard to the resolution offered by Lodge No. 126, I think that if they had offered the resolution and left out the fourth clause they might possibly have had some chance of having it indorsed. As it now reads the resolution as a whole is an insult to every man who attended the last convention, whether or not he supported the resolution in favor of an increase in salary. However, the question does not need my defense because President Franklin has stated the proceedings exactly as they occurred.

If more of the lodges would try to have delegates present and not try to tear down by their subsequent actions what was done in a conscientious sense of duty by their accredited delegates, then possibly we could attain more.

In regard to the salary proposition, personally, I was, am, and will be in favor of the law as it now reads. We cannot hope to have nor expect to get educated men to hold these responsible positions unless we can pay them what they are worth to us.

A man to be president of this organization must be able to cope with men of the brightest minds who are educated along these lines. If we want to put them on a salary that some of us are now making it will not be long until everyone of us are working for a very small wage, because the educated men will eventually drift into something where they can do better for themselves and loved ones. So I say give them a good salary and keep them with us and not be trying to educate a new set every time we have a grievance. The men that we are going against are old timers in this business and every time we send a new one against them we are only losing ground so it is very necessary that we keep men in our ranks who can deliver the goods for us, and the only way we can do it is to pay them good first class salaries.

I do not think we made a mistake and I believe the majority of the thinking members of the organization will bear me out in this. While the salary we are now paying seems to be a lot of money to some of us, I believe that in the course of time it will be shown that it was one of the wisest moves made at this last or any preceding conventions.

Trusting that the membership at large will thoroughly discuss this matter and all other things of this Brotherhood in order that we may all be benefited in the long run, I remain,

Yours fraternally,
L. A. FREEMAN.

Springfield, Mo.

Editor-Manager Journal:

I am sending a few lines for the April issue of our Journal and I hope you may find space for same. It is not often that I take up the space, being content to leave it to the other members of our organization, but when I read the March issue, I felt it was time that some of our members who have worked hard and faithfully for several years to build up an organization, took a hand and had something to say.

I have read with much interest the resolution from Lodge No. 123, in which they offer an amendment to our constitution wherein our International President's salary shall be reduced from \$2,400 per year to \$1,800 per year, giving as their reasons for same that the increase was granted by our last convention at a time when our treasury and conditions of the country and trade did not warrant it. Also stating that they believe our membership as a whole are not satisfied and that the increase was granted by a "machine-controlled convention," and offer a comparison of our president's salary with the average earnings of boiler-makers and shipbuilders. What has prompted our brothers in Montana to start a move of this kind I do not know, but in my opinion, some one has made a serious mistake. In the first place I cannot agree with their argument as to the conditions of the country and trade not warranting

the increase, for the face of the matter is that our auditor's report shows \$58,555.10 in our treasury July 17, 1914, the month in which the increase took effect; and the fourth quarterly report of the I. S. T. shows in our treasury \$73,735.15 on January 1, 1915, an increase of \$15,180.05 for the six months after all liabilities and expenses had been paid, including the president's salary at \$200 per month for six months. These results were accomplished without increasing the dues or cost of membership to our members, hence, my claim that their argument is not a good one.

As for the membership as a whole not being satisfied, will say I believe the great majority of the membership are satisfied and believe in the best of wages and conditions. It is to be expected that some are not satisfied as some men are never satisfied with anything, and especially those who take an obligation to abide by the laws and rules of our organization and after they have had their voice and vote are not content with the action taken unless they can be the dictators, then proceed to try to undo what a large majority of those who had interest enough in the welfare of an organization to be represented in regular convention in conformity with the laws, had done. Furthermore, I feel sure if the entire membership of our organization were familiar with the proposition, they would by an overwhelming vote, sustain the action of the San Francisco convention.

As a member of this brotherhood for a good many years, I have always had a great deal of pride concerning same, and as our earnings and conditions generally compare favorably with any of the other metal trades or railroad shop trades, I feel that our officers are entitled to the same consideration as that given by our sister organizations. Are we going to be known as a lot of cheap skates and compel our president to give his time and brains in our behalf for \$600 per year less than the presidents of the other crafts with which we are affiliated receives? I will venture the answer will be "No," as I have a great deal of confidence in the men of our craft and feel that their final decision will be "Do unto others as you would have them do unto you." If we wish to place our organization on an equal basis with our sister organizations, let us treat our officers the same as other organizations do theirs. If we wish to command the respect of the labor movement, as well as our employers and the public, let us at least be as fair with our own employes as we expect our employers to be with us. My experiences in the past have shown me that considerable is expected of our president. The nature of his business naturally compels him to meet and do business with government, municipal and corporation officials, as well as business men in general. He is our representative and we in many instances are judged by his ability and appearance. Let me ask how many of our readers de-

sire to be represented by a man inferior in ability and appearance to those representatives of other organizations? I will venture to say none. Then let us respect our own representative and treat him as others treat theirs, and by so doing, uphold the dignity of our brotherhood and offer him some inducement to give us the best that is in him.

To adopt the amendment offered by Lodge No. 123 simply means a reduction in salary to our president after he has received the increase for nine months, a violation of all principles of unionism. How many of our brothers would stand for a 25 per cent reduction in wages? Not one.

Now for the "machine-controlled" convention we hear so much about: The writer happened to be a delegate to that convention and served as chairman of the law committee, and must say if the convention was controlled by a machine, the machine was invisible and I think the real machine got a few cogs knocked out of it and finally died. I am sure it missed fire on several occasions during the convention, as the loyal members of our brotherhood who attended the convention refused to be handed a lemon by a bunch of politicians. Every member on my committee acted as his conscience dictated and not in accord with the wishes of anybody, and I resent the statements that have been made and denounce them as unwarranted as well as untruthful. I have been serving my district as business agent for the past ten years, receiving my salary and expenses direct from lodges comprising my district, and at no time prior to the San Francisco convention did I or my district receive any financial assistance whatever from the grand lodge. Neither was my salary paid whole or in part by the grand lodge. Consequently I was free and independent to vote as my conscience dictated and not obligated to anyone.

The reference made in the article by Bro. C. J. Maes to the beneficiaries of the machine rule and openly charging that the vice presidents, organizers and business agents are beneficiaries of the machine, in my opinion, is an insult to the intelligence of our brotherhood, and just so long as such narrow, selfish views are countenanced, just that much longer will we as an organization be in placing ourselves in the foremost ranks of the labor movement. The laws of our brotherhood provide specific methods for dealing with dishonest officers, which gives to each and every member an opportunity of preferring charges against any officer for any wrong doing or for any violation of the laws of our order, and there is no excuse for anyone going around crying "Crook!" "Thief!" etc. In my estimation, a man who claims to have knowledge of the dishonesty of our paid representatives and does not come forth with his charges and proof of same, is worse than those he accuses, and should be dealt with accordingly.

Bro. Maes says he sees that some of the officials must take a Pullman to ride fifteen or twenty-five miles and that this petty graft must be cut out. Why doesn't he say which ones and state specific instances and not deal in generalities, so that we all may wise up a bit? I do not think it is fair to make such broad statements, as no doubt some of the representatives are at least half way decent and honest, and when generalities are dealt in all of them must be spattered a little at least. I further believe that our officers should be given the same consideration that all members are given, and believe them innocent until proven guilty after a fair and impartial trial under the laws of our brotherhood.

Bro. Maes lays great stress upon the depression of business throughout the country, and offers to compare our president's salary with the earnings of the average members. He then proceeds to use the little hammer as to the expenses, etc. I don't believe I ever heard of such comparison before. The members of my district favor a man with qualifications to transact our business along business lines, and they know that the duties and requirements of the president of our brotherhood are considerably more than that expected of a journeyman in the shop, and is a position that commands a much higher salary. Consequently there can be no comparison whatever. If all our members entertained the same ideas as those expressed by our brother from No. 123, I would not give much for the future of our brotherhood. Now, as to the hotel bills of our international president: I have not had an opportunity to inspect the quarterly report as closely as I would like to, but from past observations of them, I am willing to wager that they are within the law of our brotherhood. I just wonder how many thousand miles our brother from Montana has traveled in a box car as the representative of our members, and I wonder if he was our international president if he would stop at a cheap rooming house. I suppose he would go to a soup house for his meals or hit a free lunch. Again I wonder what the business world would think of us to have our leader pulling off such stunts. If our brother ever represented a body of men in such manner, I just wonder what kind of men they were. While traveling over my district and transacting the business for my constituents, I have found that nobody has anything to give away, and if a man lives respectably or half as well as he would at home, it costs money. The cost of living has increased wonderfully, the last few years and the hotels and restaurants have not forgotten to raise their prices either. This applies all over the country, and generally where a man could live on two dollars per day a few years ago, he cannot live on three now.

I represent a district comprising seventeen lodges, who are now and have been for some time enjoying a very good agree-

ment and conditions which compare favorably with the best in the country. We believe these conditions were established by selecting our very best men to represent us, and have always paid them the best of wages and did not ask them to ride in box cars or eat at soup houses. We want our representatives to live respectably and pay them accordingly. We expect our grand lodge officers to do the same, and when we get so poverty stricken that we can't treat them like other men in similar positions are treated, we had better dispense with their services and go back in the old rut where we were ten or twelve years ago. I am sure many of our older members will remember those times.

I hope our membership will give these matters due consideration and investigate some of the statements made before taking action. Let our motto be "Onward and Forward," not "Backward." Don't let us establish a precedent for every employer in the country to take advantage of by saying the conditions in the country forced us to reduce our own officers' salaries, and the same conditions will compel them to reduce the wages of the men.

Trusting this will meet with the approval of one and all, and with best wishes, I am

Yours for good wages,

A. F. BINGHAM,

Pres. and B. A. Dist. No. 23.

Neodesha, Kan.

Dear Sir and Brother: Please insert in Journal the following poetry:

Is there any heart discouraged as it journeys on its way?

When thou passeth through the waters,
Does there seem to be more darkness than there is of sunny day?

Oh! It's hard to learn the lesson, as we pass beneath the sod,
That the sunshine and the shadows serve alike the will of God.

But there comes the word of promise like the promise in the bow,
That however deep the waters they shall never overflow.

When the flesh is worn and weary, and the spirit is depressed,

And the temptations sweep upon it like a storm upon ocean's breast,

There's a Heaven ever open for the tempt-driven bird,

There's a shelter for the tempted in the promise of the Word;

For the standard of the spirit shall be raised against the foe,

And however deep the waters they shall never overflow.

When a sorrow comes upon you that no other soul can share

And the burden seems too heavy for the human heart to bear

There is one whose grace can comfort if you will give Him abode;

There is a burden bearer ready if you'll trust Him with your load,
For the precious promise reaches to the death of human woe,
That however deep the waters, they shall never overflow.

When the sands of life are ebbing and I near the Jordan shore,
When I see its billows rising and I hear its waters roar,
I will reach my hand to Jesus in His bosom I shall hide,
And 'twill be only a moment till I reach the other side.

It is then the fullest rising of the promise I shall know
When thou passest through the waters, they shall never overflow.

—E. P. Reddick, C. S. L. 418.

Tulsa, Okla.

Dear Sir and Brother: We would like to see this in the next issue of the Boiler-makers' Journal if you have space:

THE FUTURE.

The route to life's hope, great success,
Is like all roads that prong
The right road to travel by,
And the other way that's wrong.

But the menace of this very day
For success try to grab,
Is the future of the Union Man,
And the future of the Scab.

The Union Man with conscience clear,
With no onthought to discard,
While the scab with uneasiness,
While the scaley with uneasiness,
Is always on his guard.

And thus it goes on day by day
No matter what you choose,
You have to profit all your gain
With no conscience, then you loose.

For an unclean conscience brings you wrath,
You belong to lower grades,
You can't live in Eternity,
They won't have you in Hades.

But the Union Man with conscience bright
Knows nothing else but love,
Will dwell in the land of happiness,
With a great chance for above.

But the poor, weak minded, radical
Guys with minds like frogs,
Will have no place at all to go,
They'll have to dwell with dogs.

So let us take the only way,
And from that way don't part,
And we will live forever
With the Unions in our heart.

—R. E. Lannon, Local 592.

Chicago, Ill.

Dear Sir and Brother:

At a regular meeting of Stoney Island Lodge No. 454, B. M. & I. B. & H. of A., the following resolutions were adopted:

Whereas, it has pleased the Almighty God, in his infinite wisdom and power to take to his reward our esteemed and beloved brother, Henry R. Cooper, therefore be it,

Resolved, that while we bow to Him above, we deeply lament the death of our worthy brother. We, his fellow brethren, extend to his bereaved parents and members of his family our most profound sympathy and may the Divine Ruler of the universe who giveth and taketh away, give to them the strength and Christian fortitude, to bear up under this their great sorrow in the loss of their deceased son and brother. And be it further

Resolved, that a copy of these resolutions be sent to the bereaved parents and family, a copy be sent to the official Journal for publication, also a copy be spread on the minutes at our next regular meeting and our charter draped for thirty days.

WM. KELBY
EMIL R. DETTMER,
CHAS. LEAHY,
Committee.

East St. Louis, Ill.

At a regular meeting of Lodge 363 the following resolutions were adopted:

Whereas, It has pleased the Almighty God in His infinite wisdom to remove from our midst the beloved mother of our esteemed brother, Charles McCarthy, therefore be it

Resolved, That we, the members of Lodge No. 363, extend to our worthy brother and family our heartfelt sympathy and condolence in this their sad hour of bereavement softened only by the confiding hope that her spirit has departed to a better and brighter sphere where sorrow is unknown and, be it further

Resolved, That a copy of these resolutions be sent to our bereaved brother and a copy to our Journal for publication and a copy be spread upon the minutes of our meeting.

JAMES ROSE,
JOHN ROCHE,
FRANK HOAG,
Committee.

Richmond, Va.

Whereas, it has pleased the Almighty God, in his infinite wisdom to remove from our midst the beloved sister of our worthy and esteemed brother, J. C. Tyler, therefore be it,

Resolved, that we his fellow brothers extend to our brother our heartfelt sympathies in this sad hour of bereavement, and as we bow in humble submission, to the will of Him who doeth all things well, we pray that the Almighty God may comfort and console him that he may bear his trial with fortitude, be it further

Resolved, that a copy of these resolutions be spread upon our minutes and a copy be sent to our bereaved brother, and a copy sent to the Journal for publication.

Fraternally in sympathy,
E. M. DAYWALT,
S. P. CRITZER,
GEO. A. YORK,
F. C. BLOUNT,
Committee.

Memphis, Tenn.

Dear Sir and Brother: Local 180 is sending a vote of thanks to the Grand Lodge for the prompt payment of Bro. Jas. Robt. Copeland, Reg. No. 17117, disability claim for the amount of \$200 for the loss of said brother's left eye.

This is the first claim that Local 180 has ever asked for and same was appreciated by all of Local 180.

Yours fraternally,
C. F. GULLENWATER,
C. S. L. 180.

A Compilation of Labor News.

BY THE A. F. OF L. NEWS SERVICE.

WAGES-BY-LAW DISASTROUS.

Sydney, New South Wales.—Protests by trade unionists over the manner in which their wages have been juggled by government-established boards reached a climax in this city when the wages of hotel and restaurant employes were reduced from 20 to 25 per cent. Chief cooks in the higher class hotels have been reduced \$5 a week, while waitresses have been cut \$1 a week. The Australian Worker, published in this city, declares it to be "the most astounding award that has yet been delivered by any wages board in New South Wales." The paper also says: "Not only did the board reduce wages from about 20 to 25 per cent

in hotels and restaurants, but it went beyond the requests of the employers' association and reduced the wages of employes in tea rooms, for which the employers' association made no request whatever."

The unions will protest against the new award by conducting a campaign of publicity against the wages they are now forced to accept. It is announced that a "fair list" will be issued, containing the names of those establishments which will not reduce wages to the level of the board's award.

In an address to the Sydney Labor Council, W. O'Neill, the new president, said that unions are throwing the responsibility

of securing better working conditions on the chairmen of wages boards. He was cheered when he stated that if the organizations federated they would then not need to trouble about arbitration courts, as they would possess the power to protect themselves.

In his half-yearly report, Secretary Kavanaugh, of the New South Wales Labor Council, protests against the manner in which wages boards are debarred, by court order, from considering wage increases. He says:

"If the employer happens to be dealing in the necessaries of life he may go to the Necessary Commodities' Commission, and if he can justify his claim to increase the price of his commodity, he may do so. The employes, on the other hand, no matter what the reason may be, must not get an increase in wages, because the country is at war. We are not even allowed to submit our claims to an increase to the arbitration court. Prices may be increased and our purchasing power thereby reduced, but wages must remain stationary until the war is over."

Since the above was written, Judge Heydon, of the industrial arbitration court, has modified his decision that wages boards cannot consider increases. The court acknowledged this action was taken because of agitation by the trade union movement, whose members have been aroused by this unexpected show of power over them by the courts.

MILLIONS OF ILLITERATES.

Washington.—There are 5,500,000 men, women and children over ten years of age in this country who cannot read or write, is the startling statement contained in a report issued by the House committee on education, which favored a bill to appropriate \$15,000 to enable the federal commissioner of education "to devise methods and promote plans for the elimination of adult illiteracy in the United States." This bill failed to pass the last Congress, although it was urged that the millions of illiterates would be reduced to one per cent of the population within ten years.

In favoring this appropriation the committee on education says:

"Fully half of these illiterates are young men and women with many years of life yet before them to be lived out with the handicap of total illiteracy, unless they are encouraged and assisted to throw off the burden. With proper encouragement and help most or all of these would learn to read or write and to do simple practical problems in arithmetic. Many of them would do much more. They would then be better citizens and more profitable to themselves, to society, and to the industrial world."

In addition to the more than 5,000,000 illiterates, it is shown by figures prepared by

government experts that there are in the United States 15,000,000 or 20,000,000 men and women who can barely read or write.

ROLL CALL VOTE ON BURNETT IMMIGRATION BILL.

Those Voting "Nay" Voted in Favor of Having Two Men for Every Job.

Alabama.

Aye—Abercrombie, Blackmon, Burnett, Dent, Harris, Hefflin, Hobson, Underwood. Nay—Mulkey, Taylor.

Arizona.

Aye—Hayden.

Arkansas.

Aye—Caraway, Floyd, Goodwin, Jacoway, Oldfield, Taylor, Wingo.

California.

Aye—Bell, Church, Curry, Hayes, Kettner, Kent, Knowland, Nolan, Baker, Stephens.

Kahn answered "present." He was paired against the bill with Roberts of Nevada, who was paired for the bill.

Colorado.

Aye—Seldomridge, Taylor. Nay—Keating, Kindel.

Connecticut.

Nay—Donovan, Kennedy, Lonergan, Mahan, Reilly.

Delaware.

Aye—Brockson.

Florida.

Aye—Clark, Sparkman. Not Voting—*L'Engle, *Wilson.

*L'Engle and Wilson were paired for the bill, with Vare of Pennsylvania against.

Georgia.

Aye—Adamson, Bell, Crisp, Edwards, Howards, Hughes, Lee, Tribble, Vinson, Walker. Nay—Bartlett, Park.

Idaho.

Aye—French, Smith.

ILLINOIS.

Aye—Baltz, Buchanan, Borchers, Fitz Henry, Foster, Fowler, Hill, Hinebaugh, McKenzie, O'Hair, Rainey, Tavener, Thomson. Nay—Britten, Copley, Gorman, Gallagher, Graham, Madden, Mann, McAndrews, Sabath, Stone, Stringer, Williams. Not Voting—Hoxworth.

Indiana.

Aye—Adair, Cox, Cullop, Dixon, Gray, Morrison, Moss, Rauch. Nay—Barnhart, Korbly, Lieb, Peterson. Not Voting—Cline.

Iowa.

Aye—Good, Green, Haugen, Kennedy, Kirkpatrick, Scott. Nay—Connolly, Towner, Vollmer, Woods. Not Voting—Prouty.

Kansas.

Aye—Anthony, Campbell, Connelly, Doolittle, Helvering, Murdock, Neeley. Nay—Taggart.

Kentucky.

Aye—Barkley, Cantrell, Fields, Helm, Johnson, Langley, Powers, Rouse, Stanley, Thomas. Nay—Sherley.

Louisiana.

Aye—Aswell, Watkins. Nay—Broussard, Dupre, Estopinal, Lazaro. Not Voting—*Elder, Morgan.

*Elder was paired for the bill with Metz of New York against.

Maine.

Aye—Guernsey, Hinds, Peters. Nay—McGillicuddy.

Maryland.

Aye—Lewis, Linthicum, Price, Talbott. Nay—Coady, Smith.

Massachusetts.

Aye—Gardner, Gillett. Nay—Deltrick, Gallivan, Gilmore, Greene, Mitchell, Paige, Phelan, Roberts, Rogers, Thacher, Treadway, Winslow.

Michigan.

Aye—Hamilton, Kelley, McLaughlin, MacDonald, Mapes, Smith, J. M. C., Smith, Samuel W., Woodruff. Nay—Beakes, Cramton, Doremus, Fordney. Not Voting—*Lindquist.

*Lindquist was paired for the bill with Graham of Pennsylvania against.

Minnesota.

Aye—Anderson, Davis, Lindberg, Volstead. Nay—Manahan, Miller, Stevens. Not Voting—*Smith.

Steenerson answered "present." He was paired against the bill with Faison of North Carolina for the bill.

*Smith wished to vote "no," or against the bill, but not being in the hall when his name was called was not permitted by the Speaker to vote.

The Vote Explained.

The 261 Representatives voting "AYE" voted to protect American workers; voted for American standards of life, and voted for industrial, political and social welfare.

The 136 Representatives voting "NAY" voted to insure the steel and coal barons an unlimited supply of cheap labor; voted to increase illiteracy and voted to retard industrial, social and political betterment.

A two-thirds vote was necessary to pass the immigration bill over the President's veto.

If any four of the 136 voting against labor had voted for labor, the bill would have passed.

Mississippi.

Aye—Candler, Collier, Harrison, Humphreys, Quin, Sisson, Stephens, Witherspoon.

Missouri.

Aye—Alexander, Decker, Dickinson, Hamlin, Hensley, Lloyd, Rubey, Rucker, Russell, Shackelford. Nay—Barthold, Booher, Borland, Gill, Igoe.

Montana.

Aye—Evans, Stout.

Nebraska.

Aye—Barton, Kinkaid, Stephens. Nay—Lobeck, Maguire, Sloan.

Nevada.

Not Voting—*Roberts.

*Roberts was paired for the bill with Kohn of California against.

New Hampshire.

Nay—Reed, Stevens.

New Jersey.

Aye—Baker, Browning, Drukker, Hart, Parker. Nay—Eagan, Hamill, Scully, Townsend, Tuttle, Walsh.

New Mexico.

Nay—Fergusson.

North Carolina.

Aye—Doughton, Godwin, Gudger, Kitchin, Page, Pou, Small, Stedman, Webb. Not Voting—*Faison.

*Faison was paired for the bill with Steenerson of Minnesota against.

New York.

Aye—Danforth, Hamilton, Mott, Parker, Platt, Underhill. Nay—Brown, Bruckner, Calder, Cantor, Carew, Chandler, Clancy, Conry, Dale, Dooling, Driscoll, Fairchild, Fitzgerald, George, Gittins, Goldfogle, Goulden, Griffin, Levy, Loft, Maher, O'Brien, Patten, Riordan, Smith, Talcott, Taylor, Ten Eyck, Wallin. Not Voting—*Dunn, McClellan, *Metz, Oglesby, Wilson.

*Dunn was paired for the bill with Metz of New York against.

North Dakota.

Aye—Helgesen, Young. Nay—Norton.

Ohio.

Aye—Allen, Ashbrook, Bathrick, Bowdle, Claypool, Fess, Francis, Gard, Key, Post, Switzer, White. Nay—Brumbaugh, Bulkley, Crosser, Goeke, Gordon, Sherwood. Not Voting—Whitacre.

Oklahoma.

Aye—Carter, Davenport, Ferris, McGuire, Morgan, Murray, Thompson, Weaver.

Oregon.

Aye—Hawley, Lafferty, Sinnott.

Pennsylvania.

Aye—Ainey, Brodbeck, Butler, Carr, Dershem, Difenderfer, Farr, Grist, Hulings, Keister, Kiess, Kelly, Kreider, Leshner, Lewis, Palmer, Patton, Porter, Rothermel, Rupley, Temple, Walters. Nay—Bailey, Barchfeld, Burke, Casey, Donohoe, Edmonds, Lee, Logue, Moore, Morin, Shreve. Not Voting—*Graham, *Langham, *Vare.

*Langham was paired for the bill with Graham of Pennsylvania against.

*Vare was paired against the bill with Wilson of Florida for the bill.

Rhode Island.

Nay—Gerry. Not Voting—Kennedy, O'Shaunessy.

South Carolina.

Aye—Aiken, Byrnes, Finley, Johnson, Lever, Ragsdale. Nay—Whaley.

South Dakota.

Aye—Burke, Dillon, Martin.

Tennessee.

Aye—Austin, Byrns, Garrett, Houston, Hull, McKellar, Moon, Padgett, Sells, Sims.

Texas.

Aye—Beall, Callaway, Dies, Eagle, Garrett, Gregg, Henry, Rayburn, Slayden, Smith, Stephens, Sumners, Vaughan, Young. Nay—Buchanan, Burgess, Garner, Hardy.

Utah.

Aye—Johnson. Nay—Howell.

Vermont.

Aye—Greene, Pumley.

Virginia.

Aye—Carlin, Flood, Glass, Hay, Holland, Jones, Montague, Saunders, Slemp, Watson.

Washington.

Aye—Bryan, Falconer, Humphrey, Johnson, LaFollette.

West Virginia.

Aye—Avis, Brown, Hughes, Moss, Neely, Sutherland.

Wisconsin.

Aye—Cooper, Frear, Lenroot. Nay—Browne, Burke, Each, Konop, Reilly, Stafford. Not Voting—Cary, *Nelson.

*Nelson was paired for the bill with Kahn of California against.

Wyoming.

Aye—Mondell.

DISCUSSES RESTRICTION.

~~Oklahoma~~ **Oklahoma City, Okla.**—In a leading editorial on the question of restricting immigration in this country. Editor Fields, of the Oklahoma City Evening Times says, in part:

"It is plainly time to put aside sentimentalism and study this question in a cold-blooded, dispassionate way. Stand at the gateway of one of the great factories of Pennsylvania, New Jersey, New York, or Massachusetts, when the evening whistle blows; watch five and six thousand men check out by number and crowd through the gate; then go and inspect the hovels and rookeries in which they swarm to exist between dusk and dawn; note the sanitary conditions, food, bedding, and other requirements—then ask yourself seriously and candidly whether you think an American laboring man, well born, decently reared and fairly well schooled, should or could bring himself to accept wages that will lower his standard to such a level? Frankly, now, do you blame the average young American, who is capable of taking a thought ahead, if he hesitates about assuming the duties and responsibilities of a husband and a father when he knows that in its last analysis the wage scale is limited and fixed by a practically unlimited supply of labor imported from lands where the lowest standards of living prevail?"

PROTEST WAGE RULE OF JUDGE.

Sydney, New South Wales.—In his annual address before the conference of the railway workers and general laborers' union, held in this city, President Rosser called attention to Judge Heydon's unfair judgment recently in which he notified workers that they must not look for wage increases in these troublesome times.

"Despite this," continued the unionist, "we can't help noticing that the employers, both the merchants and the middlemen, who deal in the necessary commodities, have raised the prices with the consequent effect of decreasing the wages of the workers by at least 25 per cent during the last five months."

The decision complained of was made by Judge Heydon, of the court of industrial arbitration, who notified wages board, several weeks ago, that because of the

European war conditions were such that increases were out of the question. The decision, it is declared in some quarters, has practically suspended the sittings of these boards, which are created by law to adjust wages and other questions that arise in the various industries.

SUSTAIN RIGHT TO PICKET.

Phoenix, Ariz.—In the case of a unionist charged with "disturbing the peace," in connection with a strike of cooks and waiters, Judge Stanford of the Maricopa county superior court charged the jury as follows regarding the right of workers' to picket:

"Employees, individually, or acting through a union, have a right to attend at or near the house or place where the business of the employer is carried on, for the purpose of peacefully persuading any person to cease to patronize such place where such employees have ceased to work and have the right to recommend, advise or persuade the public at large by peaceful means to cease to patronize such place and have the right to peaceably assemble in any place in a lawful manner for a lawful purpose."

The jury decided that picketing was not a disturbance of the peace and discharged the defendant.

OPERATORS EVADE DAMAGES.

Harrisburg, Pa.—In an effort to secure the benefits of the proposed state compensation law, Attorney Devere, representing the United Mine Workers, told the senate committee on mines and mining that the companies evade liability by advancing the argument that the men in charge of the mines—the foremen—hold certificates issued by the state, hence are agents of the commonwealth and that, therefore, their employers cannot be made to pay damages. The miners want the mine foreman certificate law repealed. As a substitute they urge that to qualify for foreman, a man must have spent five years in the actual work of mining and blasting coal in a chamber.

REFUSE A RE-HEARING.

Louisville, Ky.—The Kentucky court of appeals has refused to grant a rehearing on the workmen's compensation act, which it recently decided, in a divided opinion, to be unconstitutional. The court also refused to modify its decision so the law could be made effective, pending an amendment by the legislature, which convenes the first of next year.

The majority opinion expressed a belief that the legislature could draw up a constitutional law, but objection was raised to the present act because of the limit of amount specified for various damages, the claim being made that the placing of a limit is against the state constitution.

Compensation advocates are now conducting an educational campaign preparatory to the convening of the next legislature.

"PERSONAL SAFETY" URGED.

Harrisburg, Pa.—To urge individual workmen to realize their personal responsibility, is one of the methods recommended to reduce accidents by officials of the state department of labor and industry, in a report just issued. It is shown that accidents to the number of 38,126 occurred in the various industrial plants of the state during the year. The loss in wages from these accidents amounted to \$1,048,503.96. According to the report the total number of days lost by workmen on account of accidents was 426,824. This gives an average loss to each workman of twelve days.

"When we consider the far-reaching injury to the social well-being of the people of the Commonwealth," continues the report, "the need of remedy grows imperative. It has been found that depending upon these injured workmen are 64,016 other persons. This means a total of more than 100,000 persons affected by these accidents."

UNIONISTS FIGHT REACTION.

Washington.—Secretary Morrison, of the American Federation of Labor, has received the following information from President Marsh, of the Washington State Federation of Labor:

"We are having the legislative fight of our lives this winter to retain upon the statute books legislation achieved during the past years. Probably not in twenty years has such a reactionary body sat in our state capitol. Bills are introduced to repeal our eight-hour law on public works, eight-hour law for women, full crew bill and mothers' pension law. We are holding public hearings on all these bills and arousing public sentiment throughout the state. You may rest assured that trade unionists in this state will fight as best they know to hold that which they have gained through many years of struggle."

WOULD NULLIFY LABOR LAW.

Boston, Mass.—Efforts are being made to nullify the anti-injunction law, passed last year by the legislature, and a bill to this effect has been introduced in the state law-making body. This bill is serving as a model for federation of labor in other states, which are urging its adoption by their respective legislatures. The law provides that no judge can issue an injunction in industrial disputes except where irreparable injury is threatened, and then only in cases where there is no adequate remedy at law.

The law also contains this clear-cut declaration: "In construing this act, the right to enter into the relation of employer and employe and to assume and create a new relation for employer and employe, and to perform and carry on business in such relation with any person in any place, or to do work and labor as an employe, shall be held and construed to be a personal and not a property right."

REAL EFFICIENCY FAVORED.

Columbus, O.—At an open meeting of unionists in this city, President Wilson of the Pattern Makers' League, said:

"We are accused of opposing modern efficiency methods, but we are opposing only such so-called efficiency methods as tend to drive men to work beyond human endurance. We favor good efficiency methods.

"There is not a large employer who dares to say any more that he is opposed to organized labor. Rockefeller recently declared publicly that he is not opposed to organized labor. No matter what capitalists really think, organized labor has reached the point where employers recognize the force of public opinion back of it.

"By the abolition of child labor alone labor unions have done enough to justify their existence. In addition, we have secured legislation for safer mines, better sanitation and shop regulations."

MINES KILL 2,451 IN YEAR.

Washington.—Coal mining in 1914 cost the lives of 3.3 men in every 1,000 employed, while in the year 1913 the death rate was 3.73. This reduction means a saving of more than 300 lives, reports the United States bureau of miners. The number of miners killed for every 1,000,000 tons of coal mined in 1914 was 4.81. In the year 1913 there were 4.89 miners killed for every 1,000,000 tons mined.

"Shocking as is the violent death of 2,451 men in a year's time in a peaceful industry," said Van H. Manning, acting director of the bureau, "the men of the bureau who are engaged in the campaign to reduce this casualty list find, in comparison with other years, some indications that the improvement noted in the saving of life will be further accentuated as the years pass."

"SIXTY-HOUR" LAW A FARCE.

Charleston, S. C.—The sixty-hour law of this state is a farce, reports commissioner Watson of the department of agriculture, commerce and industries to the state legislature. The law, while providing for only sixty hours' labor in any one week, permits of the making up of lost time, and this has been so construed that enforcement of the law is absolutely impossible. The commissioner reports that state officials "have been almost overwhelmed with complaints from operatives in textile plants." He recommends that this proviso be repealed and such regulations substituted as can be enforced.

OPPOSE QUALIFICATION.

Toronto, Ontario.—Trade unionists in the Ontario province are asking that the property qualification for holding any municipal office be abolished. The injustice of this law is apparent when it is recalled that no property qualification is necessary for a candidate for the provincial legislature or the federal parliament.

FAVORS STATE COMPENSATION.

Astoria, Ore.—In an editorial on the subject of state compensation, the Morning Astorian says:

"Private interests should never be permitted to come between the employer and the injured employe, conducting a business that depends on accident and injury of human beings for its profit. Such an enterprise is no more legitimate than it would be considered a legitimate business for a private corporation to engage in policing our cities and making prosecutions for law violations. The administration of a compensation law by which the injuries of employes of our state are cared for is as much a function of government as in the maintenance of public schools, the policing of our cities and the administration of justice."

PUBLIC PAYS TRANSPORTATION.

Washington.—At least forty-three states authorize the transportation of pupils to public schools at the expense of school districts, according to a bulletin issued by the United States bureau of education. In certain states transportation at public expense is permissible only, in others obligatory. Ohio, for example, requires transportation for children two miles or more from the school, while other states require transportation when the distance is one and one-half miles or more.

In the several states the school authorities may pay parents or guardians a fixed amount per day for transportation, while Maine, Vermont, Minnesota, South Dakota and Oregon permit payment for room and board for pupils in homes convenient to the schools where the cost of so doing does not exceed the cost of transportation.

INSIST ON UNION LABEL.

San Francisco.—The board of supervisors of this city has declined to consider bids for printing from non-union firms, and has approved a proposed charter amendment making compulsory the use of the union label on all city printing. This amendment will be voted on at the special election next month, and is intended to make legal a former resolution of city officials which has been declared void by the supreme court on the ground that a union label reso-

lution is in conflict with the competitive bidding clause of the city charter.

LABOR LAW CASES ADVANCED.

Washington.—Cases involving the constitutionality of the New York alien labor law, which provided that only citizens should be employed on public works, has been advanced for argument by the United States Supreme Court to October 12. The court has already enjoined the enforcement of the law, which was upheld by the New York state court of appeals.

As a result of this decision the New York legislature modified the law by providing that citizens should be given the preference for employment on this work.

VICTIMS OF GUNMEN SUE.

New Brunswick, N. J.—Damage suits to the amount of \$120,000 have been filed here on behalf of workers who were shot by armed detectives in the employ of the American Agricultural Chemical Company, at Chrome, on January 19. The actions, for \$10,000 apiece, are similar in the twelve cases. All of the complainants were shot in the back. Attorneys for the strikers declare the case presents no new problems in law, as it will be easy to prove the liability of the company.

WILL TEST RELIEF FUND.

Cincinnati, O.—Judge Cushing has decided against the Baltimore & Ohio Southwestern railroad in its bill of demurrer against the suit of Joseph Bailey, former switchman, to recover damages. He contributed to the company's relief fund for six years, and states that when a worker leaves the service he is not reimbursed. It is further stated that 3,000 employes are compelled to be parties to this fund. The railroad asked that the case be dismissed, but this the court refused and ordered a trial.

ATTEMPT TO ADJUST STRIKE.

Oklahoma City, Okla.—Officials connected with the state labor commissioner's office are attempting to adjust the strike of oil tank builders. Nearly 2,000 men are involved. State Labor Commissioner Ashton reports that the conditions which caused the strike are "very bad."

Among Our Exchanges.

LABOR'S WORST ENEMIES.

It is reported in a press dispatch from Chicago that three labor officials were arrested on indictments charging them with conspiracy in restraint of trade. It is further reported in the dispatch that one of the number is guilty of blackmail. If the charge of blackmail, is founded on facts then such a labor official should find no room in the ranks of organized labor. The labor official who through blackmail se-

cures tribute from an employer brings a labor organization into disrepute and is a far worse criminal than the highwayman.

No labor journal can afford to defend the blackmailer, and the sooner such a "mooching" parasite is branded as undesirable and expelled from the labor union, the better it will be for the standing of the labor movement.

The labor organization cannot be held responsible for the acts of an official who

prostitutes his official position for personal aggrandizement, providing such labor organization makes it known in no uncertain language that officials who use the organization to secure dishonest revenue are unworthy of the confidence of the working class.

The blackmailer in the labor organization is labor's worst enemy and should be treated as a pariah. The labor movement should not be condemned for the disreputable acts of an official, no more than any other organization or association that has elected or appointed officials who have outraged the trust reposed within them. Christ selected twelve men to propagate the doctrines of Christianity, and yet, one among the number committed treason to the "Prince of Peace," whose religion has covered the earth and aided in the expulsion of the brute from man. Men with ulterior motives will crawl into the labor organization just the same as they crawl into the church, but neither of these institutions should be condemned, simply because some member or official has debauched himself for the price of dishonor.—John M. O'Neal in Trinidad "Free Press."

WATCH YOUR STEP.

"Look before you leap" is an old adage but should be carried under the hat band of every union man.

It is not the purpose nor the duty of a labor organization to declare a firm unfair or call a strike every time an employer of labor looks cross-eyed.

The constitutions of the several labor organizations and the American Federation of Labor contain provisions which if carefully adhered to by union members would prevent unnecessary and fruitless strife between employers and employees.

When the Creator made man He supplied him with a head and endowed him with the powers of thought. That head was placed there to use not as an ornament nor as a battering ram but as an aid to keep men out of troubles and to blaze paths toward brotherhood.

If the head was intended to be used as a battering ram it would undoubtedly have been made solid without having space for any substance such as we call the brain.

Trickery, deceit and intolerance for the opinions of others has no place in the labor movement.

The Labor World would caution union men to be careful in their proceedings, to guard against hasty action. The labor movement cannot afford to act injudiciously on any grievance that may come before them, particularly at this time. To be contrary and dogmatic will be utter folly; to be calm and precise in judgment; to consider all elements involved in any question will be the greatest of wisdom.

Watch your step, step carefully and look before you leap.—The Labor World (Duluth, Minn.)

WHAT CHINA MIGHT DO IF SHE WERE AROUSED.

Spread China on top of the United States and it would hang over Alaska and Mexico. In population it beats us better than four to one.

In the Pennsylvania anthracite region a seven-foot, free-running coal vein is now a rarity. In China's 13,500 square miles of first-class anthracite coal land, the seams average fifteen feet in thickness and often reach forty.

Thus far, no diamonds have come from China; but nature has endowed her with most everything else—coal enough to heat the world for ages; vast ore beds of iron, copper, tin, lead and zinc; gold, silver, salt and valley soils of incredible fertility.

China's coal, iron and limestone lie near together. She can supply the world with steel, and, when taught scientific agriculture, she can feed mankind.

The native Chinaman is honest, capable, industrious, quick to learn. Let him be organized for industry or war with modern methods and there are enough of him to make a mark.

Think of what Japan has done in fifty years on a group of islands not as large as Texas and you gather a hint of the tremendous stake for which she is playing in the endeavor to capture control of China.

China, vitalized as Japan has been, could, yes would, rule the world!—Milwaukee Journal.

HOW DO YOU PLAY?

It comes a bit hard to admit that the real question of life is not so much what our condition is as how we meet that condition. With repining? That brings melancholy and despair. If conditions aren't just right, the more we think and ponder over what is unfavorable, the worse they seem. The darkness looms large and so close to the mental vision that it shuts out whatever faint ray of hope may be trying to shine through. Cheerfulness lets in the light; it adds to both mental and physical power. Hope in an inspiration. By keeping the mind open hardships may be lessened, if not done away with.

It is good for us that there are some hard things to endure. It is in meeting storms and beating down obstacles that we increase our strength and mount the heights. Were all the way easy, we should never develop the muscle to climb higher. Were there no temptations, no thorns, we should lack understanding of others and sympathy. Our characters would become weakened like the unused muscles of the dervish, which in time become paralyzed and cannot be moved. However hard we have to struggle, there is someone not far away who has just as hard a time. We need sometimes to get our mind off the prize and remember that the really important thing is how we play the game.—Milwaukee Journal.

News of General Interest.

UNITED STATES COMMISSION ON INDUSTRIAL RELATIONS.

In a report to the United States Commissioner on Industrial Relations, William O. Thompson, Counsel for the Commission, announces the inauguration of machinery for collective bargaining between the government and its employes at the important Government Arsenal at Watertown, Massachusetts.

Under an order issued by Brigadier General William Crozier, Chief of Ordnance of the United States Army, grievances of the machinists and other workmen employed at the arsenal are to be adjusted by joint boards, composed of representatives of the arsenal and of the employes.

This innovation is particularly interesting because it puts collective bargaining into effect under conditions that are often said by critics of unionism to be incompatible with trade agreements. These conditions are the existence in the arsenal of a system of scientific management devised by Frederick Taylor of Philadelphia, and the fact that public necessity forbids any interference with the operations of the arsenal, as an important part of the national defense. General Crozier's action in issuing this bulletin sets a precedent and constitutes an experiment that will be watched with interest both by public and private employers. If the experiment succeeds it will prove that a democratic shop organization can be maintained side by side with so-called scientific management and in an industry where safeguards against interruption are of prime importance.

Mr. Thompson was detailed by the Commission last summer to aid in an effort to adjust the differences that threatened to arise at Watertown because of the objections of the men to the Taylor system of scientific management. He had the full cooperation and numerous conferences with General Crozier, N. P. Alifas, of the Machinists' Union, and John R. O'Leary of the Molders' Union, as well as with Colonel Wheeler, Commanding Officer of the Arsenal. The plan devised by Mr. Thompson is incorporated in General Crozier's order.

This order provides a shop board, consisting of a representative of the arsenal and of the employes in the shop where the grievance arises. In case the shop board fails to adjust the grievance it shall then be taken up by the arsenal board, consisting of an officer of the arsenal, to be selected by the commanding officer, and a representative of the employes of the whole arsenal, to be selected by the employes. In case the members of the arsenal board cannot agree they shall submit a statement of the subject in controversy to the mediation board, consisting of five members appointed as follows:

The commanding officer shall appoint from his staff an officer, who, if practicable, shall act continuously; the commanding officer shall also appoint an additional member, who may be an officer or an employe, not from the rank and file of the employes, and who must not be a party to the grievance. The employes on their part may also appoint two representatives from among themselves, the first to act as continuously as practicable; the second shall, if possible, be a representative of the craft which has the complaint before the board, but he must not be personally involved in the question for adjudication. The commanding officer and employes shall select a fifth man, who shall act as chairman of the board.

Appeal may be taken from the decision of the mediation board to a supreme mediation board, which shall consist of three members, one to be appointed by the Chief of Ordnance, once to be appointed by the crafts representing all the employes of the arsenal, and these two to choose a third member who shall act as chairman. The findings of the supreme mediation board are not to be final, but are to be subject to the approval of the Chief of Ordnance, with an appeal from him to the Secretary of War.

General Crozier's order specifically states that the "employes are understood as not waiving any objections which they may have to any method or manner of work which may be in force in the said arsenal, such, for instance, as the stop-watch elemental time studies, or the premium system of payment to employes."

In a letter from General Crozier to the commanding officer of the Watertown arsenal, incorporated in Mr. Thompson's report, General Crozier states:

"The enlargement of the privileges now existing and in practice with reference to this subject is offered with the object of giving employes as full participation in dealing with matters with which they are closely concerned as is consistent with the interest of the government and the responsibility which is devolved upon the department."

It is understood that if the experiment at Watertown proves successful the system will be extended to other arsenals.

EX-PRESIDENT TAFT DISCUSSES PROHIBITION.

New Haven, Conn. (Special News Dispatch):

"Ex-President Taft, whose recent expression of opposition to national prohibition before the Boston Bar Association aroused much comment, has taken occasion to discuss the matter more fully in a letter which he has written to Mrs. Tilton, of Cambridge, Mass. While Mr. Taft states that he was

not accurately quoted in his speech before the Bar Association, he expresses sharp criticism of prohibition laws. His letter follows."

January 3, 1915.

My Dear Mrs. Tilton:

What I said in respect to National Prohibition was misunderstood and not correctly reported. The subject of my remarks was, "The Evil of Multiplicity of Laws." I called attention to the fact that there had been passed by Congress and State Legislatures 65,000 laws in the last four years, and that such a mass of legislation was an evil of burdensome proportions, as we were rapidly finding out.

This excess of legislation I attributed to two causes. The first was the erroneous belief that any reform could be accomplished merely by legislation, and the second was that legislators were prone to enact laws, not because they believed their enforcement would do any good, or because they had their enforcement in mind, but only because their votes would profit them politically. Due to this last cause, whenever a part of the electorate in a Congressional District, not a majority, but supposed to hold the balance of power, threatened to plump their votes for or against a Congressional candidate on a particular issue, and without regard to their usual party affiliation, they were able to frighten legislators into the legislation which they, as a minority group, demanded. In this wise the amendment for National prohibition secured a majority of the members of the House of Representatives. Many members voted for it who were not really in favor of it, nor did a majority of their constituents demand it. Such members voted for it merely to secure the approval and support of a comparatively small element in the electorate whose votes they feared might defeat them if they voted their own convictions.

I then pointed out the evils of an amendment to the Constitution of the character proposed. I said that it would destroy the balance of power between the central government and the state government; that it was a direct blow at local self-government, and at the integrity of our Federal system depended on preserving the control by the states of parochial and local matters; that the regulation or prohibition of the liquor traffic was essentially a local matter, because opinions with reference to how it should be treated varied with every community. Secondly, it was dangerous because the exercise of jurisdiction to prohibit the liquor traffic would call for a horde of Federal officials in addition to the hundreds of thousands now representing the United States Government, and would give to an unscrupulous manipulator in National politics, with Federal authority, a power that would be dangerous to the republic whenever candidates were to be selected by his party, or whenever an election was to be had.

I said that the lack of sincerity in the vote for the amendment by a majority of the House, when it required two-thirds to pass, was shown by the fact that those who voted for the amendment had not attempted to exercise all the Federal authority there now was within the present Constitution. I pointed out that this majority could pass a law which would be valid, under the present Constitutional division of powers between the Federal Government and the states, declaring that intoxicating liquor should not be a legitimate subject of commerce between the states, or between this country and foreign nations. In that way Congress could hedge each state about and permit it to regulate within its own borders the manufacture, sale or use of intoxicating liquor without the receipt of liquor from the outside.

I did not say I favored such a bill, because I do not favor it. My personal view is that as long as a great majority of the states do not prohibit the manufacture and sale of liquor within their borders, it would be very unwise on the part of Congress to attempt to restrict the interstate commerce in intoxicating liquor. It may be that we shall come to the time when National public opinion will demand such legislation, but certainly we have not arrived at it now. In the matter of lottery tickets, lotteries were regarded at the beginning of the last century as a legitimate means of raising money for many purposes. In a century, the attitude of the public changed toward lotteries, so that there was only one state in the Union that permitted them—Louisiana—and there grew up to be a very strong sentiment in that state against their continuance. Thereupon Congress rightly passed a law making the sale of lottery tickets across state lines illegal. But we certainly have not reached such a condition with respect to the manufacture and sale of intoxicating liquors.

I vetoed the Webb law making illegal the transportation of liquor into states which forbade its manufacture and sale, because it was not uniform in its application to all parts of the United States, and was an attempt to delegate to individual states the power to regulate Interstate Commerce in violation of the Constitution. The question is now pending in the courts.

In my remarks I said also that this appeal to Congress for an amendment to the Constitution by the people of the states where prohibition laws were now in force, was a humiliating confession of the ineffectiveness of those laws in such states in their local communities in which a majority of the people do not sympathize with the officers of the laws in enforcing them.

I think the solution of the liquor question is in local option, by which the sale of liquor is forbidden in communities that by the expression of a majority of the voters show that public opinion will sustain the enforcement of such a law. To pass laws forbidding the manufacture and sale of liquor and then have large parts of a state

where liquor is sold freely and in defiance of the law is a demoralization of all law that is most detrimental to the interest of the whole community.

These shortly stated are my views with respect to the prohibition question. Of course they could be elaborated, but I think I have answered your queries as to my position, and I hope I have corrected the erroneous impression that was given by the report of my remarks at the Bar Association.

Sincerely yours,

WM. H. TAFT.

Mrs. Elizabeth Hewes Tilton, 11 Mason Street, Cambridge, Massachusetts.

AN ITALIAN FOUR-CYLINDER PRAIRIE LOCOMOTIVE.

By Frank C. Perkins.

A four-cylinder compound prairie locomotive shown in the accompanying illustration was constructed at Milan, Italy, at

the American Association for Labor Legislation. The report attacks the New Jersey system for having fixed the basis for compensation too low. Under the act the injured worker is entitled to only two weeks' medical attendance with a \$50 maximum and to 50 per cent of his wages. This, remarks the report, is one of the lowest scales in the country.

Recent laws tend to fix compensation on a more liberal scale. New York and Ohio started with a 66 2-3 per cent scale. Massachusetts, after two years experience with 50 per cent, recognized its inadequacy and raised it to 66 2-3 per cent, at the same time very greatly extending the period of payments. In a dozen states this year active legislative campaigns to establish compensation on a basis of 66 2-3 per cent are in progress.

Family life cannot be maintained on \$5 or \$6 a week and this is all that numbers of New Jersey families are entitled to have

the works of the Societa Italiana Ernesto Breda, and is in use by the Chemins de fer de l'etat italien.

This engine has four cylinders, 420 mm. in diameter, with a stroke of 650 mm. The diameter of the driving wheel is 1.85 meters and the fixed wheel base measures 1.95 meters, while the total is 3.45 meters.

The boiler has a total heating surface of 242.8 square meters, of which 178.2 square meters represent the heating surface of the tubes and 52.4 square meters the steam super-heated surface, while the area of the grate is 3.5 square meters. The amount utilized being 12 kilograms. This engine develops 1,300 horsepower and has a maximum traction effort of 10,580 kilograms.

The total weight of the engine and tender combined is 120,400 kilograms. The weight of the tender in service is 49,600 kilograms, and of the locomotive, 70,800.

HALF OF WORKERS' WAGES INSUFFICIENT COMPENSATION.

Half of the workers' wages is an inadequate proportion for compensation, according to a report on the New Jersey Compensation law which has just been issued by

during disablement under the existing law, since, according to a report of the New Jersey Bureau of Labor Statistics of 1912, 48 per cent of all employes engaged in manufacturing receive \$10 or less per week in wages. In consequence of the low scale of payment many injured workers were found whose wives and children had been compelled to seek poorly paid work or to beg for charity.

Compensation at a rate which does not allow for the continuance of the family life of the worker defeats its own ends, the worker suffering deprivation and hardship while the community is left to support the family through one channel or another.

Medical Treatment Important.

Medical aid, it is urged, should be determined solely by what is necessary for the injured worker in order that he may return to his work as soon as possible. The limits set by the Jersey laws are illogical and indefensible. If the worker should lose the medical attendance needs at the end of a fortnight, his prolonged disablement is not only to his own injury, but is contrary to the interests of his employer.

Strong objection is raised to the New

Jersey system by which a workman is compelled to accept the services of the doctor selected by his employer or to pay all his own medical expenses. The existence of a Board for the administration of the law which would make impartial provision for necessary medical aid would greatly improve the existing system.

Insurance for Compensation Necessary.

The report strongly urges the policy of compulsory insurance for compensation. Compensation breaks down completely when firms which have not insured their workers against accident become bankrupt. In a number of cases in New Jersey, after favorable settlement in the courts had been obtained injured workers or their dependents have not received any compensation owing to the failure of the firm from which payments were due.

THE LARGEST LOCOMOTIVE CRANE IN THE UNITED STATES.

By Frank C. Perkins.

The accompanying illustration shows the new mammoth locomotive crane installed at the New York navy yard, as designed at Cleveland, O., and believed to be the largest locomotive crane in the world, although it

boom, which adds 38 feet, and from which the auxiliary hoist is suspended, was particularly designed for handling the basket masts which are peculiar to the new dreadnaughts. Hitherto there has been no crane of sufficient radius to handle these masts as a unit.

THE PROCEEDINGS OF THE NATIONAL ACADEMY OF SCIENCES.

Beginning with January, 1915, the National Academy of Sciences has instituted the issue of a monthly journal, the Proceedings, which, in addition to being the official organ of publication of the Academy, will serve as a medium for the prompt presentation of brief original papers by members and other American investigators. Its aim will be thus to furnish a comprehensive survey of some of the more important results of the scientific research of this country, and it is intended to supplement, not replace, the papers appearing in special journals. The first number of the Proceedings contains, among others, papers on physiology and genetics, including a contribution by Davenport on "Violent Temper and Its Inheritance." This is, in the opinion of The Journal of the American Medical Association, an attempt to study the

is pointed out that the upset state of affairs in Europe makes it extremely difficult to fully corroborate this, but the assertion that it is the largest in the United States is beyond question. The main boom is 75 feet in length and has capacity of 50 tons at the full radius.

The main hoist is placed at the end of this and is used for conveying boilers, armor plates, big guns and engines, which are used in the large warships. The auxiliary

hereditary behavior of some of the elements of moral action—to analyze, by the methods of the Eugenics Record Office, the family history of persons who have marked emotional traits. Violent and more or less periodic outbursts of temper occur in families which are characterized by prevalence of epileptic attacks; also in those exhibiting cases of mania, and in others in which "hysterical" attacks are common. The special form of the attacks differs somewhat

in these classes of families, but the method of inheritance of the tendency is the same in all, and it seems probable that in each class the simple symptoms of the emotional outburst are modified by the differences in these three classes of the nervous condition. The fact that the tendency to outbursts of temper does not skip a generation, according to the report of 165 family histories of wayward girls in state institutions, indicates that it is a positive or dominant trait. This tends to emphasize that such features have a typical hereditary basis, a statement which many sociologists who hold differences in the "conditions of life" responsible for the differences in men, are quite likely to dispute.

A ONE-PIECE STEEL END FREIGHT CAR.

By Frank C. Perkins.

The accompanying illustration shows a one-piece steel end freight car of great strength. It is maintained that the concentric corrugated one-piece end, pressed as shown, insures every inch in the entire end being of equal strength.

There are no posts, braces or rivets required in the entire end and it is held that no built-up end could compare with it for

amount of claims to be paid. The steel ends strengthen as well as prevent damage to the car bodies, reducing loss of earning capacity as well as repair costs.

A CO-OPERATIVE MAIL ORDER HOUSE.

The prevailing conception of a labor union is that its only function is to instigate strikes for the purpose of increasing wages, shortening hours and creating a monopoly of employment for its members. Correct information as to the educational and beneficial work the unions are doing is available only to those who are readers of the labor press.

Whenever organized labor breaks into the columns of other newspapers it is because of some strike, some judicial decision, some law suit, or to give publicity to a tirade by some union hater. Then organized labor is depicted as a dictator, a criminal, a thug, an un-American institution that should not be tolerated in a free country.

Very seldom is mention made of the beneficial activities connected with the general scheme of organization, such features as sick and death benefits, out-of-work relief, old age pensions, homes for the aged, schools for apprentices, correspondence

strength. It keeps the car in perfect alignment and allows a foot more space inside the car. It is said to give better protection to the contents of the car and it is said these ends assure that a car will be continuously in service.

The ends are flanged to fit any class of car, old or new, and the method of flanging at the edges gives great strength at the corners. It is claimed that the one-piece steel end triples the life of the car, reducing the amount of depreciation per year and prevents damage to lading, thereby reducing

courses for journeymen, and the legislative work in congress and state legislatures, where laws are urged for the abolition of child labor, the protection of women in industry and the safeguarding of the health and lives of all who work. These are matters with which organized labor is occupied continuously.

Hostile organizations of employers are abandoning the idea that the American labor movement can be destroyed or even curbed. They see the membership of the A. F. of L. increasing each year; they see labor enlarg

ing its influence among the law makers of the land; there is recognition of its power and aggressiveness, new plans for widening its sphere of usefulness are constantly being advocated and inaugurated.

Whenever labor break new ground, when it reaches out into hitherto untried fields of endeavor, the experiment is eagerly followed by all who are in sympathy with the movement, who give time and thought to the progress of the workers. The latest attempt to draw the hosts of labor more solidly together is to concentrate their purchasing power for the benefit of union label products of all kinds.

About a year ago there was organized in New York City a co-operative association of union men and women, known as the Union Label Products Trading Association, which has in view the finding of a larger market for the sale of union label goods. The general plan is to establish in all large cities retail stores where only union label goods will be sold. Also to sell goods by the mail order method, made possible by the introduction of the parcels post.

On September 12, 1914, an office and sales-room was opened in the World Building, New York City. A large stock of men's furnishings, cigars and cigarettes, pocket knives, household articles and many special lines of women's wear has been assembled. An illustrated mail order catalog has been issued, and sent to trades unionists and sympathizers whose names could be secured. The results thus far have been very satisfactory, enough orders have been received to encourage the Association to enlarge its lines and increase its stock of goods. The goods handled are the best that can be obtained from the most reliable union manufacturers. No attempt is made to have customers pay extra for the union label, the prices being no higher than are paid for non-label goods.

The enterprise has the endorsement of the leaders of the American labor movement, men prominent in its councils being members of the Association. Official recognition was given to the Association by permitting Mr. George Stein, its vice-president, to address the last A. F. of L. convention in Philadelphia, and by being listed in the Official Directory of the Union Label Trades Department of the A. F. of L.

The Association is organized under the laws of the state of New York, with a capital stock of \$50,000. Shares are sold at \$10.00 each, and no one can own more than fifteen shares. There are at present 275 shareholders and the list is increasing rapidly. It is the intention to secure members in all parts of the country. These members becoming active boosters, salesmen and customers. Members of all crafts are welcome.

The certificate of organization provides that the association has the right to sell at retail, to become wholesalers and jobbers, and to engage in manufacture. A plan that comprises all the features of the large and successful co-operative enterprises which

have for so many years been profitably conducted by the workers of Europe.

Literature, details and catalog can be secured by writing to Union Label Products Trading Association, 527 World Bldg., New York City.

WAGES AND HOURS OF LABOR IN THE BUILDING AND REPAIRING OF STEAM RAILROAD CARS, 1907 TO 1913.

The Bureau of Labor Statistics of the United States Department of Labor has just published as Bulletin No. 163 a report on wages and hours of labor in the building and repairing of steam railroad cars. The report is based on information obtained from the principal representative establishments in the industry. Figures are presented in this Bulletin for rates of wages per hour and full-time hours of labor per week for the years 1907 to 1913 and for full-time weekly earnings for 1910 to 1913.

Full-time weekly earnings of the employes in the principal occupations in this industry in 1913 were 5.5 per cent higher than in 1912, 6.0 per cent higher than in 1911, and 8.9 per cent higher than in 1910; average rates of wages per hour for 1913 were 6.3 per cent higher than in 1912, 6.4 per cent higher than in 1911, and 9.9 per cent higher than in 1910; the full-time working hours per week in 1913 were 0.7 per cent lower than in 1912, 0.4 per cent lower than in 1911, and 1.1 per cent lower than in 1910.

The data for 1913 were obtained from 73 representative establishments and covered over 42,000 employes. The average full-time weekly earnings in 1913 in the principal occupations in these representative establishments were as follows:

Cabinetmakers	\$19.03
Carpenters and car builders, wood	17.11
Car repairers	15.15
Fitters	15.99
Laborers	10.58
Machine woodworkers	16.26
Machinists	17.81
Painters	17.77
Pipe fitters	18.56
Riveters and buckers	19.41
Tinners	19.23
Truck builders	15.31
Upholsterers	19.50

In 1913 the full-time hours of labor per week were under 54 in quite a number of the establishments visited and over 60 in but very few. The predominating full-time hours per week were 54 and the average about 56.

NONE EVER REALLY LOST.

(From the Kansas City Star.)

The ferryman, while plying over a water which was only slightly agitated, was asked by a third woman in his boat whether any persons were ever lost in that river.

"Oh, no," said he. "We always finds 'em again the next day."

Smiles.

THE LORD'S WAY.

When James A. Garfield was president of Oberlin College a man brought for entrance as a student his son, for whom he wished a shorter course than the regular one.

"The boy can never take all that in," said the father. "He wants to get through quicker. Can you arrange it for him?"

"Oh, yes," said Mr. Garfield. "He can take a short course; it all depends on what you want to make of him. When God wants to make an oak he takes a hundred years, but He only takes two months to make a squash."—Ladies' Home Journal.

WHAT IS THE ANSWER?

"Mother," she began, "what does trans-Atlantic mean?" "Across the ocean," replied her mother. Then, "Does 'trans' always mean across?" "Yes, it does, always," and the mother added sternly, "If you ask me another question tonight I shall send you to bed!" The second silence lasted quite three seconds. It was broken at last by a plaintive, small voice, which commented, "Then I suppose transparent means a cross parent!"

ONLY JOKING.

A negro was lying down during the noon hour, sleeping in the hot sun. The clock struck one, the time to pick up his hod again. He rose, stretched and grumbled: "I wish I wuz daid. 'Tain' nothin' but wuk, wuk from mornin' till night."

Another man, a story above, heard the complaint and dropped a brick on the grumbler's head.

Dazed, he looked up and said:

"Da Lawd can stan' no jokes. He jes' takes ev'rything in yearnist."—Kansas City Star.

DISTINGUISHED.

"Who is that haughty looking woman on the right?"

"That is Signora Juarez-Torreon-Varanza-Quilla of Mexico."

"And what are those badges, buttons and medals with which she is almost covered?"

"Why, she's a daughter of 329 revolutions."—Judge.

"Why, Willie," said the teacher in a pained voice, "have you been fighting again? Didn't you learn that when you are struck on one cheek you ought to turn the other one to the striker?"

"Yes'm," agreed Willie, "but he hit me on the nose and I've only got one."—Sacred Heart Review.

NEVER SAW A BUN DANCE.

It was the grammar lesson, and the teacher was explaining the difference between a common and abstract noun.

"An example of a common noun is dog," she said, "for you can see it, while you cannot see anything that is an abstract noun. For instance, have any of you seen abundance?"

There was silence for about a minute. Then a little boy got up and said:

"Please, ma'am, I have never seen a bun dance, but I have seen a cake walk."—Hamilton, Can., Labor News.

EARLY SIGNS.

"What makes you think the baby is going to be a great politician?" asked the young mother, anxiously.

"I'll tell you," answered the young father, confidently, "he can say more things that sound well and mean nothing at all than any kid I ever saw."

ENCOURAGING.

Catcalls and groans, vegetables and eggs are directed at the stage, but still the well-meaning performer, who is in the midst of a long monologue, continues to recite his lines.

Finally a despairing spectator hurls a boot on the stage, and the actor starts to retreat behind the scenes.

"Keep on playing!" cries the manager in the wings. "Keep on till we get the second boot!"

THOUGHTFUL OF HIM.

Houseman—If I'd known you were going to drop in on us so unexpectedly, we would have had a better dinner.

Horton—Don't mention it, old man; but next time I'll be sure to let you know.—Boston Transcript.

DIDN'T NOTICE HER.

"Did you notice that lovely girl in the pretty brown dress, waiting in the lobby?" he asked his wife as they took their seats in the theater.

"What! That frowsy thing with the false puffs, enameled face, gold teeth, made-over dress, imitation mink furs, and torn gloves? No, I didn't notice her. Why?"—Puck.

"What have you there, son?"

"Ten beans."

"Beans? Do you mean dollars?"

"Yep."

"Why don't you call money by its right name?"

"Ain't beans a good enough name for money?"

"Not for you. You never plant any."—Atlanta Constitution.

VICTRESS.

"Madam," said the man in the street car, "I know I ought to get up and give you my seat, but unfortunately I've joined the Sit Still Club."

"That's all right sir," replied the woman. "And you must excuse me for staring at you so hard; I am a member of the Stand and Stare Club."

She proved herself so active and conscientious a member that the man began to feel uncomfortable under her gaze. Finally he rose and said: "Take my seat, madam; I guess I'll resign from my club and join yours."—Boston Transcript.

AT PUBLIC EXPENSE.

Visitor (sampling stout with evident appreciation)—Really, this is splendid stuff. They say that it is both meat and drink.

Workman (interrupting)—Shure, it's roight ye are, sor; an' if ye take plenty av it it'll foind ye lodgings."—Strauss Program Magazine.

In a country store a young boy was under discussion by the cracker-barrel committee. Jones had just remarked, "That boy's a regular fool. He don't know nothing; he don't know enough to come in when it rains." Then he discovered the boy's father, who had overheard the remark, and, wishing to appease him, he said: "Well, Sam, 'tain't all your fault. You learned him all you knew."—Exchange.

HE UNDERSTOOD.

A teacher was trying to find from a tiny child the name of his father. He seemed quite unable to think of it, so, to help him, she asked:

"What do you call him?"

"I call him father," was the reply.

"Well, what does your mother call him?"

The response was eloquent of the manners of the neighborhood. "She doesn't call him anything—she likes him."—Ex.

SOME HINT.

"Hello, Blank! Where are you going in such a hurry?"

"To the postoffice to put up a kick about the wretched delivery service."

"What's the trouble?"

"Why, that check you promised to send me ten days ago hasn't reached me yet."

"I've seen better days, mum," said the tramp at the door. "I once did business in Wall street."

"You surprise me," said the sympathetic housewife. "Did you deal in stocks and bonds?"

"No, mum. Pencils wuz me line."—Birmingham Age-Herald.

Small Boy—"Good fishin'? Yessir; ye go down that private road till ye come to th' sign 'Trespassers Will Be Prosecuted,' cross the field with th' bull in it an' you'll see a sign 'No Fishing Allowed'—that's it."—Life.

Poetical Selections.

CLING TO THOSE WHO CLING TO YOU.

There are many friends of summer,

Who are kind when flowers bloom;

But when winter chills the blossoms,

They depart with the perfume.

On the broad highway of action,

Friends of worth are far and few;

So when one has proved his friendship,

Cling to him who clings to you.

Do not harshly judge your neighbor,

Do not deem his lift untrue

If he makes no great pretensions—

Deeds are great, though words are few.

Those who stand amid the tempest,

Firm as when the skies are blue,

Will be friends while life endureth—

Cling to those who cling to you.

When you see a worthy brother

Buffeting the stormy main,

Send a helping hand fraternal

Till he reach the shore again.

Don't desert the old and tried friend

When misfortunes come anew,

For then he needs friendship's comforts—

Cling to those who cling to you.

—Harold C. Keyes.

HEART STRINGS.

The strings of my heart are slender,

But so many they form a strand,

And the ties they bind, though tender

Are as strong as an iron band.

Loyal the ties of Friendship,

Precious the faith and trust,

That a friend who will help us in trouble

From a sympathy—not that he must.

Sweet are the ties of Duty

When conscience they obey;

To others bearing blessings—

"Well done" their reward away.

Vibrant the ties of Love are

To the music of Love's command,

Though sacrifice be their portion

Hearts are happy that understand.

The strings of the heart are slender,

But so many they form a strand,

And the ties they bind though tender

Are strong as an iron band.

—Amelia Day Campbell, in the Union Leader.

THE FARMER.

My hands are gnarled and horny,
 My face is seamed with sun,
 My path is sometimes thorny,
 My living grimly won
 By labor unremitting
 And hard and bitter toll;
 Forever I am pitting
 My strength against the soil.

The city's lights and glamor
 Are not for me to know,
 But neither is its clamor,
 Its squalor and its woe,
 Not mine its pleasure places,
 But mine the good brown lome
 The air, the open spaces,
 The quiet peace of Home!

And, though by all my labor,
 I win no mighty prize,
 I still can face my neighbor
 And look him in the eyes;
 I am no speculator
 Within the wheat-pit hurled;
 I am the wealth-creator
 Who helps to feed the world.

One with the Empire-makers
 Who bring a better day,
 I till my thrifty acres
 And bow to no man's sway;
 My gold might heap up faster
 Were I to crook the knee,
 But no man is my master
 And I am strong—and free!
 —Selected.

WILL THE LIGHT BE WHITE?

"Oft, when I feel my engine swerve,
 As o'er strange rails we fare,
 I strain my eyes around the curve
 For what awaits us there.
 When swift and free she carries me,
 Through yards unknown at night,
 I look along the line to see
 That all the lamps are white.

"The blue light marks the cripple car,
 The green light signals slow;
 The red light is a danger light,
 The white light, 'let her go.'
 Again the open fields we roam,
 And when the night is fair,
 I look up in the starry dome
 And wonder what is there.

"For who can speak of those who dwell
 Behind the curving sky?
 No man has ever lived to tell
 Just what it means to die.
 Swift toward life's terminal I tread,
 The run seems short tonight.
 God only knows what's at the end—
 I hope the lamps are white!"
 —Cy Warman.

DISARMAMENT.

"Put up thy sword!" The voice of Christ
 once more
 Speaks in the pauses of the cannon's roar.
 Oh, men and brothers! Let that voice be
 heard.

War fails; try peace; put up the useless
 sword!

Fear not the end. There is a story told
 In eastern tents, when autumns night grow
 And round the fire the Mongol shepherds sit
 With grave responses listening unto it.
 Once, on the errands of his mercy bent,
 Buddha, the holy and benvolent
 Met a fell monster, huge and fierce of look,
 Whose awful voice the hills and forests
 shook.

"Oh, son of peace!" the giant cried,

"Thy fate
 Is sealed at last, and love shall yield to
 hate."

The unarmed Buddha looking, with no trace
 Of fear or anger, in the monster's face
 In pity said, "Poor fiend, even thee I love."
 Lo, as he spake the sky tall terror sank
 To hand breadth size; the huge abhorrence
 shrank

Into the form and fashion of a dove,
 And where the thunder of its rage was
 heard

Circling above him sweetly sang the bird,
 "Hate hath no harm for love," so rang the
 song.

"And peace unweaponed conquers every
 wrong."
 —Whittier.

THE STAY-AT-HOME.

Who shirks his duty year by year,
 And thinks he's paying rather dear,
 And at fraternity sneer?
 The Stay-at-Home.

Who first is sure his teeth to gnash,
 And swear the lodge has gone to smash,
 When called upon to pay his cash?
 The Stay-at-Home.

Who wiggles like an angle worm
 If asked to serve a single term,
 And pleads his health is now infirm?
 The Stay-at-Home.

Who chews the rag with great delight,
 And says some folks ain't doing right,
 And remains away each meeting night?
 The Stay-at-Home.

THE CHEERFUL SPIRIT.

If you will sing a song as you go along,
 In the face of a real or fancied wrong,
 In spite of the doubt, if you'll fight it out,
 And show a heart that is brave and stout;
 If you'll laugh at the jeers and refuse the
 tears,

You'll force the ever-reluctant cheers
 That the world denies when a coward cries,
 To give to the man who bravely tries,
 And you'll win success with a little song
 If you'll sing the song as you go along.

—B. McCain Fields.

HIS DAUGHTER'S VOICE.

Patrick sat in the kitchen watching his wife peel potatoes. Mary Ann, their daughter, was in the front room playing the piano and singing at the top of her voice.

"Patrick," said his wife, "phwat does the singing tacher mane when he says, 'Mary Ann's voice is mellow?'"

"Oh," said Patrick, "that's jest a nice name for rotten. These music fellers they do be so polite."

MATTER OF TASTE.

Herlock Sholmes, the detective, had just made another great deduction.

"Our baby," he remarked, "has a natural taste for music."

"But how do you know that when he isn't two years old yet?" queried Doctor Squatsom.

"He has got nearly all the polish gnawed off the lower half of the piano," explained the peerless sleuth.

In Memoriam

Members.

Ole Isaackson, Reg. No. 34707, age 41, of Lodge No. 165, Duluth, Minn.; born Norway, died Feb. 21, 1915, from blood vessel bursting in head. Married, leaving two children. Member two years and five months.

Ottmar Rebstock, Reg. No. 89087; age 50 years; of Lodge No. 80, Anaconda, Mont.; born in Germany, 1865; died Feb. 17, 1915; killed by car at shop; single. Member three years the 15th of April.

M. Mosley, Reg. No. 47006; charter member of Local No. 196, Helpers' division, Port Arthur, Tex.; initiated 9-17-1905, died Feb. 18, 1915, in Houston, Tex., of pneumonia; age 30 years; buried Port Arthur, Tex.

E. A. Merton, Reg. No. 102000; initiated 8-11-14, Lodge No. 305, Port Arthur, Tex.; died March 3, 1915, of pneumonia at Port Arthur, Tex.; buried in Port Arthur. Age 47.

MALLEY.

E. K. Malley, Reg. No. 73974, of Lodge No. 30, Roanoke, Va., was born in Richmond, Va.; died December 11, 1914; married; member four years and six months. Age 34 years.

Lodge Notices

E. L. Chafin—Lodge No. 587.

We have suspended Brother E. L. Chafin for not paying dues or honest debts. I, myself, loaned this brother some money to bury his little child, and he will not pay it back. He also owes several bills that he won't pay.

C. C. MADDY, C. S. L. 587.

J. E. Welch—Lodge No. 568.

Any secretary taking up the card of Brother J. E. Welch, Reg. No. 42294, will confer a great favor by notifying the undersigned. Or if Brother Welch reads this it will be to his interest to write to the secretary of Lodge No. 568.

A. W. RICKETT.

W. M. Horstmeyer—Lodge No. 381.

Any secretary taking up the card of

Relatives.

Mrs. Lena Martin, mother of Brother John Martin of Lodge No. 227, Chicago, Ill., died at her home, Lemont, Ill., Feb. 17, 1915; age 62 years.

Mrs. Wm. Powers age 37, wife of Brother Wm. Powers of Lodge No. 206; born New Orleans; died Feb. 15, 1915.

Patrick Shea, 80 years, father of Joseph T. Shea of Lodge No. 442; born County Kerry, Ireland; died Feb. 18, 1915.

Master Ethan Allen Johnson, age 3; son of Brother and Mrs. E. A. Johnson of Lodge No. 200, died February 17, 1915.

Alex Kruinski, age 42, brother of Philip Kruinski of Lodge No. 227, born in Germany, Feb. 24, 1873, died Feb. 26, 1915; dropsy.

Daniel Joseph Collins, member Lodge No. 515, Everett, Mass., age 56, born in Ireland, died February 20, 1915. He leaves a wife and five children. Cause of death, from accident to head about five years ago.

Brother W. M. Horstmeyer, Reg. No. 9735, please hold same and correspond with Joe Wilson, secretary Lodge No. 381, Amarillo, Tex., as this brother borrowed some money from this lodge which he has forgot to return.
JOE WILSON, L. 381.

LIST OF MEMBERS PREVIOUSLY ADVERTISED

L. D. Landuall, Reg. No. 87263, left Teague, Tex., owing a grocery bill of thirty-nine dollars and ninety-five cents (\$39.95). He is wanted by Mrs. John Cure, Teague, Tex., who stood good for the amount.

T. D. Swain, Reg. No. 38826, by Lodge No. 567, for non-payment of a note of seventy-five dollars (\$75.00).

R. L. WHITE,
Cor. Secretary Lodge No. 567.

H. E. or Earnest Robertson is wanted by Lodge No. 173, for failing to make good some money he borrowed.

J. P. TAYLOR, Lodge No. 173.

Stewart et al—Lodge No. 66.

Any secretary taking up the card of Edgar Stewart, Reg. No. 21232, or Noble C. Townsen, Reg. No. 62088, will please correspond with the secretary of No. 66, Little Rock, Ark., as these brothers misrepresented facts and secured transportation out of Little Rock and Lodge No. 66 had to pay for same.

E. WORTHSMITH,
Corresponding Secretary No. 66.

Trials, Fines, Etc.

Diedrich—Lodge No. 305.

This is to certify that Walter G. Diedrich, Reg. No. 103300, was tried by Lodge No. 305, and found guilty of violating the laws of our Brotherhood by returning to work on the Reeves Bros. contract job after strike had been declared, and was fined \$1,000 and suspended for 99 years. He is not entitled to recognition in any way from the officers or members of this Brotherhood until such judgments are satisfied.

C. L. BRAGG, Pres.
T. O. RILEY, Sec'y.

Boiler Makers' Tools

We make a specialty of boiler tools and have a complete line of the following:

- Roller Flue Expanders
- Sectional Flue Expanders
- Pneumatic Flue Expanders
- Arch Flue Expanders
- Tube Cutting Machines for Locomotive Tubes
- Safety Sectional Expanders with Quick-Acting Knockout
- Beading Tools
- Superheater Flue Expanders

If you want special tools, submit blue-print or templates and we will furnish estimates.

By Insisting Upon Purchasing Union Stamp Shoes

You help better shoemaking conditions.
 You get better shoes for the money.
 You help your own labor position.
 You abolish child labor.

Do not be misled by retailers who say: "This shoe does not bear the union stamp, but is made under union conditions." This is false—no shoe is union made unless it bears the union stamp.

Boot and Shoe Workers' Union

246 SUMMER STREET, BOSTON, MASS.

Factories:- Detroit, Pt. Huron, Mich., St. Louis, Mo., Sarnia, Ont.

SECURITY SECTIONAL ARCH

This arch is of light weight
It is built up of small sections
So made as to cool off quickly
It is easily removed for work
Made so to help the boilermaker

AMERICAN ARCH COMPANY

30 CHURCH STREET, NEW YORK

McCORMICK BUILDING, CHICAGO

Since the first railroads

Stifel's Indigo Cloth

Standard for over seventy-five years

has been the "old reliable" Over-all---Uniform---Shirt--- Jumper--- cloth for the "men of the road."

To three generations of railroaders it has demonstrated that *it's the cloth in the garments that gives the wear.* Stifel's Indigo wears like leather and looks good as long as it lasts.

Be sure you see this mark on the back of the cloth, inside the garments before you buy. It's your guarantee of the genuine Stifel Indigo.

No. 5.

AUSTRALASIAN LABOR REGULATING SCHEMES.

By Samuel Gompers, in the Federationist.

Historical Summary.

Serious efforts to colonize Australia began with the independence of the English colonies in America. England had need of outside lands for her superfluous people. "Superfluous" covered many classes. During the British civil wars it meant political prisoners and those who might stir up political opposition. At other times it meant criminals and those confined in jails. Then the poor and the paupers were the "superfluous." Transportation was the early method of dealing with these problems. Transportation in turn supplied colonists and labor for new territorial possessions.

English law of the eighteenth century provided numerous and lengthy jail sentences, consequently the jails were overcrowded. The beginnings of English Australia were an experiment with a convict settlement. The first boatloads landed in the swamps of Botany Bay. The convicts did not prove the best material for colonists. They knew little about farming and were determined to do as little work as possible.

The early colonial policy of New South Wales, which then comprised the eastern half of the continent, was dominated by convictism. The colonists were divided into two classes—criminals and warders. The distance of Australia from England was at that time a practically insurmountable barrier to attracting desirable colonists. But the theorists, the speculators and the unfortunate were free to do what they would with the land.

The warders, who were army officers together with the New South Wales Corps, maintained autocratic rule in Australia. There were two divisions of the period when convictism was the dominating policy—during the first division governmental attention was concentrated on the convicts and discipline during the second, upon ex-convicts (emancipists) and reformation. A rebellion forced the change to the second policy.

During these years, when the transportation of convicts was a governmental policy, there was an accompanying practice called assignment. Convicts were assigned to work on privately owned land, owners of which undertook to maintain the men.

Later it became the custom to assign men to any one who would agree to maintain them. Practically the whole laboring class were "assigned servants." The assignment practice was stimulated by the land grant system—one of the conditions of giving grants to free settlers in proportion to the number of assigned servants for whom they would become responsible.

Sometimes the men to whom convicts were assigned were ex-convicts hardened by the convict system. As a result of gross brutality many assigned men fled to the bush and became outlaw bushrangers. The influence of this convict slavery upon the colonists, who were the employers, can be readily imagined. The population of New South Wales in 1832 is suggestive; 32,000 freemen, 17,000 ex-convicts, and 28,000 convicts under sentence.

In 1840 the assignment system was replaced by assisted immigration. An Order-in-Council made Tasmania and Norfolk Island the only convict settlements in Australia. In 1852 the transportation of convicts was abolished except in West Australia. The constitution of 1842 established the foundations for self-government.

Meanwhile discontent, necessity for finding fertile fields, the grazing industry, the discovery of gold and other motives and causes had led to considerable exploration and the founding of colonies along the coast. These afterward developed into what are known as the states of Victoria, Queensland, South Australia, West Australia and Tasmania. The problems and conditions in all were practically identical.

The land laws of New South Wales provided the following regulations: At first, blocks were allotted for small quit-rents; later, to free settlers in sizes proportional to capital expended on the land and the number of assigned servants; land could be bought for a small price. In 1831 a new policy was inaugurated as a result of Edward G. Wakefield's propaganda against cheap land. There were to be no more land grants, but land was to be sold at public auction.

This Wakefield represents a class of colonists to whom Australia was a field for opportunity. He was a Whig philosopher whose theories were unhampered by practical experience. A pamphlet expounding his system of colonization was published in

1829. Wakefield thus analyzed the defects of New South Wales: It was no place for gentlemen, because the refinements of life did not exist there and because there was no leisure class. Wakefield's suggestions are thus described by an historian:

"A leisured class must have servants to do the work, and of free servants (for convicts were to be shunned) there were none. A laborer might work for you during the first year or two after his arrival from England, but he would be sure to save money out of his wages and buy land with it—for land was much too easily got in New South Wales—and then the refined master would find himself without a servant and must spend his leisure in working for his own living. These conditions produced a new kind of society, and not a good kind. A really valuable colony would be one in which the state of society in England was faithfully reproduced.

"How was this to be done? The letter had its remedy cut and dried. All the enumerated evils arose from the cheapness of the land—make land dear. Then the laborer could not afford to buy it and set up for himself; wherefore he would remain a laborer, happy and contented, earning his master's living as well as his own, and the master would have time to read and converse on intellectual matters with his equally leisured neighbors. Therefore, sell land at a high price, use the money thus obtained in bringing out emigrant laborers and take care only to bring just as many as would actually be wanted to cultivate the land sold. So everybody would be happy—the rich would hold all the land and the poor would never lack employment. The whole arrangement went like clock-work—in theory."

Wakefield's proposals had influence in Australia in abolishing land grants and in establishing Anglo-Saxon standards and a tradition of idealism in governmental affairs.

After several intercolonial conferences the Australian colonies agreed to an act establishing a federal government, and the Australian Commonwealth became a national state January 1, 1901.

Edward G. Wakefield had not exhausted his energy in Australia. In 1837 he was instrumental in the founding of the New Zealand Company to colonize New Zealand. The company encountered trouble in making the natives understand the English system of land ownership. Its intricacies did not appeal to their primitive sense of justice and they demonstrated the justice of their fame as fighters. In the end the natives learned to tolerate the system. New Zealand is a much more fertile, attractive land than Australia, with a more invigorating climate. In this more congenial region Wakefield's theories developed more satisfactory results.

Forces That Resulted in State Regulation of Industrial Relations.

In connection with convictism it must be remembered that prisoners of England were at that time political as well as criminal

and that the law of England provided imprisonment as the penalty for the unfortunate as well as the vicious. These convicts transported to Australia represented all kinds of people. Among those transported were the laborers of Dorchester who united to raise wages and were sentenced to imprisonment under the conspiracy laws.

All convicts were under the direct control of the government, which combined the functions of a warden, a labor employment bureau and an Italian padrone. The comparatively free settlers needed laborers; they looked to the government to supply that need and to maintain some sort of supervision over the workers. They were accustomed to regard the government as an employer if not an owner of laborers. The government with so many convicts at its disposal undertook extensive public improvements and public works and so established the traditions and customs of government employment and operation, and governmental regulation of relations of employers and employes.

The homogeneous nature of the colonial population was conducive to strengthening this characteristic. The colonists were almost wholly from Great Britain. Assisted immigration resulted in the selection of immigrants of a most desirable nature. As a result there was similarity in traditions, customs, ideals—characteristics that make for solidarity of the group and increase tendencies toward community or collective action.

Then, too, the idealism of Wakefield had left its impress upon community thought, it gave them a utopian vision, a sort of paternalistic ideal of what government may do for the people through regulation.

These are the conditions and tendencies that naturally resulted in the socialistic legislation of Australasia. The effects of this legislation can best be seen in concrete illustrations.

Economic organization of workers in Australasia was comparatively late because the services of skilled workers were so much in demand that the workers received good wages. Following upon the reaction of the rush to the gold fields the number of people seeking work greatly increased. Organization became necessary for self-protection and the labor movement began. After the fifties the movement steadily grew.

The official Bulletin published by the Australian Commonwealth classifies the labor organizations under four classes: (1) independent local unions; (2) those with a state organization; (3) organizations whose jurisdiction extends over two or more states; (4) Australasian or international organizations which include workers in merchant service or nomadic trades.

The census for 1912 gives the following figures: Total number of members of trade unions in the Commonwealth, 433,224; total number of employes over 20 years old in all professions, trades, and occupations, 944,559.

There is no federation of all the labor or-

ganizations of Australia, although efforts have been made in that direction. In 1879 when a world exposition was held at Sydney an intercolonial labor congress was held also. Other congresses were held afterwards at various intervals of three, four and five years, but no permanent organization was established. These congresses considered only matters of intercolonial or interstate nature. Each was called through the initiative of some trade especially interested. Some of the allied trades have organized trades councils—such as the building trades, the iron trades, the food producing and food distributing trades.

Method of Political Regulation.

In the Australasian states minimum wages have been established by means of governmental agencies in two ways; wages boards established for the purpose of fixing wages and industrial arbitration courts to prevent strikes. The first of these laws was the compulsory arbitration law of New Zealand following the seamen's strike. Arbitration courts have found that they must exercise the power to regulate wages as an incidental power necessary to the effort to maintain industrial peace.

The minimum wage is fixed by wages boards, government agents who have the right to compel employers to pay at least the wage fixed. Where the minimum wage is a by-product of industrial arbitration courts, workers have been fined and imprisoned for not conforming to the decrees of the judges of these courts.

Courts of Industrial Arbitration have been established by West Australia, New Zealand, and the Commonwealth for industrial disputes that affect more than one state. Victoria and Tasmania have wages boards and no state arbitration courts. New South Wales, South Australia and Queensland have industrial courts to which decisions of wages boards may be referred.

South Australia in 1900 amended its factories act to provide for the establishment of wages boards. Court decisions practically invalidated the legislation. Further legislation was enacted in 1906. Again the courts interfered with the result that the wages board system did not really become operative until 1908 when the law was revised and made to forbid strikes and lockouts. In 1912 a compulsory arbitration law was adopted which subordinated wages boards to an arbitration court and established the judicial system of wage regulation.

Queensland adopted the wages board system in 1908. Following the general strike which originated among the tram workers and tied up all industries in Brisbane, the compulsory arbitration system was adopted in 1912, accompanied of course by judicial regulation of wages.

New South Wales established an industrial arbitration system in 1901, which in 1908 was grafted upon a wages board system, so that the government undertook to regulate wages, hours and apprentices and to prohibit strikes and lockouts. The method of the New South Wales system is highly

judicial in character. It proceeds by taking testimony as the basis for reaching a judicial determination. Its wages boards have all the symptoms of courts. The arbitration act of 1912 did not modify the essentials of the system.

Tasmania enacted a wages boards act in 1910. It forbids strikes and lockouts in matters concerned with decisions of the state boards.

Victoria established the wages boards system in 1896 and has since extended the system and increased the powers of the various boards. The characteristic of the Victorian system is conciliation.

Even from this brief summary of legislation regulating wages this tendency is manifest. Wherever any degree of power to regulate wages is granted to state authority that authority with increased powers of enforcement is gradually extended.

Regulation in New South Wales.

New South Wales is the chief industrial state of Australia and contains the largest city. The workings of their system of governmental regulation of wages is very interesting in view of the fact that similar legislation is urged for American industrial centers.

The law regulating industrial relations now operative in New South Wales became law April 15, 1912. The title of the law indicates how complete is the control which the government exercises: "An act to provide for the regulation of the conditions of industries in certain particulars by means of industrial conciliation and arbitration, and for the repression of lockouts and strikes; to establish and define the powers, jurisdiction, and procedure of an industrial court and certain subsidiary tribunals; to preserve certain awards and industrial agreements."

The agencies and methods of exercising this control are of a judicial nature. This judicial characteristic is manifest in the fact that New South Wales has a Labor Attorney-General and in the details of the law and its operation given below.

The industrial arbitration legislation of New South Wales is intended to regulate employers as well as employes. It prescribes for them the minimum wages that can be paid, limits the hours of work and the proportion of apprentices. The state undertakes to police and enforce all awards through a professional prosecuting officer and a staff of industrial inspectors. Breaches of awards and industrial agreements are prosecuted in the arbitration and inferior courts of the state.

The whole system is under the supreme direction of the Court of Industrial Arbitration, which office is occupied by Judge Heydon.

The law of 1912 was intended to make various changes in the act of 1908. One purpose was to reduce the number of wages boards dealing with local wages and industrial conditions. In order to accomplish this the craft instead of the industry was made the basis for organization. The intention is to bring together allied industries under

one chairman so that there shall be twenty-eight subsidiary courts of arbitration.

The "advanced" step which New South Wales desires to establish is the "principle of craft unionism which involves the claim that all craftsmen such as carpenters, engine drivers, painters, engineers, and so on, shall belong to the same union."

To take advantage of the 1912 Industrial Arbitration Act employers and employes must register. The registrar, a state official appointed under the act, has considerable discretionary power. He may register as an industrial union of employers any person or association of persons, or any incorporated company or association of incorporated companies, who or which has in the aggregate throughout the six months next preceding the date of the application for registration employed on the average, taken per month, not less than fifty employes. Any trade union may register as an industrial union of employes. However, any such application may be refused by the registrar if he is of opinion that the organization applying is not a bona fide trade union, or if registered under the act would not be a bona fide industrial union, or if it appears that another trade union to which the members of the applicants' union might conveniently belong has already been registered as an industrial union.

Applications must be made in writing, approved by the majority of the governing bodies in case of employers and by the majority of the committees of management for trade unions.

The judge of the Arbitration Court has absolute control over registration by his power of cancellation. "For any reason which may appear to it good" the court may cancel the registration of any union. The court may also cancel registration upon the request of an industrial union. Cancellation however, affords no relief from existing awards and industrial agreements, except when the union or its members have aided or instituted a strike or lockout and then upon consent of all parties concerned.

Industrial agreements may be made between employers and employes, and if not for a longer term than five years may be filed with the registrar by either party. When filed these agreements become enforceable just as awards made through agencies of the arbitration act.

Control over industrial regulation is centralized in the Court of Industrial Arbitration, which is a superior court, a court of record and seal. The court consists of one judge, Judge Heydon. In case of a vacancy the Governor may appoint a Supreme Court judge, a District Court judge, or a barrister of five years' standing. An additional or a deputy judge may be appointed when necessary who must have these same qualifications.

Under the industrial court are the wages boards. At the recommendation of the court, boards shall be constituted for the industry or calling. The ideal is to group trades or industries under twenty-eight

heads, but numerous demarcation (jurisdictional) disputes have resulted in many more boards. This is another proof that industrial relations can not be arranged according to any theoretical plan—they have grown in certain shapes and forms and like all live organisms resent amputation and pruning.

The court recommends the chairman and the other members of all boards who are appointed by the Minister. Each board consists of a chairman who presides and two or four other members, half of whom represent employers and half employes. When the employers or employes are largely women or girls, and there is in the opinion of the court no one of them suitable to act upon the board, an outsider may be appointed. Since the court is to be the judge as to the qualifications of a woman or girl to defend the rights and interests of her associate workers, may not intensity and persistency in a woman or a girl be regarded and held as disqualifying characteristics?

The boards model themselves after the parent body and are petty courts. They usually meet in police courts, a custom which adds judicial atmosphere. Members are appointed for three years but may be removed by the Minister. They take an oath not to reveal evidence of a confidential nature before the board. The sessions of the board may be public or secret at its discretion. The board members receive fees. Charges have been made that the fees are sufficient to lead to dilatory methods. It is the custom to appoint lawyers as chairmen of the boards. Often these are young lawyers of the "briefless" type and sometimes they are men of established reputations. Employers have made objection to trade union officials acting upon boards. This objection has occasionally resulted in officials resigning office and working at their trades while serving upon the board. Employers even in Utopian Australia do not wish employes to have the advantage of the bargaining skill of trained men.

The boards examine witnesses and take evidence preparatory to reaching their judicial determinations. Their authority in making recommendations extends to the following:

(a) Fixing the lowest prices for work done by employes, and the lowest rate of wages payable to employes, other than aged, infirm, or slow workers.

(b) Fixing the number of hours and the times to be worked in order to entitle employes to the wages so fixed.

(c) Fixing the lowest rates for overtime and holidays and other special work, including allowances as compensation for overtime, holidays and other special work.

(d) Fixing the number of proportionate number of apprentices and improvers and the lowest prices and rates payable to them.

(e) Determining any industrial matter.

(f) Rescinding or varying any award made in respect of any of the industries or callings for which it has been constituted.

(g) Declaring that preference of employ-

ment shall be given to members of any industrial union of employes over other persons offering their labor at the same time, other things being equal: Provided that where any declaration giving such preference of employment has been made in favor of an industrial union of employes such declaration shall be cancelled by the Court of Arbitration if at any time such union or any substantial number of its members takes part in a strike or instigates or aids any other persons in a strike; such court may suspend such declaration for such period as to it may seem just.

An award is signed by the chairman and sent to the registrar, who publishes it in the New South Wales Industrial Gazette and notifies the parties concerned. Parties to the agreement, or any person, with the consent of the court, may apply for variations or amendments to the award.

New South Wales has suffered so much because of industrial dislocations (strikes or lockouts) in the mining district that the act of 1912 provided a special arrangement for such difficulties. These conciliation committees are not hampered by the judicial methods of the boards but endeavor to institute real conferences between the parties concerned in the industrial disagreement.

Since strikes and lockouts (dislocations) are forbidden by law, such illegal acts may be severely punished.

The court may fine industrial unions which instigate, take part in or aid strikes or lockouts a sum not to exceed one thousand pounds (\$5,000).

Any individual who participates in a strike may be made to pay a fine not more than fifty pounds.

Wages may be attached to pay such fines.

If the person is a member of a trade or industrial union the union may be fined in addition.

If any union of employes instigates or aids in an act for which any person can be fined the union may be ordered to pay a fine not to exceed one thousand pounds and its registration may be suspended or cancelled at the discretion of the court.

Uses of the injunction are legalized that out-Dayton our own Judge Dayton.

The courts may grant a writ of injunction to restrain any person from continuing to instigate or to aid in a strike or lockout. Such a writ may upon application be granted *ex parte* or on notice.

The dignity and majesty of the court are upheld by declaring violation of injunctive orders a misdemeanor punishable by imprisonment for not more than six months.

The conception that the labor power of human beings is a commodity or property is embedded in Australian law and is generally acquiesced in by the Australian laborers.

When an employer fails to pay the wages fixed by an award or industrial agreement the employe may apply to the registrar or an industrial magistrate for an order for payment, or may enter suit in any district court. Breach of award or industrial agree-

ment may be punished by a fine not in excess of fifty pounds. In case of wilful act to defraud an injunction may be granted to prevent further breaches.

Since organization is a part of the machinery of industrial regulation employers may not dismiss employes because of membership or activity in a trade union. Any employer who dismisses employes for such cause may be fined not more than twenty pounds for each worker dismissed. The burden of proof rests upon the employes to show that the dismissal was not for some other cause. However, no prosecution for an offense of this nature shall be commenced except by leave of the court.

Results of Industrial Arbitration.

Now as to the way this system of state regulation of industrial relations works out. That is best demonstrated by Australian comments. We will relate incidents published in Australian papers.

The Daily Telegraph made the statement that there had been an unusual number of strikes and lockouts in Australia during the past year, which was almost exactly in proportion to the strength of unionism in the various states, and concluded that unionism means strikes.

The Australian Worker, the official organ of the Australian Workers' Union, published in Sydney, made the following reply, which shows that the workers' idea of what constitutes the real protection of the workers does not differ fundamentally from that of trade unionists of the United States:

"Unionism does not necessarily mean strikes, but it does mean the bettering of wages and conditions of labor, because through unionism labor has the power to strike."

When the European war began, Judge Heydon refused to consider further applications for increases in wages and declared that the Australian workers must share the misfortunes of war with the other patriots. This important decision marked the collapse of the system regulating wages, perhaps temporarily but yet effectually. Judge Heydon found it necessary to modify his decision to apply only to government employes. This is the comment of the Australian Worker of January 14:

"The vetoing, ostensibly on account of the war, of any further applications by unions for increases in wages may say a good deal for the personal opinions of Mr. Justice Heydon, President of the N. S. W. Arbitration Court, but it doesn't say much for his logic.

"On every hand the prices of commodities are going up. Meat is 50 per cent dearer than it was a few months ago; bread is dearer, and house rents have not decreased, despite the fact that they were forced up in times of unparalleled prosperity.

"In fact, it is safe to say that living is at least 20 per cent more expensive in New South Wales than just before the outbreak of war.

"Now note the illogicalness of the position.

"If the Big Business man desires—and he seems to be always desiring—to increase the price of his goods he can, and does, approach the Necessary Commodities Commission. That Commission doesn't tell him that, for the sake of the Empire, all such applications are 'off,' and that the prices obtaining before the war and the imposition of the new tariff duties must continue to prevail.

"Instead it invites him to step inside, considers his application, hears all the evidence—indeed, goes to a lot of trouble to get evidence—and then gives a decision, usually in favor of an increase.

"Why should this illogical distinction be made between the man who has goods to sell and the man who has his labor to sell—especially as it is the latter's labor which produces the former's goods?

"If things are to be left as they were in the one case, why not in the other? What is the operating difference?

"Has labor organized, fought, suffered, and sacrificed to win elections and put its party in power only to give the exploiter all the advantages while it is brusquely requested to stay out on the doorstep?

"One of these days when Mr. Justice Heydon isn't too busy dilating on the political economy which he knows so little about he might answer these questions.

"In the meantime Organized Labor would do well to answer them itself."

The conclusions of these workers who have tried the system of state regulation of hours and wages which many theorists have been trying to fasten upon American workers is most noteworthy. "Organized labor would do well to answer this question itself." Whatever benefits organized labor establishes through its economic power and retains control in its own hands are the things alone upon which it can depend.

Jurisdiction of Industrial Court.

It will be remembered that the authority of the Court of Industrial Arbitration permits it to determine any industrial matter.

That authority was made to include control even over the labor press, as will be seen in the case of the cancellation of the registration of the New South Wales Amalgamated Railway and Tramway Service Association. This organization endeavored to enroll all unionists of every branch of the railroad industry into one union. When the 1912 act became operative the Railroad and Tramway Traffic Association, which was organized on the principle that each group or section of workers could be best protected by separate organizations, tried to secure its representatives upon the wages board, although it was not registered. The Traffic Association charged that the Amalgamated Association had delayed the work of a previous board and had deliberately impeded the last board because of hostility to its chairman. To substantiate the last charge the following was quoted from the official journal of the Amalgamated Association, the Co-operator:

"Just here let me say, in parenthesis, that the meeting of the Railway Traffic Board

has not been pushed on. The executives of the Association have been waiting for the new arbitration act to come into force in the hope that the millstone of Hamiltonism might be got rid of, and a big effort in this direction will be made."

Incensed by this plain statement, which the judge deemed contempt of court, the registration was cancelled. This gave the Traffic Association the opportunity to secure registration and to get its members on the board. The Royal Commission, authorized to report on this and other matters to be specially considered with reference to the legislation of 1912, which was under consideration, makes the following comment, which applies equally to all other workers who have not the right of registration:

"But although the same class of workers was represented on the new board, and although the Amalgamated Association could have submitted claims and have had their witnesses examined, though not by their own counsel, it was no doubt a serious loss to the Amalgamated Association, which so far as the Traffic Wages Staff is concerned far outnumbers its rival—the respective figures being 15,000 and 1,200. If a suitor has a claim to an estate and is entitled to bring that claim before a court in his own way and by counsel who instructs, it is no consolation to him to be told that his interests are being safeguarded by a distant and not too friendly cousin who is making a claim of a similar nature and on similar grounds to his own, which if granted will injure to his benefit."

That commission then makes this significant statement as to the power of the court:

"With regard to the power of cancellation, I suggest that this should be limited to specified cases, and no longer left to give rise to such surprises as that which the union has experienced in the present case. The power of initiation which the court possesses should, as I have already suggested, be left as it is; but it is a provision foreign to ordinary judicial system which casts upon a court so grave a responsibility, and arms it with so crushing a power, as that of expelling competent suitors forever from all rights of audience or remedy, and this for reasons undefined by Parliament and therefore, until a specific incident arises, undefinable by the court."

The New South Wales system of regulating industrial relations with all its authority and power makes provisions for all industrial problems except industrial freedom. The judicial despotism which rules over industry maintains many of the principles and practices which the workers of the United States of America have persistently denounced and opposed. Instead of being a workers' paradise, New South Wales is rather a paradise for lawyers.

There is nothing in the system of governmental regulation of industry as developed in New South Wales that is in conformity with the spirit or the genius of the people of the United States.

THE BOILER MAKERS' JOURNAL

Official Organ of the International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America.

A Monthly Publication Issued the First of Each Month from Room 3, Law Building, Kansas City, Kansas.

JAMES B. CASEY, Editor and Manager.

Subscription Price.....\$1.00 Per Year in Advance

ADVERTISEMENTS.

Advertising Rates Will be Furnished Upon Application to the Editor-Manager. No Reading Space Will be Sold for Advertising Purposes Under Any Circumstances.

All New Members Must Have Their Name and Address Sent in Through the Secretary of Their Lodge. After That They May Have Changes Made in Their Address by Filling Out Blank Form in Back of Book and Forwarding to the Editor.

All Copy Must be Received by the Editor by the 18th of the Month to Insure Publication in the Following Issue.

All Contributions and Correspondence Relating to the Journal Should be Addressed to J. B. Casey, Editor, Room 3, Law Building, Kansas City, Kansas.

Entered at Postoffice, Kansas City, Kansas, as Second Class Mail Matter.

SPREADING FALSE NEWS.

A short time ago many newspapers announced that the strike in the oil fields was settled, possibly the Associated Press spread the news for all we know, at any rate this was an unauthorized statement and bears all of the ear marks of having been faked for the purpose of deceiving our members in particular, and the working people generally, so that large numbers of men might be induced to go there seeking work, thinking everything was settled and becoming stranded, be forced to join the strike breakers' ranks. According to a state law of Oklahoma these unfair firms dare not advertise for men without announcing that a strike is in progress, some did this at first and still have hanging over their heads the possibilities of an indictment.

While a large proportion of our members in the fields, we believe, are working for fair firms, who seem to be getting more and more of the work, still the firms whose names appear in the Journal are still trying to operate on open shop basis and our members should refrain from taking work in the fields until they become conversant with the particulars surrounding same. And by all means pay no attention to rumors or newspaper statements about settlements, when a settlement is reached ample notice will be given.

TIME TO CALL A HALT.

In the past couple of issues there have appeared certain articles which, no matter what the motive of the writers, are tending to arouse dissension and hard feelings in our ranks that bodes no good to our organization and in our opinion it is time to cut out all such articles and stuff of this kind. We have been slow to arrive at this conclusion, we wanted all of our members to feel that the Journal was not only theirs collectively, but that each were privileged to write articles of a helpful and instructive nature and have them published in the Journal, in short to make it a clearing house for the exchange of information and ideas among our members as how best to build up and manage our Brotherhood, we saw signs of an inclination of

some to violate this standard of helpfulness and good will and we appealed to our members in March Journal to refrain from writing articles of a personal or abusive nature, however, some did not give much heed to our appeal; some of the articles appearing in the past two issues not only made many unsubstantiated charges but indulged in personalities, these naturally elicited answers in the same strain. In this issue will be found more articles along the same line only becoming worse as they proceed; we have refrained from turning down any of these communications up to the present time although we are accused of doing so by one of the articles in this issue for no better reason than the correspondence from the other members did not favor their position; there is no foundation for this charge, we are always prompted to act in the way we believe is for the best interest of our organization and its members, regardless of how it effects us and we are going to do so in this case; therefore, becoming convinced that it is for the best interests of our organization that these mud slinging articles be cut out, we are going to assume the responsibility for refusing to publish any more of them from any body from this issue on, unless we are overruled by a higher authority, if any should feel aggrieved, they of course have a right to an appeal from this decision of the editor, however, we feel we are voicing the sentiments and desires of a large majority of the rank and file of our organization.

Our members are still invited to write for the Journal, their articles should be newsy, instructive or in some way helpful, and must be free from criminations, recriminations, personalities or abuse. We trust that all of our members will acquiesce in this decision, that all feeling will be allayed and the Journal resume the high standard it has been trying to follow in the past.

We have no desire or intention of editing a muck raking publication and the Journal will not deserve to bear that title if we can prevent it. We hope the foregoing will meet with the approval of all our members and that all will join with the editor in trying to make the Journal more efficient and valuable to our organization and all its members.

BIG BUSINESS DREADS AND FIGHTS UNIONS.

At the Chicago hearing of the Industrial Commission, several officers of big business were on the witness stand, and practically all of them admitted discriminating against union men and a hostility to organized labor. President Carlton and Vice-President Brooks of the Western Union admitted that commercial telegraphers were underpaid and at the same time also admitted that membership in a labor union was sufficient cause for their company to discharge any of its employes, that they would have nothing to do with the union. Vice-President Reynolds of the Postal Telegraph, shared the Western Union's hostility to organized labor, but admitted his company has organized a fake union among its employes which is absolutely controlled by the company. These two companies organized and entrenched in every possible way, deny to their employes the right to organ-

ize for their protection. This seems to be a characteristic attitude of the representatives of big business, they want nothing to stand in the way of their absolute power over the lives and fortunes of those in their employ, this intolerant attitude only hastens government ownership of these two companies, a thing that should have taken place long ago. We are the only great nation of the world that does not own and control all telegraph and telephone lines, the present war in Europe has greatly emphasized the importance and necessity of government ownership, and this is liable to be a live issue at an early date, however, it is not likely that the government will purchase them until the hundreds of millions of water is squeezed out of the stocks and bonds.

General Superintendent Bell of the Illinois Central Railroad, while on the stand gave it as the reason that his company refused to recognize the federation of shop employes and which resulted in a strike, that a "federation would be too hard for the company to handle." President Markham of the same road presented a voluminous statement in which he said if the System Federation was "allowed to grow it would threaten the life of every industry in the nation," these statements cannot be reconciled with the experience of other roads with the same kind of an organization, the roads in the southeastern states have agreements with the federation of shop trades, the management and the men live in harmony with each other and there has not been a strike there since these federations were formed. This shows pretty conclusively that the I. C. officials' fears were groundless and had they been better advised, this strike would not have taken place. Of course, these officials have got to have some excuse to try to justify their actions, and one thing is as good as another we suppose.

RAILROAD HIGH FINANCE.

A recent press dispatch informed us that the appellate division of the supreme court of New York had declared that bonds to the amount of \$5,133,000 issued in the name of the Wabash Railroad in 1913 was illegal and the board of directors headed by George Gould was held personally responsible and they would have to return the above amount together with interest since October 15, 1915. This gives a glimpse of railroad high financing and the facility and practice of railroads in issuing these bonds.

The issue of which the above mentioned sum was a part amounted to \$30,000,000. Certain stockholders entered suit against the directors claiming unlawful issue of stock and the lower court upheld this contention, however, an appeal was take by the directors and the appellate court passed all but the above mentioned \$5,133,000.

Most of the railroad systems of the country are today suffering from the effects of past reckless issues of stocks and bonds and they are called upon to pay interest and dividends on fabulous sums that represent nothing but water.

AMERICAN STANDARD OF WAGES TOO LOW SAYS A PROFESSOR.

Professor Scott Nearing of the University of Pennsylvania, writing in "The Survey" states that from two-thirds to three-fourths of the male wage earners in the northern and eastern parts of the United States, employed in the leading American industries, are not paid enough wages to keep a family of five in decency, and permit saving to avoid dependency in old age.

He asserts that the working man "should compare his methods of accounting with that of a modern business," he argues that the worker in the industrial field, represents an investment, a part of which is his bring up and education, and that when the industrial manager makes an investment in the shape of a new machine, he estimates the life of the machine and sets aside a certain portion of this amount each year, and charges it to depreciation so that at the end of the period he may replace the worn out machine by a new one. He argues that the workers should charge depreciation against their services, so that besides maintaining themselves and family during the period of their productive usefulness, they should have enough to provide against want in old age.

He claims to have investigated and found that in the northeastern states, from two-thirds to three-fourths of the males employed in the leading industries do not receive a sufficient wage to provide a decent living for a family of five, much less to provide for old age. He argues that business men start to making income after they have met running expenses and paid fixed charges and that the working man who only makes a bare living for himself and family has no income.

All of this is logical, equitable reasoning and it should be universally put into effect, men do not want charity but even handed justice, they should receive for their services to society, not only a sufficient amount to meet the ordinary living expenses and cost of raising and education of their children, but enough to purchase insurance against accidents and want in old age.

The case of maintaining and raising a family is a fixed charge against the industry, as is also insurance against sickness and industrial accidents and old age pensions.

U. S. TO BUILD ALASKAN ROAD AT ONCE.

A recent press dispatch announced that President Wilson had selected the route for the Alaska Railroad which this government will build and that work would commence at once. Congress left the selection of the route to the president, two or three different routes were considered and the one decided on will start from Seward, situated on Resurrection Bay and will be built to Fairbanks, which is situated on the Tanana River.

The Alaska Northern Railroad already built was purchased at a cost of \$1,150,000 and will be a part of the system. It is estimated that when the whole line is completed it will cost \$26,800,000. The work will begin in charge of a Commission consisting of W. C. Edes, Lieut. Frederick Mears

and Thomas Riggs, Jr. We are told that the Commission will proceed at once to Alaska to take charge. Chairman Edes will make his headquarters at Seward, Lieut. Mears will be stationed at Ship Creek and Riggs in the Broad Pass region, as soon as the route was selected and work ordered started, President Wilson issued the following order: "I charge the commission particularly with the preparation and maintenance of such arrangements as may be required for the health of the men engaged in the work of construction, and I instruct you to prepare and adopt a proper system of compensation for accidents which may occur on the work, in general on the lines of the system, now in force in the construction of the Isthmian Canal, but such system shall be so framed that its benefits shall be applicable not only to those who are directly in the service of the Commission upon salary, but also to those who may, by contract with the commission, be actually engaged in the work of construction in Alaska." Thus the victims of accidents will be given some compensation for same.

While this work will start at once, it seems there is but a limited chance of getting employment as a part of the construction force, and as we have had some inquiries already in reference to this job, we want to warn our members against going to Alaska with the expectations of getting a job, we are told that but few men will be employed by the commission and Secretary Lane of the Interior Department has issued a warning against a stampede there. If any of our members desire to go there they should write to Washington or members of the Commission and make application for employment, if they are engaged all well and good, but it is taking a big risk to go there on your own hook.

OUR LODGES SHOULD AFFILIATE WITH STATE FEDERATIONS.

We would like to impress upon our members everywhere, the importance and necessity of our lodges being affiliated with the State Federation of Labor in the state where they are located. They should not only be affiliated, but should be represented at all their annual conventions by their most experienced and able members, so that legislation and other matters affecting our members or our trades may be properly looked after, this can only be done by having able representatives present and in this way become a factor in the affairs of the general labor movement.

Too often our lodges neglect this duty and are content to remain isolated from the other members of the family of trades unions, and as a consequence when we need aid and assistance, we know not where to get them, as we neglected to cultivate the friendship and co-operation of other trades.

In no line of business is this co-operation of other organizations so essential for success, as in trying to secure the enactment of labor legislation. Those who have had experience in lobbying for labor measures, realize more fully than others the importance of this matter.

We need to have enacted in a large majority of the states, an effective boiler inspection law, and if we are going to make an effort to accomplish

this task, the sooner we start out to do so, the better it will be, for others are trying to get such a law enacted with men of other callings as inspectors and it seems that they have the passive, if not active assistance of certain insurance companies; therefore, if we would have efficient laws enacted and have justice given to our members, we must promptly take hold of this matter in an active and intelligent manner and secure the assistance and co-operation of organized labor, generally if possible. In no better way can we secure this co-operation than by affiliating with the central bodies and state federations.

A NOVEL EXPERIMENT IN MANAGING AN INDUSTRY.

The public press announces that the Dennison Manufacturing Company, a five million dollar corporation of Boston, Mass., would be turned over to a part of the employes to manage and all employes will share in the profits of the concern. The company now employs 2,400 persons; of this number about 200 will join in the management, this embraces all who have been earning \$1,200.00 or more a year.

It seems the plan is to issue management stock, and divide this among these 200 employes, the voting of this stock will control the policy of the concern. We are told all employes will share in the profits, through provision for annual or more frequent returns on their operating capacities," just how this will be determined it does not state. This experiment will be watched with interest, and if it proves successful it will no doubt encourage other concerns to follow suit. There is no reason either why it should not prove successful, for the men selected are no doubt practical experienced men and are practically running the plant at the present time, although without being recognized.

We mentioned the matter of having the men represented on the Boards of Directors of Corporations sometime ago and still believe it would be in the interest of all if one or two old experienced employes were added to the board of directors of each manufacturing industry, it would not only produce a keener interest in the welfare of the concern and establish a greater degree of confidence between employers and employed, but many good, practical, money saving suggestions would be received that would bring in good returns.

INDUSTRIAL UNIONISM, AMALGAMATION, ETC.

For a number of years there has been an agitation by some for industrial unionism, the one big union and consolidation of trade unions, evidently an effort on their part to find some short cut, quick action plan by which organized labor will be made perfect and achieve complete success without further trouble, these are worthy objects of course; but in our haste to reach this goal, we should be careful not to seize hold of something as a weapon, which instead of battering down the opposition will hurl us to destruction. Fable tells us that once upon a time a dog was crossing over a stream of water with a bone in his mouth and looking down saw another bone, in his greediness to possess this too, it let go the bone in his

mouth and made a dive for the other one, only to find it was the shadow of the one it held in its mouth only an instant before and of course the dog lost both bones. We can learn a lesson from this fable, learn that it is not wise to drop the substance in order to seize the shadow; organized labor is but in its infancy here and as we advance from one formative stage to another, and thus pass over the waters of agitation and desire for a change, we should not drop the substance, our present organization—in order to seize the shadow of some chimerical and impractical plan and in doing so not only lose what organizations we have, but set back the cause of labor for years.

It seems to us a great many have a very imperfect conception of the term, "industrial unionism," some seem to think the amalgamation proposition advanced by the machinists and industrial unionism is one and the same, in this they are seriously mistaken. If labor in this country was to be divided into strictly industrial groups, the members of our organization would be divided into several groups and amalgamated with the other workers of these several groups, for instance, those working for railroads would be grouped with all other employes of railroads; those working in locomotive plants would be grouped with all others employed in this industry; those working in ship yards would be consolidated with all other ship yard employes; the contract shop would be grouped with the others employed in the same industry; as would also the tank builders be grouped with all men employed in this industry. It will not take a lengthy argument to convince our members of the disadvantages arising from such a plan; in some cases our members in order to make sure, if possible, of steady work, would have to carry cards of two or three organizations, and a large proportion of our members would be like a shuttle-cock, running back and forth from one organization to another.

While the opinion is entertained by many that this plan would have a centrifugal effect, that is a drawing closer together, it would in fact have a centripetal effect, that is a throwing off, or in other words a regrouping more numerous than we now have in the trade unions, for after each trade, each calling, and those employed in manufacturing, selling and distributing of the various articles of commerce, were divided into these many groups, they would number many more than we have National or International Unions at the present time; all that would be accomplished would be to divide about all mechanical trades and changing the formation of the ranks without increasing the efficiency of organized labor. Some of our members are constantly reciting all the ills that mankind is heir to as evidence of the failure of organized labor, instead of offering encouragement and assistance in helping to fully organize our craft, and in other ways perfect our organization; they are trying to find some new and untried form of organization to substitute in its place; others there are who believe we are making no progress unless we are constantly changing from one thing to another, they too are ever ready to condemn the trade union movement, instead of examining closely our past actions and practices, so that profiting by this experience, we may avoid in the future, the mistakes of the past.

They entirely ignore these, ignore the immutable laws of cause and effect, and are ready to condemn some supposed inherent weakness of craft unionism, instead of examining closely the records of our past policies and practices, in order to find out the errors we have committed and by avoiding them in the future strengthen our organization and make sure its future success.

Too often in the past the radical has dominated the action of some of our locals and forced them into hasty and ill advised strikes without fully endeavoring to peaceably adjust their grievances, calculating the possibilities of success or making preparations for carrying on a contest. The failures produced by such ill advised actions should not be charged to organized labor's inefficiency but to the unwise actions and advice of those precipitating the trouble.

If we are wise we will study the efforts and experience of those who went before us, for experience is the chart of the sea of human efforts and marks the reefs and shoals upon which was wrecked the inexperienced and unwise efforts of those who proceeded us and the lessons derived from this experience, is the compass that points the way to the harbor of success. It seems to us the lessons taught by the past failures of promiscuously formed unions, plainly shows the inherent weakness of the plan; the Knights of Labor went to pieces because of friction, internal dissention and dissatisfaction, which finally brought about dissolution; the A. R. U. seemingly was run on a quick action, hair trigger basis that ran it into a life and death struggle in short order and it did not survive, the shock of the first battle; this is not intended as a criticism of that organization but to show the weakness of the form of organization. The I. W. W. was formed upon even a more quick action basis and it went to pieces with the same speed and without accomplishing any good for the workers.

The underlying policy of promiscuous organizations seems to be to depend upon numbers instead of organization, to overawe by size rather than efficiency of organization; however, in our opinion, this theory is wrong. No doubt many of our readers have seen large mobs of people handled by a few well trained policemen acting in concert with each other; systematic, efficient, organization and intelligent action counts for much more than mere numbers. Another fault is that large membership inspires so much confidence, it breeds contempt for caution or discretion and as a consequence it is easily stampeded, some member pleading the cause of a real or imaginary grievance, may use some little eloquence, the members' feelings are played upon and too often it results in a stampede, hasty action and trouble. While on the other hand if this hasty action is taken by a local in affiliation with a federation of all employes the latter will have to pass upon it and it will likely correct a mistake if it is made, and in this way a large part of the trouble and strife caused by hasty action will be avoided.

Our present organization is a consolidated one, we have boiler makers, ship builders, tank and gas meter builders, and helpers of all those previously mentioned. We are bound together by a similarity of trades, what concerns

one, concerns all; we may, yes, probably will consolidate with other trades in the future, however, in our opinion it will not be with the organizations mentioned by the present consolidation proposition, but with other trades, whose work is similar to our own such as the structural iron workers, and sheet metal workers. The last convention of our organization went on record as favoring this consolidation. The present is not an opportune time for the accomplishment of this task; however, it is quite likely that the future will bring about conditions which will not only make it possible but desirable. These trades are consolidated with the boiler makers and ship builders' organization of Great Britain and Australia and the plan evidently works alright in these countries.

Let us persevere in our efforts to build up our organization, better organize our trades, and meet the other problems that confront us, and these others will be met at a more opportune time.

QUOTATIONS.

It behooves us always to bear in mind, that while actions are always to be judged by the immutable standard of right and wrong, the judgments which we pass upon men must be qualified by consideration of age, country, station, and other accidental circumstances; and it will then be found that he who is most charitable in his judgment is generally the least unjust.—Southey.

There are a multitude of human actions which have so many complicated circumstances, aspects, and situations, with regard to time and place, persons and things, that it is impossible for anyone to pass a right judgment concerning them without entering into most of these circumstances.—Dr. I. Watts.

From the first record of human impatience down to the present time, it has been complained that the march of violence and oppression is rapid, but that the progress of remedial and vindicative justice, even the Divine, has almost always favored the appearance of being languid and sluggish. Something of this is owing to the very nature and constitution of human affairs, because, as justice is a circumspect, cautious, scrutinizing, balancing principle, full of doubt, even of itself, and fearful of doing wrong, even to the greatest wrong doers, in the nature of things its movements must be slow in comparison with the headlong rapidity with which avarice, ambition and revenge pounce down upon the devoted prey of those violent and destructive passions.—Burke.

The great duty of life is not to give pain; and the most acute reasoner cannot find an excuse for one who voluntarily wounds the heart of a fellow creature. Even for their own sakes, people should show kindness and regard to their dependents. They are often better served in trifles, in proportion as

they are rather feared than loved; but how small is this gain compared with the loss sustained in all of the weightier affairs of life! Then the faithful servant shows himself at once a friend, while one who serves from fear shows himself an enemy.—Frederika Bremer.

We found, or thought we found, an inconvenience in having every man the judge of his own cause. Therefore juddges were set up, at first, with discretionary powers. But it was soon found a miserable slavery to have our lives and properties precarious, and hanging upon the arbitrary determination of any one man, or set of men. We fled to laws as a remedy for this evil. By these we persuaded ourselves we might know with some certainty upon what ground we stood. But lo! Differences arose upon the sense of interpretation of these laws. Thus we are brought back to our old incertitude.—Burke.

STRIKES NOW IN FORCE.

- Farrer Traft Contract Shops, Buffalo, N. Y. (Strike on.)
- Illinois Central R. R. (Federated Trades strike on.)
- Harriman Lines. (Federated Trades strike on.)
- Pere Marquette R. R., Grand Rapids and Saginaw, Mich. (System Federation strike.)
- Contract shops, Mobile, Ala. (Metal Trades strike.)
- Atlantic Basin Iron Works (Shields & Moran, New York). (Strike on.)
- Hibbon & Co., contract shop, South Chicago, Ill. (Unfair.)
- Milwaukee Boiler Co., Milwaukee, Wis. (Strike on.)
- Stockton, Calif. (Metal Trades strike.)
- Warren City Boiler & Tank Co., Warren, Ohio. (Strike on.)
- Standard Boiler & Plate Iron Co., Niles, Ohio. (Strike on.)
- Reeves Bros., Alliance, Ohio. (Strike on.)
- Hammond Iron Works, Warren, Pa. (Strike on.)
- The Petroleum Iron Works, Sharon, Pa. (Strike on.)
- The Treadwell Construction Co., Midland, Pa. (Strike on.)
- Riter-Conley Construction Co., Pittsburgh, Pa. (Strike on.)
- Des Moines Bridge & Iron Works, Des Moines, Iowa. (Erecting work at Bremerton, Wash.)

Mechanical Department.

TO DEVELOP THE FRUSTRUM OF A SQUARE PYRAMID.

Figure 1 shows the plain view, a-b-d-c-a shows size and shape of bottom or larger end, and e-f-h-g-e that of top end. Fig. 2 shows the side elevation, i-j-l-k-i shows height and shape of one side.

To lay out template proceed as follows: Strike lines from b to c and a to d, continue the latter on indefinitely; next take the vertical height of pyramid as shown by Fig. 2, transfer this to line a-d Fig 1, from o to p; then take distance from o to f and transfer to line p-l which is parallel with o-f; next take distance from o to p and transfer it to line f-l, where lines p-l and f-l cross each

other is a center through which to strike line b-i-x. The lines p-o-b-l-p shows one-half the size and shape of the frustrum of a pyramid. Where the lines o-p and f-l cross each other at x is the apex of the pyramid. Next take trams and with one point at x and the other at i, strike the small circle e-f-h-g-e. Next extend trams from x to b and strike the larger circular line. Next take distance from a to b, Fig. 1, and transfer to a-b Fig. 3; from b strike line to x, continue to make these sides and strike lines to x, until all four sides are taken, then strike lines from e to f-h-g-e. If rivets are to be used ad for lap at a-e. Bend template at a-e, b-f, d-h, c-g.

J.B.C

International Officers' Reports.

REPORT OF FIFTH VICE-PRESIDENT ATKINSON.

Helena, Mont., April 14, 1915.

I left headquarters on January 6 for Seattle, Wash., to assist in bringing about a consolidation of Locals 104 and 489, and I am pleased to report that I was successful in getting the two locals to consolidate, as I am satisfied that much better results can be obtained both for the boiler makers and ship builders by all being in the one local. After the consolidation was brought about, the members decided to put a business agent in the field to look after their interest, as a great deal of work that right-

ly belonged to the boiler makers and ship builders was being done by other crafts. I am glad to report that Brother Dan McKillop was elected business agent and I am satisfied that Brother McKillop will make a good man on the job, if the members will only give him a little assistance. I am very sorry to report that work continues to keep very slack all along the coast, and a great many of our members are out of employment, and those that are working are working so short time that they are barely making enough to meet expenses. On January 19 I went to Olympia, Wash., to attend the State Federation Convention, also to assist

Brother Frank De Pender of Lodge No. 242, Spokane, Wash., in trying to have the boiler inspecting passed in the state of Washington, but I am very sorry to report that we were not successful in having our bill enacted into a law. Brother De Pender stayed in Olympia nearly all of the session of the legislature and did everything he possibly could to have our bill passed. I made several trips to Olympia and gave him all the assistance I possibly could, but it is the same old story, the big interest had too much of a pull. They had control of the majority of the representatives and senators, and whenever a bill was introduced that did not meet with their approval, all they had to do was to pass the word along the line and it was a cinch that the bill would not get very far. There was not a law on the statute books that was of any benefit to the working people but the big interest tried to have it repealed or amended in such a way as to kill all the benefits derived from such a law; they even tried to do away with the state labor commissioner's office, simply because Mr. Olson insists that the laws of the state be lived up to. If all labor commissioners were as honest and conscientious as Mr. Olson in seeing that the laws of the state were enforced, I am satisfied that there would not be as many accidents in the different states as there are at the present time.

I visited Lodges 247 and 568 in Tacoma, Wash., and found that the members of those two locals were working very short time, but are in hopes that business will pick up in the very near future. Business in Victoria and Vancouver, B. C., is also slack. I am sorry to report that I just received a letter from Brother Joe Reed in Vancouver informing me that he had been very sick, but was improving a little at the time he was writing the letter.

The Des Moines Bridge and Iron Co. has the contract to erect nine fifty-five-thousand-barrel oil tanks for the government; two of them are being erected at Bremerton, Wash., and two at Vallejo, and the other two at San Diego, Calif. I understand that the other three are to be erected on the east coast. This firm is very unfair to the members of our organization. Brother McKillop and myself made several trips to Bremerton, Wash., for the purpose of trying to get this firm to employ our men, but so far we have not been successful in getting very many of our men to work, but I am in hopes that Brother McKillop will be successful in getting the job straightened up.

The Seattle Dry Dock and Construction Co. has contracts to build three submarines for the government. This company is also a very unfair company to our members, and I am in hopes that the metal trades department will get busy and try to get the government to investigate the kind of work this company is doing. Also to investigate the class of mechanics they

employ, also the scale of wages they are paying.

I am inclosing some newspaper clippings to President Franklin that I cut out of newspapers in reference to Submarine F-4, which sank in Honolulu Harbor on March 25 and caused the death of Lieutenant Alfred L. Ede and twenty other members of the crew. This submarine was built by the Seattle Dry Dock and Construction Co. about a year ago and from all reports it has always leaked and never was seaworthy. This same company built two submarines about two years ago for the Chilean government, which they never accepted on account of the poor workmanship done on these boats. After these two boats were completed and tested, they cut out over seven thousand rivets and still the Chilean government would not accept them.

When the war broke out in Europe this company succeeded in selling these two boats to the English government and they were taken to Vancouver, B. C., and I understand one of them has been on the dry dock all of the time since it has been there, on account of its leaky condition, and the other one they are afraid to submerge for fear it will meet the same fate that F-4 did. There is a good deal of talk of the Canadian government demanding an investigation to find out who it is that is responsible for having the government buy such submarines. I believe it is about time our government was doing a little investigating and finding out what kind of work this company is doing.

I received a letter from Brother Bowser, business agent of San Francisco, requesting me to come to San Francisco as soon as possible; about the time I was ready to start for San Francisco, I received a letter from Vice-President Hinzman requesting me to go to Great Falls, Mont., also several other points in the Northwest. I left Seattle on April 3rd for Spokane, stopping over there on Sunday, leaving Monday morning for Thompson Falls, Montana, to investigate some work that was being done there. On my arrival in Thompson Falls I found that they were erecting a very big power plant. I also found that the structural iron workers were working on a pipe line, which is about finished and we all know according to the agreement we have with the structural iron workers that this class of work belongs to our members, and if the iron workers are going to continue to do our work I can't see any use in having an agreement when it is being violated. I have always understood that an agreement entered into and signed up by both parties was binding but it is different with the agreement we have with the iron workers. Another thing that I have found when a job of this kind is coming up, a great many of our members never notifies anyone about it and never pays any attention to it until the job is about finished and then they send in a complaint about someone doing our work. Just as soon as a job of this

kind shows up in the shop our members should get busy and find out where the job is going up and who has the contract, also find out who is going to do the erecting. I hope in the future that our members will take a little more interest in this kind of work and assist in getting this class of work for our members. I am very pleased to know that conditions are looking so favorable for our members in Oklahoma and I am in hopes that it will only be a short time until all our members will be back working, and all those unfair firms will be forced out of the oil fields. I also hope that the investigation of the Illinois Central and Harriman Lines strikes now being investigated in Chicago will result in bringing about a settlement of those strikes. While in Tacoma I had the pleasure of meeting Brother John Callahan, business agent of the Milwaukee and I can assure the members working for that system that Brother Callahan is a hustler and is sure to get results if our members on the Milwaukee will only give him a little assistance. This finishes my report for this time, which I hope will be satisfactory.

I will close with best wishes and kindest regards to all our members, I am

Yours fraternally,

WM. ATKINSON.

REPORT OF SIXTH INTERNATIONAL VICE-PRESIDENT DOWD.

New York, April 17, 1915.

To the Officers and Members of the Brotherhood:

The following is my report from Nov. 1 to April 15th.

November 1 to 11th.—In port of New York visiting the various shops in District No. 2. Also tank jobs being erected in this district, visited P. I. W. job, Kings County Oil Works, where our members were on strike. Had a conference with Brother McCarthy B. A., and committee of strikers regarding this situation. We also had conferences with Mr. Kultz, eastern superintendent of P. I. W. Co. He insisted we declare the strike off and have men return to work. This proposition District No. 2 would not consider as the members who were employed by this company have made numerous complaints in regard to the amount of work they were compelled to do in eight hours.

November 12th.—Brother Daly, Secretary of District No. 2, Brother McCarthy and myself had a conference with Mr. Kultz but it was impossible to reach any settlement of strike with the P. I. W. Co. After conference I went to Philadelphia, Pa., met President Franklin and got his advice on several matters pertaining to District No. 2. Also informed him of structural iron workers doing our work at the Equitable Life building. He took this matter up with President McClory who said he would wire his New York representative to remove their members. While at Philadelphia I had the pleasure of meeting our delegates to the A. F. of L. conventions, Brothers McGowan, Mc-

Guire Graham and Boyle, president of Lodge No. 341.

November 13th.—Returned to New York and in the evening left for Boston, Mass., arriving there on November 14th. Met Brother Wells and Brother Donohue, president and secretary of District No. 34.

November 15th.—Attended meeting of Boston and Maine R. R. Federation, delegates discussed at length proposition of getting an agreement with the above named railroad and they turned the whole proposition over to the International officers who were in attendance to open up negotiations with the B. & M. officials. Vice-President Boland of the blacksmiths, Vice-President Jennings of the machinists, the late vice-president of the carmen, Brother Gallagher, and myself, assured the federation that we would do our utmost in securing agreement.

November 16th to 30th.—At Boston with the above named vice-president. We instructed Brother Faunsworth, president of the B. & M. Federation, to write Mr. Bartlett, general superintendent of motor power, for a conference and while waiting for conference I visited several of the contract shops in Boston and vicinity in company with Brother Daniel Generson who is representing Lodge No. 585 as their B. A., and who is endeavoring to organize every contract shop in the city of Boston. We also visited the Bartlett and Haywood job at Lynn, Mass., where this company was going to erect a large gas holder. We also visited Hammond Iron Co. job at Cambridge, Mass., and job of Bartlett and Haywood at Salem, Mass. Also attended a regular meeting of Lodge No. 250 whose members are all employed in the New Haven R. R. and are only working eight hours a day and three days a week. I also made a trip to Lowell, Mass., November 23, and attended a meeting of Lodge No. 371 and informed the members that we were waiting for word from Mr. Bartlett as to what date we could meet him. November 24th I returned to Boston, visited the Readville shops and Roxbury shops and talked to the members of Lodges' No. 281 and 250. I was requested to make a trip to Hyannis, Mass., where machinists were supposed to be doing boiler maker's work. I also visited the Cambridge engine house on the B. & M. R. R. The vice-presidents of the organizations affiliated with the B. & M. federation and the president, Brother Faunsworth and myself, had several conferences during this time regarding the B. & M. agreement, and on November 30th, Brother Faunsworth informed us that Mr. Bartlett, superintendent of the B. & M., had agreed to meet Vice-President Jennings and myself to talk over the proposition of an agreement and after a conference between the vice-presidents they decided that Brother Jennings and myself meet Mr. Bartlett and learn from him, if possible, his attitude in regard to us negotiating with him for a federated agreement.

December 1 to 31st.—On December 2nd Vice-President Jennings and myself had a conference with Mr. Bartlett and after talk-

ing over agreement proposition at some length we finally got him to agree to meet the International officers of the organization affiliated with the system federation, and he further agreed to write me in a few days setting the date for conference. I also attended a regular meeting of Lodge No. 515 whose members are employed on the B. & M. R. R. and informed them of our meeting with Mr. Bartlett and inasmuch as there were some changes to be made in the proposed agreement we called the meeting of the Advisory Board of the B. & M. Federation after discussing the changes to be made. They then gave the international officers full power to sign up the agreement.

December 9th.—Committee and myself had conference with Mr. Bartlett and Mr. Wiggin and after going through the agreement with them for hours there were some articles that we could not agree upon and that Mr. Bartlett said he would have to confer with Mr. Hustus, president, before he would agree to same.

December 11th.—Attended a Federation meeting of the N. Y., N. H. & H. R. R. shop men and advised the delegates on several matters.

December 12th.—Left Boston for Greenfield, Mass., and attended an open meeting of Lodge No. 517 and talked to the members of the welfare of the organization and some of the members who had been suspended assured me that they would get reinstated in Lodge No. 517 again.

December 13th.—Left Greenfield for Boston and arriving in Boston I learned that the New Haven R. R. closed down their shops from Boston to New York until January 4th, and this certainly was a hard blow to our members and in fact all other shop men as they had been on short time for months. Brother Generson, B. A., of Lodge No. 585, and myself, visited the contract shops in East Boston. We also made a trip to Taunton, Mass., where the R. D. Wood Co. were erecting a gas tank. We arranged with some of these men to become members of Lodge No. 585. We also visited the New Haven shop and talked to men who promised they were going to become members of Lodge No. 250. They promised me they would go to Boston and attend the next meeting of Lodge No. 250. These men were not included in the closedown of the shops, as they do hot work.

December 17th.—Left Boston for New Haven, Conn., and attended a regular meeting of Lodge No. 61, as instructed by President Franklin. I informed the members of our negotiations with the B. & M. for a federated agreement.

December 18th.—Left New Haven for Boston and on arriving received word that Mr. Bartlett would meet our committee on December 21st.

December 19th. — Had conference at Quincy House with International officers and President Faunsworth.

December 20th.—Attended regular meeting of Lodge No. 585 and the members were

well pleased with the report of their B. A., Brother Generson.

December 21st.—Had conference with the officials of the B. & M. R. R.; opened up negotiations which continued until December 24th when we signed the first federated agreement on the B. & M. R. R. system.

December 26th.—Had conference with Brother Le Flam, president of Lodge No. 245, and Brother Wells, president of District No. 34, and advised them on several grievances that existed at the Concord shops.

December 27th.—Vice-President Jennings of the machinists and myself mapped out a trip to cover every point on the B. & M. R. R. and hold joint meeting and give the rank and file the full particulars and explain all matters pertaining to the new agreement, and decided to hold our first meeting at Lowell, Mass., January 6, 1915.

December 28th.—Went to Providence, R. I., and visited some of the shops there and talked to the men in regard to reorganizing Lodge No. 172, but I found there was very little work going on at that time and the men were not inclined to reorganize.

Dec. 29th.—Left Boston for Hyannis, Mass., and investigated case of machinist doing boiler maker's work as requested by Lodge No. 250. On arriving I learned that the man worked nights and I talked to his foreman, Mr. Shaw, and he said I would have to see Mr. Hallett, as he was the man who was doing the work. I had an interview with Mr. Hallett and he said he was classed as a general utility man and received 20½c an hour and that he did everything around, and inasmuch as there was very little boiler work and this being an isolated point he only did emergency work and I informed him that in the future he should not do any boiler maker's work. I also informed the foreman to this effect.

Dec. 30th.—Left Hyannis, Mass., for Boston.

Dec. 31st.—I answered considerable correspondence.

Jan. 1st to 31st, Jan. 1-2.—At Boston visited some of the contract shops.

Jan. 3rd.—Left Boston for Sharon, Pa., by orders of President Franklin to meet Mr. Todd, president of the P. I. W. Co.

Jan. 4th.—Arrived at Sharon, Pa., and met Mr. Todd regarding the action taken by his company and the six other tank building companies in declaring open shop on all their work in the Oklahoma Oil Fields, and after a two hours' conference Mr. Todd said that the seven tank building companies had decided to erect all their work in all sections of the country under open shop conditions. He also informed me that Mr. Geo. Reeves of the Reeves Bros. Co. was the secretary and chairman of their association and suggested that I write him requesting a conference to discuss this proposition. Having to attend the joint meeting of all the crafts on the B. & M. at Lowell, Mass., on January 6th, I sent full particulars of my conference with Mr. Todd to President Franklin.

Jan. 5th.—Left Sharon, Pa., for Boston, Mass., arriving there on January 6th. Met Vice-President Boland of the Blacksmiths; Vice-President Jennings of the Machinists; President Faunsworth of the B. & M. Federation. We then left Boston for Lowell, Mass., and held federated meetings. We gave the members full particulars of agreement signed December 24th and we also held similar meetings at Lyndonville, Vt., Concord, N. H., Greenfield, Mass., Mechanicsville, N. Y., Keene, N. H. and Boston, Mass., and I am glad to report that the members of the various crafts affiliated with the federation at the above mentioned points approved of the agreement and were well pleased with the success we made.

Jan. 16th.—Had conference with President Wells of District No. 34 and advised him on some grievances he was to take up with Mr. Bartlett, superintendent of Motor Power on the B. & M.

Jan. 18th.—Received wire from President Franklin to meet him in New York, arriving in New York on the 19th. While in New York in company with President Franklin we discussed the situation and conditions of our organization in District No. 2, Port of New York with Brother Kenneally, president of District No. 2, Brother McCarthy, B. A., Brother Daly, secretary and treasurer and arranged with the above committee to call a special meeting of District No. 2 to be held January 24th. We attended a regular meeting of Lodge No. 163 at Hoboken, N. J., and President Franklin and myself addressed the meeting.

Jan. 24th.—We attended special meeting of District No. 2 and President Franklin went over the situation of the Port of New York with the delegates and advised them on several matters and upon learning of the vast amount of money owed Brother McCarthy, B. A. of District No. 2 and upon request of the district for an organizer to be left in New York to help organize the unorganized men of our craft. President Franklin arranged to have me return to this city as soon as I could finish up my work in the New England states and this was satisfactory to District No. 2. After meeting I left New York for Boston, Mass., arriving there on January 25th. Had conference with committee of B. & M. Federation and arranged for a conference with Mr. Bartlett for January 28th. Also visited Bartlett and Haywood job at Lynn, Mass., and also visited some of the shops in company with Brother Generson, B. A. of Lodge No. 585 who has been successful in organizing several of the unorganized shops. Attended conference with Mr. Bartlett as arranged and had a clear understanding in regard to two articles in the agreement as to the interpretation of same. Also attended a meeting of District No. 34, January 30, and delegates elected Brother Wells, president; Brother Donohue, secretary and treasurer and Brother Kennedy of Mechanicsville, N. Y., vice-president. I advised the delegates on several matters pertaining to

working conditions on other railroads and when all business was transacted they adjourned to meet on February 20th.

February 1 to 28th. February 1.—Left Boston, Mass., for Portsmouth, N. H., in regard to organizing the men in the navy yard in that city. I took this matter up with Brother John Quinn, president of Lodge No. 467. He advised me that there were very few men working at that time and thought that later on there might be an opportunity to do some organizing. From there I went to Bath, Me., and located some of the former members of Lodge No. 168. I talked to them in regard to reorganizing this lodge and they informed me that they done very little work all winter. The ship yards being practically closed down and several of them were out of work at this time, but suggested that I come back in a few months and if conditions were better they would be willing to organize. From there I went to Portland, Me., visited the Portland Iron Co., talked with some of the men in regard to organizing and am sorry to say I was confronted with the same situation as I was at Bath, Me.; men out of work very nearly all winter.

February 6th.—Left Portland, Me., for Boston, Mass., visited some of the contract shops in the vicinity of Boston with B. A. of Lodge No. 585. Also went to Providence, R. I., and located big tank job being erected by the P. I. W. Co. at the Standard Oil Company's plant at Fort Hill. Foreman of the job, Mr. Hubble, ex-member of our organization. There were about ten or twelve men on this job and I had a personal talk with all of them and they all agreed to strike this job that night, which they did.

February 10th.—Left Boston for New York.

February 11th.—Attended conference with representatives of metal trades, department of the A. F. of L. and the United States Brewers Association in regarding to giving contracts for brewery supplies to shops that employ union men. The brewers committee agreed to do this as much as they possibly could and would give the preference to companies hiring union men.

February 12th-17th. Visiting shops in District No. 2, port of New York. Also attended meeting of Lodge No. 163 and No. 16, and talked to the members in regard to getting their assistance in reorganizing the men in this district and they promised to give every assistance they possibly can in helping to build up our organization. I also had conferences with Mr. Ackley, New York manager for the Edgemore Boiler Co., regarding four boilers his company had to erect in the New York steam heating power house at 59th street, but could not get him to place members of our organization on this job and the work was being erected by non-union men. I took this matter up with the New York Steam Heating Co., and they said that I would have to do business with the Edgemore people as they had nothing to do with the erection of the boilers.

February 18th.—Went to New Haven and attended a regular meeting of Lodge No. 61, by request of members of this lodge and

advised the members on several matters pertaining to our Brotherhood.

February 19th.—Left New Haven, Conn., for New York. On arriving went to 59th street power house job and called four of our members who were working for another company out on strike. We were also successful in getting men who were working for the Edgemore Co. to strike.

February 20th.—Had conference with Mr. Atley of the Edgemore Co., and after discussing the situation of the 59th street job and this work being tied up, Mr. Atley insisted he had nothing to do with the erection of the work.

February 21st.—Attended a regular meeting of district No. 2 and reported the situation of the 59th street power house job and pickets were placed to watch this job. Visited the office of District No. 2, made a trip to Shadyside, N. J., and Edgewater, N. J., to try and locate some tank work. Located four tanks that were to be erected by the Kellogg Oil Co. Brother Daly, secretary of District No. 2, and myself, attended a regular meeting of Lodge No. 176 of Elizabethport, N. J., which was a fine meeting. I also attended a regular meeting of Lodge No. 45 and they had a very fine meeting. Members of both these lodges assured me that they would give me every assistance possible in trying to organize the unorganized men of our craft. Also visited several of the shops and talked to several ex-members who promised me that when conditions were better they would be reinstated in their respective lodge as they are now only working very short time.

March 1-7th.—Attended a regular meeting of Lodge No. 21 and financial secretary was instructed to send reports to the I. S. T. as soon as possible as this lodge had not reported for some months. Visited the office of District No. 2 daily. Also visited several shops in the Port of New York and made several visits to Weehawken, N. J., where the Koehler Iron Co. tank job was being carried on. Had a talk with the foreman, Mr. Williams, and arranged with him to put all union men on this job and after the proposition was all settled an ex-member of Lodge No. 21, named James Campbell, who was assistant foreman, had a long talk with Mr. Williams; then I was informed by Williams that he was going to erect his job under open shop conditions and this he did do with Campbell as his foreman. And as the tanks were being erected on the Erie R. R. property this company assisted the Koehler Co. all they could to erect this work. Also visited some of the buildings where some tank work was being erected. Also attended a meeting of Lodge No. 163, Hoboken, N. J., and attended a regular meeting of District No. 2. After this meeting I left for Boston, Mass., arriving in Boston March 8th, as ordered by President Franklin, and attended a meeting of District No. 34 of the B. & M. R. R. committee. Was sent to Mr. Bartlett and requested him to meet myself and a committee to take up some grievances. He agreed to meet the

committee but would not consent to meet me at this time until they had made an effort to adjust the grievances with him first. After district meeting I went to Lowell, Mass., and addressed a meeting of Lodge No. 371. I talked to the members on the good and welfare of our organization and they surely had a fine meeting. After the meeting I returned to Boston and on the 9th left Boston for New York.

March 10th to April 15th.—During this time I had been representing District No. 2 because of the deplorable state of our organization in the Port of New York. Owing to the thousands of men who were out of employment practically all winter, it became necessary for District No. 2 to suspend Brother McCarthy, their B. A., temporarily, due to the above conditions and I have been visiting the shops and ship yards and meeting and talking to the members who have been suspended prevailing on them to become reinstated and I am satisfied that when work resumes and conditions are better we will be able to build up the lodge in District No. 2 and strengthen up our organization in the Port of New York. I have had conferences with Mr. Henry C. Hunter, representative of the metal trade association, and also representative of the boiler manufacturers of the Port of New York, in regard to bringing about an agreement between the above named associations and District No. 2. This proposition has been approved by the district, and Mr. Hunter advised me that he will submit this proposition of an agreement to his executive board and we are now waiting to hear from Mr. Hunter. I have also attended meetings of Lodges No. 16, 21, 45, 163 and 176. Visited the office of District No. 2 daily. Visited new buildings being erected, locating such work as belongs to our craft and placed the members of our organizations on same. I also made a trip to Albany, New York, by orders of Vice-President Hinzman, and protested to Governor Whitman, with other representatives of labor, against him signing an amendment to the Workmen's Compensation Law, and I am sorry to say that the governor a few days afterward signed the amendment. I also tied up three tank jobs being erected by the P. I. W. Co. in this district; one at West New York, N. J.; one at Hunter's Point, L. I., the other one at Warner, N. J., and we intend to tie up every job that is being done by the seven tank building companies in this district. The Reeves Brothers, of Alliance, Ohio, have started a big tank job with non-union men at Flatbush, Brooklyn. This job, from the information we received, will last for a period of six months. I am working at this time on this proposition and expect to make a clean sweep on this job within a short time, and I want to assure the brother members who are on strike in the Oklahoma oil fields that the members in the Port of New York are doing everything within their power and assisting me in every way to tie up the work that is being done by the open shop companies in this district. And inasmuch as

District No. 2 covers a radius of 25 miles from the New York City Hall, it keeps us on the alert at all times. And I am glad to say at this time that I have nearly all our members who follow up the tank building industry working for fair companies to our organization and we all hope that conditions will be better in the near future in the marine shops, as they have been practically closed all winter with the exception of a few men at work and the same conditions prevail at this time in the marine industry.

This concludes my report to April 15th and trust it will meet with the approval of all, and with best wishes and kindest regards to one and all, I remain,

Yours fraternally,

JOHN J. DOWD,

Sixth International Vice-President.

REPORT OF SEVENTH I. V. P. MAHER.

At the conclusion of my last report was in Newark, Ohio, organizing. While there I received orders from headquarters to go to Pittsburgh, Pa., and meet management of the firm of Riter and Connelly, which I did to try and settle controversy of our men at Roast, La., but after meeting general manager I was unable to reach any settlement of controversy. From Pittsburgh I went to Conneaut, Ohio, to attend mass meeting which was very well attended. Brother Weyand also attended this meeting as did Brother Knight of the Carmen, Brother Roy Horn of Blacksmiths and Brother Malloy of Machinists and as chances of forming a System Federation were very good we all agreed to return for another meeting. From Conneaut I returned to Pittsburgh to again meet the firm of Riter & Connelly which I did with no results. From Pittsburgh I went home to spend Christmas. From Portsmouth I went to Chicago where I met Brother Horn of Blacksmiths and Brother Malloy of Machinists, where we arranged several meetings of the men at Stoney Island with the intent of forming a System Federation at that point and were successful in getting committees appointed from all crafts to take the matter up.

While in Chicago, I attended a meeting of Lodge No. 39 and a very good meeting it was, also after the meeting refreshments were served and some very good talks made on the good of the order. Brother Cundiff attended meeting also and made a very good talk as did Brother Coghlan, B. A. L. No. 39. I also attended meeting of Lodge No. 1 and it was a very good meeting also. While in Chicago I received orders to go to Newark, Ohio, to take up grievance, Local 99, which I did, grievance settled.

From Newark, Ohio, I went to Cumberland, Md., to meet schedule committee, Western Maryland R. R. and assisted them in drawing up new schedule. From Cumberland, Md., I went to Conneaut, Ohio, to form System Federation where I again met Brother Horn and Malloy and we were suc-

cessful in forming System Federation at Conneaut and also successful in organizing Blacksmiths at that point.

From Conneaut, Ohio, I went to Huntington, Ind., on orders from headquarters to try and re-organize lapsed lodge at that point. At Huntington, Ind., I received orders to go to Chicago and take up grievance between Lodge No. 1 and Lodge No. 39. While in Chicago received a wire to go to Chicago Heights to take up grievance with Central Locomotive Works who had abrogated agreements of all crafts. Brother Tegtmeier of Blacksmiths and Brother Greenier of Machinists were assigned to this controversy also, after meeting management we were unable to adjust grievance and requested the Department of Labor to send commissioner of conciliation to try and adjust controversy. Mr. A. T. Faulkner of Cleveland, arrived and after several conferences we were able to settle controversy temporarily. Also, while in Chicago I attended several meetings of Lodge No. 356, Hammond, Ind., and at last meeting we had ten new applications for membership. From Chicago I went to Milwaukee, Wis., to investigate strike at the Milwaukee Boiler Works, and succeeded in getting two conferences with management, which I hope will result in settlement later on.

While in Milwaukee I attended meeting of Lodge No. 302, and a very good meeting it was, also. I also had the pleasure of meeting Brother DuBrocq and of having dinner with him and his family. From Milwaukee I returned to Chicago, to again take up grievance of Lodges No. 1 and 39, but as grievance was a very complicated one was unable to settle it. From Chicago I went to Bellefontaine, Ohio, where I reorganized lapsed Lodge No. 243 with 12 members. While at Bellefontaine, I made several trips to Springfield, Ohio, and Columbus, Ohio, where I expect to get good results from my trips, later on. From Bellefontaine I went to Portsmouth, Ohio, and attended meeting of Lodge No. 402 to take up some important matters. From Portsmouth I went to Washington, Ind., to take up grievance on B. & O. R. R. and attended a large mass meeting last night. Will report on this grievance in my next report.

This will conclude my report, and with best wishes and regards to all, I remain,

Yours fraternally,

M. A. MAHER,

Seventh I. V. P.

REPORT OF EIGHTH INTERNATIONAL VICE-PRESIDENT RYAN.

Since the conclusion of my last report in April Journal, conditions in the strike zone in the Oklahoma oil fields have progressed as favorably as can be expected, considering the conditions of the labor market throughout the country at this time.

Numerous newspapers have published articles to the effect that the strike has been settled and that labor troubles were at an

end. Brothers no settlement has been reached whatever. No conference has been granted to date, the members of Osage Lodge No. 592 have been on strike nearly three months now against the Open Shop inaugurated by the seven Eastern firms, namely, Petroleum Iron Works, Standard Boiler Plate Iron Co., Warren City Tank & Boiler Co., Reeves Bros., Hammond Iron Works, Treadwell Construction Co., and the Rites-Conley Co. Needless to say hundreds of strikebreakers have been employed from all over the country to force the Open Shop policy into effect in the old fields of Oklahoma, Louisiana and Texas. These same strikebreakers are now being paid for the actual amount of work performed, thereby making a graduated wage conditions, ranging from \$2.25 to the standard rate of \$4.50, \$4.75 and \$5.00.

While the unfair firms are endeavoring to break our organization and Open Shop all of their work, we are enjoying the union conditions we have built in recent years in the employ of five new fair firms, namely, the Kennicott Co., Wm. Garver Co., United Iron Works, Kansas City Construction Co., and the Kaw Boiler Works Co. The aforesaid firms are employing our members exclusively and are working union conditions, recognizing the organization and paying union wages at \$4.50, \$4.75 and \$5.00 per day on the best work basis. I am pleased to report that additional contracts are being let by the producers to the said fair firms, this being an unusual condition in a strike against the Open Shop, consequently it places a new light on our strike situation.

Strike Pay Roll.—In order that the rank and file may know that we had six hundred members in our first pay week strike rolls. In the past few weeks we have dropped to one hundred and seventy-five; we have received in regular strike benefits about twenty-seven thousand dollars (\$27,000.00) to date.

Donations from subordinate lodges in response to circular letters of appeal issued by Lodge No. 592 have brought returns to the extent of two hundred and fifty dollars and twenty-seven cents (\$250.27). I am attaching an itemized statement handed me by the recording secretary. We are publishing same so the rank and file may know the actual amount received from the appeal.

Of the 600 members who responded to the strike order three months ago I dare say 400 are now employed by fair firms. Concerning desertions from our ranks, foremen and all, 30 men will fully cover our losses out of a total of 600. Sorrow and sadness have also entered our midst and we mourn the loss of four more of our respected members since my last report. Brother John Corrigan (helper), Reg. No. 99176, of Lodge No. 542, was shot and instantly killed at Drumright, Okla. His assailant is out on \$5,000.00 bail. Brother Chas. P. Callopy, Reg. No. 42730 (boiler maker) passed away with pneumonia after a brief period. Brother Frank Hanivan (boiler maker), Reg. No. 77483, and Brother Alex. MacAvoy, Reg. No.

31223, succumbed to pneumonia after brief illness. We also have Brother Fred J. Altazin, Reg. No. 89092 (boiler maker), lying in Cushing hospital, the victim of a shooting affair, and while dangerously wounded he is now on the road to recovery for which we are all thankful. His assailant also being a brother member. We also have a brother, Stell Cole, recuperating at his home at Childress, Tex., the victim of a hold-up at Oilton, Okla., recently. Truly, our trials have been plentiful at a time when our united strength is being put to test. One for all and all for one has been our motto and we are meeting misfortunes trial's face to face as they appear. With summer near at hand we are fighting harder than ever and our prospects could not be brighter for victory. By way of demonstrating the spirit which exists in Lodge No. 592 a twenty weeks' assessment of one dollar per week for twenty weeks is now in effect as we believe in the adage of help comes to those who first helped themselves. We are endeavoring to keep in close touch with our brothers on strike at Houston and Port Arthur, Tex., and every way to have united action.

A spirited election has just been held in Lodge No. 592 for the office of corresponding and financial secretary, also for trustee, five candidates competing for secretaryship. Result of votes taken show Brother Richard Leahy victor with 167 votes, Brother C. E. Houghton with 125 votes, Brother Wm. J. Koller third with 85 votes, Brother I. L. Timmons fourth with 8 votes and Brother Mahan fifth with five votes, a total of 390 votes cast. Brother Edw. Sheehan was elected trustee over Brothers W. H. Clark and Frank Hawks.

Relative to traveling brothers, Lodge No. 592 has placed into effect a rule to prevent traveling brothers from depositing clearance cards and going to work. This action became imperative owing to the number of members who began to arrive in the field as soon as fair jobs started. Having about 200 members still on strike, this action has been taken to protect the brothers who have been fighting the strike during the past three months. We have also had delinquents and members who hold withdrawal cards for several years present themselves and desire to reinstate and deposit cards in order that they might go to work here on what fair jobs our striking members have preference upon. Should a traveling brother desire to pay dues to maintain his good standing, Lodge No. 592 will accept clearance cards, stamp his book and card him out, but he cannot go to work until such time as conditions become normal and our striking brothers become employed. Brothers, you can help win this strike by remaining out of the oil fields of Oklahoma, Louisiana and Texas until our difficulties are settled. Will you do it?

From March 10 to date, April 12, my time has been devoted in assisting Lodge No. 592 in our struggle against the open shop in the Oklahoma fields. I regret that my

correspondence has been neglected, but the district involved necessitates both time and personal attention. Situated 68 miles from our Tulsa headquarters, we must be on the job, so to speak, day and night. Will we win? Keep your eyes on Osage Lodge No. 592 and Oklahoma. My efforts in the sale of emblem buttons and charms have been somewhat curtailed, owing to the strike; however, we are still boosting our new slogan, "Buy and wear a button or a charm."

Trusting my report will prove interesting to the rank and file, I am

Yours fraternally,

JOS. P. RYAN,

Eighth International Vice-President.

Correspondence.

MONTREAL, CANADA.

To the Officers and Members of all Subordinate Lodges Everywhere.

Dear Sirs and Brothers:

At this time I crave your attention to a matter which I am satisfied refers to the writer personally. It is the "Proposed Amendment to the Constitution," submitted by Lodge No. 126, Winnipeg, Man., and which appears in the columns of our official Journal, during the months of March and April.

Now, dear reader, this may be somewhat lengthy to read, but it will be and is to your benefit to know the facts. You will note on page 269 of the April issue of the Journal, under the heading of "Reasons Why We Should Have the Recall" (second paragraph) it reads: "According to our Constitution and the verdict handed down by the Executive Council at their annual meeting held in Kansas City, October, 1914, to Lodges No. 126, No. 451 and No. 529, an officer cannot be removed unless convicted of certain charges, inefficiency does not constitute a charge, etc.

Now, you all would like to know what your Executive Council, had before them at the last Council Meeting, in reference to this matter. The following is a copy of the original resolution, and below I will reply:

"Whereas the economic conditions of Canada necessitates the having of an energetic vice-president who has some ability as organizer, and who has the technical knowledge of the organization he represents, so as he will be able to advise and aid the various lodges that he may come in contact with; and

"Whereas Third Vice-President J. P. Merrigan, has been given a three years' trial,

and we have found him wanting in the necessary qualifications; Therefore be it resolved; that Perserverance Lodge No. 126, recommend that International President J. A. Franklin, immediately proceed to take a referendum vote for the recall of Third Vice-President J. P. Merrigan; and be it further resolved:

"That if this resolution be carried by a majority of the members thereof, that he immediately make arrangements for the election of a successor from amongst the brothers, recommended by the members in Canada."

The above resolution was unanimously adopted at the regular business meeting of Lodge No. 126, held in Winnipeg, August 16, 1914, and reaffirmed at the next regular business meeting held September 2nd. We have nothing against Brother Merrigan as far as honesty, morals, etc., are concerned, our only objection is that he has not the ability and cannot fill the office of a International Vice-President, and to keep him any longer is merely keeping up an unnecessary expense and hinders instead of aids any organizing work that might be done. It is common knowledge amongst boiler makers and helpers throughout this country, that as an organizer he is a failure. Speaking from our own personal experience of Brother Merrigan's inability in Winnipeg and vicinity, we will cite a few cases out of the many, that will suffice we think, for his recall, and the urgent necessity of placing a more energetic brother in his place. He has been three years on the job and it cannot be said that we were over hasty in reaching this decision. During that time he has never brought in a single application to the Winnipeg lodges, although he

has spent two or three months each year in this vicinity, what he has done during that time is a mystery to this lodge.

At the beginning of the trouble between the boiler makers and their helpers, he showed his ability as peacemaker by failing to appear before a meeting of the helpers (when asked to come and advise them and help to clear up the differences between them and the boiler makers) on the rather flimsy ground that the helpers were not in good standing to the Grand Lodge and he did not see why he should waste any time with them at all. The fact that the quarrel was disrupting the local lodge, and that it was the function of a grand lodge officer to try to the best of his ability to settle internal strife, seemed to bear no weight. The majority of the helpers are still outside of the fold, no question but what we will get them all in again, but a little advice given at the proper time, might have saved the time, money and energy that has and will be spent before that is accomplished.

His ability and results as an organizer in this district as far as Lodge No. 126 is concerned, has been nil. He tried to organize the G. T. P., some two years ago, and the lodges of this city were so disgusted with the results (some four or five applications) that they assessed themselves one-half day's pay per month for several months in order to help out the boys on the G. T. P. They elected Brother McGowan, as organizer and sent him out to see what he could do in the way of lining up the men up on the road. A more fertile field could not have been found as in the short space of two months he succeeded in practically organizing the entire system, with the results that the company has been forced to meet the men in committee, although all efforts so far has failed in the way of getting the company to sign a contract, the company evidently is trying to force a strike, the men are just as strenuously trying to avoid it, and Brother Merrigan is doing nothing seemingly but drawing his salary. A committee from Lodge No. 529, (G. T. P.) has repeatedly asked Brother Merrigan to come before their lodge and give them some advice as to what to do or how to act, he has not as yet done so, although he did appear at a joint meeting of boiler makers and machinists, almost everyone in the hall that night had something to say but Brother Merrigan, he never said a single word, notwithstanding that the results of the meeting might have been the calling of a strike.

The contract shops in this city are of the non-union variety. We have had union men working in them at various times and we are expecting Brother Merrigan to do something in regards to trying to get the closed shop, and we are willing and ready to give all the assistance within our power, we have brought the subject before him at various times, but nothing has been done. Our time has been taken up this last two

or three years with the troubles on the G. T. P. The strife between the helpers and boiler makers, and the various grievances that has cropped up along the C. P. R., from time to time. With the result that there is not a union man to our knowledge in any of the contract shops in the city at present time, which means that the work of organizing there has got to begun all over again.

What has been done in the way of organizing, settling disputes internal and external, has been done without the aid of Brother Merrigan although it has been many times solicited, and we are of the decided opinion that a change is necessary; as a boiler maker and a union man we have nothing against Brother Merrigan; as a Grand Officer we don't think that he reflects credit on the international, his very personality is against him, he cannot give advice, because he has not the necessary knowledge, he is more liable to widen a breach than close it. He came as a stranger amongst us, we have given him three years' trial, surely no man can ask for more and he has been found wanting. We want a change, we ask it from you the rank and file of the Brotherhood, hence this referendum."

Now, dear reader, you can read what I have to say in rebuttal. From the foregoing, one would be inclined to say to himself "is it not beastly exasperating to think that we have had such a dreadful man all these years in the capacity of vice-president of our organization." Lacking almost every qualification but that of being a boiler maker and a union man, I thank Heaven, that the latter qualifications were at least accorded your humble servant. Perhaps it was not intended, but was overlooked in the excitement. However, if the committee who drafted these resolutions were sincere in granting your humble servant the aforesaid qualifications, I am indebted to them very, very much indeed, and to the members who indorsed the report of the committee. For in my humble opinion—and I think you will agree with me, any person possessing such qualifications is not a dead one altogether. I am proud to be the former, because I was assigned to such work and made good. And also proud to be one of the latter, and never had to go outside of this berg to have any such honors bestowed upon me.

Now, to get at what you are all entitled to—my reply, and it is not going to be counted by myself to find out whether there will be three hundred or three thousand.

Last August, after having made a special visit over the Canadian Northern Railroad, from Winnipeg to Edmonton, and touching some points on the lines of the G. T. P., and C. P. R., I arrived back in Winnipeg, on the afternoon of September 2nd. That evening Lodge No. 126, held their regular meeting. I attended same. During the course of meeting while the recording secretary was reading the minutes of the

previous meeting, I heard my name mentioned. I didn't get the full contents of what had been read at the time, but did later, and later heard what the report of the committee was. The report was, the resolution which you have already read—that which appears above. The committee was appointed at the Sunday meeting August 16th, to draft up the resolution. The committee reported under the head of "Special Committees, and read the resolution. After it had been read the president, asked me if I had any reply to make? I told him that it was read off so continuous and so lengthy, that I was unable to grasp it all, and that I would naturally expect to be given some time to look over the charges or whatever they may be termed, so that I could answer them, and if the meeting would be kind enough to allow me to answer them I would do so with the time at my disposal, briefly for the time being. The privilege was granted, and I replied to it all.

Now, follow the resolution from the first word; "Whereas" to the word "Canada" second paragraph. The request could not be granted according to our Constitution, as this method was abolished at convention 1906. Article III, of the International Lodge Constitution, could have been studied. I will refrain from having anything to say regarding my qualifications, ability, technical knowledge, etc. "Leave George do it."

First. It reads: "That Perseverance Lodge No. 126, recommend that International President J. A. Franklin, immediately proceed to take a referendum vote for the recall of third vice-president J. P. Merrigan." Now, anybody that follows up the laws of our Brotherhood knows that President Franklin could not comply with the request. Again, the convention had hardly adjourned two months, and at the convention the following lodges from the Dominion, were represented: 126, 134, 191, 413 and 451. Why was all this not brought to the attention of the delegates at that time? The delegate from Lodge No. 126, placed himself before the delegates for the office of vice-president and was defeated. What better place could there be than at that convention to come out openly and inform the convention, that I was lacking in my qualifications, etc., to continue in the office of vice-president, for this brotherhood. No, nothing was said of this nature.

Second. "That if this resolution be carried by a majority of the members thereof, etc." The resolution could not be placed before the membership, and our constitution should have been consulted prior to the convention and after.

Third. "The above resolution was unanimously adopted at the regular business meeting of Lodge No. 126, held in Winnipeg, August 16, 1914, and reaffirmed at the next regular business meeting held September 2, 1914, etc." Now, I don't believe there was a regular summoned meeting to take up this matter on Sunday afternoon, August 16. I am satisfied that a few gossipers had

been discussing the outcome of the convention, after the return of the delegate from Lodge No. 126, and something that did not materialize at the convention, caused them some uneasiness until the regular meeting was held where they aired their sentiments. Then a committee was appointed to bring in a report. That report is the one you have before you. Now, it states that, it was (the resolution) adopted at the meeting of August 16th, and reaffirmed at the next meeting held September 2nd. Just think this over. The resolution was unanimously adopted before it was written (August 16th) and was written as it appears verbatim, before the lodge adopted any part of it. Now, what do you know about a piece of business of that nature? Before the lodge has anything to say in the matter the resolution is adopted? It was not adopted at the meeting of September 2nd. I was present, and know what was adopted. Why, when I got through making matters clear to those present, all of the foregoing resolution was stricken out, except the beginning, and then, if the members had been conversant with the idea at the time, that portion would not have been adopted. As it was (from what I saw at the meeting) I don't believe Lodge No. 126, properly speaking would in-dorse any part of the resolution.

Fourth. "It is common knowledge amongst boiler makers and helpers throughout this country, that as an organizer he is a failure." Now, I would like to know where this information was received? I know, and it was not from any of the lodges in the Dominion. The remainder is very nice, from the word "speaking" to "place." As far as bringing in applications to Lodge No. 126, is concerned, well, I must admit that the nature of my work does place me in a position very well to bring application to Lodge No. 126, or any other lodge. When the opportunity presents itself I do bring them before the lodges. If not, I mail them to the local secretaries. Bringing in application for membership can be accomplished, but getting the initiation fee and the application at the same time seems difficult, unless I happened to be in some town on pay day, where there was an applicant for membership, where there is no lodge, and if I had arranged to collect the fee and application I certainly would not overlook doing so. On the other hand, if I could not be in town on pay day, and received the assurance of a candidate, I would inform him to hand same over to one of the members employed along with him, and also advise the member working there that the candidate would expect him to collect his application and fee, and forward same to the lodge in which he was a member of. I know from experience that it is not an easy matter to collect initiation fees between pay days, and even on that day after being promised perhaps on several occasions very often there is some excuse given for not being in a position to pay. What they want to mention Lodges No. 451 and 529 for I don't

know. Evidently, somebody was busy making iniquities. There is a whole lot in the labor movement, that is a mystery to them, besides not knowing what I was doing during the time I spent in Winnipeg and vicinity.

Fifth. "At the beginning of the trouble between the boiler makers and helpers, he showed his ability as a piece-maker by failing to appear before a meeting of the helpers (when asked to come and advise them and help to clear up the differences between them and the boiler makers) on the rather flimsy ground that the helpers were not in good standing to the grand lodge and he did not see why he should waste any time with them at all, etc. In reply to the foregoing, I will say, that to the best of my knowledge there was no trouble between the boiler makers and helpers or vice versa at any time. I did everything that was fair and reasonable, while meeting with the helpers after I had returned to Winnipeg, from the Little Rock convention. If there was any differences or trouble between the helpers and boiler makers in Winnipeg, then it was because the convention decided or rather made it law, that the helpers divisions would be discontinued after December 31, 1912. The G. T. P. strike was still in effect after I returned from the convention, and naturally some of my time was spent on that road. I was not in Winnipeg, permanently to be meeting with Lodges Nos. 451 and 126, and Lodges Nos. 212 and 127 H. D.'s, at any time. But when the opportunity presented itself, I did go and attend the meetings of all four lodges, I did not shirk meeting the helpers at any time that I knew there was a meeting. If I did not attend any of their meetings after January 1, 1913, for a time, it was either because I was not in town or did not know they were holding a meeting. I admit that I did not attend any of their meetings after March, 1913. I was never asked to come and advise them. It was never necessary for any person or persons in Winnipeg, to have to come and request me to go and advise the helpers what to do. I took the initiative all of the time. I met with the helpers of Lodge No. 127, after I had returned from the convention. Not long after the convention, I met with the helpers of Lodge No. 127, on another occasion, and had six or seven members of Lodge No. 126 there also. I did not widen any breach that night. I also attended the meetings of 212 H. D., Brother D. Cook, was the delegate to the convention. He explained the changes when he returned. At a later meeting held by Lodge No. 212, arrangements were made to meet with a committee from Lodge No. 451, whereby they would co-operate regarding consolidation. It did not materialize. I can't be blamed for that. After being out over one of the roads, and returned to Winnipeg, I was given to understand indirectly that the helpers had change their views as to consolidation, and no committees of either of the four lodges

had met. Immediately, I called a special meeting of the presidents and secretaries of the four lodges, and had a thorough understanding in the matter as it existed at the time, and believed that that would be the settlement of the objectionable views on the part of the helpers and boiler makers, towards the consolidation.

I would like to know what lodge was being disrupted as a consequence of the helpers not abiding by the laws of our Brotherhood? None in Winnipeg, or vicinity that I know of. No such information has ever been brought to my attention directly or indirectly. I think it a very small statement to make that, the local lodge was being disrupted, as a consequence of the helpers not consolidating. Yes, a majority of the helpers employed in the C. P. R., local back-shop and roundhouse are not in the local lodge, but it is not for want of advice that they are not members of our Brotherhood, or the local lodge. Nor can it be said of anything that I did unlawfully that kept them from being members, unless, as is customary for someone to say to the contrary.

Advice! Well, I gave them both, boiler makers and helpers, all the advice in this matter that they could obtain from anybody, and without offending or injuring any person's feelings or character. Write I may say it myself: I have yet to hear some better arguments than those which I advanced in favor of consolidation of our forces. Some people try to make it appear as though it was simply a local affair, and not international.

Sixth. "His ability and results as an organizer in this district as far as Lodge No. 126, is concerned, has been nil, etc." Right here a lot of stress is placed on organizing the G. T. P. When I first went up there it was to handle the situation. It was September, 1911. October 10, 1911, our members came out on strike. The strike was in existence fourteen months. Was there any organizing to be done on that road during that time? Brother R. S. Ward and committee of machinists and myself, went to Montreal, to meet with the president of that road, and arrived at a basis of a settlement December 13, 1912. All of our members who applied within thirty days were given employment. I never went over the road to try to organize the unorganized, after the strike had been settled. No move had been made by either us or the machinists, until about April, 1913. The machinists decided to send a man over the G. T. P., to organize the unorganized. Brother Chas. MacGowan, of Lodge No. 529, at that time happened to be out of employment, and as the two crafts were co-operating towards bettering their conditions, undoubtedly the machinists were after some of the local officers to select some member as they were going to go over the road and organize the boiler makers and helpers. Because, the terms of the settlement of the strike, in part, read as follows: "I have

also agreed that next spring say May or June, if a majority of the men employed by the company in these crafts are not satisfied with their conditions of employment, you will meet a committee for the purpose of arranging the terms of an agreement, and failing to arrive at such an agreement, you will submit the question at issue to a board of conciliation appointed under the Industrial Disputes Act, and that the Company will agree to accept the decision of the Board, provided the men will also agree to accept such decision." A meeting of the lodges in Winnipeg, was held to appoint some member to act in conjunction with the machinists. Brother McGowan, being out of employment, naturally was selected. He went over the road and did get a number of new members. They admit that "a more fertile field could not be found, etc." Why, man alive these men (the majority of them) were wanting to know how they could obtain membership in either organization before either organization had decided what course they would pursue. Where most of the organizing was done, was done at Transcona shops. They all wanted to get into the Union, and be good fellows, after the strike was over. And, the fee that was offered to them was a cinch. They never considered the fee, it was the CARD they wanted. Why, it has not been unusual for the company to meet committees of our organization and machinists. They have been so doing since 1910. No, they were not successful in getting the company to abide by the late award of the board under the Industrial Disputes Act. Conditions throughout the continent did not warrant the employees of either craft giving the company another battle, after the award was made in their favor. The company was not trying to force the men to strike at all. I know who was talking strike. Why, the men could have taken that course if they wanted to, but they knew better, owing to trade conditions throughout the country.

No committee of Lodge No. 529, has ever asked me to come before their lodge and give them some advice as to how to act or what to do. Not necessary.

Yes, I was at the joint meeting, and joint meetings. I had all I wanted to say at Transcona meeting before we came in to Winnipeg, for the other meeting. The whole situation was explained by the chairman of the committees, and everything was clear to those present. They were to decide upon a proposition which was submitted to them by the company, through the committee. Brother R. S. Ward, of the machinists, and myself refrained from saying anything that might influence the meeting. The question of strike was not at issue at all.

Seventh. Well, I won't say that the men in the contract shops can't be organized. But, unless somebody is assigned solely to that work, I don't think it can be accomplished in short order. "Our time has been taken up this last two or three years with the trouble on the G. T. P. strike with the

helpers and boiler makers and grievances on the C. P. R., from time to time." Who are "our" who have been devoting all their time to such matters? Why, you would think that "our" whoever "our" is, had been doing some great work, prior to the G. T. P., strike, the consolidation and the local grievances, which arise everywhere, and laid blame on the above, because about two men that were members from the contract shops went in arrears.

Eighth. "What has been done in the way of organizing," etc. Well, if they settled any of their external and internal disputes, without my aid, I am glad to know it. But, to say that my aid has been solicited many times, is unwarranted. They are not of the decided opinion that change is necessary. Not Lodge No. 126, as yet anyway. For the balance of the resolution, I will have little or nothing to say.

Now, dear reader, I know that everybody is not my friend. The Good Book says: "Love your enemies." This I will endeavor to do. And while holding this position, I find that it is necessary for me to do so. But, I am not going to swallow them.

I am satisfied that I have the good wishes of our officers and members of this Brotherhood and other organizations, and wherever I have been I have been respected, and I intend to command such while I am your servant. I know how and who were the instigators of the foregoing resolution. I know how the approval of the other lodges was received, and many other matters of a scurrilous nature that has been done to try to injure my character, etc.

In conclusion, will say that I would have liked to have had this communication appear in the April issue of the Journal, but it was not convenient for me to get it in. However, I trust that it will appear in the May issue.

Thanking you in advance for your attention to this communication which I asked of you at the outset, I am,

Yours fraternally,

J. MERRIGAN,
Third I. V.-P.

FROM THE RAILWAY DEPARTMENT.

St. Louis, Mo.

(Continued from last month.)

With the adoption of new laws and acting in conformity with the rulings of the American Federation of Labor, the Department was confronted with many problems:

First. To acquaint the membership with the facts that the reorganized department represented very largely the form of organization desired.

Second. That all system federations must become affiliated to the department and recognize its laws and rules of procedure, for in no other manner could the plan of joint action be given a fair trial and the opportunity to prove its worth to the membership.

Third. That only members of organiza-

tions affiliated to the American Federation of Labor and the Railway Employees' Department were eligible to affiliation in a system federation.

Fourth. The necessity of prosecuting the work of organization on the unorganized roads and by so doing protect the interests of the organized.

Fifth. That the success of the department would be measured very largely by the support it received from the membership.

We want the membership at large, and particularly those who follow railroad work, to become thoroughly conversant with the aims and objects of the department. Section (1) of Article XV of the Laws of the American Federation of Labor reads:

"For the greater development of the labor movement, such departments subordinate to the American Federation of Labor are to be established from time to time as in the judgment of the American Federation of Labor, or of its Executive Council, may deem advisable. Each department is to manage and finance its own business."

The Railway Employees' Department is maintained at a cost of one-half of one cent per member, per month, paid direct to the secretary-treasurer of the department by the general officers of the international organizations affiliated to the department. Charters issued by the department to system federations cost ten dollars, for which they receive in return, a charter, seal, ledger, constitutions and one hundred letter heads; this represents the only cost of affiliation; system federations are given the greatest possible latitude in drafting their by-laws; practically the only requirement being that they must not conflict with or usurp the laws of their respective internationals, or those of the Railway Employees' Department; they must be submitted to and receive the approval of the president of the department to be in full force and effect.

The laws of this department were adopted in a convention held April, 1914, the delegates being composed of representative men elected by the members of their respective crafts working on the railroads of the United States and Canada, the grand lodge officers, with voice, but no vote, attended this convention, giving to the delegates the benefit of their wide experience and knowledge gained as a result of their many years of experience in upbuilding their respective organizations. The Railway Employees' Department is the only one of the five departments chartered by the American Federation of Labor which provides for this form of delegate representation; this may be largely attributed to the nature of the railway industry and the necessity of having delegates attend the department conventions who are thoroughly familiar and conversant with the conditions throughout their respective jurisdictions.

Conventions of the department are held biennially, the second Monday in the month of April, even numbered years.

Representation: "Each organization shall be entitled to one delegate from each system federation, who shall be elected at least thirty days previous to the convention, said delegate must be an employe of the railroad he represents or employed directly by the men on the system, and the names of such delegates shall be forwarded to the secretary-treasurer of this department immediately after election."

Notice to Membership: "Ninety days prior to convening the convention, the secretary-treasurer of this department shall notify the secretary-treasurer of the respective system federations of the date the convention will be held; also call attention to the manner of submitting resolutions, election of delegates, etcetera."

In order to meet the conditions prevailing throughout the United States and Canada, the convention subdivided the jurisdiction of the department into five divisions. To avoid detail we will simply state that Division No. 1 embraces all western roads, Division No. 2 all eastern and northeastern roads, Division No. 3 all southern and southeastern roads, division No. 4 all Canadian roads. Division No. 5 includes all locomotive and car manufacturing plants in the United States and Canada.

As rapidly as possible, it is the intention to organize each of these divisions, the system federations will be required to affiliate to their respective divisions and observe the laws and procedure adopted; all of which are subject to the approval of the department.

The specific object in view being to establish a condition that will facilitate negotiations for a joint agreement, embracing all roads and manufacturing plans within the jurisdictions of the respective divisions.

Divisions 1, 2 and 3 are divided into territories that in a general way conform to the different rate zones established by the rulings of the Interstate Commerce Commission. Each division will in a very great measure look after their own business, with the assistance and co-operation of the Executive Council and officers of the department; the laws of the department provide for the manner of procedure in all essential matters pertaining to the division, but are too lengthy to reproduce in an article of this kind. Copies of the constitution can be secured on application.

In explanation to the many inquiries received, the department laws provide for two distinct forms of system federation. One embraces the following organizations: Brotherhood of Boiler Makers and Helpers, Brotherhood Blacksmiths and Helpers, Brotherhood Railway Carmen, International Association of Machinists, International Brotherhood of Electrical Workers and the Sheet Metal Workers. These organizations comprise the Mechanical Section.

The Brotherhood of Railway Clerks, Switchmen's Union of North America and the International Brotherhood of Steam Shovel and Dredge Men represent the trans-

portation organizations, now affiliated to the department, and comprise the Transportation Section. The necessity for this action became apparent when the system federations opened negotiations for new agreements, and under present conditions it will be necessary to work along these lines. The plan represents the sentiment of the delegates attending the April, 1914, convention of the department, and will, no doubt, be continued until we are in a position to negotiate one general agreement for all organizations represented in the department. This must not in any manner be construed to mean that all affiliated organizations cannot or will not act jointly if the necessity arises. We have simply adjusted ourselves to meet a condition which we must and did recognize.

The Railway Employes' Department aims:

- (1) To bring within the organization all railway employes.
- (2) To shorten the hours of labor to eight hours per day.
- (3) To establish a minimum wage scale for all employes in all branches of railway service, said wage scale to conform to the recognized right that all who perform a useful or necessary work are entitled to earn a decent living for themselves and those dependent upon them.
- (4) To perfect the organization of its affiliated parts to a point where we can propose and make joint agreements, either for a specified territory or on a national basis.
- (5) To use all honorable means to prevent strikes or lock-outs, the department being pledged to a policy of conciliation and voluntary arbitration as a means of adjudication in all cases which cannot be otherwise settled.
- (6) To bring about uniform laws regarding per capita tax to internationals, and the inauguration of strikes and financing same.

These are some of the principal things which the department has been organized for, and if you will but stop and analyze the foregoing you must recognize that this department embraces all the features of an industrial organization, in addition to which we receive the financial and moral support of the members of the affiliated organizations irrespective of the industry in which they may be employed, we at the same time give our financial and moral support to them; under this plan and the laws of the American Federation of Labor, all of the great industries of this continent can be similarly organized and perfected. Those of our members who are prone to criticize the American Federation of Labor, its departments and the plans of craft organization, which have so often proven their worth and today stands pre-eminent in achievement, when compared with the labor organizations the world over, should, in justice to themselves and their fellow workers, bear in mind that the American Federation of Labor must, to a very great extent, reflect the sentiment of its affiliated

membership, and if the delegates elected to attend these conventions do not represent their respective workers, these members have the remedy in their own hands.

We have often found ourselves in disagreement with certain of the policies and some of the decisions of the American Federation of Labor, but this would not justify any action on the part of a minority that has for its purpose a division in the forces of labor; the man or organization that is not broad minded enough to recognize and abide by the decision arrived at by the majority, does not, in our opinion, represent an element that would be safe to

(To be continued in next month's Journal.)

Pratt, Kas.

To the Boiler Makers and Helpers of Kansas:

Having returned home from Topeka, disgusted, I will endeavor to give you a synopsis of the jitney legislature just adjourned:

The boiler inspection bill came to its death on the calendar as many other bills did. I had many promises from leaders in both houses that they would consider this bill before adjournment. However, I find that the promise of the average legislator is no more binding than that of a campaign promise. The amendment to the compensation law was agreed to by the employers, insurance people and representatives of labor, was passed by the house and messaged over to the senate, scrambled over for three and one-half hours and killed by striking out the enacting clause.

Four bills were introduced to re-create the State Society of Labor and Industry. At no time was there a shadow of a chance for its passage; just campaign buncombe handed out by Capper for the labor vote.

The full crew and train limit bills were both killed in committee and never came up for consideration on the floor of either house.

A bill was introduced requiring railroads to provide standard cabooses and met the same fate as the full crew bill.

A bill requiring electric headlights on switch-engines was introduced, and, as the railroads owned the committee, it was not recommended for passage.

The Barber Board Law was repealed. This law was self-sustaining and the board had turned over to the school fund over \$500, but Capper is opposed to giving a workingman a state job, no matter if it does not cost the state anything to maintain it.

Some kind of a mothers' pension law was passed, which is absolutely worthless so far as the common people are concerned.

A commission was created to determine the hours of service and wages for women and children; of course the governor will appoint the largest employer of labor and his political appointee as labor commissioner, who will tell us how many hours they shall work and under what conditions.

The semi-monthly pay became a law.

In the campaign of 1916 you will hear what great things were done for labor by the legislature (jitney) of 1915. Mr. Capper and his party have violated every promise made to labor, absolutely disregarding every pledge made and when he appointed Mr. McBride as labor commissioner he proved that political henchmen will be the only ones considered for appointment, and backed up on his offtime promise that he would be guided by labor's recommendation.

Brother John Craddick, president State Federation, Henry Hopkins of the Miners, C. H. Danner of the Conductors and R. V. Snyder of the Trainmen, I wish to thank for their efforts in promoting the boiler inspection bill.

Brother Casey deserves much credit for his efforts and if we had many of his ability and willingness to make a sacrifice for labor, we would accomplish much more. Few of us would be willing to put forth the efforts Brother Casey did at Topeka without any compensation, traveling to and from at night and working on the job during the day.

As for myself, I have no apology to offer. I did my best and any failure on my part was from inability and lack of judgment.

I thank you for your co-operation and sincerely hope two years hence that we will have a representation from each shop-craft at Topeka.

It would take too much space and cost considerable to give a detailed report as to how all the legislators voted on labor measures, but during the next campaign I hope to give account of them should they attempt to be re-elected.

With best wishes and kindest regards, I beg to remain

Fraternally yours,
S. T. SAMPLE.

Portsmouth, Va.

Dear Sir and Brother:

Herewith inclosed you will find a journal mailing list of twenty-eight names. which will show you that the boiler makers in the yards are waking up to the situation, and I tell you I felt much gratified to see them come into the organization. I think we have got all in except four or five, and I believe we will get them in, too, in a short time, as they now see they have to be closely allied to accomplish the things we go after. But it is not only the Boiler Makers alone that see the necessity of becoming organized; the other crafts are waking up to the fact, and the time is very near when we will have a Navy Yard Federation. They are working on it now. I am also looking forward to the time that the Boiler Makers of all navy yards will form a Naval District Lodge, and when that time comes and we can place a good man in Washington and keep him there, we will then get some recognition and good results.

Hoping this list is satisfactory, and with best wishes, I am,

Yours fraternally,
GEO. J. THOMAS,
Cor. Secy. Lodge No. 57.

St. Thomas, Ontario, Canada.

Dear Sir and Brother:

Please insert the following in the next issue of the Journal:
Mr. Alfred Jolliffe.

Dear Sir and Brother: The officers and members of Lodge No. 413 extend to you their deepest sympathy in this, your hour of Bereavement, occasioned by the death of your beloved mother. May God help you bear your burden.

Resolved, That while we lament with sorrow, we must submit to the will of our Heavenly Father, Who doeth all things well.

FRANK ROBERTS,
Cor. Secy. Lodge No. 413.

Tacoma, Wash.

As Lodge No. 568 has not used any space in our valuable Journal, thought I would like the brothers at large to know we are still on the map.

At our last regular meeting we held a little smoker in honor of V. P. Brother Atkinson, and Brother J. L. Callahan, B. A. of District No. 26; almost all the brothers were present, but I don't know if the V. P. and B. A. were the drawing cards or the refreshments. I hope it was the former. All respect and credit possible to give is certainly due Brother Callahan for the good work he is doing as Business Agent of District No. 26. So, brothers, let us all get together and help him in every way possible.

Brother Atkinson has also been a hard worker in this part of the country. We wish to extend him a vote of thanks for his endeavors. We are always glad to have Brother Atkinson present at our meetings.

Business is pretty quiet here. We all hope conditions will open up soon, but remember our policy is the same as ever—no card, no work.

With best wishes to all, I remain,
Yours fraternally,

A. W. RICKETT,
Fin. and Cor. Secy. Lodge No. 568.

Casper, Wyo.

Dear Sir and Bro:

At our last meeting here, which was April 5th, we decided to write to you and have you publish a notice in the Journal for May, to tell all brothers not to come up here, as there is only a little work here at present and we don't care to accept any more clearance cards. There may be some work open in the latter part of the summer but as it is now there is almost more men here than there is work, so if any more men come up here we won't be able to put them to work. So we would like to have you put this in the Journal.

Yours fraternally,
A. R. WITZ, S. L. 596.

Huntington, W. Va.

I am hereby sending a photograph of the boiler makers and helpers of Huntington shops, a part of them, they are not all here,

which I hope to see in the next issue of the Journal, and oblige,

Yours fraternally,

W. L. YOUNG.

A GROUP OF SOME OF THE MEMBERS, LODGE 249, HUNTINGTON, W. VA.

RAILWAY EMPLOYES DEPARTMENT.

Office of President, St. Louis, Mo., March 30, 1915.

To all Officers and Members—Greeting:

We herewith submit a fac-simile copy of a circular (the original of which we have in our possession), being one of several of a similar character that have been sent broadcast by or through the instrumentality of Carl E. Person.

FEDERATION OF RAILWAY EMPLOYES
Now on Strike on the Illinois Central System
Strike Headquarters,

117 South Monroe, Rooms 2 and 3, Clinton, Ill., Phone 736. Carl E. Person, Strike Secretary, P. O. Box D.

Clinton, Ill., Feb. 26, 1915.

Dear Friend:—

We wrote you some time ago and asked you to subscribe for a bundle of Strike Bulletins. As yet we have not heard from you.

It is up to the labor movement to keep the public off the struck roads during the Frisco Fair, in doing this we need your assistance to carry on a campaign of publicity against the roads on strike.

We asked your lodge to purchase a bundle of 10 Strike Bulletins for one year, which will be ten dollars. If you can not do this, please give us an order for five papers for one year, which will be five dollars. Make it possible for us to advertise the strike in your city, won't you?

Please take this matter up at your next meeting, and let us hear from you.

I am fraternally yours,

(Seal)

F. D. COMERFORD,

Attorney for the men on strike.

Make all money orders and checks payable to Carl E. Person, Strike Secretary.

On March 25, 1915, Mr. Frank Comerford appeared before the Executive Council in St. Louis, Mo., in connection with the strike hearings to be held by the Commission on Industrial Relations. He was shown the above letter and declared the signature attached thereto as a forgery and that it was used without his knowledge or consent. Mr. Comerford was asked if he had ever issued or caused to be issued other similar circulars, bearing his signature. His answer was: "Never."

This letter bears the official seal of the Illinois Central System Federation, and while gotten out in Clinton, Ill., was inclosed in an envelope bearing the Chicago, Ill., postmark, showing that they had been transported to Chicago and mailed from the West Pullman Station.

The Strike Bulletin is not indorsed by the department, or any of the affiliated organizations, and the purpose of this circular is to acquaint you with this fact, together with the methods adopted by C. E. Person in an effort to secure financial support.

Issued by the authority of the Executive Council of the Railway Employers' Department of the A. F. of L.

(Seal)
A. O. WHARTON,
President.

JOHN SCOTT,
Sec'y.-Treas.

Elmwood Place, Ohio.

Dear Sir and Bro:

In reading the March and April issues of our Journal, I took particular notice of the communications therein from Brother Maes, of Lodge No. 123, Livingston, Mont., and hope that a few words from my pen will not be out of place. The articles I have in mind

are the proposed amendment to our G. L. Constitution, pertaining to a reduction in salary for our International President. I think that it is absolutely ridiculous, and I might further say it is laughable and if he wasn't so persistent I would be led to believe that he was trying to play a joke on our worthy president, but as the matter really is, I can't for the life of me see how a man who carries a union card in his pocket can conceive the idea of advocating a reduction in wages for anybody, especially so when it pertains to the organization to which he claims membership. It surely shows very plainly on the surface that he has not got a superfluous amount of common sense or diplomacy, or he would never have presented the matter to the rank and file in the manner he did. I'll venture to say that if he had the opportunity to obtain one of the positions in the official roster on our international organization he would very readily grasp it with both hands, and he would no doubt defy anybody to question his ability or anything else. I have been an active member of our worthy brotherhood for quite a number of years, and it has always been my impression that we ought to be brothers in every way that we possibly can, to always try to work in harmony with one another, and strike for better working conditions and increased wages. There is no doubt in the world, but that the officials in every line of business who employ boiler makers, know of every article contained in our Journal, and wouldn't it be a fine thing for the boiler makers of some contract shop or railroad line to go before the management to seek an increase in wages, and have them throw it in your face about your own organization reducing the salary of our international president. Why, they would simply turn you down cold, and consequently you would have a lot of disgruntled members, and they would be very apt to howl because the organization was of no assistance to them, so now you can readily see the fallacy of such an amendment and I sincerely hope it dies a sudden death. It is my honest opinion that Brother Franklin is not receiving one cent more than he deserves, and I feel sure that he is giving us the very best that he has in him and if we shall reduce his salary we are going to hurt his pride and feelings and no doubt he will want to resign from office, and who can but say that he would be missed very much, to our sorrow, so let us get together and kill this amendment.

Just a few remarks in regards to this part of the country; times have been rather hard all winter, but we are managing to pull through somehow and everybody seems to be happy, as prospects are beginning to look somewhat brighter and we all hope that spring will bring a revival of good business.

Hoping you will find space in the next issue of our Journal, and with best wishes and kindest regards, I am,

Yours fraternally,

JOHN CULLEN C. S. L. 91.

Dear Sir and Bro: Green Bay, Wis.

We, the officers and members of Lodge No. 485, Green Bay, Wis., wish you would find space in the next issue of the Journal for a few words concerning our Brother, Alfred Abbott, who has worked at our trade practically all his life, starting in as a rivet heater in the year of 1864 in England, and serving the term of eight years in that country as an apprentice, and finishing his trade complete, he started for the United

BROTHER ALFRED ABBOTT OF LODGE
485, GREEN BAY, WIS.

States the same year, finishing up his apprenticeship, settling down in Marquette, Mich., starting his career again as boiler maker for the D. S. S. & A. R. R. Co., and was shortly married after working there in 1872, or along that limited time. In 1874 returned to England on account of the panic and hard times in the United States and started to work for the same company that he previously had served his apprenticeship with, the London Northwestern R. R. Co., at the Cruve Locomotive works in Cheshire for 15 months, then was laid off on account of poor business.

Leaving there for Manchester he received a position as boiler maker with Galloway & Sons until 1878. On account of reduction in wages they went on strike for 26 weeks and lost out, and finally returned to the United States in June, 1879, landing back in the same old place, Marquette, Mich., and from there to Escanaba, Mich. March, 1880, working for the C. & N. W. for two years, quit and started again for the same company, in the year of 1885, working for them for five continuous years. He finally quit the road to come to Green Bay in July, 1890, to work for the old Milwaukee Northern R. R. Co., better known now as the great Chicago, Milwaukee & St. Paul R. R. system; continued to work at that place until the A. R. U. strike in 1894 then went back to the C. & N. W. where he has remained in their actual service as a competent boiler maker for 20 years.

Until the fall of 1914, on account of sickness of vertigo and rheumatic neuralgia, not being able to perform his daily duties, was granted a pension by the head officials of the C. & N. W. R. R. Co., for the long and faithful service he had rendered. His pension service date starting February 1, 1915. Brother Abbott was born in England, October 13, 1851, and also served his apprenticeship there as before stated.

We, the members, are also gratified to learn that our brother has received a pension for his long and active service with the C. & N. W. R. R. Co., also glad to know that our Brother Abbott is still a member in good standing in our local by still retaining his death benefit fund after taking a with-

drawal card, which has entitled him to all rights and benefits of our organization, to attend meetings which we all know would be a chair vacant in our lodge room that has never been properly filled. We all join in and wish him success for the remainder of his long and active life and being the first case of a charter member arising in our local, we are gratified to have a chance to publish same in our monthly Journal, so as to give the members of our organization a good example. Enclosed also find a photograph of Brother Abbott for Journal.

Yours Fraternally,

JOHN M. SLATER, Sec'y.
JOHN CHRISTENSEN, Pres.

VANCOUVER LODGE 194, DRY DOCK BUNCH, PRINCE RUPERT, B. C.

Dear Sir and Bro: Prince Rupert, B. C.
Inclosed find picture of members of Lodge No. 194 which are working on pontoon dock here at Prince Rupert. This dock is 600 feet long, wood pontoons and steel sides.

It is for the Grand Trunk Railway. This is the first dock of its kind in British Columbia. Would be glad if you would put this picture in the Journal.

Yours fraternally, BOB LACKIE.

Dear Sir and Bro: Buffalo, N. Y.
Inclosed you will please find a program of the Buffalo Technical Evening High School, which I have been attending the past six months, taking a first year's course in mechanical drawing, and I must say that the schools today are far advanced from what they were 25 years ago since I left school.

received the prize, the only one given in this class.

Trusting this may be an opening wedge in inducing our members to attend these schools, and take some interest in the technical pages of our Journal, and with best wishes and appreciation I beg to remain,

Yours fraternally,

JOS. ERNST, Treas. L. 7.
Lima, Ohio.

The drawings that are made and the developments of same are very interesting and instructing, and ought to stimulate all of our young and old members to be up and doing something to advance themselves, for their own welfare, as well as to their employers, they can advance themselves in these schools by studying in their spare time and at the same time take advantage of the technical page of the Journal, which I myself have been following out in detail.

No doubt you will be interested in the enclosed program as out of a class of 32, I

At a regular meeting of Oak Lodge No. 259 the following resolutions were adopted unanimously.

Whereas, It has pleased the Almighty God in His divine wisdom, to remove from our midst the beloved son of our esteemed brother, A. K. Greishiemer; therefore, be it

Resolved, That we, his brothers, extend to the bereaved brother and wife our heartfelt sympathy, in this, their hour of bereave-

ment, and pray that the Almighty God may comfort and console them, and that they may bear their trials with fortitude; and be it further

Resolved, That a copy of these resolutions be spread on our minute book, a copy forwarded to our bereaved brother and wife and a copy be sent to our official Journal for publication.

HARRY L. GUNN,
A. C. THOMPSON,
PATER O'NEILL,
Committee.

Boston, Mass.

Dear Sir and Bro:

I take the liberty and pleasure at this time of showing to our brother members in the other various locals throughout the various states the work I have been accomplishing since I first took the office of business agent of Local No. 585 here in Boston, and vicinity, especially in the increasing of our membership and the general building up of our body.

With the good assistance of all my fellow members from our worthy president, Brother Wm. E. McNabb, and all of our officers and members, there has been good success, as everyone has kept their shoulder to the wheel and have always been ready and willing to assist me in the work which I have been doing.

There has been 14 boiler makers reinstated and two boiler makers initiated. There has also been 14 boiler makers' helpers who have been initiated and 15 boiler makers' helpers who have been reinstated. The above are as follows:

14 boiler makers reinstated.	\$140.00
2 boiler makers initiated.	20.00
14 boiler makers' helpers initiated.	70.00
Total.	\$305.00

We have also had 12 boiler makers' clearance cards taken in and 13 helpers' clearance cards that have been taken. This shows an increase to our body of 170 members. The outlook for a greater increase in our membership is very promising and I have assurances that in the near future our body will be one of the strongest.

I wish to say in closing that I hope every boiler maker who is not at present a member of our local in the vicinity where we are located will get on the firing line and become a union man, as it means protection to himself and a great benefit to his family. I trust that my letter will appear in the May issue of our Journal for the benefit of our fellow members.

Yours fraternally,
DANIEL N. GENERSON,
B. A. L. 585.

P. S.: I am very grateful to Brother John J. Dowd, our Sixth International Vice-President, for the great help, service and advice he has given to me while he was in Boston.

Nashville, Tenn.

Dear Sir and Bro:

You will find inclosed a copy of a memorial of Brother James Fitzgerald and wife to be published at a regular meeting of Lodge No. 42 at Nashville, Tenn., held March 25, 1915. The following resolutions were adopted:

Our brother and wife, Mike J. Fitzgerald, has been called to the great beyond; therefore, be it

Resolved, That we extend our heartfelt sympathy to the family of the deceased and trust that the Heavenly Father will comfort them in their bereavement and help them to say, not my will, Oh, Lord, but Thine be done; and be it further

Resolved, That our charter be draped for 30 days, a copy of these resolutions be spread on the minutes of our meeting, a copy sent to the bereaved family and a copy sent to our official Journal for publication.

Yours fraternally,
BROOKS BREWER,
ELVIN CARVER,
W. T. PENTECOST,
Committee.

Decatur, Ill.

The wave of laying off men has at last struck the members of Lodge No. 447, and twenty boiler makers have been laid off as well as mechanics of other crafts in like proportion. How long the lay-off will last it seems no one is able to tell at present, but we hope not long. Lodge No. 447 is attempting to organize a ladies' auxiliary. At our last regular meeting, April 6th, a short meeting was held, after which a banquet was held, attended by the wives and families of a large portion of the members of No. 447. The committee that was appointed by the lodge to handle this affair did splendid work and deserves some consideration as it was strictly handled by members of No. 447. The object was explained to all present and a great many ladies signed up for a ladies' auxiliary, the result of which remains to be seen. The evening was spent in dancing, the music furnished by members of the lodge and their wives, and all had such a joyous time. It was midnight before we left the hall. It was Lodge No. 447's first attempt and it was such a success we hope it will be repeated in the near future.

Lodge No. 447 has a large membership and should have a large ladies' auxiliary and organized labor be benefited by the cooperation by these two organizations.

Cor. Sec'y. Lodge No. 447.

East Boston, Mass.

Dear Sir and Brother:

The Third Annual Ball of Lodge No. 585, was held on the night of April 9th at Sumner Hall, East Boston, Mass., in a blaze of glory. From 8:00 to 9:00 p. m. A very enjoyable concert program was rendered by Fisk's Orchestra, Mr. Joe Fisk, leader; dancing followed from 9:00 p. m. to 2:00

a. m., with a midnight intermission for supper. The spirits of Terpsichore, Orpheus and Epicurus which seemed to linger while "the dancing was on" made the festive event one long to be remembered. The enchanting music, the beautiful floral and bunting decorations, the handsomely gowned ladies, and the well groomed gentlemen in evening dress made the scene one of animation and beauty. Perfect order prevailed, not one ripple of unpleasantness marred the placidity of the evening's entertainment. Dance number four was dedicated to our tried and true friend, Sixth International Vice-President John J. Dowd, who tried to arrange to be able to be present to greet us with his cheery presence and encouraging remarks in the general situation, particularly in the port of New York, where he has been for some time working with all his strength and sagacity in worthy grand effort to reintimate the slumbering embers of unionism in our craft in the great metropolis but duty, which is always paramount to pleasure with John J. Dowd, prevented him from attending the ball.

The success of the affair both from a social and financial standpoint was due to the committee of arrangements. Wm. E. McNabb, John Warnock, Augustus E. Page, Daniel E. Generson, Daniel B. McInnes, Secy.; Harry Hegan, Thom. J. Farmer, Wm. Clouter, Bernard McDonald, Treasurer; and Chas F. Smith. The officers of the ball were: Floor director, Wm. E. McNabb; Assistant floor director, Thos. J. Farmer; Marshal, D. N. Generson. Aids: Sam'l. Eccles, Chas. L. Schmidt, John Nolan, John J. Farrell, Chas. J. Smith, Jas. E. McNabb, Edw.

Schriren, Danial Higgins, Wm. Warnock and Thos. DeFretas, and among others present, Secretary Jos. Irwin and President Geo. A. Mitchell of Lodge No. 515.

Representative John J. Kearney of Ward No. 2, East Boston, Mass., who is a vice-president of the Massachusetts State Branch of the A. F. of L., and one of organized labor's most consistent and trusted advocates in the Massachusetts legislature.

Wm. E. McNabb and wife and son, Thos. J. Farmer, wife and son, Bernard McDonald and wife and daughter, Jas. A. Vincent, Dan'l. B. McInnes and wife, Mr. and Mrs. Chas. Griffith, Benjamin White and wife, Mrs. Catherine McDonald, Harry Hegan and wife, James R. Spiers and wife, Charles F. Smith and wife, Frank Gardis and wife, Michael Flaherty and wife, John Bernard Gahen, Chas. Jenkins, James Bogan, John W. Cartwright and wife, T. F. DeFretas and wife, Thos. Murphy and wife and daughter, John Wilson, wife and son, Matthew Mason, Thos. Bradley, Thos. Jordan, Jos. J. Kerrigan, David J. Dooley, Jos. Supino and sisters, D. Wolfso, John J. Kerrigan, J. Healey, B. Gallagher, Wm. S. Shannon, John Warnock and wife, A. E. Page and wife, Chas. L. Schmidt, Thos. Lockman, John F. Callahan, Jas. Brown and wife and daughters, Wm. Warnock and wife, Dan'l. Higgins and wife, Wm. Clouter and wife, Wm. Smith, Geo. P. Lawler, Con'l. McInnes and wife, David J. Dooly and wife, Wm. J. Westlake and wife and Arthur Clemens and wife.

Yours fraternally,

DANIEL B. MCINNES,
C. S. L., 585.

PHOTO OF BANQUET, LODGE 450, WASHINGTON, D. C.

Dear Sir and Brother: Washington, D. C.

On some occasions Local No. 450 writes to the Journal on business pertaining to our local. On this occasion we are writing to be published in our Journal of an evening of pleasure, also honor to Local No. 450, which shall go down in history in the labor movement of the Nation's Capital.

At a former meeting it was decided, to hold a banquet to celebrate our anniversary,

and primarily, to get the employer and employes in closer touch with each other, also if possible to get all unorganized boiler makers of this city to become members of Local No. 450.

With this end in view the following committees were appointed, General Banquet Committee, W. Webber, chairman; Geo. P. Smith, H. LeLaurin, M. H. Kimmerling and A. W. Sherier.

Committee on speakers. Jno. Kimmerling, chairman; Jno. Meade and J. D. Evans.

Entertainment Committee. A. W. Sherier, chairman; R. Wagner and C. Crawford. Printing and press committee. O. Baker, chairman; S. S. Kelchner and W. P. Kilroy.

The place and date decided on, the New Masonic Hall and February 29th was selected.

The following gentlemen were extended invitations. Hon. Edw. Keating, member of congress from Col. Frank Morrison, Sec. A. F. L., A. J. Berres, Secretary Metal Trades Department, A. F. of L. C. H. Clayton, clerk of committee on labor, U. S. Congress, Hon. Franklin Roosevelt, Secretary of navy, sent his regrets owing to business of a pressing nature at this particular time.

The following employers, Mr. Boswell, Mr. Webber, and Mr. Briscoe were present. Brother Keeler, secretary of Columbia Lodge No. 174, Brother Rucker of the Pattern makers, boiler makers from railroad and contract shops not members of our local and all members of Local No. 450 were present.

Brother Thos. Nolan having business in the city at the time kindly consented to act as toastmaster, which was done in a very able manner.

The reception started at 8:30 p. m. in the main auditorium, where Moody's Union Orchestra was stationed, our esteemed President, Bro. A. W. Sherier and International Vice-President Nolan in a few words of welcome led those present to the banquet hall on the next floor, which was beautifully decorated by the committee in charge who are deserving of great credit.

The tables were arranged in an artistic manner, laden with all the best the season affords, together with the beautiful vases of flowers, was a sight to freshen the appetite of those present.

This part of the program was attended to by the following wives of members of Local No. 450: Mrs. A. W. Sherier, Mrs. Wm. Webber, Mrs. Geo. Smith, Mrs. J. W. Kimmerling and Mrs. M. W. Kimmerling, also Mrs. LeLaurin, wife of our foreman boiler maker at the Navy Yard. Mr. Le Laurin although holding a withdrawal card has always taken an active interest in the welfare of our local. Great credit is due the ladies, for without their gentle touch and energy our banquet would not have been the success it was.

After all present had been filled to the utmost midst the strains of popular airs from the orchestra, a flashlight picture was taken, a copy of same I inclose for the Journal. While union made cigars were passed around, Brother Nolan in his able manner, introduced the speakers.

Hon. Edw. Keating spoke on organized labor in general, his connection with same, at present holding a card in the Printer's

Union, his remarks being received by loud applause.

Frank Morrison, spoke in his usual witty manner of telling incidents and having the honor of being an uncle to a coming boiler maker.

A. J. Berres spoke on the benefits of the metal trades department of the A. F. L.

C. H. Clayton spoke of the co-operation of the Labor Committee in Congress to assist the labor unions and to assist as far as he is able the Brotherhood of Boiler Makers.

B. P. Donnelly, chief gunner of the U. S. N., whose remarks were of interest, being scientific, theoretical and logical, concluding his speech on the effects of the speeding up systems in navy yards and arsenals in connection with the intricate parts of guns on the battleships of our navy. Though not in a position to be a union man, Mr. Donnelly has always been ready to give his assistance at any time to organized labor.

Mr. Briscoe, Mr. Boswell and Mr. Webber spoke on their intention to co-operate with the union man.

Brother Keller, noted for his oratory, and Brother Rucker also well received remarks.

The hour getting late our toastmaster moved to adjourn and all present sang "America" standing, after which all retired to their homes, satisfied that the boiler makers of Washington, D. C., Local No. 450, had paved the way of informal meetings of this nature where employes and employers could meet on equal ground, become friends for each other's interest and create the feeling of true brotherhood, which as organized men, we all strive for.

Fraternally, J. D. EVANS,
A. W. SHERIER,
W. P. KILROY.

Brainerd, Minn., April 10, 1915.
Editor Journal—Dear Sir and Brother:

It seems to have become a characteristic habit of yours to brand most statements not in accord with your views as not "authentic," "not based on fact," etc. This method is not new, nor does it satisfy the average member. Some may probably consider such a statement from you as being final, but I think the large majority of our members are too intelligent to accept such as proof.

Now, in your reply to a resolution from Lodge No. 116 and unanimously indorsed by Lodges No. 123, 111, 130 and 247 (which indorsements were not published), you take the position that said communication was simply "addressed" to J. A. Franklin and others, and these were requested to give their private opinion on the subject. Now, brother, you are either ignorant of the full contents and purport of that communication or you are resorting to subterfuge. To be sure it was addressed to J. A. Franklin as head of this organization, that, I believe is the usual manner of submitting questions to this organization, but to infer that only his opinion was requested is not only misleading but is absolutely wrong.

As proof of such, all one needs is to read the communication as published in the Machinists' Journal for November, 1914. If you have read that communication, then I insist that you are quibbling. But, possibly, you have not read it. If not, then suggestions being in order, I suggest that before accusing others of rushing into print and making misstatements, that you permit the president to answer for himself, or be sure you understand the facts yourself.

I am forced by your note to furnish proof that this communication was in reality addressed to our whole organization through the medium of our president. This communication embraces a report adopted by the general officers of the Machinists' Union, approved by their general executive board, submitted to a referendum vote and indorsed. Now the machinists' organization is not in the habit of going through all that business simply to get the private opinion of Messrs. Franklin, Kline, Haynes, McElroy, Kirby, Daly, McNulty and Alpine. The report and the resolution adopted expresses the views of the machinists' union on the question of amalgamation, and its purpose is to get the other metal crafts to investigate the proposition.

In President W. H. Johnston's letter, he makes it very clear that it is intended to bring about a full discussion and an extensive study of this question. I quote from his letter. He says, "It now becomes my duty, under the provisions of the resolution, to get in touch with you with a view of fulfilling the full purport of the resolution, and ask your organization, through you, to give me some expression as to your position on this very important question."

This is very clear, it is an expression from the boiler makers' organization that is requested, not from Brother Franklin as you infer.

Further on he states, "I am sure that you will agree with me that this is a question that cannot be worked out in a day or possibly a year. It will take time, as it is an educational question and must receive the best thought of the rank and file of your organization."

Now it is very probable that the resolution opposing this question was drawn up by one man on the committee appointed by our executive council, and possibly not more than half an hour's study of the whole question was given, if any at all, for the committee was instructed to report unfavorable.

Now brother, I respect our grand lodge officers and consider them competent men, but I must condemn the method by which they have handled this matter. Place the machinists' report side by side with the report of our executive council, and one must agree with the brothers in Winnipeg when they term our executive council's resolution "childish" and without "logic."

Considering the actions of our officers on this question, and the failure to publish said communication in our Journal, it seems

clear that an attempt is made to smother this question, hoping that it will eventually blow over. Our resolution, in view of these facts, is correct in condemning our officers' conduct. Regarding the statements made in an editorial in our Journal for December, it seems quite consistent with our officers' action, and to read it again, in the light of these further evasions and subtle insinuations, it is obvious that the motive was to breed distrust, thereby preventing a getting-together on this question.

Perhaps it was you, Brother Editor, "that acted hastily in drawing conclusions because of not being fully informed." Now I have stated this as frankly as possible. I have absolutely no personal feeling against any of the officers. I believe they have made a mistake and that you, brother, in attempting to justify wrong procedure, are also in error. It's not a good policy. So far as I am concerned, I am willing to drop this feature of the question, providing our officers see to it that this communication is published in full in our Journal, and that a free and full discussion is permitted on the question.

Lodge No. 116 feels that it has simply stated facts in plain language, not for the purpose of hurting the feelings of our president or you, brother Editor, but to impress it on our officers that the only way to do business for us is to do it openly and straightforward. This is too important a question to be handled lightly and, if amalgamation is to be the logical outcome of development in the labor movement, nothing can stop it.

I trust that our officers will look at this question in a proper light. I do not mean that they should favor it, simply that in the last analysis it is the rank and file that must decide, and necessity will determine what their decisions will be. Let us discuss amalgamation seriously from every angle. I hope that personalities and ridicule will be dispensed with and that a clear, logical argument for and against will be conducted in our Journal.

Hoping to see the communication from the machinists in this month's Journal,

Fraternally submitted,

J. G. BROWN, Lodge No. 116.

Winnipeg, Canada.

To the Officers and Members of the I. B. of B. M., I. S. B. and H. of A.:

To continue the discussion of a further amalgamation of the workers engaged in the railroad industry which was suggested by Brother McGowan of Lodge No. 377 and commenced by Lodge No. 126 of Winnipeg in the March Journal and which was replied to by Brother Franklin in the same issue, in which he states among other things that ("it might be well to add at this time that there are members of the executive council who were affiliated with the labor movement, giving the very best that was in them, in the interest of our movement when the authors of this article were in

swaddling clothes. If such statements were not disgusting to men of sober thought, they might be considered funny") and also ("it is a wonderful thing to dream dreams and to see visions").

Now one would glean from the above that Brother Franklin was attempting to convey the impression that human beings gain in wisdom, "like whiskey does in quality, with age." If such is the case, one will have to admit also that it is sometimes very difficult to "teach an old dog a new trick" and if after studying past history as far as written history goes one finds that the workers have always been treated the same, if not worse than the other animals (and I use the word animal here, as the human species is only different to the rest to the extent that he is "supposed to think") that the workers have been ruled, robbed and fooled by a master class through most of the time of written history, "ruled" to the extent that the master class had the physical and mental "might," "robbed" on an average of all they were able to produce, with the use of the different kinds of "tools of production" of the different ages, robbed of all except what it took to keep them in their different standards of living and reproduce their kind, as it is necessary to have other workers when the older ones are dead or are cast on the industrial scrap heap. "Fooled" to the extent that the master class could use the public institution of information, such as the "press," school and church, to mentally chloroform the workers and after learning the above, one comes to the inevitable conclusions that only insofar as the workers as a class understand their "class position" in human society and to that extent so organize to combat the master class, is the only way that they (the workers) have ever secured anything to their material interest.

Further we find that the position of the "working class," as compared with the masters is relatively speaking worse at present than any time in history, by this we mean that the workers on an average receive less, as compared with their total product, this being accounted for by the fact that with the aid of more modern tools, their capacity to produce more has greatly increased and the amount of the same, that they receive in the form of wages, has not kept pace with the increased product, although wages have had the appearances of increasing from time to time, hence the spectacle of the 20th century wage slave being the most prolific of any kind of a slave that has existed to date.

Also that human labor power is the "only human factor" necessary in wealth production, hence to the workers the whole product (by all the reasoning of common sense) should belong.

Now after considering the above analysis of the working class (which, by the way of a reminder, the member of this International are part and parcel of, although there is no doubt but what some might think

otherwise) we advocate certain changes in the form of our present organization, which we think will place us in a better position to combat the master class. If said changes are not in accordance with the ideas as expressed by Brother Franklin and Brother Gompfer's *la H. F. of L.* and for that reason are the external indications of a "dreamer" and one who attempts to express such ideas verbally or in writing, according to our president, are the sure symptoms of the one so doing "dreaming dreams," although we had always been led to believe that "a dreamer" was one who, in a somnolent state, was unconscious to everything except the sub-conscious involuntary action of the mind, a condition, we are not, as yet, willing to admit we are in.

But to get back again to Brother Franklin's article, page 194, *March Journal*. From reading same one would come to the conclusion that Lodge No. 126 was offering a cut and dried plan of an organization that would completely emancipate at least the metal workers, but if any have such an impression, we ask you to carefully re-read the article by Lodge No. 126, appearing on page 193 of the same *Journal*, after which we think you will agree with us, in what we intended the article to be, namely, the means of using the pages of the *Journal* for the friendly and intelligent discussion of further solidification of the railroad and metal trades and other important subjects that could and should be discussed, no doubt to the advantage of all of us, if necessary to the exclusion of the lengthy accounts given of the grand reception given to so and so, or election of officers held, after which followed smoker, etc., or some one born, died or married, all of which, no doubt, is very interesting to those immediately concerned, but with but very few exceptions is not of interest to anyone else.

In expressing the above we believe we are saying what was amply exemplified in the April issue of our *Journal* by the different articles by members of the different lodges.

Of special interest are the articles by Lodge No. 179 of Denver, the one by Brother Brown of Lodge No. 116, also the ones from "the Railway Department" and Brother Lines of Springfield.

Now just a word in answer to Brother Lines' article on page 287 of above *Journal*, where he expresses doubt as to the feasibility of men learning to be all round mechanics, permit us to say that that is the affair of the masters, not ours, our concern is not, at present at least, to produce more wealth, but how to get a greater portion; if not all of that which we already produce and the masters are looking well after their end of it, as is so ably pointed out by the article from Lodge No. 179 on page 277, that in place of the companies making all round mechanics, they are doing just the reverse, making specialist or more machine tenders if you like, something the writer as well as any "boomer" can testify to. So

let us be frank and whether we like it or not (most of us don't) and admit that our trade like most all other trades is becoming so specialized that it is impossible to tell where one trade leaves off and the others commence.

Now let us see where our interests as railroad workers are in common and for that purpose will copy the preamble of the C. N. R. R. System Federation, which was adopted at a meeting of that organization held recently.

"The Federation of Shop Employees of the Canadian Northern Railway System recognize the following as being of vital importance that may require united action at any time:

- No. 1. Hours of work.
- No. 2. Overtime rate.
- No. 3. Wages.
- No. 4. Discrimination.
- No. 5. Disposition of old employees.
- No. 6. Apprentice question.
- No. 7. Recognition of the federation.
- No. 8. Recognition of joint shop committees.

The cause for either will be cause for joint action.

Now brothers, let me ask you, if the only thing left out in the above, worth considering, is not the demarkation of trade lines which we pointed out was so complicated that it was impossible to tell where one leaves off, etc.?

Now, let us candidly ask you in the name of common sense is it worth all the expense of keeping up the different organizations as pointed out by Brother Brown of Lodge No. 116 on page 273 of April Journal? Is it worth all the time spent in jurisdictional disputes as is evident by reading the proceedings of any trade union convenient? Stop and consider the time spent by our international officers in such disputes, just read Brother Franklin's report to the last convention and see what a great amount of his time was taken up in this respect, then consider for a minute the other organizations and you will get some idea of what an expense we are put to, not to fight the "Master Class," but to scrap between ourselves, all for what? To see what worker will do a certain piece of work to the exclusion of some other worker. Can we lay claim in any sense of the word to being progressive and continue such tactics as these?

It is with regret that the writer of this article has to announce the departure of the Brother who originally started the discussion of this subject through Lodge No. 126 in the pages of the Journal, as he was compelled to leave, in search of that ever elusive "job," so it becomes our duty to continue it and in so doing, we realize that one cannot mention everything that can be said for or against a subject of this kind in one or even several articles of this size, but in finishing this time, again permit me to quote from the proceedings of the recent C. N. R. Federation Convention, after-

noon session, second day proceedings. We find this, "Whereas we believe that organized labor, particularly in the metal trades would accomplish far better results under one organization. Therefore, be it resolved that this federation go on record as being in favor of the amalgamation of the metal trades under one grand lodge and one set of grand lodge officers."

The foregoing was unanimously indorsed by the above organization, showing to what extent the move is being considered up in this country.

Just a word aside from the above subject. Lodge No. 126 has a provision, as most of you are, no doubt, aware, in the March and April Journal, offering a recall proposition for Grand Lodge Officers. It is not the intention of the writer to discuss same at this late date, only to point out that Lodge No. 126, after re-considering part of same decided to withdraw the lines (such statement not to exceed 300 words) contained in part (b). This change will no doubt be made on ballots by Brother Franklin if it receives sufficient support to get that far, which you have until May the 10th to decide on.

Now another word in regard to what appears to be a mistake of some sort, in the article by Brother Freeman of Lodge No. 96 which appears on page 288, April Journal. He deals with a resolution which according to the way it is in the Journal, is offered by Lodge No. 126, when from what follows, a mistake of some kind is very apparent.

In closing, let me add to the suggestion offered by Brother Franklin to the members of Lodge No. 126 in his article in March Journal ("not only to study the history of the labor movement in this country") but study the history of the workers, as far back as written history goes through the ages, study the class position of the workers at the present time, learn to understand the system in which you live and it is a safe bet that ere long you will be classed among the "dreamers" also as maintained in the early part of this Article.

Yours fraternally,

R. C. McCUTCHAN,
Member Lodge No. 126.

Cushing, Okla.

Dear Sir and Brother:

Under separate mailing envelope I am sending you a photo of the burial of the late Brother Alec MacAvoy, Reg. No. 31223 of Osage Lodge No. 592, who succumbed to pneumonia after a short five days' period. Brother MacAvoy was born in Lima, Ohio, initiated in Lodge No. 83 of Jackson, Tenn., April 29, 1903. Recently was reinstated in Lodge No. 486 of Tyler, Texas, had also been a member of Lodge No. 37, New Orleans, La., and No. 592 of Tulsa, Okla.

Brother MacAvoy was a tried and true member and has been the sixth member to pass away in the oil fields within the past three months. Brother Perry MacAvoy

of Lodge No. 90, Sugar Creek, Mo., brother of the deceased attended the burial and is seen in the picture near the left of the remains. Fifty members of Lodge No. 592 escorted the remains as a mark of respect from the undertaking parlors to the Catholic Church of Cushing, where Reverend Father Trienekens celebrated a requiem mass after which the remains were interred at Cushing Catholic Cemetery.

Lodge No. 592 mourns the loss of a staunch trade unionist and a beloved friend in the passing away of Brother Alec MacAvoy.

Resolutions of condolence will be found in another page of our Journal including the

names and register numbers of Brother MacAvoy, Frank Hanivan, John Carrigan, Chas. P. Callopy, O. J. McBride and James B. Farrell, who also have in the past three months been removed to eternal rest through the divine wisdom and mercy of Almighty God. May Eternal light shine upon them.

With the exceptions of Brother MacAvoy and Brother Carrigan interment was made at distant points. Brother P. J. McBride at Bloomington, Ill., Brother James B. Farrell at Dayton, Ohio, Chas. P. Callopy at Olean, N. Y., and Brother Frank Hanivan at Titusville, Pa.

Respectfully submitted,
JOS. P. RYAN, 8th I. V. P.

Livingston, Mont.

Dear Sir and Bro:

Please insert the following article in the May issue of our official Journal.

In the April issue of our Journal, appeared several articles written by our members, which are against the resolution presented by Lodge No. 123, and what for, to discourage the rank and file against the resolution. Of course, all the articles are a disapproval of the resolution.

It seems very strange that not a one appears approving of our resolution, and yet we know it to be a fact that an approval to our resolution was sent to the editor for publication, and which was refused on the grounds that it was inflammatory.

Brother Hinzman's article, consisting of four pages in the April issue of our Journal, not only abuses one of our members, but the entire Lodge of No. 123. He goes on with a big howl and uproar, about the articles Brother C. J. Maes wrote for the Journal, stating that they are not facts, that they are misstatements. Read Brother Hinzman's article and see if he proves that they are not facts. The statement that Brother Maes is capable of inducing seventy-five members of Lodge No. 123, is to broad a statement for anyone to make, and get away with it, without a bit of retaliation from the members of No. 123, and we feel that Brother Hinzman owes this lodge an apology. Also to Brother Maes, at the same time begin practicing what he preaches, lay aside the hammer, boost and quit knocking our members and our resolution. Talk about machine politics, what else can one make out of those articles in our Journal, everything against, nothing for, and note who wrote them, an article for the resolution is considering inflammatory. Why not print an article for once in a while. Oh, no! just what happens to suit the editor or our dear Brother Hinzman. Away with this one-man power, give

us all equal rights to the Journal. Our claim is that the rank and file is competent to transact any and all of the business of this Brotherhood, and to vote on questions after free discussion in the lodge room, without a word from the officers who happen to be paid employes of our Brotherhood, especially as the disgruntled argument Brother Hinzman wrote. He must be afraid that he won't get a raise in his salary. If high salaries is all he can advocate for officers, then we had better have no officers at all. We claim the salaries were high enough and which they are, as they receive all expenses, including everything. There is not one who looks like a "million dollar beauty" to us. You are all being paid better wages than any of us who are working at the trade.

We care not what the salaries are of the other organization officers, as that seems to be the big thing at convention, to raise the salaries of some officer and then go back home and boast of what was done. The A. F. of L. raises salaries, then the metal trades, and so on down the line until they get entirely out of any comparison of the man who toils in the shop or factory. Put the brakes on brothers, or we will have to pay more per capita tax in order to pay the officers their salary.

Yours fraternally,

C. D. CAIN, President.

THEO. W. EVERT, C. & F. S. L. 123.

Cushing, Okla.

Dear Sir and Brother:

At the last regular meeting of Osage Lodge No. 592, International Brotherhood of Boiler Makers, Iron Ship Builders and Helpers of America, the following resolutions were adopted:

Whereas, In a short period of three months the Almighty God, in his infinite wisdom and mercy, has caused to be removed from our ranks six of our brothers, namely,

Brothers James B. Farrell, Reg. No. 58684; P. J. McBride, Reg. No. 9938; John Corrigan, Reg. No. 99176; Charles P. Callopy, Reg. No. 42730; Frank Hanivan, Reg. No. 77483, and Alec MacAvoy, Reg. No. 31223; and,

Whereas, Osage Lodge No. 592 mourns the loss of the aforesaid departed brothers, as they have proved themselves tried and true trade unionists for as throughout the storms and trials undergone by our organization; and,

Whereas, We have suffered their loss at a time when the members of Osage Lodge No. 592 are engaged in a bitter struggle to maintain the wages and conditions we have fought for in the years gone by, thereby making our tribulations greater at a time when we are struggling for victory in a

fight forced upon us by seven of the largest firms erecting work in the oil fields of Oklahoma; therefore be it

Resolved, That we extend to the relatives of our late departed brothers, our heartfelt sympathy in the sad hour of their and our bereavement, that a copy of these resolutions be sent to the relatives of our departed brothers, a copy be spread upon the minutes and a copy sent to our official Journal for publication, and that our charter be draped for a period of thirty days.

JOHN J. LAWLER,
ERNEST B. AWAIN,
RICHARD LEAHY,
JAS. DONOHUE,
ED SHEEHAN,
Osage Lodge Committee.

A GROUP OF SOME OF MEMBERS OF LODGE 471, CRISTOBAL, C. Z.

Paraiso, C. Z., Pan.

Dear Sir and Brother:

Inclosed herewith a photograph of a group of boiler makers, all brothers of Local No. 471, Cristobal, C. Z., Panama, reading from left to right, top row: Ben Crozier, Tom Bozarth, Walter Jones, Victor Z. McMullen, Former Secretary Benedict, Peter Ender.

Bottom row: Andrews, P. C. Whitie, R. H. Van Hoose, Louis Dittmer. Taken in Plaza in Colon, Republic De Panama, a few months past, and thought I would send it up for publication as some have returned to the States.

With best wishes to the whole old gang, also to the fraternity, I remain

R. H. VAN HOOSE.

Livingston, Mont., April 10, 1915.

Dear Sir and Brother:

I must again ask space in our Journal as a matter of personal privilege, in answer to the various brothers who seem to think I am Lodge No. 123, or at least the head of a machine that controls it, and proceed to give me a personal lambasting, because I have committed the heinous crime of daring to criticize Grand Officers and a convention that I and others believe was dominated by them. If I had written articles criticising McNeil or Dunn during their term of office I would have got the same

dose; yet if someone had dared to investigate and expose them, how much trouble, scandal and shame would have been saved our Brotherhood. I do not consider Grand Officers our masters, but our servants, hired to do our work, and open to criticism for all acts when officially engaged. So their and their friends' sarcasm and ridicule is wasted on me, as I had no idea they would agree with me. Now it is the common practice for those accused of wrong doing to make a big fuss, enter general denials, accuse their accusers and kick up such dust that the true issue is lost sight

of, but it won't work this time. Neither Lodge No. 123 nor myself are on trial. When we are, let them come; they will find us waiting.

President Wilson said in a speech: "The Nation is not fed from the tops, but it is fed from the inconspicuous people up." This applies to a union, as well as a nation. Brother Flynn of Lodge No. 154 will not give me credit for trying to be fair and just, nor would he give anyone else who disagreed with him. I would say to Brother Flynn that I have voiced the sentiments of the "rank and file" the same as he or others who write articles on question they are interested in, no more and no less.

Now as to the "unfortunate tourists" of Brother Flynn's, I have many friends among them, as 33 years at this trade in various sections where they abound has convinced me they are no different than other brothers except they like to travel and they have a change oftener. I have met many of them in the last six months and everyone agrees with me, and many talk more bitter than I do. I have never turned one down that floated along, nor does Lodge No. 123, as we maintain ple cards at four different points all the time, and many "boomers" have told me stories that do not agree with Brother Flynn's of the generosity of Grand Officers. I have not figured out the per cent, per member, per year, like Brother Flynn, nor do I care to, as it is not the question. Perhaps the mathematical brothers can figure out the per cent, per member, per week, that is still owing the brothers who gave up jobs on the I. C. and Harriman Lines to become "unfortunate tourists" for the benefit of organized labor. I consider that a moral debt that had better be paid before increasing salaries of those who were drawing steady pay during that time, patting the brother on the back, telling them to stick to it, we are bound to win, and finally stopping the benefits of the few who were not discouraged, but continued to fight, hoping these "well appearing" men were true prophets. About \$160 that would be due the writer at \$7 per week would look good to him now, and I gave up a job that was paying \$145 per month to be called a knocker, ridiculed and slurred by these high brows, because I am exercising my right to fight what I consider wrong, an injustice to our members and a menace to our Brotherhood. But we cannot suppose a General Organizer of the A. F. of L. like Brother Flynn to understand such a figure, as it would be wrong to pay brothers thusly, but it is better that he and others go riding over the country in Pullmans, eating in diners, stopping at the best hotels and asking for more salary on the strength of the flexibility of their jawbone and "dignified" appearance.

If I were to be robbed, I would as soon that a sneak thief would do it as a hold-up; the effect is the same. Brother Flynn gives his deduction of my motives; now my deduction of his article is that we would

sing a different tune if his commission as a General Organizer of the A. F. of L. was canceled, and he would become an "unfortunate tourist." But no danger, as professional union men of this type generally have a finger in some treasury where material for a machine is needed.

Now Brother Bingham of District No. 23 has his slam at me and No. 123. Some of his articles are logical, but the silly, absurd talks of Grand Officers having to eat at soup houses, free lunches and travel in box cars is all rot to those who know they are allowed \$3 per day for hotel bills and legitimate expenses. When we see expense accounts of \$3 per day for the calendar days of a month, then several items of Pullman fare, meals in diners, all totaling many dollars extra, we wonder how a man can sleep in a Pullman, eat in a diner and at the same time have \$3 a day bill at a hotel. It is out of the question; it can't be done except on an expense blank with a pencil. President Franklin has to O. K. such expense accounts to make them payable, and does it. When Vice-President Merrigan took charge in Canada, his reports showed hotel bills of \$2 and \$2.50 per day, but someone must have written him a letter, or put him wise, for his next reports show that all the hotels charged him \$3 per day at the same places where they charged him \$2 and \$2.50 the preceding quarter. Now, don't take my word for a bit of this; get the expense accounts from our secretary each quarter, look up the old ones and see if I am lying or "trying to give a wrong impression to our members in order to bring our Grand Officers in disrepute." Seeing is believing; look for yourselves; think for yourselves, and don't take the blarney of professional hot air artists for facts.

If Brother Bingham really wants proof of the short haul Pullman lines, let him look up the reports for the last quarter of 1914 and not rush into print disputing a man who knows whereof he writes. I never knew before that a man to have brains that would be useful in official positions, to meet employers, had to have the appearance of Apollo or the dignity of an old world monarch. I supposed such men were chiefly for high society functions. I stand corrected, Brother Bingham; I will never vote for a man for official position until he produces a certificate from a court of beauty. But I have known men of different unions and holding official positions, who seemed to deliver the goods, yet they did not strike me as \$10,000 beauties. Now as regards raising salaries, I believe it should be done by referendum, not by a convention representing about one-fifth of our Brotherhood. Our referendum law is too unwieldy, and made that way by the enemies of referendum, because under referendum a machine is not possible, and the men who pay the dues, make the laws, and not a hand-picked law committee. The machinists have adopted that plan of doing business, and who will say their order is not progressive, im-

proving and initiating more up-to-date ideas than we are with our out-of-date plan of doing business. We need referendum, but not referendum hampered by laws designed by its enemies to defeat its usefulness. I expected to hear from Brother Bingham, as he was an important part of that convention, and I did not expect him, or any of the rest of the machine, to acknowledge its existence.

Now, brothers, I should nearly fill the Journal if I endeavored to reply to all of Brother Hinzman's article, so I will only touch on it. He quotes a portion of my argument at the Railroad Department convention, and endeavors to show a veiled threat therein. Now I will trust the brothers who are not blinded by prejudice to discern the difference between a threat and a warning. I resent the insult to Lodge No. 123 in his statement of my inducing 75 members of Lodge No. 123 to indorse the resolution. I or no one else can make the members of No. 123 vote for anything they don't want, and if the dear brother thinks he can, I extend him a very cordial invitation to come and try it. Now, dear brothers, you know better, you have met other members of Lodge No. 123 and know they are not the kind of men who are led around by the nose by anybody, but a bunch who take an active interest in the affairs of our Brotherhood. Have you a better lodge on the roster, that keeps its accounts better, takes a larger interest in all union matters or takes less time of our Grand Officers? We have not had a visit from a Grand Vice-President for nearly two years, yet they have been all around us and through this city. Still, we exist and have good meetings.

Now as to my being an expert machine man, I remember having to rise to a point of order at the Railway Department convention at Kansas City, and object to Brother Hinzman voting on vive voce vote, when he was not entitled to a vote, but wished to defeat a pending motion, and his gentle voice counts some in a vote of that kind. Then to talk of me instructing him in machine politics. Why Boss Croker of Tammany Hall fame had nothing on him. And now a word to you, Brother Hinzman. I will put up my hammer when the men who pay the dues control our union and all its business. It was the fault finders who were not satisfied with conditions, who made our union possible; it was the fault finders who caused its advance, and it is the fault finders of today who are not satisfied to remain tied to the HAS BEENS and who will raise it out of the rut of self-satisfaction, and place it abreast of the times. This Rip Van Winkle period is getting very tiresome. If I am violating the laws of our Brotherhood, prefer charges, but no one can intimidate me. My closing advice to all brothers is: Read your Journals, read the quarterly reports, also the executive council proceedings, and keep track of things. I do not wish to dictate to a solitary member how

to vote, but wish them to know the truth before voting. "Eternal vigilance is the price of liberty," and this applies to unionism as well as politics.

Fraternally submitted,
C. J. MAES of Lodge No. 123.

Dear Sir and Brother: Danville, Ill.

Lodge No. 22 has sent out raffle tickets on a watch to get Brother Thompson an artificial leg.

We would like to have you print a notice in the next month's Journal, notifying all locals who have not as yet sent in their stubs or money or the tickets please do so, as we would like to hold the raffle the first of June, but if it is too late to be printed in the next Journal, we will have to hold it for the first of July.

Hoping I have made this clear enough and expecting an early reply, I am

Fraternally yours,
W. J. IRWIN, C. S. L. 22.

Cristobal, C. Z., Pan.

Dear Sir and Brother:

I was advised by our local to write you about some men here on the Isthmus who have come down here below the standard scale of wages (60 cents per hour), and some have a card; they came down here as riveters and caulkers. They are getting the men here for 60 cents per hour, first class men; we are trying to uphold the scale of wages here and there men come and tear it down.

We would like very much for you to put a notice in our Journal about this matter of men coming down here for that money.

Hoping you will do this for us, I am

Yours respectfully,
C. S. LODGE 471.

A COMMUNICATION FROM THE METAL TRADES DEPARTMENT.

Washington, D. C.

To the Internationals.

Greeting:

The secretary of the Bridgeport Metal Trades Council writes us that the Bridgeport Arms Co. of that city is increasing the size of their plant so that they can better and more capably handle the orders that they have for munitions of war. He also calls to our attention the fact that advertisements are appearing in the local papers which largely exaggerate the true conditions of affairs at Bridgeport. These articles, of course, are inspired by the manufacturers and the result of such advertising is for the one purpose of overcrowding the city with mechanics, and I am informed that there are a great many men of the metal trades out of employment at the present time.

I would suggest that mention be made of this fact through your journals to your membership so that the conditions in Bridgeport will not be made worse than they are by an over supply of workers from which the manufacturers can draw from and as a consequence perhaps reduce the wage rate.

With best wishes and hoping you will give this matter your earliest attention, I am
Fraternally yours,
A. J. BERRÉS,
Secretary-Treasurer.

Roanoke, Va.

Dear Sir and Bro:

At the last regular meeting of Melrose Lodge No. 29, the following resolutions were adopted:

Whereas, it has pleased the Almighty God to remove from this world of trials and sorrow our beloved Brother, D. B. Baker; therefore, be it

Resolved, That we, his fellow brothers, extend to his wife and daughter our heartfelt sympathy, and pray that God, the great Creator who doeth all things well, may be ever ready to comfort and console them in the hours of bereavement and sorrow, and give them confiding hope that his spirit has departed to a better and brighter sphere where sorrow is unknown; and be it further

Resolved, That a copy of these resolutions be sent to the family of Brother Baker, a copy be sent to the Journal for publication and a copy be spread upon the minutes of our meeting.

Fraternally in sympathy,
J. F. MURRAY,
H. D. MAUCK,
Committee.

Wichita, Kas.

Whereas, It has pleased the Almighty God, in His infinite wisdom, to remove from our midst the beloved mother of our worthy and esteemed brother, Joe Ringey; therefore, be it

Resolved, That we, his fellow brothers, extend to our brother our heartfelt sympathies in this sad hour of bereavement, and as we bow in humble submission to the will of Him who doeth all things well, we pray that the Almighty God may comfort and console him that he may bear his trials with fortitude; be it further

Resolved, That a copy of these resolutions be sent to our bereaved brother, and a copy be sent to the Journal for publication.

Fraternally in sympathy,
S. F. SLOAN,
PHIL DUNN,
H. B. LING,
Committee.

Lafayette, Ind.

At a special meeting of Star City Lodge No. 36 (360 O. I. B. of B. M. I. S. and H. of A.), the following resolutions were adopted:

Whereas it has pleased Almighty God in His infinite wisdom to remove from our midst the mother of our esteemed Brother, Charles Hentze; be it

Resolved that we extend to the bereaved family our sincere and heartfelt sympathy in this hour of affliction; and be it resolved that a copy of these resolutions be sent to the family of the deceased and a copy be sent to our Journal for publication and also a copy spread on the minutes of our next regular meeting.

WM. H. CASSMAN,
FRANK L. BONGEN,
WM. MATTHEWS,
CHAS. LAHRMAN,
JACK HALPIN,
Committee.

NOTE:—The following night letter was received from Brother T. C. Maddy, a delegate from Lodge No. 587, Beaumont, Texas, to the State Federation of Labor in session at Austin the contents of which is self-explanatory.—The Editor.

Austin, Tex., April 20, 1915.

J. B. Casey, Room 8, Law Bldg., K. C., Mo

To all Boiler Makers:—I am in Austin, Texas, attending State Federation of Labor; can say that we have been tendered hall of Representatives for our entire meeting; something that is unparalleled in history; please publish. Will make full report to the national secretary of No. 507, Beaumont.

T. C. MADDY.

A Compilation of Labor News.

BY THE A. F. OF L. NEWS SERVICE.

UNIONS GIVE GREATEST AID.

Toronto, Ont.—The Industrial Banner of this city is one more trade union paper that hits the nail on the head in its following summary of the value of organization:

"After all is said and done, there is nothing more certain or easy of proof than the assertion that trades union organization has accomplished more in safeguarding the rights of the working class than all other agencies combined.

"The craft that has a 100 per cent organization in any industrial center is more potent to force the concession of reasonable hours and a living wage and to maintain them, even during periods of business

depression, than the best fair wage clause that was ever enacted by a municipal council.

"While it may be true—not in Toronto, however—that when properly enforced a fair wage clause may force even unfair contractors to pay the prevailing rate of wages, the said prevailing rate is first fixed and enforced by trades union organizations.

"Where the labor unions are weak, the prevailing rate is bound to be correspondingly low, and even an efficiently enforced fair wage clause cannot secure to the wage-earner a higher scale of remuneration than the weak organization existing is able to enforce.

"Where organization is weak the hours of labor are long and the prevailing rate of wages are low, and where organization is strong it naturally follows that shorter hours and higher wages must necessarily follow.

"No fair wage clause ever seeks to do more than enforce the prevailing rate that organization has already won.

"Every craft that is in the enjoyment of the eight-hour day has secured the boon, not through the good will of the employers or the party politicians, but because of the trades unions that have compelled its recognition."

WAGES BY LAW AND LAWYERS.

Sydney, New South Wales.—Protests of trade unionists against a 25 per cent reduction of wages of waitresses has proven effective, and the old rates have been restored.

The reduction was ordered by the government wage board at the request of the Employers' association. At it would be illegal to strike, the workers gave notice they would publish a "fair list" containing names of those places that would not reduce wages to the level of the board's award, which also included workers in tea rooms, although these were not mentioned in the employers' demand. The vigorous protests of unionists and other citizens has forced a modification of the award, and the wages existing before the outbreak of the war have been restored.

The Saddlers' union is also objecting against the policy of this industry's wage board, whose decision has been appealed to the arbitration court, where, it is hinted, it will remain for six months. Last October the saddlers secured a decision providing for a minimum rate of \$15, but its enforcement was postponed for four months on account of the European war. At the end of the four months, the employers asked for a further extension of four months, but the chairman of the wage board made it twelve, despite protests by the workers who showed that this industry was never in better condition because of the demand for war supplies.

Even though New South Wales has a labor government, there has never been a labor man appointed as chairman of a board, declared ex-President O'Brien of the New South Wales Labor Council, who urged that the government be asked to appoint more industrial judges, so that appeals could be considered more speedily. The unionist said: "At present the awards are delivered by the chairman of the wage board and since these men are mainly lawyers, with no sympathy for the workers, as shown by the awards they delivered, it was inevitable that there should be appeals from their decisions."

THE A. F. OF L. EXHIBIT.

San Francisco.—The Bulletin of this city makes this reference to the American Federation of Labor and its attractive educational exhibit at the Panama-Pacific exhibition:

"The American Federation of Labor has grown in thirty-four years from a membership of less than 50,000 to a membership of more than 2,000,000. Its average membership last year was 2,020,671. The average American family is usually reckoned at five members. This would make the total number of persons dependent on the earnings of organized labor about 10,000,000. One person in every ten in our country is intimately interested in the prosperity or welfare of organized labor. Moreover, outside the organized trades, in occupations which it has not been possible to unionize, there are millions of workers whose wages and conditions of work are indirectly influenced by the conditions that have been secured in the organized trades.

"The importance of this united body of workers and voters is apparent even to those short-sighted persons who are opposed to a democratic influence in industry. No one who is not already familiar with the history, principles and program of organized labor should lose a good opportunity now presented, by the Federation's exhibit at the exposition, to become so. The policies of the Federation of Labor are a good deal more important to us than the policies of Great Britain or Germany. If it helps to solve the great problem of peaceful industrial development, as it surely is doing, it is worth sympathetic and broad minded study."

W. U. EMPLOYEES "SPOTTERS."

Chicago.—The Western Union Telegraph company not only maintains a "spotter" system, known as a special agents' department, to spy on employes with regard to their union affiliation, but the policy of the company is to fight the union with all the powers at its command, to discharge operators who are members of the union, and to refuse to deal with union officials.

These frank statements were part of the testimony of Newcomb Carlton, president of the Western Union, before the United States industrial relations commission.

The witness made no attempt to conceal Western Union's hostility to unionism, and admitted that hundreds of operators had been discharged for membership in the union and that many of these had been refused employment by certain telegraph companies controlled by Western Union. Equally frank admissions were made relative to the low wage of telegraphers.

President Konenkamp of the Commercial Telegraphers' union followed Mr. Carlton. He showed that the highest rate in New York is \$100 a month. This ranges to zero "for those who work for nothing for several months to get into the service." The witness said increased wages were followed by a "speeding up" order, and that in branch offices operators work up to thirteen hours a day seven days a week. The unionist agreed with President Carlton as to the employment of "spotters," but he went into the detailed workings of this spy system. In answer to the question, "What do you con-

sider is the remedy for these evils?" the union executive said:

"The most important remedy is the right to organize."

"What are your demands?"

"All we have ever asked is the right to organize."

Committee who adjusted grievance for the boiler makers at the Norfolk Navy, with assistant secretary of the Navy, Mr. Roosevelt. Right to left—G. F. Calvert, Thos. Nolan and Geo. J. Thomas.

EVILS OF CONVICT LEASES.

Chattanooga, Tenn.—The state legislature has voted to continue the system of convict leasing to contractors, and the Central Labor Journal of this city says:

"The convict lease system is proven by legislative investigation to be guilty of the following civic crimes: Inhumane treatment of the convicts themselves; deprivation of their families of the support they are entitled to; encouragement and breeding of tuberculosis from close confinement; illegitimate interference with manufacture and industry of the state; unfair treatment of laboring people of the state by the introduction of cheap prison labor in competition with them; depriving the farmers and others of a good public road system by failure to employ the convicts in this connection.

"Contemplate the picture of a thousand

helpless men closely confined in cramped quarters, the germ of tuberculosis rampant among them; one by one they become the victim of that dread germ till the record shows that over 50 per cent of the deaths are from this disease; each man given a man's task, and punished by the merciless lash in the hands of a stalwart guard if he fails in this task; see the loads of merchandise shipped out under these conditions, the product of pauper labor, and bearing the germs of disease into every home; see the bowed and helpless form of the released convicts, after service, returning to their homes, diseased, helpless, bearing the same germs to their neighbors. There you have the picture of conditions under the convict lease system."

HOW "SPOTTERS" SPLIT UNIONS.

Chicago.—Before the United States industrial relations commission, John G. Taylor, business agent of Oakland, Cal., machinists, testified that "spotters" engaged in disrupting unions are generally designated as follows:

1. The promoter of quarrels, who gains membership in the budding union and by his wiles sets Jew quarrelling with Gentile, Italian against Austrian and so on, thus weakening the strength of the membership.

2. The "good fellow," who makes friends with everybody and spends his money so freely that those who try to keep up their end of the entertainment presently find themselves financially embarrassed, and are thus open to suggestions of treachery to the union.

3. The "discourager." This man is a professional pessimist who is tormented with objections to unionism and predicts nothing but trouble for organizations which try to compel powerful corporations to grant the men their rights.

NEW LOAN SHARK BILL.

Harrisburg, Pa.—A new loan shark bill, aimed to correct the flaws the supreme court recently pointed out in declaring unconstitutional the statute of two years ago, has been introduced in the state assembly.

The bill regulates the loaning of money in sums of \$300 or less, either with or without security. In the preamble it is asserted that because of extortion on the part of loan sharks borrowers often have to pay interest and other charges to the extent of between 100 and 300 per cent or more; that through intimidation and ignorance borrowers have to pay many times the amount actually due. Those engaged in the lending business after the passage of this act would pay a license fee of \$50 and transact their business under the supervision of the state banking commissioner. A \$5,000 bond would be required. Interest charges would be, up to \$100, 3 per cent a month; between \$100 and \$300, 2 per cent a month; in addition to which there would be a small examination fee. Charges in excess of these figure would entitle the borrower to recover the excess

and to receive a \$50 bonus, which would be a penalty on the lender. Drastic penalties are provided.

R. R. OFFICIALS CONSCIENTIOUS?

Chicago.—According to President Markham, of the Illinois Central railroad, officials are conscientious—they are guided by public opinion and the welfare of the people. And because officials of federations of labor unions are not responsible to the people and are not answerable to this "moral tribunal," President Markham is against them. This was brought out at the hearings of the United States industrial relations commission in this city. Mr. Markham favors large corporations, because they can better serve the people, but if labor unions get too powerful, they are liable to exercise their power unwisely, he says. Public opinion, however, will hold the corporations in check, avers the Illinois Central man.

At this point in the proceedings some of the unionists present indicated a desire to laugh, but were hushed by several stern raps of the gavel, vigorously wielded by Chairman Walsh.

OPPOSE 15 CENTS AN HOUR.

Columbus, Ohio—Agitation by Columbus trade unionists against a rate of 15 cents an hour for a 10-hour day for unskilled labor by a construction company resulted in a resolution of protest being passed by the city common council, which called on the company "to pay at least 28½ cents per hour for such labor, and that the laboring men of this city be requested to refuse to work for less than 28½ cents per hour, which is the standard established by the city of Columbus."

Unionists are now organizing these unskilled workers and the publicity that has resulted has aided the organized movement in general.

LAWYERS PAID \$294,113.

Boston, Mass.—During the past four years the Bay State Street Railway company has paid lawyers \$294,113 for "retainers" or "retainers and services." This was brought out at the arbitration hearings of wage demands of the company's employes who rejected an offer, last fall, of one-half a cent an hour increase. James M. Swift, counsel for the company, assured the board that these payments to lawyers were "quite modest" when one considers the Bay State is a \$50,000,000 corporation. A few days before this evidence was made public Mr. Swift told the arbitration board that the workers were making an "appalling demand."

DAN HARRIS HAS PASSED AWAY.

Brooklyn, N. Y.—The announcement that Daniel Harris, president of New York State Federation of Labor, is dead, will come as a shock to organized workers throughout the country who knew this sterling trade unionist. He passed away last Monday, after an illness of several months. The direct cause

of death was blood pressure, which affected the throat. His illness was aggravated by a refusal to obey physicians' orders and abandon all trade union activity. Last year deceased secured some relief through a trip to the southwest, but the antagonism of the New York legislature against compensation and other labor laws found the old war horse again in the fight, which proved his last, and which caused him to really "die in the harness." He was 68 years old.

Deceased was a member of the Cigarmakers' union and held many offices in that organization. He was a trade unionist to the core and believed there was no limit to the possibilities of workers through agitation, organization and education. His death removes one more from the small circle of trade unionists who are as active today as they were 35 and 40 years ago.

PORTERS MUST LIVE ON TIPS.

Chicago.—The United States industrial relations commission is conducting the first government inquiry into the wages and conditions of employment of sleeping car porters and conductors. General Manager Mungerford, of the Pullman company, testified that porters receive \$27.50 a month for the first fifteen years. At the end of that time the rate is increased 5 per cent, making his pay \$28.87 a month. In the first ten years of service he buys \$36.50 worth of uniforms a year, but thereafter the company pays for uniforms. The witness said he did not know whether porters were dissatisfied with these low wages, as the company had "received no expressions of dissatisfaction regarding them." Porters are permitted to retire on the trains at 11 or 12 p. m. and must go on duty at 3 a. m. This applies to all trains. In answer to the question whether \$27.50 is enough to pay a man for a month's work, the general manager said: "We can get all the men we want at that rate."

RAILROADS ARE NOT SO POOR.

Chicago.—Wayne C. Ellis, statistician of the Iowa railroad commission, is not impressed with the poverty tales of railroad managers. While protesting to the interstate commerce commission against increased rates for the benefit of western roads in Iowa, Nebraska, North Dakota, South Dakota and Minnesota, which, he said, were earning from 6 to 16 per cent.

"All of the roads in this territory," he continued, "were able to pay their operating expenses, taxes, interest on bonds and debts, dividends on preferred stock and had enough left in 1914 to equal 8.76 per cent on their stock outstanding in the hands of the public. In 1913 they earned 10.68 per cent on the common stock."

The witness explained that his averages were obtained by including the non-dividend paying roads with those regarded as prosperous.

BISHOP PLEADS FOR BOYHOOD.

Los Angeles.—“The boy must not be robbed of his boyhood. It is essential to his advancement. To crush him down in a factory is one of the greatest crimes a civilized nation permits men to do,” said Bishop Edwin N. Hughes, of San Francisco, in a speech in this city.

“The boy is the true ‘Jack of all trades.’ During the course of his boyhood, and at various stages, he has ambitions to be first one thing and then another. One day he will wish to be a carpenter, the next day to be an engineer, and so on. These desires are the result of the things he sees, and the boyish mind is thrilled.

“The boy is one of the greatest problems confronting us as individuals and as a nation. The only way in which a father may understand his own son is to first try to understand his own son’s father when he was the same age as his son.”

DEFEAT CONTRACT SYSTEM.

Jefferson City, Mo.—Through organized labor’s activity, the state legislature defeated a bill to extend the contract system in convict labor in this state. The workers not only defeated this bill, but secured the passage of a law which abolishes the system and inaugurates the state-use system.

Other legislation secured is:

Miners’ bath law.

Empowering state miner inspector to close dangerous mines.

Making it easier to prosecute imitators of union labels and shop cards.

Providing for better sanitary conditions in foundries.

Labor secured the defeat of a bill to repeal the barbers’ state board of examiners, and lost in their efforts to secure a workmen’s compensation law.

EIGHT-HOUR DAY UPHELD.

Cleveland, Ohio.—Common Pleas Judge Lieghey has upheld a municipal court decision that contractors engaged on city work are legally limited to an eight-hour day. The case was against the superintendent of a construction company, who was fined \$500 and sentenced to sixty days in the workhouse, and who appealed.

SETBACK FOR LABOR AGENT.

Washington, D. C.—Leroy Brazee, a Detroit employment agent, received a setback in the United States Supreme court, which refused to issue an injunction against the Michigan authorities to restrain them from enforcing a law regulating employment agencies. Brazee is facing a sentence of 90 days in the Detroit house of correction for violation of the law.

HOLD SEAMEN’S ACT IS EFFECTIVE NOVEMBER 4.

Washington.—Attorney General Gregory has decided that the seamen’s law passed by the last Congress shall become effective November 4, and not July 1, of this year, as

had been held by the department of commerce.

Steamship owners have overwhelmed the department of commerce with protests against enforcement of the act July 1, claiming that it would be impossible for them to so equip their vessels as to conform with the act by that time.

They claimed, also, that they had been assured by committees of Congress that the law would not become effective until November.

Attorney General Gregory held the law as it affected foreign vessels shall not become effective until March 4, 1916. This delay is given in order to permit the Senate to amend treaties where necessary.

HOW ABOUT REPUTATION.

Des Moines, Ia.—The house of representatives has passed a bill which provides that the state shall compensate persons found to be innocent of crime after they have been imprisoned, for the time that they spent in prison. Compensation is to be fixed on the basis of the amount earned if the person was free.

DENIES RIGHT TO PICKET.

Lenoir City, Tenn.—The need of a state anti-injunction law, similar to the recently enacted federal Clayton act, is shown by the order of Chancellor Kyle in the case of striking textile workers and the Holston Manufacturing company, which secured a temporary injunction and which is now made permanent. Under its provisions the strikers are permitted to ask non-unionists to join them, but they are not allowed to picket or urge non-union employes to quit the service of the mill management.

The strike was caused by discharges when a local of textile workers was formed. The workers say conditions were unbearable and they were forced to unite.

SECURE ELEVEN NEW LAWS.

Austin, Tex.—Eleven new laws is the result of labor’s activity before the state legislature, just adjourned. Included in the list is compulsory education, abolishing the business of loan sharks, providing for the printing of text books in Texas, improved fire escape law, preventing private employment agencies becoming recruiting stations for strikebreakers, 54-hour law for women and a law giving communities the right to give school children free text books if they so desire. The mechanics’ lien law was changed, and now makes it more satisfactory to the worker and the material men.

CHANGE ATTACK ON SCHOOLS.

Chicago.—It appears that the attempt to divide public school in this state has failed. A new plan is now being advocated to establish a dual system of schools in Chicago by appointing a superintendent of vocational education, independent of the regular school superintendent, and with full power over a special department to be known as the “de-

partment of vocational schools." Trade unionists are opposing all these theories, as they see in them attempts to segregate the children of workers into vocational

schools, while those whose parents are more fortunately provided with the means of life will secure the usual public school education.

Among Our Exchanges.

UNIONISM IN CANADA.

A "patriotic" Canadian employing class has failed in its attempt to destroy real trade unionism in the land of the Maple Leaf.

For years the shrewd Canadian employers have favored "Canadian" trade unions.

But the "Canadian" trade unions have failed to arouse the false cry of patriotism in the breasts of Canada's toilers.

The Canadian workers are more interested in protecting themselves than in lip service to the false god of nationalism.

The government statistics, which in no way favor real organization of the working class, tell the story of the fall of the "Canadian" union and the rise of the American Federation of Labor.

In the last two years the international unions gained 191 local unions in Canada while the national unions lost 26 locals.

There were only 133,132 trade unionists in the Dominion in 1911, while last year there were 175,799.

Of the 175,799 Canadian unionists, 149,577 were members of the American Federation of Labor.

Only 26,222 men and women were enrolled in non-national unions.

But all these, 26,222 men and women, did not worship at the shrine of folly.

The Canadian Federated Letter Carriers, with several thousand members, is affiliated with the Trades and Labor Council of Canada. It is recognized and assisted by the international movement.

Several other independent organizations favor the international movement.

The Canadian Federation of Labor is on its deathbed.

It is so weak that it cannot hold a convention.

Last year it held no convention.

Patriots who want to build a wall around Canada so that the Canadian people cannot trade with their neighbors and their "mother" country do not want international trade unions.

Patriots who own the Detroit street railway and countless other corporations in this country don't want their Canadian employes to belong to an international organization.

They practice internationalism in all their dealings, but neither do they want the Canadian people to trade with their neighbors nor the Canadian toilers to unite with their brothers and sisters on this side of the border.

But Canadian workingmen and workingwomen are mangled by machines which are just as heartless as the machines which mangle their brothers and their sisters in the United States.

So Johnny Canuck does the only sensible thing. He joins the union of his class.

He has derived much benefit from his entrance into the international fold.

He has also aided the international.

Secretary Frank Morrison, of the American Federation of Labor came from a Canadian farm; and several international presidents and many general organizers of international unions were born in the Dominion.

The trade union was not formed in order that its members might indulge in mutual admiration.

The trade union was formed for self-protection.

Canadian workingmen and Canadian workingwomen know that they have everything to gain from the American Federation of Labor.

This is why they join it.—The Detroit Labor News.

REAL LIGHT.

Postmaster General Burleson is giving the American people some facts in very clear terms about the oft-repeated charge that the railroads are being cheated in the transportation of parcel post matter. Mr. Burleson says:

"Although the railroads contend that they are underpaid for carrying the mails, the facts are that they are overpaid, and that they are receiving from the government amounts which for hauls of any considerable length, exceed by about two to one the amounts they receive from express companies for like and similar service."

And Mr. Burleson backs up his words with the figures:

"Upon the two principal mail routes from New York to Chicago, over which is carried the largest daily weight of mail transported anywhere in the world by rail, aggregating about 319 tons daily; railway mail pay amounts to \$2.58 per 100 pounds, while the railroads' proportion of the first-class express rate between those cities is approximately \$1.20 per 100 pounds."

No man does a greater service in the interest of public and of business than shedding light. The American people are not disposed to treat the railroads unjustly. Why should they be? Their prosperity is interlinked with that of their industries. But they do like to know that they are being treated fairly in turn. Mr. Burleson puts his point clearly; he gives his figures to back it up. If an answer is to be made, it, too, must deal in facts.—The Milwaukee Journal.

CAPITAL AND LABOR ARE PARTNERS.

They do work for each other. Too often, however, the Capitalist has allied himself with Monopoly, and as an individual he assumes the power of Monopoly under the guise of Capital. And the Laborer, discriminating no more between the two than the Capitalist himself, bitterly resents this assumption of superiority. The direction of industry, and the management of affairs, is assumed entirely by the Capitalist; and while he realizes that he himself is helpless without the co-operation of Labor, he knows that Labor must bow to immediate necessity, and so yield to his dictation. The remedy for this state of affairs does not lie necessarily in Labor's control of industry; but it does demand that Labor be so independent that the worker can freely withhold his services from any enterprise of course that does not meet with his approval. Capital today dictates terms to Labor, not as Capital, but as Monopoly. Destroy the Monopoly, and Labor and Capital will stand upon an equal footing. For, if the natural opportunities for industry be thrown open alike to Labor and Capital, Labor will be freed from the necessity of accepting the preferred terms of Capital; and will be able to negotiate as an equal. The Capitalist being deprived of his present privilege, and compelled to deal with laborers who are not under the immediate necessity of working for him, will be obliged to share, not only the product of the joint efforts of Capital and Labor, but the honor and responsibility as well.—The Public.

FREEDOM'S BATTLE WON.

On Thursday, March 4, at about 9:30 a. m., the good news arrived at San Francisco that the Seamen's battle for freedom had been won—i.e., that President Wilson had signed the Seamen's bill.

Throughout the country the same good news was disseminated by the afternoon papers of that day.

March 4, 1915, was truly a day of rejoicing. All will agree that there was ample reason for rejoicing. In the language of Senator La Follette, the noble champion of the Seamen's cause, March 4, 1915, should be fittingly described as "the Seamen's Emancipation Day."

It has been a long and weary struggle—a contest that might well exhaust the patience of the most enduring and persevering of mortals.

From January, 1892, to March, 1915, the organized seamen of America have struggled and striven in the legislative field, always using their very best efforts to secure that measure of justice so long denied and and only just now secured.

During the years in which the Seamen's hearings and conferences upon the legislation bill has been pending in Congress, boys have grown into manhood and men have reached the declining years of life.

There have been more investigations and hearings and conferences upon the legisla-

tion asked for by the Seamen than on any other subject that ever engrossed the attention of Congress. The various Congressional committees, sub-committees, conference committee, etc., have each in turn referred, re-referred or harbored, sheltered and housed the bill for periods varying from days to months. Nearly every pigeon-hole in every committee room where maritime affairs are considered has at some time or other served as a resting place to the Seamen's bill. The volumes of printed matter issued with regard to the question, involved in the Seamen's bill if placed side by side and measured with a lead line would run well up into the 'steenth fathom mark. The actual time consumed by the various sessions of Congress in which the Seamen's bill received consideration, if measured by a monetary standard, would exceed several of the largest fortunes rolled into one.

But why relate or dwell upon the past? The fight has been made and won—

For Freedom's battle once begun,

Bequeath'd by bleeding sire to son,

Though baffled oft is ever won.

Freedom's battle has been won, and after Nov. 4, 1915, when the La Follette Act is in effect, as far as American shipping is concerned, the American seaman will stand relieved from any criminal proceedings for violating a contract to labor. In a word, he will be in exactly the same position as other workmen. And after March 4, 1916, when the Act takes effect with regard to foreign shipping at American ports, the seaman on foreign ships will enjoy the same blessings of freedom so long as they are in American ports.

As for the other important features of the La Follette Act—and there are many—it behooves every seaman to thoroughly familiarize himself with the changes and the improvements made upon existing statutes.

Without the intelligent effort of each individual seaman and the loyal backing of his economic organization, it will be utterly impossible to reap to full advantage the benefits of the new Charter of freedom.

Comrades of the Pacific, the Lakes and the Atlantic, it is necessary now, more than ever before, to attend your union meetings. It is essential to bring in every straggler not yet within the fold and, above all, remember the words of Daniel Webster:

"God grants liberty only to those who love it, and are always ready to guard and defend it."—Coast Seamen's Journal.

THE SHOE PINCHES.

Criticism of the Federal Industrial Commission and its chairman, Frank Walsh, would carry more weight if they bore less evidence of being prompted, by the spirit which denies the government any right to scrutinize business methods from the point in view of the best interests of society.

Though some of Mr. Walsh's critics may be sincere in saying that their objections to the commission are based on the chairman's methods of directing its work, most

of them are in arms because the commission has brought to light unattractive facts regarding the treatment of labor in many of our largest industries.

Had the commission gone noiselessly about its work, carefully skirting the edges of the condition known as industrial unrest, taking the easy roads and avoiding the rough ones, it might at this moment have the good will of the interests which are now denouncing it. It is because it has done the work which seemed to it necessary that it has brought upon itself this flood of hostile criticism.

The outcry against the commission and Mr. Walsh is the wincing of the "galled jade."—The Milwaukee Journal.

THE HYGIENE OF GAS LIGHTING.

When an innovation in the industrial world tends to replace some older, long-established practice, one frequently sees a vigorous defensive response on the part of the supporters of the process that is being outdistanced. This reaction usually rounds to the advantage of all concerned. It spurs the losers to renewed effort to regain lost prestige, and the end-result not infrequently is the discovery or invention of novelties which improve the condition of existence and reduce the cost of living. As a specific instance of such commercial rivalry, which is widely reflected in the affairs of everyday life, the competition between gas and electricity may be mentioned. Usually the determining factor in the use of two sources of energy for heat or light effects is a purely economic one. Electric lighting, when once perfected to a stage where it became an efficient and reasonably economical process, threatened to supplant gas lighting within doors for purely hygienic reasons. The pollution of the air by the products of incomplete or complete combustion of the illuminating material is avoided by the electric light. Large quantities of hot combustible gases are not formed and need not be removed. The contrast in the conditions that may be brought about by the two systems is too obvious to require a detailed description. The defenders of the modern systems of illumination with gas have advanced certain considerations quite independent of the relative intensity and quality of the light produced. They claim that the great production of heat in gas-light fixtures brings about a natural ventilation effect through the air currents it produces, so that the products of combustion, notably carbon dioxide, are never allowed to accumulate unduly in the atmosphere, and an excessive rise in temperature is also prevented by the movement of the air. To this has been added the statement that, with gas lighting, the micro-organisms of the air in the rooms involved are destroyed by the flame itself and likewise by the traces of combustion products like sulphurous acid which exhibit an antiseptic action. The allegations in respect to the effect of gas lighting on the bac-

terial contents of the air have been investigated in the Hygienic Institute of the University of Munich by Ahlborn. In a room of 57 cubic meters' capacity under uniform artificial circulation of the atmosphere, the number of bacteria in the air decreased 24 per cent in one hour. Under precisely comparable conditions, including the presence of three large gas-light flames with open globes, the number of micro-organisms decreased 40 per cent in the same period. This increased destruction of bacteria is undoubtedly attributable to their burning up in contact with the incandescent surfaces or their destruction by the heated gases that are produced. The point for emphasis, however, is the fact that such differences, amounting at best to only 16 per cent, are too small to possess any serious significance from the point of view of practical hygiene. The argument for the superiority of gas lighting in this respect can scarcely be maintained.—The Journal of the American Medical Association.

LABOR SHOULD BE CONTENT.

The forces of organized labor in Texas have every reason to be proud of the record achieved by the 34th legislature; in the wealth of salutary labor measures passed this legislature has probably distinguished itself over all others.

Compulsory education, long fought for and long desired, has at last become a law in this state.

Free school books in any school district of the state where the residents of that district vote for it.

The text-book law, providing that all school books used in the public schools of Texas shall be printed in Texas.

The regulation of private employment agencies which means the elimination of traffic in human misfortune.

A semi-monthly pay day for all establishments employing more than ten persons.

Extension of the masonry inspection law to include state inspection of public buildings of counties, towns and cities.

An amended mechanic's lien law giving absolute protection at minimum cost.

Extension of the 54-hour law for women to include cotton mills and textile factories.

A law making compulsory the installation of bathhouses and lockers for coal miners.

A law limiting the operation of "loan sharks"—long fought for by organized labor.

Vive, the legislature!—El Paso Labor Advocate.

ONE OF THE MOST PECULIAR PEOPLE IN WORLD.

Washington—Europe has still today one utterly peaceful people, peaceful in action, in intent, and of peaceful contemplation, according to the National Geographic society. This race is one of the most peculiar peoples in the world's history—the gypsies.

Entering into the life of all nations under the sun, yet a part of no single one;

mingling themselves within the highest civilizations, yet unlettered; pilgrims upon an eternal wander path, yet forever true to the ties of racial blood and to customs whose origin and significance have been fully forgotten, the gypsy is the most mysterious of all the strange elements of folkdom.

The Children of Cain?

Whence they came has never been settled to a certainty. All manner of fables have been spun to explain their origin. Since they first appeared upon the stage of Europe in the middle ages, they have been identified with the lost tribes of Israel, the mixed multitude that followed Moses out of Egypt, the Canaanites, the Amorites, the Saracens and the Egyptians. Some have held them to be the children of Cain, and others have decided that they were the children of the Wandering Jew and inheritors of the restless curse of their father.

The gypsies, themselves, have never professed to know who they were or where they came from, but they have shown great readiness to accept the conclusions on this subject of the people among whom they lived. It was not until the growth of comparative philosophy and the chance investigation of the gypsies' tongue in the beginning of the last century, that scientists concluded the gypsies to be a wandering low-caste tribe from northern India. Their language nearly resembles Sanscrit, the foundation tongue of all our western languages which has held itself purest in Indian sources.

Language Is Unwritten.

This language they have wonderfully preserved in the face of over-mastering cultures and eternal wandering. This has not been accomplished by a literature or by a close corporation. The gypsies have no literature, and their language is an unwritten one, while they, themselves, are scattered in small bands over the whole face of the earth, scattered even more widely than the Jew. The gypsy calls himself "rom," meaning man, "the man" of all men." His wife is "romni"; his folk-like is "romnipen," and his language is "roman." Everyone not of his race come under the generic term of "gentile."

Gypsy-folk present the strangest problems known to philology and ethnography. An elementary, nomadic folk persisting for centuries in the midst of complex civilizations, they have retained their physical characteristics, their tribal rules and customs reminiscent of their far-distant, extra European past, their highly inflected language, and their thousand years of fever for roving. They are absolutely singular and without close parallel among the peoples of earth.

Reached Germany About 1417.

They entered Europe by way of Constantinople in the twelfth century, and overflowed into the northern Balkans, Hungary, central and western Europe, England, and thence, to North and South America. The

English called them Egyptians, after their supposed origin, whence the name gypsy. They reached Germany in about 1417 and England about 1500. At first they were treated kindly by the western nations, but their strangeness, their unconventionality, their light-fingered ways, their proneness for fortune-telling, necromancy, black magic, and their unwillingness for work in all forms soon called down upon them bitter persecution in Germany, England, France and The Netherlands. In the Balkans, Russia, Hungary and Poland, they were well treated, and they are found in these countries in great numbers today. It is estimated that Europe has more than 900,000 gypsies.—Milwaukee Journal.

PAYING THE FIDDLER.

There comes a Spartan cry from all over the country from the railroads for permission to increase freight and passenger rates. A thousand and one reasons are advanced why the railroads should be given this right. And yet the real reason why such a condition has arisen has not been touched upon by any of the newspapers or those papers devoted to financial interests.

The reasons are obvious:

When such men as James J. Hill and E. H. Harriman could take hold of a road which in an intrinsic way was worth a few dollars and with glowing possibilities sell millions of dollars worth of stock to an unsuspecting public, and then leave the road to earn the interest charges upon the money which they got and did not put into the betterment of the road, it is not a far cry to chicanery. And yet today nearly ever railroad in the country is carrying millions upon millions of dollars of stock which is not represented by the investment of a single dollar.

Today the railroads are asking the people to permit them to earn interest upon billions of dollars which never went into the railroads.

It does not require a mathematician to figure that if you overcapitalize a proposition you must find a way to pay the fiddler.

And the easiest way to pay interest upon stocks and bonds which are the usufruct of stock jobbing is by saddling the burden upon those who are least able to bear it—the working men and working women of this broad land.

If a railroad had cost some \$50,000 per mile to build, it was bonded at \$100,000, the difference going into the pockets of the "financier," or what is commonly known as "Kings of Finance."

If all the money taken out of railroads by exploiters were to be returned, railroad rates could be lowered and the equipment today would be 100 per cent.

As it is, the railroads have been robbed right and left and the public is now asked to feed the "kitty."

They call Mr. Hill an "Empire Builder." He is. He is more than that. He receives

more than a million dollars for every one that he invested.

Who gave him that money?

The United States Government and the various states through which he operated. And so it was and is right here in Ohio.

Get Poor's Railroad Manual, look it over, and when you have digested just an infinitesimal part you will readily discover who got in out of the wet. Now the people are expected to create a new crop of millionaires.—The Chronicle (Cincinnati, O.)

News of General Interest.

THE WORLD'S LARGEST GUN, MADE AT WATERVLLET.

By Frank C. Perkins.

The accompanying illustration shows the world's largest gun, made at Watervliet, and mounted on special car for shipment. The car carrying this 16-inch gun built some years ago at Watervliet Arsenal from forgings supplied by the Bethlehem Steel Company, and the following facts regarding this car and gun, are of interest.

This special car was designed for the transportation of large and heavy material

and has a length between couplers of 103 feet, 10½ inches. Its weight is 196,420 pounds and it has a capacity of 300,000 pounds. This car is constructed so as to distribute weight evenly on thirty-two wheels.

It may be stated that the 16-inch gun-forgings were also made at the Watervliet Arsenal, and it has a total length of 500.9 inches. Its outside diameter over the powder chamber measures 60 inches and it has a diameter at the muzzle of 28 inches, while its total weight is about 284,500 pounds.

"CATCHING" TUBERCULOSIS, OR INFECTION.

To the man who works for his living, falling sick with tuberculosis means a very real danger not only to his own life, but to the lives of his wife and children as well. His wealthier neighbor may lay aside his routine cares and "take the cure" for tuberculosis without materially affecting his family's health or income. The consumptive workingman, on the other hand, must give up his job and with it his only income, and at the same time he is frequently compelled to remain at home, a constant source of danger to his family, unless he is properly instructed. It may save you who read this article considerable money and suffering if you learn from it how to avoid the entrance of tuberculosis into your body.

Tuberculosis is infectious and communicable from one person to another. It differs in some respects from scarlet fever, measles, or small-pox, so-called "contagious" diseases, in that tuberculosis requires repeated exposures and certain special conditions to pass the germ from the sick to the well. It is not inherited, but must be com-

municated through one of the following sources from one person to another:

(1) The infection is derived in the very large majority of cases from the sputum discharged from "open" or ulcerating tubercles in the lungs.

(2) A certain number of persons, chiefly infants, estimated variously from one to ten per cent of all cases, receive the infection from the milk of tuberculous cows.

(3) A very few others may possibly obtain the infection from the urine and fecal discharges of consumptives or from the pus joints or other parts of the body which are the seat of ulcerating tuberculosis.

(4) In a few extremely rare instances the infection is conveyed through the blood of the mother to an unborn child, but the offspring seldom survive long.

(5) No infection can be conveyed from tuberculosis of the "closed" or non-ulcerated variety, or after ulcerations are completely healed.

With regard to the manner of infection, still bearing in mind that tuberculosis must be communicated from one person to another, we find that by far the most frequent

mode of infection is by inhalation; the second is by swallowing, and the least common, by inoculation of a wound or abrasion. Considering each of these modes of infection a little more carefully, we learn that:

(1) The bacilli are inhaled most often in dust. The dust is most often contaminated by careless spitting; but the germs may also be given out in the act of coughing (with the mouth unprotected) or hawking, sneezing, loud talking, singing or laughing. Quiet breathing carries no infection.

(2) The bacilli may be swallowed with food which has been contaminated with infected hands or otherwise, and also with the milk, butter and other dairy products derived from cows suffering from bovine tuberculosis.

(3) Inoculation by the infection of cuts, scratches or abrasions is not frequently observed.

While no age, race or class is immune against infection from tuberculosis, children are more susceptible than anyone else. At the age of 15, frequently as high as 75 per cent of the population may show the presence of the germs, though not that many may be sick with tuberculosis. In view, however, of the fact that these germs may lay quiet in the body of the child for years, until with unfavorable surroundings his resistance is lowered, causing the disease to develop, it is extremely important that fathers and mothers do everything possible to keep their children away from danger of infection in their earlier years.

Everything should be done at home to keep the child rugged and healthy. The father and mother, whether they have tuberculosis or not, should be scrupulously careful in their habits of spitting and personal hygiene. The working father owes it not only to his own health but to that of his children to avoid tuberculosis in every possible way.

(Editor's Note.—This article has been prepared for the Boiler Makers' Journal by the National Association for the Study and Prevention of Tuberculosis. Others will follow, giving more details as to what you should know about tuberculosis.)

A NOTORIOUS SPYING SYSTEM.

The following is a copy of a letter sent out by a detective or strike-breaking agency of Cleveland, Ohio. It was marked personal and confidential and of course was not intended for the public to read, but it fell into the hands of friends of organized labor, and, therefore, we are able to reproduce same to show the despicable methods used by some to spy on organized labor and filch money from employers of labor:

THE CORPORATIONS AUXILIARY COMPANY,

Chamber of Commerce Building.

Cleveland, O., January 15, 1915.

(Personal and Confidential.)

E. J. Brettell, General Manager, Brettell Bros, Mingo, Junction, Ohio:

Dear Sir—You no doubt are contemplating

operating your mines, permitting such of your employes as are willing to return to work, to do so irrespective of the arbitrary position assumed by the leaders of the United Mine Workers. In order to insure the success of this venture, you will require assistance such as this company is prepared to furnish, both in the way of giving protection to your loyal employes, as, no doubt, they will be molested and pressure brought to bear in every way to discourage them and in recruiting a sufficient number of workmen to conduct operations. You will also of necessity have to keep yourself informed as to what the attitude of your disloyal employes is and what steps their so-called "leaders" will take to frustrate your plans.

We have handled many strikes and have yet to lose a single one, and many of these strikes were won without the use of a single guard or the destruction of one cent's worth of property. Among recent large strikes of national prominence that we have handled we might mention the Boot and Shoe Workers' strikes in Portsmouth, Ohio, and Brooklyn, N. Y.; the Furniture Workers' strike in Grand Rapids, Mich.; the Teamsters' strike in Indianapolis, and the Rubber Workers' strike in Akron, Ohio. The officers of our company are men of repute and we have a reputation to sustain which we have built up by doing our work thoroughly at the least possible cost to our clients. In handling labor troubles we aim to bring them to a successful issue as quickly as we can, fully appreciating that it is only by our proved ability to accomplish this that we can hope to enjoy the future patronage of our clients. We are widely and favorably known, not only in this state, but throughout the country, numbering among our clients some very prominent coal operators who have gone on record as saying that our representations are true in every particular, despite the fact that we have gained but little publicity, it having always been our aim and the desire of the people we do business with to avoid this.

In conclusion, let us say a word regarding our industrial or community control service, which comprehends placing men in labor and political organizations with the idea of having them work up to the leaders, not with the object of writing history after somebody else has made it, but for the purpose of making history by influencing or dominating that particular organization. This is a big proposition, but by no means an experiment with us, as we are doing this today for some of the largest manufacturers in this country, and there is absolutely no reason why, with the support of the coal operators, it cannot be accomplished in the coal industry.

Our methods, as you appreciate, have no place in correspondence, but if you will write or phone us, appointing a time when our representative can call so that your time as well as our time—both of which are valuable—may not be wasted, we will

be glad to explain everything fully to you and know you will be interested.

Anticipating your early and favorable reply, which carries with it no obligation whatever excepting a candid discussion of a subject that is of vital importance to you, we remain,

Yours very truly,
THE CORPORATIONS AUXILIARY
COMPANY,

By DAN G. ROSS,
District Manager.

A NEW HEAVY FREIGHT SERVICE LOCOMOTIVE.

By Frank C. Perkins.

The accompanying illustration shows the construction of a new heavy freight service locomotive of the Baltimore & Ohio Rail-

LOCKED OUT MINERS OF OHIO WILL RAISE OWN VEGETABLES.

Bridgeport, O.—The locked out miners of Eastern Ohio have proved themselves to be a resourceful army in the long deadlock that has followed the operators' refusal to abide by the mine-run law on many occasions. The latest bid, however, on the part of the miners for "strategic" honors is so novel that it reads like a chapter from the Kaiser's war book. The plan is to provide garden products for their families during the spring and summer months, and unless the present plans miscarry the barren hillsides of the coal regions and the wasted lands of vacant lots will soon blossom forth into bountiful truck gardens, from which the miners will secure sufficient vegetables to reduce their meager

road, constructed at Philadelphia, Pa. This railroad company's class "S" locomotive has cylinders 30 by 32 inches and values of the piston type of 16-inch diameter.

The boiler is of the straight top type of a diameter of 90 inches, the thickness of sheet being $\frac{7}{8}$ inches and 15-16 inches, and the working pressure being 200 pounds. The fuel used is soft coal and the fire box has a length of 132 inches and a width of 96 inches, the depth, front, being $89\frac{1}{2}$ inches. The water space front and sides and back measure 6 inches, and the tubes of steel have a diameter of $5\frac{1}{2}$ inches and $2\frac{1}{4}$ inches and a length of 23 feet.

This engine is equipped with a Schmidt superheater, the superheater surface being 1,329 square feet. The total heating surface of the engine fire box is 258 square feet and its total 5,573 square feet, of which tubes represent 5,215 square feet.

The driving wheels have a diameter, outside of 58 inches, the diameter back being 44 inches. The driving wheel base is 21 feet, and the rigid wheel base is 21 feet, while that of the total engine and tender is 76 feet, 6 inches.

The weight of the engine and tender is 584,000 pounds.

store bills and at the same time more fully meet the demands of their appetites.

During the past few weeks many requests have been received at the Bridgeport District office, from the locked out miners, requesting that they be furnished with garden seeds. The demand grew to be so general the district officials decided to do all in their power to furnish the necessary seeds and to make the movement district-wide. Secretary Houston, of the Department of Agriculture at Washington, was appealed to to furnish the district office with a large quantity of government free seeds, in such variety as the ordinary run of garden products claimed. Although the department has not yet had time to consider the request, it is generally believed that Secretary Houston will favor the idea, as the miners promise some surprising results in diversification and scientific gardening, which at present is claiming the department's attention in a nation-wide campaign.

The first planting will occur this week, in advance of the arrival of government seeds, when in nearly every camp hot beds will be sowed with tomato seeds. When the plants have reached the proper age, weather conditions permitting, the plants will then be distributed among the miners who in turn

will set them out on the ground "home-steaded" by them for gardening purposes.

The publication of the truck gardening plan of the miners, as expected, brought forth loud protests from several of the coal companies who seriously object to the idle land being cultivated into provision-bearing plots for the benefit of the miners. This denial, however, on the part of the operators will only tend to increase the offers of free land by the farmers who are thoroughly in accord with the plan. In addition to the land secured from the farmers, prediction is being made that many home owners who have large vacant lots will solicit the miners to cultivate their holdings on a share basis.

Regardless of the difficulties, the miners are joyful over the prospective success of the idea.

"IF YOU MUST DRINK."

(From the Crescent Magazine.)

To the married man who cannot get along without his drinks, the following is suggested as a solution to a bondage of his habits.

First: Start a saloon in your own home.

Second: Be the only customer and you will have no license to pay. Give your wife two dollars to buy a gallon of whiskey, and remember there is sixty drinks to one gallon.

Third: Buy your drinks from no one but your wife, and by the time the first gallon is gone she will have \$8.00 to put in the bank and \$2.00 to start business again.

Fourth: Should you live ten years and continue to buy drinks from her and then die with snakes in your boots, she will have money enough to bury you decently, educate your children, buy a house and lot, then marry a decent man and quit thinking about you.

AN ENORMOUS STEEL COAL CAR.

By Frank C. Perkins.

At Roanoke, Va., there has been designed and constructed by the Norfolk & Western Railway Company a 100-ton car with six wheel trucks as seen in the accompanying illustration, having a capacity for nearly

pounds and is intended to carry when full loaded 90 tons, with the 10 per cent addition or about 100 tons. The car measures in length inside 45 feet, 6 $\frac{1}{4}$ inches, and it has a width of 9 feet, 6 inches, and a height of 6 feet, 5 inches. The outside dimensions are 46 feet, $\frac{3}{4}$ inch for the length of body

a quarter of a million pounds of coal.

This 100-ton coal car is mounted on a pair of Lewis six-wheel trucks and it is stated that this car was designed for the purpose of mounting a heavy freight car without too heavy concentration of loads on the axles. It is held that this six-axle truck is a perfectly equalized freight car truck without pedestals. The car weighs, complete, 65,200

over all, and the width of the body is 10 feet, 4 $\frac{1}{2}$ inches, while the height above rail measures 10 feet, 4 $\frac{3}{4}$ inches, and the distance between truck centers is 32 feet, 10 inches, while the length over end sill is 46 feet, 10 $\frac{3}{4}$ inches.

The car has a cubic capacity when level full of 2,829 cubic feet and a heap on top of the car at 30 degrees increases the ca-

capacity 551 cubic feet so that the total cubic capacity including heat at 30 degrees is 3,380 cubic feet.

It is claimed that this car has actually on it 206,000 pounds of Pocahontas coal. The springs are so located that the side frames themselves become equalizers, and

properly distribute the coal between the wheels. The frame is articulated over the center box, which allows ample movement to take care of any vertical irregularities in the track. With this car fully loaded as mentioned above, the individual axle loads are about 44,300 pounds each.

AN EXAMPLE FOR AMERICA.

New Laws in England and Denmark Ameliorate Labor Conditions.

Denmark and Great Britain have evolved a public insurance against unemployment, so that the costs of hard times and seasonal unemployment are shifted from the individual to the group, or from the individual to society itself.

This is the most advanced legislative step taken by any country. It involves an official recognition of the fact that the old individualism of an earlier day has passed away, and that the individual alone should not be required to suffer from social conditions which have passed beyond his power of control.

America remains almost the only advanced nation that continues to ignore the fact that conditions of an earlier age have long since passed away. Social thought still treats the worker as a free man, able to turn his hand to employment if he wills, when in reality the land has been closed against him, the tools of employment are in other hands and the industrial system is wholly beyond his control.

We have not yet begun to organize, to provide means for, clearance in industry such as the banks have maintained for a generation; we have not recognized the

necessity for housing the itinerant worker, nor have we accepted the social obligation to shift to society the costs of sickness, accident, invalidity and old age, all incidents of modern industry and all a proper charge against society itself.—Frederick C. Howe in the Century Magazine.

MASS MEETING OF ORGANIZED LABOR.

The beautiful auditorium of the Los Angeles Union Labor Temple was filled to overflowing with enthusiastic trade unionists Wednesday evening, March 24, the occasion being a mass meeting to afford labor an opportunity to enter protest against recent utterances of men connected with interests antagonistic to organized labor, and to give detailed information relative to Labor Temple affairs.

The meeting was one that will long be remembered by those present. Interesting addresses laudatory of the efforts being put forth by the Board of Directors to clear the Temple of debt were made by men prominent in the movement, and an open defy hurled at the enemies of labor.

A number of organizations adjourned their meetings and attended in a body. An interesting feature of the meeting was the entrance of two hundred members of the Beer Drivers' Union, and the announcement by

one of their members, Mr. Ferd Roth, that the organization had passed a resolution in the meeting just closed to the effect that their social fund be drawn on for money enough to purchase two shares of stock for each member.

A number of individual members of the many organizations present at the mass meeting subscribed for varying amounts of stock, and the Labor Temple's European Tour Contest was given renewed impetus.

The Los Angeles Musicians' Union No. 47 A. F. of M., made a further investment in Los Angeles Labor Temple stock, and is making arrangements to enter a candidate in the European Tour Contest. They purchased 240 shares. Secretary H. P. Moore, of the Musicians, in commenting upon the deal, said:

"Had we given closer attention to Labor Temple affairs in the past we no doubt would have taken this action ere now. We have held a block of stock in the Temple for a long time and have always endeavored to do our duty toward the institution. So far as I can see, the Labor Temple property is a valuable one. It is close in and the increase in values in this district during the past ten years has been most phenomenal. While at the present time there is a temporary lull in business, none will deny that this property will continue to increase in the future as it has done in the past."

A. W. (Booth) Thomson, of Cleveland Typographical Union No. 53, has been selected by the Printers as their candidate in the Los Angeles Labor Temple European Tour Contest. Thomson is a well-known member of the International Typographical Union, having attended many conventions of that organization as a delegate. He was chairman of the Committee on Laws at the Providence, R. I. session of the I. T. U. last year, and at the present time is serving as chairman of the Committee on Vocational Training, created at that convention, which committee will make its report to the Los Angeles convention in August.

U. S. DEPARTMENT OF LABOR, BUREAU OF LABOR STATISTICS, WASHINGTON.

Butter Prices, From Producer to Consumer.

"Butter prices from producer to consumer" is the subject of a report recently issued as Bulletin No. 164 by the Bureau of Labor Statistics of the United States Department of Labor. This report relates to creamery butter only and the prices considered are those for butter passing promptly from producer to consumer, no cold storage prices being included.

The object of the report is to show the relation between the price of the raw material (butter fat) and the retail price of butter in periods of comparatively low and high prices, and the cost of distribution or the additions made to the price of butter as it passes from producer to consumer. Data as to creameries were obtained from

10 representative establishments in the famous Elgin District and in Northwestern Missouri, and prices and margins of wholesalers and retailers were obtained covering various lots of tub and print butter bought from the 10 creameries mentioned, and handled in the large markets of Chicago, Cincinnati, Cleveland, Philadelphia and Pittsburgh. June, as representing the season of high production and low prices, and December, the season of low production and high prices, were the months selected, and data was secured for these months for the following representative years: 1904, when butter prices were the lowest shown for any year since 1901; 1910, when there was a wide range of prices and the average was comparatively high; 1911, when prices fell somewhat as compared with 1910.

The primary constituent of butter is butter fat, which briefly defined is the pure oil contained in milk, cream, or butter. The farmer who supplies milk or cream to the creamery is paid on the basis of the amount of butter fat contained therein. The difference between the price paid the farmer by the creamery for the butter fat in one pound of butter and the price paid by the consumer for one pound of butter represents the total margin from producer to consumer.

In the periods covered by the report the average price received by farmers and paid by consumers, the margin between those prices, and the per cent that the margin in each case was of the retail price were as follows:

Average price paid farmer for butter fat in 1 pound of butter; June, 1904, \$0.1518; December, 1904, \$0.2326; June, 1910, \$0.2562; December, 1910, \$0.2733; June, 1911, \$0.2086; December, 1911, \$0.3297.

Average retail price per pound of butter paid by consumer, June, 1904, \$0.2428; December, 1904, \$0.3285; June, 1910, \$0.3442; December, 1910, \$0.3746; June, 1911, \$0.2982; December, 1911, \$0.4341.

Total margin, June, 1904, \$0.0910; December, 1904, \$0.0959; June, 1910, \$0.0880; December, 1910, \$0.1013; June, 1911, \$0.0896; December, 1911, \$0.1044.

Per cent margin is of retail price, June, 1904, 37.5; December, 1904, 29.2; June, 1910, 25.5; December, 1910, 27.1; June, 1911, 30.0; December, 1911, 24.1.

In December (the month of low production) the prices were considerably higher than those in June (the month of high production), especially in the years 1904 and 1911. When figures for the three years are combined the increase in December as compared with June amounts to 35.4 per cent for prices received by farmers and 28.5 per cent for those paid by consumers. In the two months of 1904 when prices were low the total margin represented a much higher proportion of the retail price than in the corresponding months of 1910 and 1911, when prices were higher.

The total margin between producer and consumer is made up of the creamery

margin, freight and cartage, wholesaler's margin, and retailer's margin. In the periods considered the average creamery margins per pound varied from a minimum of 2.04 cents in June, 1910, to a maximum of 3.38 cents in December, 1904; freight and cartage averaged the same (about three-fourths of a cent per pound; the average wholesaler's margin varied from a minimum of 1.3 cents in June, 1904, to a maximum of 1.87 cents per pound in December, 1911; the average retailer's margin varied from a minimum of 3.9 cents per pound in December, 1904, to a maximum of 5.08 cents per pound in December, 1910.

ONE DAY REST IN SEVEN.

Important Decision in New York.

The nation-wide campaign for the enforcement of one day rest in seven will be greatly assisted by the favorable decision recently handed down by the Court of Appeals in New York. As the highest court of New York has thus upheld the constitutionality of the law, it is thought improbable that it will be seriously challenged in other states. Bills to limit the working week to six days are to the front in Illinois, Pennsylvania, Ohio, Minnesota, New Hampshire, New Jersey, California and Wisconsin and a number of other states.

In giving this decision the bench of the New York Court of Appeals is unanimous. The bench states that such a law is "in the direction of the betterment of public health and welfare, and, therefore, that it is one which the state for its protection and advantage may enact and enforce." The decision also points to the special need for legislative protection of the worker in the confined atmosphere of factories and workshops. The act primarily applies to factories and mercantile establishments.

The American Association for Labor Legislation which initiated legislation for one day of rest in seven points to the new need of affording the worker this protection owing to the inadequacy of Sunday laws under modern conditions.

Many modern industries are and must be continuous in their operation. "More than 15 per cent of the employes in the iron and steel industry as a whole and more than 50 per cent of the blast-furnace workmen were on a regular schedule of seven days a week, with a long turn of eighteen, or twenty-four hours at the change of shift," stated the United States Bureau of Labor Statistics, in its report in August, 1912. This means that nearly 26,000 men, in this industry alone, were condemned to toil week in, week out, without respite.

Of 180,000 trade-union members in the state of New York one man in every five was reported to the State Department of Labor in 1910 as working regularly seven days a week. In the same year the Bureau of Labor in Minnesota reported 98,558 men working seven days each week. In Massa-

chusetts a joint legislative committee in 1907 estimated that 221,985 persons, or over 7 per cent of the population, were engaged in seven-day labor.

Not only must blast furnaces be stoked all the week but many forms of house service such as heating must be uninterrupted. Thus while the old Sunday laws are no longer practicable, the physical and moral welfare of men and women none the less demands the assurance of a day of rest.

The harmful results of continuous employment are recognized by casualty concerns. "If an applicant came to us for insurance, and we knew he was working seven days a week, we would refuse the risk, unless such excessive work was only temporary"—is the declaration of John M. Pattison, President of the Union Central Life Insurance Company. A statement more significant of the dangers of seven-day labor could hardly be found.

THREE YEARS UNDER THE NEW JERSEY COMPENSATION LAW.

That administration of workmen's compensation laws by the courts is the most unsatisfactory system that could be devised from the worker's point of view is the conclusion formed by the American Association for Labor Legislation which has just completed the first thorough investigation made into the operation of a state compensation law in this country.

New Jersey, in 1911, was the first state to establish a system of accident compensation, and the report just issued by the association covers three and a half year's experience of its operation. Since New Jersey led the way, twenty-three more states have passed workmen's compensation acts and in the present year the question is before the legislatures of forty-four states. No other single issue, it is stated, is the subject of so much legislative activity.

The New Jersey law, contrary to the usual practice, created no special machinery for the administration of the act, but left cases to be settled between the injured worker and insurance company or employer according to the schedule prescribed, contested cases to come before the courts of common pleas in the twenty-one counties of the state.

In the course of the investigation not only were numerous officials, employers and workers interviewed, but 655 cases from court records were studied and many were followed up to the homes of the workers. It was found that court proceedings seriously handicapped the workers in a number of different ways. While the worker is less well informed as to the law and court procedure, he is at the same time, owing to the expense involved, generally unable to engage such expert lawyers or witnesses as are available for the employer. Under the New Jersey law the court determines the amount to be paid in fees by the claimant to his counsel. As counsel's fee is customarily determined by the amount of the

award and not by the work done, attorneys can usually only be induced to take up cases involving larger claims on a speculative basis. Thus very few minor claims are brought to court. A scrutiny of the settlements registered with the Department of Labor showed that though many of the settlements were irregular only 7 per cent of the claims appeared in the courts. The absence of machinery for administration of the act clearly allows less scrupulous employers to repudiate minor claims with impunity. So frequently does this occur that the association indorses the estimate of the National Civic Federation and the American Federation of Labor that 40 per cent of the amount due as compensation to the workers of New Jersey is never paid at all.

A most serious deficiency following from the court method is the amount of time consumed in making settlements. In the settlement of claims arising from 72 fatal cases the average length of time was 27½ weeks; while in 150 non-fatal cases settlement took an average of 33 weeks from the date of the injury. The report cites several typical cases showing the extent of the delay. In one case a widow and dependent children were obliged to wait fifty-three weeks for an award of \$1,500 to be paid in weekly installments. This obviously meant that the family became either public charges or the object of charitable aid, and one of the main purposes of the workmen's compensation, the prevention of destitution, was thwarted.

The association estimates that the annual cost of litigation over compensation claims in New Jersey is between \$50,000 and \$60,000. This amount of money it is pointed out is spent in litigation over the 7 per cent of the claims which are brought to the county courts which tend to give different types of decisions creating uncertainty and instability in the whole administration of the law. The same amount of money spent in equipping a commission would give to the state the advantage of expert decisions on all claims.

The Association for Labor Legislation strongly urges that all states adopt for an administration of compensation laws the commission or board rather than the court system. The association sums up the case against the court system with special reference to New Jersey in the following terms:

"Administration of a workmen's compensation law by the courts, a number of separate and scattered tribunals each already overburdened by its ordinary business and all more or less likely to be unfamiliar with the laws, results harmfully in that (1) tremendous delays arise, defeating one main purpose of a compensation law, namely to care for the injured or his dependents financially during the period of no earnings; (2) fees necessarily paid to attorneys eat up large portions of the awards; (3) settlements in violation of the law are frequently sanctioned by the courts or even

ordered by them on their own initiative; (4) conflicting opinions are handed down, confusing and complicating the whole system and making justice a matter of location, not of law; and finally (5) many meritorious claims are not pressed because of a fear that court action will result in dismissal from employment. A more unsatisfactory system, from the injured workers' point of view, would be hard to devise. Much of the hostility between employer and employe, and much of the waste and injustice that existed under the old liability system, remains in New Jersey, because the machinery which gave rise to the evil practices under the old system has been retained for administering the new. Experience in other states has shown that these evils can be eliminated by the creation of a supervising board with summary power in the settlement of disputes."

AN I. W. W. ASSAULT UPON THE CHARACTER OF OUR MEMBERS IN THE OIL FIELDS OF OKLAHOMA.

The following clipping was taken from "Solidarity," Cleveland, Ohio, an I. W. W. publication, and sent us by brother living in the Northwest, which shows copies of this sheet are being widely distributed in order to catch as many dupes as possible.

The nasty and unwarranted assault upon the character of our members in the oil fields by this writer goes to show his true character and the small standards of the organization he represents. Such slanderous articles are not worthy the attention of self-respecting men and would not be noticed here were it not for the evident intentions of these people to try and create trouble for our members in the oil fields and we reproduce this as a warning to them to be on their guard against the disruptive efforts of these people.—The Editor.

From Oil Field Jobs.

Drumright, Okla., March 15.

"Drumright is the center of all work in the oil fields around here. The prospects are good for all the rebels who wish to get on the job and do something for themselves and the organization, too. There is going to be lots of work here when the weather opens up, both on building pipe lines and steel storage tanks. A few rebels are here now. Most of the work now is corralled by wine bums. There is a chance of getting control of the jobs, if live members will come here and get out on the job. There can be great things accomplished for the I. W. W. this summer.

The tank builder's strike, previously mentioned, is about to be settled. Hundreds of tanks are to be built this summer. There will not be enough union boiler makers to do the work. There will be chances for hundreds of inexperienced men to get on the job. Why not make it an I. W. W. job? All rebels will be welcomed. Spittoon philosophers and pie-card artists wishing to live off the workers, will not be welcomed."

W. S.

Smiles.

THE VANTAGE POINT.

The mayor of a small town was trying a negro for abusing his wife. She claimed he got drunk and tried to beat her and she hit him.

The mayor turned to their little girl and asked:

"Girl," was your father under the influence of whiskey when your mother hit him?"

"No, sah! He was under the kitchen table," she very quickly replied.—Mack's National Monthly.

"Now, Silas," said the speaker, "I want you to be present when I deliver this speech."

"Yassuh."

"I want you to start the laughter and applause. Every time I take a drink of water, you applaud; and every time I wipe my forehead with my handkerchief, you laugh."

"You better switch dem signals, boss. It's a heap mo' liable to make me laugh to see you standin' up dar deliberately takin' a drink o' water."—Washington Star.

Ethel used to play a good deal in Sunday-school, but one day she had been so good that the teacher said in praise:

"Ethel, my dear, you have been a very good girl today."

"Yeth'm," responded Ethel. "I couldn't help it. I dot a stiff neck."—Pittsburgh Chronicle.

A farmer in the country last autumn gave a job to a seedy-looking individual who had applied to him, and who assured him that he never got tired. When the employer went to the field where he had put the tramp to work, he found the latter lolling on his back under a tree.

"What does this mean?" asked the employer. "I thought you were a man who never got tired?"

"I don't," calmly responded the tramp. "This doesn't tire me."—Sacred Heart Review.

A LONG SEARCH.

"I've been looking for my husband for the last two hours," said an agitated woman to a calm one.

"Don't be excited, madam," replied the latter. "I've been looking for a husband for the last twenty-five years.—From Tit-Bits.

WHY HE OBJECTED.

"Now," said the principal to one of the pupils at the close of the lesson in which he had touched on the horrors of war, "do you object to war, my boy?"

"Yes, sir, I do," was the fervent answer. "Now tell us why."

WHERE HE WAS.

"The train struck the man, did it not?" asked the lawyer of the engineer at the trial.

"It did, sir," said the engineer.

"Was the man on the track, sir?" thundered the lawyer.

"On the track?" asked the engineer. "Of course he was. No engineer worthy of his job would run his train into the woods after a man, sir."

WHERE HE GOT IT.

Teacher—Now, Willie, where did you get that chewing gum? I want the truth.

Willie—You don't want the truth, teacher, an' I'd rather not tell a lie.

Teacher—How dare you say I don't want the truth! Tell me at once where you got that chewing gum.

Willie—Under your desk.—The Railroad Telegrapher.

FRANK ABOUT IT.

A Modern Maid—Am I the first girl you ever loved?

Modern Youth—I cannot tell a lie. You are not. You are simply the best of the bunch—Ex.

STRIKING.

An Irishman invalided home from the war was asked by one of his relatives what struck him most about the battles he took part in.

"What struck me most?" asked Pat. "Sure it was the large number of bullets flying around that didn't hit me."

WHO WILL WIN?

An observer was conversing with an inquirer.

Inquirer: "Who will win the war?"

Observer: "Who won the California earthquake?"—Harper's Weekly.

EASY ENOUGH.

"Here's an account of a woman who lived on raw fish for twenty days."

"That's nothing. My uncle has been living on water for the last six months."

"So you expect me to believe that eh? Why don't you add that he grew fat on it?"

"Well he did. He's a sea captain."—The Scout.

GENTLE REMINDER.

"That man has a voice like a sawmill," said the woman with a sensitive ear.

"I wouldn't say that," replied her husband.

"What do you know about it?"

"I was in the lumber business for several years. Some saw mills don't sound so bad."—Ex.

NO USE FOR SHAKESPEARE.

Father—Johnny, stop using such dreadful language

Johnny—Well, father, William Shakespeare uses it.

Father—Then don't play with him; he's no fit companion for you.

"I don't understand precisely the functions of the Supreme Court."

"It's like this: You have a dispute with your wife and she decides against you. That's the lower court."

"I see."

"You take the matter to your mother. That's the Court of Appeals."

"I see."

"Then your wife takes it to her mother. That's the Supreme Court."—Louisville Courier-Journal.

Uncle Sol threw aside the letter he was reading and uttered an exclamation of impatience.

"Doggone!" he cried, "why can't people be more explicit?"

"What's the matter, pa?" asked Aunt Sue.

"This letter from home," Uncle Sol answered, "says father fell out of the old apple tree and broke a limb."—From the Youngstown Telegram.

Standing by the entrance of a large estate in the suburbs of Dublin are two huge dogs carved out of granite.

An Englishman going by in a motor thought he would have some fun with the Irish driver.

"How often, Jack, do they feed those two dogs?"

"Whenever they bark, sir," was the straightforward reply.—Truth Seeker.

"Is dat a kickin' mule?" asked Mr. Erastus Pinkley.

"Does you want to buy him?" inquired Uncle Rasbury, cautiously.

"No."

"Den whut's de use o' comin' aroun' here axin' useless question an' temptin' me to spoil my reputation foh truth an' mendacity fer nuthin'."

A COMPARISON.

"Why is a clock like a pretty and vain young lady?"

"I fail to see any resemblance. Why?"

"Because it is all face and figure, has no head to speak of, is hard to stop when once it is wound up and has a striking way of directing attention to itself every hour of the day."—London Tit-Bits.

WISE PAPA.

"Papa, what is an escutcheon?"

"Why?"

"This story says there was a blot on his escutcheon."

"Oh, yes! An escutcheon is a light-colored vest. He had probably been carrying a fountain-pen."—Houston Post.

HIS FORTUNE.

"Darling," whispered the ardent suitor, "I lay my fortune at your feet?"

"Your fortune?" she replied in surprise. "I didn't know you had one."

"Well, it isn't much of a fortune, but it will look large beside those tiny feet."—Kansas City Times.

MODIFIED.

"I'm a glutton for work!" boasted the man.

But his wife overheard him and asked him to split some wood.

"Er—I mean an epicure!" the man hastened to correct himself.—From Puck.

Silas—I hear your son left that small town, and went to the city to have a larger field for his efforts.

Hiram—Yes; and that's what gets me. When Hank was home a 2-acre potato patch was too big a field for him.—Judge.

"What is that tune you were playing on the bugle last night?"

"That was not a bugle," replied the cornet virtuoso rather stiffly.

"Oh, well, if you're so particular as all that, it didn't sound like a tune, either."

"I can give you a cold bite," said the woman.

"Why not warm it up?" asked the tramp.

"There ain't any wood sawed."

"So? Well, give it to me cold."—New York Sun.

WHY SHE QUIT.

Dinah (employed as waitress)—Yas, mum, I am a-leavin, dis place tomorrow.

Mistress—Why, Dinah, whatever can have displeased you with your position? Haven't I been treating you well?

Dinah—Oh, yas, indeed you have, mum. But to tell the truf, miss, in dis house dey am too much shiftn' ob de dishes fo' de fewness of de vittles.—Life.

AN INSTALLMENT.

It was on a Broadway car. A passenger stopped and picked up a coin from the floor. Three of the other passengers eyed him with envy.

He said:

"Which of you people dropped a five-dollar gold piece?"

"I did!" yelled each of the three.

"Well," said the finder to the man nearest him, "here's a nickel of it."—Exchange.

"There's nothing so hard to ride as a young broncho," said the Westerner.

"Oh, I don't know," replied the man from back East. "Did you ever try the water wagon?"—Toledo Blade.

"You just told me it was one o'clock; it just struck three," wife mutters.

"But, dear," he said with aching head,

"You know that old clock stutters."

Poetical Selections.

TWO KINDS.

There are two kinds of people on earth today;
Just two kinds of people, no more, I say.
Not the sinner and saint, for 'tis well understood
The good are half bad and the bad are half good.

Not the rich and the poor, for, to count a man's wealth,
You must first know the state of his conscience and health;
Not the humble and proud, for, in life's little span,
Who puts on vain airs is not counted a man.

Not the happy and sad, for the swift flying years
Bring each man his laughter and each man his tears.

No, the two kinds of people on earth that I mean
Are the people who lift and the people who lean.

Wherever you go you will find the world's masses
Are always divided in just these two classes;
And, oddly enough, you will find, too, I ween,
There is only one lifter to twenty who lean.

In which class are you? Are you easing the load
Of overtaxed lifters who toll down the road?
Or are you a leaner, who lets others bear
Your portion of labor and worry and care?
—Henry P. Lyman-Wheaton in the Christian Herald.

IN THE PALACE OF CONTENT.

In the palace of content
There dwells a princess fair,
The sunbeams from the sky were sent
To nestle in her hair.

Her smile gay as a Maytime day
And sweeter than a rose,
And many a smile upon the way
She scatters as she goes.

Her eyes, like evening stars, are bright
(And brighter, I opine),
And with the same soft, kindly light
Of evening stars they shine.

O princess fair, O princess fair,
How does her garden grow?
Why, many happy thoughts are there,
All planted in a row!

Now, who can read this rhyme with care
And guess just what is meant?
Are you, perhaps, the princess fair
In the palace of content?

—Selected.

AN OLD MAN'S JOB.

When a young man sits on a bench in the park,

You're sorry—a little—for him.
But the future needn't be dreadfully dark
For a youngster with vigor and vim.
But the park-bench man who's the tragic man,

Who brings to the throat a sob,
Has a paper whose lines his dull eyes scan
In search of an old man's job.

Shoulders age-bent 'neath a shiny coat,
Face that is wistful and lined,
Weak, faded eyes, eager bent, to note
The pitiful chance they may find
In the paper held by the knotted hands
That shake a bit as they hold;
The chance is so little, he well understands,
For a job for the man who is old.

Gray, scant hair, and a leg that drags
As he rises and limps away
With a half-born hoping that never flags
Till the close of a fruitless day.
Employer men, you are rushed, I know—
Your duties throng in a mob;
But give him, please, just a little show
Who asks for an old man's job.
—Miriam Telchner, in New York Globe.

TELL HER SO.

Amid the cares of married life,
In spite of toil and business strife,
You who value your sweet wife;
Tell her so.

When days are dark and friends are few,
She has her troubles, same as you;
Show her your love is ever true;
Tell her so.

In days of old you praised her style,
And spent much care to win her smile,
'Tis just as well now worth your while;
Tell her so.

There was a time you thought it bliss
To get the favor of one kiss,
A dozen now won't come amiss;
Tell her so.

She'll return for each caress
A hundredfold of tenderness;
Hearts like hers are made to bless;
Tell her so.

You are hers, and hers alone;
Well you know she's all your own;
Don't wait to "carve it on a stone";
Tell her so.

Never let her heart grow cold;
Richer beauties will unfold.
She is worth her weight in gold;
Tell her so.

—A. J. Perrault.

FACE THE SUN.

Don't hunt after trouble, but look for success.
 You'll find what you look for; don't look for distress.
 If you see but your shadow, remember, I pray,
 That the sun is still shining, but you're in the way.
 Don't grumble, don't bluster, don't dream and don't shirk;
 Don't think of your worries, but think of your work.
 The worries will vanish; the work will be

done.

No man sees his shadow who faces the sun.
 —The Railroad Telegrapher.

The train was almost crowded and the poor mother was gently tossing the baby up and down in her arms in a vain endeavor to stop its crying. As the car slowed down at the stopping place the conductor looked in the door and shouted:
 "George's Cross!"
 "Yes; and perhaps if you were cutting your teeth you'd be cross, too," the lady with the baby replied sharply.—Tit-Bits.

In Memoriam

Members.

D. A. Tierney, Reg. No. 64437, boiler maker, born in Bayonne, N. J., died on March 15th after a short illness, buried in Port Arthur, Texas; initiated in Local No. 33, January 28, 1909. Member of Local 305 at time of death.

Jones of Lodge No. 292, died March 3rd, 1915, age 61 years.

Mrs. John Hunter, sister of Brother Wm. Baker of Lodge No. 206, was born in Gretna, La., 1874, died March 30, 1915, of pneumonia; age 40 years.

Relatives of Members.

William Jones, father of Brother Wm.

James M. Daniels, age 59, father of Brother Hobart Daniels, Lodge No. 549, was born Addison, Ohio, December 17, 1858, died March 8, 1915, of paralysis.

Lodge Notices

Costlow et als, Lodge No. 292.

C. Costelow, Reg. No. 46605; Peter Gillardi, Reg. No. 48540; L. Johnson, Reg. No. 86728; E. J. Lynch, Reg. No. 65825; H. J. McLaughlin, Reg. No. 36816; A. Noble, Reg. No. 51165, please correspond with the secretary of Lodge No. 292, E. P. Butler, 1723 Gabriel avenue, Parsons, Kas.

No. 567, for non-payment of a note of seventy-five dollars (\$75.00).

R. L. WHITE,
 Cor. Secretary Lodge No. 567.

P. D. Connors—Wm. Zobel.

Anyone knowing the whereabouts of Patrick Connors, Reg. No. 8954, or any secretary taking up the card of this brother, please hold same and correspond with Wm. Zobel, 2154 Chouteau avenue, St. Louis, Mo., as he has been paying this brother's insurance bills for the past 18 months.

WM. ZOBEL,
 2145 Chouteau Ave., St. Louis, Mo.

Robertson Lodge No. 173.

H. E. or Earnest Robertson is wanted by Lodge No. 173, for failing to make good some money he borrowed.

J. P. TAYLOR, Lodge No. 173.

Stewart et al—Lodge No. 66.

Any secretary taking up the card of Edgar Stewart, Reg. No. 21232, or Noble C. Townsend, Reg. No. 62088, will please correspond with the secretary of No. 66, Little Rock, Ark., as these brothers misrepresented facts and secured transportation out of Little Rock and Lodge No. 66 had to pay for same.

E. WORTHSMITH,
 Corresponding Secretary No. 66.

Frank Brodrick—R. H. Walker.

Anyone knowing the whereabouts of Frank Brodrick will confer a favor by writing to the undersigned, as he has valuable information for him. R. H. WALKER,
 617 Walnut St., Hattiesburg, Miss.

E. L. Chafin—Lodge No. 587.

We have suspended Brother E. L. Chafin for not paying dues or honest debts. I, myself, loaned this brother some money to bury his little child, and he will not pay it back. He also owes several bills that he won't pay.

C. C. MADDY, C. S. L. 587.

LIST OF MEMBERS PREVIOUSLY ADVERTISED

L. D. Landault, Reg. No. 87363, left Teague, Tex., owing a grocery bill of thirty-nine dollars and ninety-five cents (\$39.95). He is wanted by Mrs. John Cure, Teague, Tex., who stood good for the amount.

T. D. Swain, Reg. No. 38826, by Lodge

W. M. Horstmeyer—Lodge No. 381.

Any secretary taking up the card of Brother W. M. Horstmeyer, Reg. No. 9735, please hold same and correspond with Joe Wilson, secretary Lodge No. 381, Amarillo, Tex., as this brother borrowed some money from this lodge which he has forgot to return.
 JOE WILSON, L. 381.

By Insisting Upon Purchasing Union Stamp Shoes

You help better shoemaking conditions.
 You get better shoes for the money.
 You help your own labor position.
 You abolish child labor.

Do not be misled by retailers who say: "This shoe does not bear the union stamp, but is made under union conditions." This is false—no shoe is union made unless it bears the union stamp.

Boot and Shoe Workers' Union

246 SUMMER STREET, BOSTON, MASS.

JOHN F. TOBIN, President.

CHAS. L. BAINE, Sec.-Treas.

THE COMMERCIAL NATIONAL BANK

of KANSAS CITY, KANSAS.

CAPITAL AND SURPLUS, \$550,000.00.

DEPOSITS.....\$5,000,000.00

We cordially invite the Boiler Makers and Ship Builders of the United States who desire to transact banking business with us (which can be done readily by mail), to write to any of their officers and ask any questions they may desire to ask about our reliability and standing.

P. W. GOEBEL, President.

C. L. BROKAW, Cashier.

A. C. FASENMYER, Vice-President.

G. J. BISHOP, Asst. Cashier.

THE BOILERMAKERS JOURNAL

OFFICIAL ORGAN OF THE
INTERNATIONAL BROTHERHOOD
OF BOILERMAKERS, IRON SHIP BUILDERS
AND HELPERS OF AMERICA

HEADLIGHT

UNION MADE

OVERALLS

**“ A SMILE OF
SATISFACTION
WITH EVERY PAIR ”**

**Snug-fitting, adjustable collar
--keeps out grime and cinders.**

**Good, long, wide sleeves
with adjustable, dust-proof
cuffs, that can be unbuttoned
in a moment and rolled
back over the arm.**

**Wider, more elastic, adjustable
suspenders--can't cut or slip off
shoulders.**

High, broad, keep-clean apron.

**New patented safety watch pocket, keeps
your watch absolutely safe.**

**Higher cut waist--more comfortable, keeps
you cleaner.**

WORLD'S GREATEST OVERALL MAKERS

Factories:-Detroit, Pt. Huron, Mich., St. Louis, Mo. Sarnia, Ont.

SECURITY SECTIONAL ARCH

This arch is of light weight
It is built up of small sections
So made as to cool off quickly
It is easily removed for work
Made so to help the boilermaker

No. 6.

A SPIRIT HELPFUL TO LABOR.

By J. W. Sullivan in the American Federationist.

We are not all inveterate partisans in our public activities nor immovable bigots in our mental and moral makeup. Some of us are tired of being worked by the propagandists. One may in fact imagine nowadays the prayer of a sincere inquirer in sociology to run somewhat in this manner: "Please do not try any of your social cure-all volumes on me. I am not seeking a panacea, 'a sure way out.' And spare me the infliction of your party leaflets. I have no need to start with the elementary teachings of any school of economists or so-called radicals. I have something more than a smattering of all such primers. But it would be pleasing to have, from a sober pen, a summary of the progress of the more or less tried-out practical propositions, and of the trend of helpful thought, relative to at least the major phases of the social unrest. Put me in communication with a philosophical spirit fresh from a studious survey of our social system. Let me read his best conclusions on that broad subject. I shall be better pleased if he has considered the proposals and methods of the venturesome radicals and of the cautious conservatives alike and summed up his estimate of the values of their work in their separate lines. Give me something not too sketchy nor yet over-elaborate; something not reflecting the authority of a high priest orating from a throne; something stamped with simplicity and sincerity; something that will save me from the dabbling and groping and squabbling that come with so large a part of the economic literature of the time; something that may possibly suggest fundamental workable social principles."

I have in mind such a prayer in reading Walter Lippman's "Drift and Mastery: An Attempt to Diagnose the Current Unrest." Nothing has come from the press recently better suited to respond to the requirements of a fair-minded person seeking sober guidance in the wide field—one might almost say the wild waste—of "social reform." In short, Mr. Lippman's book is to be recommended alike to beginners in the task of tackling the great knot of social problems and to veterans who through the

help of its pages may run a parallel to their labors in reaching their resting places in thought relative to radicalism or reformism.

What Mr. Lippman has to say regarding labor organization illustrates his style and method. Subjoined is his chapter on labor, condensed through indicated omissions:

"The fact is that nothing is so stubbornly resisted as the attempt to organize labor into effective unions. Yet it is labor organized that alone can stand between America and the creation of a permanent servile class. Unless labor is powerful enough to be respected, it is doomed to a degrading servitude. Without unions no such power is possible. Without unions industrial democracy is unthinkable. Without democracy in industry, that is where it counts most, there is no such thing as democracy in America. For only through the union can the wage-earner participate in the control of industry, and only through the union can he obtain the discipline needed for self-government. Those who fight unions may think they are fighting its obvious errors, but what they are really against is just this encroachment of democracy upon business. . . .

"The unions are the first feeble effort to conquer the industrial jungle for democratic life. They may not succeed, but if they don't their failure will be a tragedy for civilization, a loss of co-operative effort, a balking of energy, and the fixing in American life of a class-structure. . . .

"No wonder they despise a scab. He is justly despised. Far from being the independent, liberty-loving soul he is sometimes painted, the scab is a traitor to the economic foundations of democracy. . . .

"The picket-line is to these little economic democracies the guardian of their integrity, their chief protection from foreign invasion. . . .

"As long as the unions have to fight for mere existence, their immense constructive possibilities will be obscured in the desperation of the struggle. The strike-breaker, then, is not only a peril to the union, he is a peril to the larger interests of the nation. He keeps workmen from their natural organization, deprives them of the strength that union brings, and thwarts all attempts to train men for industrial democracy. Instead of discipline and preparation

for the task of the future, instead of deep-grounded experience in co-operative effort, we shall get, if strike-breakers and blind legislators and brutal policemen and prejudiced judges and visionless employers prevail, despair and hate and servile rebellions.

"There are certain preliminaries of civilization which the great mass of workingmen have not yet won. They have not yet won a living wage, they have not yet won anything like security of employment, they have not yet won respect from the government, they have not yet won the right to be consulted as to the conditions under which they work. Until they do it is idle to talk about industrial peace, and folly to look for 'reasonable' adjustments of difficulties. Reason begins when men have enough power to command respect; a co-operative solution of industrial problems is possible only when all the partners to the co-operation must listen to each other. Until labor is powerful enough to compel that it can not trust to the benevolence of its masters—it has to be suspicious, it has to cling to the few weapons left it, for labor is right in supposing that no national conscience and no employers' conscience yet exhibited are adequate.

"There are certain occupations where workingmen have won these preliminaries of civilized life. The most notable example is in railroading, where the Brotherhoods have become a real part of the industrial structure. They are so powerful that they can't be left out. More than that, they are so powerful that they don't have to flirt with insurrection. It is the weak unions, the unorganized and shifting workers, who talk sabotage and flare up into a hundred little popgun rebellions. Guerilla warfare is the only tactic open to weakness. But where unions can meet the employers on a real equality, as railroad workers can, there you will find very little insurrectionary talk.

"You will meet in these powerful unions what radical labor leaders call conservatism. That is a very interesting accusation. The railroad men have won wages and respect far beyond anything that the I. W. W. can hope for. They have power which makes the I. W. W. look insignificant. If the I. W. W. could win for the unskilled anything like the position and responsibility that railroad men enjoy, it would have achieved something that might well be called a social revolution. The fact is that the railroad men are 'conservatives' in the labor world, just as the Swiss are conservatives among the nations. They have won the very things the lack of which makes rebellion necessary. For if men are ground down in poverty, if the rights of assemblage and free speech are denied them, if their protests are ineffective and despised, then rebellion is the only possible way out. But when there is something like a democracy where wrong is not a matter of life and death, but of better and worse,

then the preliminaries of civilization have been achieved, and more deliberate tactics become possible. . . .

Syndicalists and anarchists half recognize the fact that only a small minority of the workers can be aroused to bitter revolt. So they have begun to sing the praises of a 'conscious minority.' In other words they have abandoned the path of democracy, because it is incompatible with the temper they most admire. Workers who were really effectively organized would produce great changes in our social structure, but they would have to act with a deliberation that no temperamental anarchist can stomach. This is the paradox of the labor movement, that those who can't overthrow society dream of doing it, while those who could don't want to. If there is one occupation where syndicalist tactics might work it would be on the railroads. A small minority could paralyze the country and precipitate a general strike. But American railroad men are not likely to do this because, they don't need to. They have a stake in the country, a genuine representation in public opinion, and they can at all times secure a respectful hearing. If that were taken away from them, if their unions were disintegrated, they too might take to conspiracy.

"It is a commonplace of radicalism that power makes for peace. It is deeply true of the labor movement that the alternatives before it are powerful peace and weak insurrection. Thus if the I. W. W. should succeed in organizing the unskilled on any extensive scale, the I. W. W., as we know it, would have abolished itself. For the unions which were created would inevitably seek a different type of leader, men of administrative capacity who can wield power without exhausting it. The extreme weakness of the unskilled workers has made them listen so eagerly to the large hopes of men like Haywood, Ettor and Giovannitti. . . .

"So far the real peril to the nation from the side of labor is the existence of great masses of unorganized, and perhaps unorganizable, workers. From them will come most of the street-fights, the beatings and the sabotage. They have no share in the country, they have 'nothing to lose but their chains.' But with the tactics open to them they haven't 'a world to win. They can parade and shout, call the police 'cossacks,' and talk revolution. But they have to put up with the pettiest gains. . . .

"When these prime conditions are achieved, labor's demands tend toward an increasing share of control. The right of summary discharge is the issue in many a strike. For unions will encroach more and more on matters of discipline; they are seeking to raise themselves to a partnership in the management. It is no idle guess to suppose that they will come to demand the right to choose their own foremen, perhaps to elect some of the directors, and to

take not only wages, but a percentage of the profits. . . .

"In this movement to eat into economic absolutism, very perplexing questions, of course, arise. What is the proper structure for a union? Shall it be organized by crafts, or occupations, or industries? With amalgamation, or by federation? How shall the unions be governed; by representatives or by direct vote? In fact, there is hardly a problem of constitutional government which doesn't appear in acute form among the workers. And in passing, one might suggest that scholars who wish to see sovereignty in the making can not do better than to go among the unions. They will find the initiative and referendum in constant use. They will find all phases of corruption and misrepresentation: the disappointments of indiscriminate democracy and the blight of officialism. . . .

"You think of the powerful organizations ready to combat every sign of unionism, of the congestion of immigrants in the labor market, of the hostility of courts and newspapers to the preliminaries of industrial democracy. I don't know, no one knows, whether labor can realize its promise. The odds seem to be overwhelming. . . .

"The unions are struggling to give the wage-earners representation, and that is why the hopes of democracy are bound up with the labor movement. Bound up, not with words and dogmas, but with the purpose which animates it. Labor needs criticism, needs inventive thought, needs advice and help. But no one can be given any of these things who has not grasped with full sympathy that impulse for industrial democracy which is the key to the movement."

FIXING WAGES BY LAW OR UNIONISM.

Mr. Harris Weinstock's Criticism.

"My attention has been called to the editorial published in a recent issue of your publication under the title of 'Trade Unionism, Progress and Liberty,' in which you take issue with me on an article written by me, and published in the Industrial Outlook, justifying the legal minimum wage for women and minors. In commenting upon my views as therein expressed, you say among other things:

"Now certain political actionists and benevolent outsiders present to trade unionists the proposition that regulation hours of work and wages be placed in the hands of political agents—minimum wage and universal eight-hour laws for private industries have been persistently advocated and trade unionists have been denounced because they have not favored them without reservation. Yet the surrender to outside authority of power to determine hours of work and wages means also to place in governmental authority either the enforcement of such determinations or the punishment of those who refuse to yield their freedom."

"Please remember that the question at issue between Mr. Rome G. Brown, who opposed a legal minimum wage, and myself was in relation to women and child workers, only a trifling percentage of whom are organized and are in a position to bargain collectively for themselves. State action has been advocated because of the weakness of these workers to scure for themselves reasonable hours and reasonable wages. To illustrate—the eight-hour day for women and minors has been in successful and satisfactory operation in the state of California now for about two years. If it had been left to trade unionists to bring about this desirable condition, it would have in all likelihood taken many decades to do so, if it could ever have been brought about. Meanwhile the fair employer, operating on an eight-hour basis, would have been seriously handicapped by the unfair employer operating on a nine or ten or a twelve-hour basis. Under the law all California employers were, so to speak, over night put upon the same basis so far as working hours for women and minors are concerned.

"In the matter of wages for women and minors, unionists are, of course, earnestly striving to establish collective bargaining, but it is likely to be many, many decades before, so far as women and minors are concerned, unionists will be in a position to establish a minimum wage in all branches of industry where women and children are employed. Whereas the state can bring about a change over night and all employers can again be placed absolutely on an equal basis, so that in the matter of wages for women and children the fair employer starts out on an even footing with the unfair employer, who will be compelled so far as labor cost is concerned to figure on precisely the same basis as does the fair employer.

"It would, of course, be a great satisfaction to trade unionism if it could be the means of bringing about this result. It would seem to me however that the interests of the untold thousands of unorganized women and child workers ought to be considered of greater importance than the desires of trade unionists, who, at best, represent a small minority of women and child workers. What ought to be sought for is the greatest good to the greatest number.

"You further state, 'Is human nature so constituted that the workers can trust matters affecting their real liberty in the hands of "disinterested" outsiders?'

"Under the legal minimum wage the worker takes no greater risk than does the employer. While it is true the worker might waive his right to fix a minimum wage, it also takes away from the employer his right to fix a minimum wage.

"As a rule the minimum wage laws are so devised that both the employer and worker have a voice in determining such minimum wage, and, as a rule, the state only intervenes as umpire, through its commission,

when the two parties, through their representatives, can not come to an agreement.

"Trade unionism has been in the field for many decades. It has not been able, generally speaking, to wipe out the sweat-shop. In New Zealand, in Australia, and in England, the state, by virtue of its minimum wage law, has succeeded in wiping out their sweat-shops. In other words, the state has been able to do over night, so to speak, what organized labor has not been able to do in many decades. The legal minimum wage has not only bettered the condition of the worker, but it has at the same time made it more possible for the fair employer successfully to compete with the unfair employer.

"If it were constitutional in the United States (which I gravely doubt) to fix a legal minimum wage for men as well as for women, I should for the foregoing reasons also advocate that. There would still be left the widest opportunities for trade unionists to go on serving the worker and society by striving for better working conditions, for the educational and moral uplift of the worker, and for continued legislative measures in the interest of the wage-earner. Therefore, in my opinion, trade unionism has little to fear from a legal minimum wage for men as well as for women, provided such legal minimum wage is determined, as it ought to be determined, by giving both sides in each trade a voice, calling upon the state only to act as umpire when the two parties at interest can not agree.

The A. F. of L. Rejoinder.

In the above criticism of our editorial published in the March issue, Mr. Harris Weinstock fails to consider the fundamental objection urged against regulation of industrial relations by law. Betterment of industrial relations for wage-earning women involves the same principles as betterment of industrial relations for wage-earning men.

In discussing wage regulation for women one must keep in mind the revolutionizing changes that have been taking place in the lives of women. Women have always done their share of the world's work. Formerly that work was done at home. Changes in industrial methods have taken that work out of homes into shops and factories. Women have followed their work out into the industrial world where they are no longer the helpers but the industrial competitors of their men folks. So far as industrial relations with employers are concerned there is no difference between male or female. A system of regulating industrial relations established for one class of workers will affect and, it is reasonable to believe, finally apply to the other. In New Zealand, in Australia, and in England laws establishing the principle of governmental regulation of wages apply to both men and women. In Australia a vigorous fight was

made to exclude men from the provisions of such legislation, but that policy did not prevail.

The workers have learned from experience that permitting governmental agents to regulate the terms under which they work puts into outside hands power to control conditions of work. That policy restricts the freedom and therefore the power of the workers themselves.

The woman movement of the present day is a movement for freedom of women. Men can and will aid, but women must achieve their freedom. The best help that society can give them is to secure them opportunity.

The best way for women to secure better wages and better working conditions is through organization. With betterment that comes as a result of intelligent personal efforts, come increasing self-development, increasing power, resourcefulness and ability to take advantage of gains and use them as the basis for further progress.

Mr. Weinstock offers as an objection that only a small percentage of women and child workers are organized. We are sorry that that is true but just as the remedy for many of the defects of democracy is more democracy, so the remedy for this evil is more organization. When a worker's arm muscles are weak the physician prescribes exercise. A hoisting apparatus might perform the work but it would only relieve those muscles of responsibility, and would continue the weakening of them. If Mr. Weinstock, other employers and well-meaning persons would apply their efforts to removing obstacles that retard organization they would be promoting the establishment, not of minimum wages but of wages that would enable wage-earners to maintain American standards of living, and would put them in a position to raise those standards as opportunities might be afforded.

In Oregon the Industrial Welfare Commission fixed the minimum for factory workers at \$8.64 per week, nine-hour days. That sum has been carefully determined by expert analysts who painstakingly reduced women's essential needs to cents—not the conscientious 64 cents. Mrs. Gee of the Garment Workers' Union of Portland, in her testimony before the federal Industrial Relations Commission, of which Mr. Weinstock is a member, stated that the highest wage paid to the organized garment workers was \$25 (16 2-3 per cent of workers received this sum); that the average wage was a little more than \$10 a week; and that the minimum wage paid to apprentices was \$8. However, as the garment workers had established the eight-hour day through their organization, the union minimum was a higher rate than that fixed by the Industrial Welfare Commission.

Fortunately the eight-hour day of the garment workers is under their own control and not subject to the more "liberal" ideas of legislative action such as "over night" granted the Industrial Welfare Commission

authority to suspend the women's ten-hour law for canneries.

Even the most ardent advocate of regulation of wages by legislative methods concedes that the method by organization is the better way, wherever practical. That it is practical is demonstrated by what the needle industries have done in organizing "mere girl" workers. The labor movement does not always attain its aims as quickly as one could wish—it is a movement of poor people. It has to break down barriers and opposition interposed by the ignorant and the sordid wealthy. But it will succeed in time; all it asks is opportunity. Meanwhile it demands that so-called "philanthropists" shall not throttle it by regulations "by law."

If the same efforts that are now expended in legislation to regulate women's wages were expended in promoting organization so that wage-earning women would be in a position to manage their own affairs, those sympathizing with underpaid workers would be doing them not only a greater but a permanent service which will not come home to haunt and shackle them.

Through legislation an eight-hour day may be secured "over night, so to speak," Mr. Weinstock argues. Through legislation it may again become a twelve-hour day "over night" as happens in the canneries of New York state. What is secured through legislation can be lost through legislation. This is demonstrated by the work of reactionary state legislatures during this year's sessions in New York, Ohio, Iowa, Washington, Oregon.

In New South Wales, "over night" wages prescribed by wages boards dropped to 13s and 12s (about \$3.25 and \$3). For several days and nights they remained at under-subsistence mark and returned to 17s and 16s only after a vigorous protest of organized workers. This "over night" change reveals the ease with which wages boards may be manipulated by interested employers. In New South Wales the public or "the state only intervenes as umpire"—an arrangement which Mr. Weinstock regards as a guarantee of security to the workers.

No development happens "over night." The causes and forces that result in the development may not always be apparent but nevertheless they exist. Even the state can not do things over night for laws do not become automatically effective. Law reflects a definite demand of public opinion and its enforcement is the result of the activity of those who will be affected by its enforcement.

Whatever benefits have come to the workers have come because they themselves first called attention to existing wrongs and demanded justice. The unorganized have benefited directly and indirectly from organization. Does Mr. Weinstock or any one else imagine that if all organizations were destroyed the workers would be protected by any amount or kind of legislation?

Unorganized workers are powerless to secure either the enactment of a law or its enforcement. Organized workers do not need legislation of the character suggested, for through their organization they participate in making the laws directly affecting them and their interests. And what is of equal importance is that they administer these laws. These laws are not declared unconstitutional or repealed. Regulation of industrial relations through organization is based upon democratic principles and is the antithesis of bureaucracy or paternalism.

Australia is generally referred to as a country governed by "Labor"—at present so-called labor government is in control in the Commonwealth and several of the states. Even under such conditions, the workers complain that the governmental machinery to regulate industrial relations is manipulated by employers to increase their own profits.

Mr. Weinstock says: "In New Zealand, in Australia, and in England, the state, by virtue of its minimum wage laws, has succeeded in wiping out their sweat-shops."

The author of that sweeping statement does not lack courage. Can it be that anyone believes that sweat-shops no longer exist in England? As for New Zealand and Australia perhaps Mr. Weinstock may be persuaded to admit that there may be different opinions as to the economic and social conditions there.

The attention of Mr. Weinstock is here called to the statement published in the Australian paper quoted in the first article in this issue and here requested:

"With all our laws, have we not stodgy, ill-ventilated tenements? Have we not evil-smelling, disease-reeking, tiny backyards and alley ways? Do we not see, right here, sallow-faced girls, aged before the blush of maidenhood has left their cheeks? Do we not see frail mothers double bent, because of the lack of proper knowledge to show them that they are living under improper conditions? Do we not see the puny children, pale and listless, tired and devoid of energy, and, as I am told by an eminent physician, full two inches short in their height, because they live in the slum quarters of our own cities?"

The workers of Australia, through their official journals and papers, complain of exploitation and sweat-shop conditions. One of the most radical labor papers recently contained this statement:

"Unionism is the hope of the world. It is the only way of salvation for the workers."

Mr. Weinstock in his reply again implies that the trade union movement is actuated by selfish motives in its opposition to the legislative method for regulating industrial relations. Despite the viewpoint that our critic insists upon attributing to organized labor, the reasons for our opposition are those which we have presented here and at

many other times. The workers think that their widest opportunities and their greatest welfare will result from organization preferably than from governmental regulation. Because Mr. Weinstock differs from us does not prove us wrong. Rather it is proof that an employer even when acting as umpire will still be influenced by employers' interests and employers' ideals of "educational and moral uplift" of the workers.

From recent events it is fair to assume that Mr. Weinstock has come under the influence of the Drews and the Merritts of the National Association of Manufacturers.—American Federationist.

THE VOCATIONAL SCHOOL VS. AMERICA.

As pathetic a philanthropy as one might see is some good woman's bequeathing her fortune to a school for the training of servants. Unheard of in America, it is no unusual happening in England. Vocational schools for maid servants, for butlers, waiters and the like has become in a sense one of the proper departments of education. To the American mind there is a vague pathos and humiliation about such an institution which does not easily explain itself.

What is wrong with a school for waiters? American as it is to maintain an equality of all vocations, and therewith an equality of dignity and honor, something in a school for waiters nevertheless frightens the American as it would no other countryman. Why not the trained waiter? One feels, somehow, a twinge of abridged democracy at the thought.

The trouble is in the recognition of the waiter by the educational system. To wait on table is no disgrace for a good American. To accept that as one's proper place is a different matter. One dislikes education to admit waitership as a proper aspiration.

A vocational school of waitership imposes a limit on the ambitions of a certain group of citizens. This limitation is more decisive as the citizen making the choice is younger. Why this is not a proper limit for the aspirations of some men is a long discussion. The remaining fact is that for the American it is not. No other people have so keen a contempt for an accepted humble place. No other people have so high a respect for a humble place unrecognized.

This is the trouble with the vocational school of waitership. Its tendency to classify certain men, and to train them to accept the limitations and duties of a certain class is not traditional in this country. There is a difference between the vocational school and the professional school. The former from its nature and method seems to impose un-American limitations on a boy's opportunity. These limitations are not so much outer circumstances as the boy's own spe-

cialized training, his restricted purpose, his inability to enter other classes.

The only justification for waiters and such, in western opinion, is that men come to it by accident. When citizens are waiters by accident of money, of brains, of health, of friends, of circumstances, in general, they are respected. When they are waiters by ideal and plan they are true spirited Americans no longer. This, it may be, is a misguided aspiration, but it is American democracy.

The democratic protest to a vocational school for waiters applies in lesser degree to all vocational schools. A boy bred to a vocation is a member of a definitely recognized class. A good school has formative, differentiative influence on a boy. A vocational school is no exception.

Has education a right to direct a group of citizens into a social blind canyon, early vocational training? The trade and, in the narrower sense usually meant, the vocation admittedly do not offer opportunity for higher self-realization that traditional America demands. It may be happy and comfortable enough in the blind canyon, but the truth remains that the boy or girl by training, breeding and plan is limited to the space within its walls. Classes must be, but to the American they must remain accidental.

But does not vocational training in another sense offer just the equality of opportunity that democracy demands? Is not here youth's chance to make his choice and to become what he wishes? There are two cogent factors against this. The vocational school by its method makes all later and more mature choices subservient to an early and in many cases ill-considered choice. The school in reality becomes the determinative factor in the necessary and mature choice of life work.

The vocational school, secondly, groups our citizenship into special classes. It specializes and trains children for a specific class, excluding him proportionately from other classes. That he chooses, usually immaturely, does not relieve the trouble. The educational recognition of class, be it waiter or harness maker is in danger. It destroys the western principle of the accident of classes.

Our schools, until recently at least, have had as a tacit ideal to train every boy for the possible presidency and every girl a possible first woman of the land. Without regard for vocational differences and, which is eventually the same thing, class differences, America trained her child for himself rather than for his position. Vocational training can be the beginning, or at least the recognition of a beginning, of a class system. That this is wholly evil no one can affirm. That it is not without dangers to western institutions and customs is also doubtful. It can be the breaking of America's frontier ideals.—B. B. in "Teaching," the State Normal School, Emporia, Kas.

THE BONUS SYSTEM TRIED AND FOUND WANTING IN EQUITY AND JUSTICE.

About eleven years ago the Santa Fe System cut off all dealings with organized labor among its shop or mechanical trades and since has not allowed union men to remain in its employ. About the same time it inaugurated the Emerson system of stop watches, standard time, bonus and its other attendant evils. Since that time the shops of this company have been as isolated to union men as was Japan to the balance of the world before one of our American admirals forced open to trade one of its ports. Union men were not given employment if their affiliation with organized labor was known and were discharged when discovered, unless it was hard pressed for competent men when those in charge would shut their eyes to the fact until the rush was over.

The officials of this company will no doubt say they are maintaining their shops on an open shop basis. This is the hypocritical assertion of all unfair employers who falsely prate about the open shop and freedom of contract. Labor has long since learned to interpret the meaning of these false platitudes to mean that the open shop is open to all but union men and that its freedom of contract is the untrammelled freedom of the employer to impose any unfair conditions it wishes upon their employes without the restraining influence of organized labor.

Some time ago an industrial survey of the city of Topeka, Kas., was made under the auspices of the Russell Sage Foundation. A copy of this report was recently forwarded to us, and we find that considerable space is devoted to the bonus system of paying wages in the Santa Fe shops, located there, which by the way are the largest shops on this road.

While the report is based upon the records as furnished by the company and of course it would not reveal any damaging testimony against any of its methods, still an unprejudiced person cannot read the report of the investigation without being forced to realize how unfair and detrimental to the working people is this unfair bonus system. Like all such it has proven to be a delusion and a snare. One cannot beat the manipulator of a shell game, neither can they make anything working this bonus or piece-working system, as there is

generally some way to prevent one from realizing the advantages held out as a possible reward.

The Santa Fe System promises 20 per cent premium for those who perform a certain piece of work within the time allowed—the workers have nothing whatever to do with setting the time allowed—this is done in an arbitrary manner by so-called experts. They can alter, change, raise or lower to suit themselves. However, it is quite likely their continued employment depends on it being kept down to an irreducible minimum—the amount of bonus earned. The records show that so far as the boiler shop is concerned very few men are able to earn this 20 per cent bonus and that only 50 per cent of all those working the system in the boiler shop earn any bonus at all. The records show the rates of pay is much lower than that paid in this section, and that even when the bonus is added to the day's rate, the amount received is less than that paid by other roads in this section. Furthermore, the handy men and helpers do more than two-thirds of the work, and the apprentices more than half of the balance. For instance, here is the number of men given as the average for the month in which this "survey" took place.

Boiler makers, 28; apprentices, 37; handy men, 18, and helpers, 115.

These figures will show at a glance the conditions that obtain as well as the inferior class of work that must be turned out. Furthermore, it shows why the management does not want to deal with organized labor. They are not willing to accord to their employes a square deal; these industrial despots try in vain to justify their unfair position; they can't do it. These conditions are some of the real causes for industrial unrest.

The Pennsylvania Railroad recently had a sixty-page book printed and distributed broadcast, trying to explain away the odium attached to its tyrannical industrial system, in which it refuses to treat with organized employes under the false plea that to do so it would have to contend with strikes, discord, etc. This is false reasoning and the reverse of this result would ensue if these corporations would treat with organized labor and enter into yearly agreements that would remove all unrest, provided they are willing to be fair to their employes. On the other hand, by refusing to treat with organized labor, their employes will remain unorganized for the present, but the time will come when these men will wake up to the injustice and tyranny that has been practiced upon them and will indulge in anarchy and sabotage. They are sewing the wind and will reap the whirlwind.

INDEPENDENT DEALERS ATTACK THE UNITED CIGAR STORES COMPANY.

The Independent Retail Tobacconist Association has gone on the war path against the United Cigar Stores Company and the American Tobacco Company. The association has filed complaint with the United States attorney general, asking for the dissolution of the United Cigar Stores Company as an illegal combination in restraint of trade under the federal anti-trust laws.

It is charged that the American Tobacco Company will only sell its products to the United Cigar Stores Company, and that both of these companies are

mixed up with the United Profit Sharing Corporations, which gives coupons and promises gifts for every so many million coupons secured. When the whole facts are unearthed it will no doubt be found that these other two corporations are only subsidiaries of the American Tobacco Company.

In the meantime our members should not patronize any of these stores, as they do not handle any union made goods of any description, while the independent stores usually do, and they should be patronized.

EMPLOYEES OF THE LA FRANCE ENGINE CO. STRIKE.

On May 6th the boiler makers and machinists employed by the LaFrance Engine Company, of Elmira, N. Y., went on strike. Six boiler makers and about 135 machinists are involved. The company refused to treat with the men as an organized body. Representatives of the machinists and our organization, as well as those from the Mediation and Arbitration Board of the state of New York, tried to settle the matter peaceably but without result. The company is connected with and being supported by the Manufacturers' Association.

Hours and conditions of employment as well as wages are the causes for the strike, all of which are bad, we are told.

FEDERAL ARBITRATORS MAKE AWARD OF WAGE INCREASE FOR ENGINEERS AND FIREMEN.

The arbitrators appointed under the Newland Act, to whom was referred the request of the engineers and firemen on eighty-eight Western railroads for an increase in pay and other concessions and who have had the matter under consideration since November 30, 1914, recently rendered an award in which a small increase in wages was granted. From the sentiments expressed by representatives of the two organizations the award was very much of a disappointment to them.

While we naturally sympathize with anyone seeking an increase in wages and like to see them realize their desires, however, the experience of the past demonstrates fully that it is not, as a general thing, possible to advance the wages of one class of mechanics very far above that of other trades, and as the wages of the transportation employes are much higher than that of the shop trades we fear they will find it hard work boosting them much further until the shop trades are able to secure a boost for their members.

There is an inexorable law of interdependence of all trades and callings. What affects one will eventually affect all in a more or less degree, and therefore what concerns one should concern all.

The transportation organizations in the past have held aloof from the balance of organized labor. This policy of isolation may have served them in the past, but we believe that in the not far distant future it will not prove so desirable and that these organizations will come to realize that it is to their advantage to seek affiliation with and become a part of the general labor movement.

A LARGE INCREASE IN BUILDING PROGRAM OF NAVY.

It is reported that Congress, at its next session, will be asked to authorize the building of six large high speed battle cruisers, four battleships, a number of torpedo boats and destroyers and a large number of submarines. If all were authorized, it would be by far the largest program of building ever undertaken by our government, but whether all are provided for or not it is more than likely that the number will be considerably increased over the number authorized in the past.

Several of the battle cruisers will be decided on, no doubt. Up to the present time our navy officials have failed to build any of this class. They are equal almost to a battleship and have a very high speed. Some of these vessels will, no doubt, be built in the navy yards. Most if not all should be built there, for instead of the profits going to stockholders, in the navy yards it is divided among the men in shorter hours and a living wage.

The New York yard has gotten most of the ships built in government yards so far, but there is no reason why at least two yards on the Atlantic and the same number on the Pacific should not be equipped to build any of the ships needed. It would insure economy in cost of work and better work being done on the ships, and in time of war should we be so unfortunate as to have to face such, they would be invaluable to the navy.

Our navy yard lodges, where conditions and facilities would warrant such an undertaking, should get busy and endeavor to have appropriations made for the necessary equipment and machinery. If they secure these, the building of vessels will soon follow.

Twenty-two or twenty-three years ago some large and powerful vessels were built at the Norfolk navy yard. These ships afterwards made splendid records for efficiency, especially the old battleship Texas.

As that section of the country abounds with lots of efficient mechanics and the facilities and equipment of that yard have been greatly increased in recent years, there is no reason why there should not be a ship on the stocks there all of the time.

No doubt as good reasons can be given why ships should be built in yards on the Pacific coast.

A. F. OF L. WITHDRAWS INDORSEMENT OF THE TAILORS' UNION LABEL.

At a recent meeting of the Executive Council of the American Federation of Labor complaint was made against the Journeymen Tailors' Union by representatives of the United Garment Workers of America, that they were placing the tailors' label on ready-made clothing and clothing made by the seceding faction of the United Garment Workers of America, and that it was in direct conflict with the laws of the Tailors' Union, which forbids the label being used by anyone not a member of that organization.

The facts leading up to this condition seems to be that at a convention of the United Garment Workers last year a portion of the delegates bolted the

convention when they could not carry things as they wished them, and organized a dual organization. The tailors' organization is dominated at the present time by advocates of industrial unionism, and in order to help carry out their ideas of a one big union they formed an amalgamation with this dual organization of garment workers. The last convention of the A. F. of L. investigated the matter and ordered the Journeymen Tailors' Union to resume their former name and sever their connection with the seceding faction of the garment workers. It seems, however, the tailors' officials proceeded to form the "Tailors' Industrial Union," and were using the tailors' label on work done by both the tailors and the garment workers. The Executive Council of the A. F. of L. canceled and withdrew the A. F. of L. indorsement of the Journeymen Tailors' label until such time as this organization complies with the orders of the A. F. of L. convention.

It seems the tailors' organization is in the throes of factional fights, which are bound to have a demoralizing effect. However, there seemingly is a rift in the clouds and that the question of amalgamation will be again opened and that it will back away from the suicidal policy of federating with seceders from another organization.

EX-MAYOR HARRISON OF CHICAGO FAVORS PUBLIC OWNERSHIP.

On the eve of retiring from the office of mayor, after having served in that capacity for five terms, Carter Harrison came out as an advocate of public ownership of public utilities. He is quoted as saying: "The more I see of private ownership of public utilities the more I am convinced that there is but one safe plan for the public to adopt, namely, to set its mind upon public ownership and not to deviate by a hair's breadth. Private management is interested in profitable operation. Economy of operation and inferior service contribute to increase profits. Economy of operation consists chiefly of low wages and long hours for all employes except the higher officials.

"Private management, however, can be made profitable by all the devious ways known to the modern financier. The Chicago surface lines are paying stockholders 5 per cent upon a valuation of which \$40,000,000 is represented by no physical property whatever.

"Years ago the conviction forced itself upon me that graft in municipal government was directly attributable to the private ownership of public utilities *and to the contract system of construction of public works.*"

While there is nothing new in these statements, we all have confidently believed all of them and more were true, still it is well to have the opinion of a man who, for twelve years, was in a better position than possibly any other American official to know and see what the real conditions were and the source of the corruption that seems to be inseparable from corporations owning public utilities. These as well as the large trusts are the source of more corruption in public and private life than all other causes combined.

We believe with Mr. Harrison that public ownership of public utilities is bound to come, and the sooner it arrives the better it will be for everybody, and especially the cities and their inhabitants.

AN OUTRAGEOUS VERDICT.

Justice has been outraged in the verdict of the venal jury that brought in a verdict of murder against John R. Lawson, executive board member of the United Mine Workers' organization, for alleged complicity in the death of a gunman in the employ of the mine owners at Ludlow. It was not charged that he had any direct connection with the killing or that he was even present when it occurred, but simply on the grounds that he was the leader of the men on strike. To use such a flimsy pretext with which to fasten such a crime upon one who was not even present when the killing took place is a travesty on justice and it does the working people a far greater injury than did the Ludlow massacre, when women and children were brutally shot and burned to death by gunmen acting as militiamen. These brutes were white washed and allowed to go scot free, while Lawson was found guilty of murder and sentenced to prison for life, not because he had anything to do with the killing of this gunman, but because he was the leader of the men on strike.

It is charged that the two chief witnesses for the prosecution were gunmen in the employ of the Baldwin-Felts Detective Agency; that the presiding judge, who was recently appointed judge, previous to his appointment, was an attorney for the mine owners and that he had severely criticised officials of the union. He was accused of prejudice against organized labor while the trial went on, but refused to disqualify himself from presiding. Furthermore, it is charged that some, if not all of the members of the jury, were tools of the company—that it was, in fact, a hand picked jury. If half of these charges are true no wonder a verdict in conformity with the wishes of the mine owners was rendered.

Of course, this unjust verdict will be fought to the bitter end, for it is a stab at the vitals of human liberty and justice, and it is but one of the series of such that labor has received from the courts in the past few years. Some of the worst of which have come from the federal courts. Here are a few of them: Fine and imprisonment for A. F. of L. officials because they published a boycott list, legalizing the black list; holding the members of the Hatters responsible for triple damages because they went on strike, and the firm they were working for pleaded a loss, and this last stab where they are trying to establish the principle of personal responsibility of labor leaders for any unlawful acts that any disorderly person may commit even though it be without his knowledge or consent. It might even be a strong armed hireling of the struck company—it matters not. The forces and influence behind this farcical trial and sentence of Lawson would establish such a diabolical precedent so that labor forces would be deprived of leaders, either through intimidation or imprisonment.

An old saying handed down possibly from ancient Grecian mythology to the effect that "Whom the gods wish to destroy they first make mad," it may be so in this case. At any rate unless the courts take a tumble to themselves it will only be a short time until the people will insist on a new deal, with greatly curtailed powers for these courts.

SECRETARY OF LABOR, WILSON, CALLS A CONFERENCE ON LABOR.

We are informed by the daily press that Secretary of Labor Wilson has called a conference of representatives from federal, state and municipal governments to be held at San Francisco August 2nd.

The main purpose of the conference, we believe, is to arrange for a system of co-operation between the federal, state and municipal authorities in solving the problems of labor distribution and the maintenance of labor exchanges. A conference of this kind should be productive of good, practical results in dealing with this important subject.

There has been so much fraud and rascality shown in connection with private employment agencies in the past few years, we are thoroughly convinced that all private employment agencies should be suppressed and this matter handled by federal, state and city governments. All incentive for fraud and gouging of unfortunate people out of employment would be eliminated, and by a system of co-operation, these governmental agencies would give better results in distributing and finding employment for those out of work.

PULLMAN CAR COMPANY GROWING WEALTHY ON TIPS.

At the Chicago hearing of the Industrial Commission, the Pullman sleeping car porters came in for investigation, or rather the methods and wages paid by the company, and it was found that only about one-fourth of the actual money needed to keep themselves and family was paid these porters as wages by the company, and the public was expected to pay the balance, notwithstanding the fact that this company has paid fabulous amounts in the past twenty years as dividends; some of the latter were stock dividends issued so that the enormous surplus of net earnings might the more readily be absorbed.

This tipping system is an imposition upon the traveling public and at the same time degrading and demoralizing to those who receive them. The company should be forced to establish an equitable standard of wages for these porters and be made to pay it out of its earnings instead of by the public.

It is a strange freak of fate that placed a son of Abraham Lincoln at the head of this corporation that so shamelessly uses the colored man to extract tips from the public in order to make its pay roll less a burden. While the father emancipated the colored man, the son is the executive head of a corporation that keeps an army of them in industrial bondage. The company is the real recipient of these tips, as they obviate the necessity of paying a living wage.

A. F. OF L. TO WAGE A CAMPAIGN AGAINST DETECTIVE AGENCIES.

At a recent meeting of the Executive Council of the American Federation of Labor it was decided to inaugurate a campaign, having for its object the

regulation of detective agencies by having Congress and the state legislatures enact laws for this purpose.

The Executive Council indorsed the Illinois law on this subject as a model law, and it seems that Congressman Baltz introduced in Congress last year a bill fashioned after this law, and which the Executive Council thinks can be passed if the forces of labor get behind it and work earnestly and diligently for its passage.

These detective and strike breaking agencies have been fattening long enough off the carcasses of defunct labor unions which they, by all kinds of foul and unfair means, have helped to put out of commission, and our members to a man should solidly line up behind this measure and resolve to work aggressively and diligently until these laws have been enacted. Senators, congressmen and members of state legislatures should be questioned as to how they will stand when this measure comes up for enactment.

The public has had many examples of corruption in connection with detective agencies recently and which show conclusively that they should be strictly regulated by law, for the benefit of the community in general and organized labor in particular, as they have been used by unscrupulous employers to harass and oppress labor on all sides, and if they are properly regulated their power for evil towards organized labor will have been destroyed.

The strike breaking agencies often organized in conjunction with some of these agencies are the most corrupt and debased bodies of men imaginable and don't hesitate at any crime in order to carry their point. By all means let's push this campaign and resolve not to let up until they have been brought back within the pale of the law and their power for mischief and crime removed.

CHICAGO LABOR OFFICIALS INDICTED.

The daily press recently announced that a federal grand jury had brought in indictments against eighteen labor officials of Chicago, and eighty-two contractors and corporations, on the charge of violating the Sherman anti-trust law, by preventing the unloading of machinery shipped from another state into Chicago. They are also accused of forming a combination to force the sale of only certain electrical apparatus, so that articles of this kind shipped from other states could not be sold in Chicago because of this combination.

We do not know what ground there is for these charges. Grand jury indictments should not have much weight, as only one side and ex parte testimony is given. The true facts will no doubt come out in the trials. As for the charge of preventing the unloading of unfair machinery shipped into Chicago from another state, even if true, there should be nothing to it, as this is clearly a right of the men. It is a part of the right to peaceable picketing, and if the machinery, or contractors using it, are unfair to the men it is within their right to try to prevent its being unloaded or used, provided they do so peaceably. To make any other construction would be to take from labor all power to force redress of grievances. As for the alleged combination to limit the sale of electrical apparatus to a certain make, approved by the combination, we know nothing about and will wait the evidence and facts before forming a conclusion.

DEATH OF A PROMINENT LABOR EDITOR.

The international officers of the International Association of Machinists recently announced the death of Mr. D. Douglass Wilson, editor of the Machinists Journal, which occurred on the 3rd day of May.

This brother was one of the oldest in the point of service of any of the international editors, having served as editor of the Machinists Journal for twenty years, and while sorely afflicted, physically, issued a journal that reflected credit upon himself as well as the organization he represented.

The Journal extends its sympathy to the family of the deceased.

AN "OPEN SHOP" TANK BUILDING FIRM LOSES WORK.

Word was received at headquarters a couple of days before closing this issue that the work which was being erected for the Gulf Refining Company at Port Arthur, Tex., by the firm of Reeves Bros., of Alliance, O., had been taken over by the Gulf Refining Company to be completed by itself with the union men on strike against Reeves Bros.

This is one of the firms that formed a combination and tried to establish open shop conditions in the Oklahoma oil fields, and when our men were locked out in Oklahoma, our men employed by these firms in other places, including this work for the Gulf Refining Company, quit work and have been on strike since.

The work will now be done by these men working under union conditions and for a fair company.

OUR POSITION INDORSED.

Since the last issue went forth to our members we have received in various ways, many expressions of approval for the stand we took in cutting out the publication of articles of a personal or muck-raking nature.

We are glad to receive these expressions of approval from our members, not only because it vindicates our position but because it shows our members are thoroughly alive to the best interests of our organization, and all of its members. There could not be anything gained by anyone in continuing to publish articles like some we had in the past few issues, on the contrary it would tend to disrupt and destroy our organization; surely there is not one of our members that desires to be a party to such a result. We firmly believe so and, therefore, look for a continued compliance from all, to our request to not send anything of a personal, abusive, fault-finding, criticising nature. We hope our expectations in this matter will be realized, but if it is not and articles containing personal abuse or criticism, or insinuations or like matter, is sent in, we will be compelled to adhere to our announcement and cut out the offensive paragraphs or reject the articles entirely.

QUOTATIONS.

I should wish to act, no doubt, in every instance as I pleased, but I reflect that the rest also of mankind would then do the same; to which state of uni-

versal independence and self-direction I should meet with so many checks and obstacles to my own will, from the opposition and interference of other men's, that not only my happiness but my liberty would be less than whilst the whole community were subject to the domination of equal laws. The boasted liberty of a state of nature exists only in a state of solitude. In every kind and degree of union and intercourse with his species it is possible that the liberty of the individual may be augmented by the very laws which restrain it; because he may gain more from the limitation of other men's freedom than he suffers from the domination of his own. Natural liberty is the right of common upon a waste; civil liberty is the safe, exclusive, unmolested enjoyment of a cultivated inclosure.—Paley.

Pride is as loud a beggar as want, and a great deal more saucy. When you have bought one fine thing, you must buy ten more, that your appearance may be all of a piece; but it is easier to suppress the first desire than to satisfy all that follow it.—Benj. Franklin.

Probability is the appearance of the agreement or disagreement of two ideas by the intervention of proofs whose construction is not constant, but appears for the most part to be so.—Locke.

Who by aspersions throw a stone at the head of others, hits their own.—Herbert.

He who will not reason is a bigot; he who cannot is a fool, and he who does not is a slave.—Byron.

STRIKES NOW IN FORCE.

- Illinois Central R. R. (Federated Trades strike on.)
- Harriman Lines. (Federated Trades strike on.)
- Pere Marquette R. R., Grand Rapids and Saginaw, Mich. (System Federation strike.)
- Contract shops, Mobile, Ala. (Metal Trades strike.)
- Atlantic Basin Iron Works (Shields & Moran, New York). (Strike on.)
- Hibbon & Co., contract shop, South Chicago, Ill. (Unfair.)
- Milwaukee Boiler Co., Milwaukee, Wis. (Strike on.)
- Stockton, Calif. (Metal Trades strike.)
- Warren City Boiler & Tank Co., Warren, Ohio. (Strike on.)
- Standard Boiler & Plate Iron Co., Niles, Ohio. (Strike on.)
- Reeves Bros., Alliance, Ohio. (Strike on.)
- Hammond Iron Works, Warren, Pa. (Strike on.)
- The Petroleum Iron Works, Sharon, Pa. (Strike on.)
- The Treadwell Construction Co., Midland, Pa. (Strike on.)
- Riter-Conley Construction Co., Pittsburgh, Pa. (Strike on.)
- Des Moines Bridge & Iron Works, Des Moines, Iowa. (Erecting work at Bremerton, Wash., Valejo, Calif., and Norfolk, Va., Navy Yards.)
- La France Engine Co., Elmira, N. Y. (Strike on.)

Mechanical Department.

To Develop Frustum of a Hexagon Shaped Pyramid

A-b-c-d-e-f-a, Fig. 1, shows the outline of plain view and h-n-i-k-m-j, Fig. 2, shows the side elevation, and Fig. 3 is the template.

To lay out, first ascertain the desired diameter and with G as a center strike circle in Fig. 1, divide the circle into six equal parts and strike lines from one division

continue until it cuts center line at O then strike line from K through I to the same point O. Next return to Fig. 1, and from Point G strike a line at right angles with line e-b, then take distance from M to O, Fig. 2, and transfer it to line G-o, Fig. 1, also take distance from M to N and mark it on line G-o, Fig. 1, and strike right angle line, then strike a line from b to o.

Then with O as a center and radius o-b

point to another until all are connected, then strike lines through center, draw lines connecting points on opposite sides as e to b, f to c, etc.

Next proceed to lay down the side elevation. First strike horizontal line j-m-k and make it as long as the distance from f to b or e to c, Fig. 1, and from the center M erect a right angle line m-n-o mark the straight height of frustum of cone from m to n, strike right angle line h-i through N then strike line from J through h and con-

strike the large circular line in Fig 3, next take the height which shows top of frustum, strike small or top end of frustum, take distance from a to b, Fig. 1, and mark it from a to b, Fig. 3, continue to mark in like manner until all points are taken, from these divisional lines strike lines to o until all points are taken, these lines represent the bending line.

Add sufficient metal on end of template to make a lap.

Connect points a b b c c d d e e f f A by straight lines, do the same with the top lines this will complete the template.

International Officers' Reports.

REPORT OF THE I. S. T. ON VOTE ON AMENDMENTS AND CONSTITUTION.

Kansas City, Kas., May 20, 1915.

To the Officers and Members of all Subordinate Lodges, Greeting:

I herewith submit the vote taken on the proposed amendment submitted by Lodge No. 123 to Article 5, Section 3 of the International Lodge Constitution, which has been published in the official Journal in the March and April issues:

Lodge	Vote
4.....	No
32.....	No
44.....	No
70.....	Yes
83.....	No
96.....	No
99.....	Yes
103.....	Yes

595.....	No

Total: Yes, 18; No, 17.

Number of lodges in good standing, 343. Total number of lodges voting, 35. Number of lodges indorsing the resolution, 18. Number of lodges voting against resolution, 17. Total votes cast equals 10.2% of lodges in good standing. Number of votes cast in favor of resolution equals 5.25% of lodges in good standing. Total number of votes cast against resolution equals 4.96% of lodges in good standing. Number of indorsements required by Article 3, Section 1, resolution failed to get the 20% indorsement in good standing equals 68 lodges. The resolution failed to get the 20% indorsement as required by Article 3, Section 1, as will be noted by the results shown falling far short of the mark, only receiving a frac-

tion more than one-fourth the required number.

Hoping this will be satisfactory, and with best wishes, I beg to remain,

Yours fraternally,
FRANK P. REINEMEYER, I. S. T.

To the Officers and Members of all Subordinate Lodges, Greeting:

We, the undersigned, have canvassed the vote taken by the lodges on the amendment submitted by Lodge 123, and certify that the result as prepared by International Secretary-Treasurer Reinemeyer is correct.

J. B. CASEY,
A. HINZMAN.

Kansas City, Kas., May 20, 1915.

To the Officers and Members of all Subordinate Lodges, Greeting:

I herewith submit the vote taken on the proposed amendment submitted by Lodge No. 126 to Article 5, Section 5, of the International Lodge Constitution, which has been published in the Official Journal in March and April issues:

Lodge	Vote
4.....	Yes
44.....	No
70.....	Yes

449.....	No
451.....	Yes
501.....	No
520.....	Yes
529.....	Yes
548.....	Yes
568.....	Yes
595.....	Yes

Total: Yes, 18; No, 10.

Number of lodges voting for Resolution, 18. Number of lodges voting against Resolution, 10. Total votes cast equals 8.16% of lodges in good standing. Number of votes cast favoring resolution equals 5.25% of lodges in good standing. Number of votes cast against resolution equals 2.91% of lodges in good standing. It will be noticed by the members of the Brotherhood that this resolution did not carry the percentage as required by Article 3, Section 1, and fell

far below the vote taken on resolution submitted by Lodge No. 123.

Hoping this will be satisfactory, and with best wishes, I beg to remain,
Fraternally yours,

FRANK P. REINEMEYER, I. S. T.

To the Officers and Members of all Subordinate Lodges, Greeting:

We, the undersigned, have canvassed the vote taken by the lodges on the amendment submitted by Lodge No. 126, and certify that the result as prepared by International Secretary Reinemeyer is correct.

J. B. CASEY,
A. HINZMAN,

REPORT OF SECOND INTERNATIONAL VICE-PRESIDENT NOLAN.

My last report was from Washington, D. C., March 5, received instructions from first international vice-president to take a matter up with the secretary of the navy which had been pending for some time, relative to an increase in wage for the boiler makers employed at the Norfolk Navy Yard as recommended by the wage board in 1914. After several conferences the question seemed to be adjusted satisfactorily and so notified the members of Lodge No. 57, through their secretary, Brother Thomas, but later on complications came up in the distribution of increase, which will be explained later on in this report.

March 7, by instructions from Vice-President Hinzman, left Washington, D. C., to investigate a grievance in the interest of Lodge No. 55. Met Brother Healy and other members after which I had a meeting with the general manager of the Newport News Shipbuilding and Dry Dock Company on the settlement of late strike; am waiting future developments pending an adjustment as agreed to between a committee of Lodge No. 55, Brothers McArthur, Williams and Ledwetch and the general manager of the company in order to make a complete report in next issue of Journal.

Lodges No. 57 and 428 have been doing some active work of late in reinstating delinquents and initiating new members. Have now about 97 per cent membership in both lodges.

The Sea Board Air Lodge No. 298, Portsmouth, Va., have a 100 per cent membership, but nevertheless are active just the same in helping to build the membership of the navy yard and contract lodges, hence through the active co-operation of all three lodges effective organizing has been done.

March 11, I was notified by Vice-President Hinzman to proceed to Rocky Mount, N. C., and confer with Brother Dixon on a grievance pending for some time with the officials of the Motive Power Department of the Atlantic Coast Line Railroad Co. Brother Dixon was chairman of the boiler makers on the system. On reaching Rocky Mount I met Brother Dixon and several other brothers of lodge No. 239, getting all information in connection with grievance as well as local conditions.

While at Rocky Mount I attended a local federated meeting of the trades employed at the Coast Line shops. Several short talks were made by members of the local federation, which was of special interest to the entire federation on the Coast Line, which I have no doubt will be carefully considered and acted on at the next regular federated convention. Before adjourning Brother Dixon made a very interesting explanation on the local situation, what had been done in the past and what can be accomplished in the future in the interests of justice, when labor forces stand royally together. His appeal for united action either in defense of the individual members, or the principles of the federation was surely appreciated by every member present, as Brother Dixon's statements on the question of federation and how conducted was absolutely correct.

March 14 I had a meeting with Mr. R. E. Smith, general superintendent of motive power, Coast Line Railroad, at Wilmington, N. C., going over the entire situation relative to Brother Dixon's grievance with the Company, using every appeal and argument to have him reinstated at the Rocky Mount shops, but no adjustment of grievance was made, unless to inform me that on his first visit to Rocky Mount shops, which would be in a few days, he (Mr. Smith) would make an investigation of Boiler Maker Dixon's case, and notify me result of investigation, but am still patiently awaiting his report on the promised investigation which I haven't received up to date, May 3.

Same date, March 14, I received a telegram from international office to leave as soon as possible for Portsmouth, Va., and report to the secretary of Lodge No. 57. On meeting Brother Thomas I found that a small increase in wage given was the cause of the grievance, due to the fact that the boiler makers employed at the Norfolk navy yard and the industrial manager couldn't agree on the introduction of a system that meant a decrease in wage for fifty per cent of the boiler makers. A pretty nice piece of economic juggling on the part of the industrial management, sure. An increase for 50 per cent of the force employed, and four new ratings added to the four old ratings in force for several years, which, if accepted, would make eight ratings in the boiler shop. There seems at this time to be no limit to the vagaries of the advocates of what is known as shop efficiency, even to the extent of disorganization of practical methods of production.

March 15 a special meeting of all boiler makers was held, Brother Phillips in the chair, in order to take definite action on the distribution of the wage increase, also the four new ratings about to be established. The result of the special meeting was, that a committee of two were appointed, Brothers Thomas and Calvert, to take up grievance with the general foreman boiler maker, Mr. Boole, as a matter of courtesy and naval regulations, also the industrial manager, Mr. Watts, and the secretary of the navy, if nec-

essary. According to instructions, Brothers Thomas and Calvert and an International representative called on the general foreman boiler maker, explaining to him action taken at special meeting. Afterwards called at the office of the industrial manager, but found he was absent, according to information given the committee, but Mr. Norris, his assistant, advised that we call later.

The following day, March 17, at 10:30, the committee had a meeting with the industrial manager in company with Mr. R. E. Glover, formerly a member of the Brotherhood, was a charter member of Lodge No. 57 and at present is the sheriff of the city of Portsmouth, Va., always ready to assist the boiler makers when called on, or any other craft when involved in a justifiable controversy with either a private corporation or the government in the interest of a square deal.

After being introduced to the industrial manager we explained the object of our visit and our reasons for opposing the injustice of the non-equal distribution of the wage increase, as well as the united opposition of the boiler makers to any increase in classes, other than the four classes then in force, but no amount of argument on the part of the committee or Mr. Glover could convince the industrial manager to recede from his position; pleaded with him to allow the four classes to remain in force, which had been for years, and distribute the increase to all as a matter of justice which they were entitled to, but would not consider an appeal whatever. Therefore committee informed him that the grievance would be taken before the secretary of the navy, handing him before leaving his office a protest to be forwarded to the Navy Department, after which a telegram was forwarded Senator Swanson of Virginia, to arrange date for committee with the secretary of the navy, and later on received the following wire:

Mr. Geo. Thomas, 204 Lincoln street, Portsmouth, Va. Meeting arranged with the secretary of navy at 10:30 a. m., March 23. Signed, Senator Swanson.

Committee left for Washington on the 22, Mr. R. E. Glover in company with them, arriving there on the morning of the 23, called on Senator Swanson, senate office in building, to explain nature of grievance and also to have him accompany the committee to the office of the secretary of the navy. The committee were received very courteously by the secretary, and the entire situation relative to grievance of the boiler makers at the Norfolk navy yards were fully discussed, also asking the committee many questions for information in connection with the case. However, no decision was reached, unless to refer the entire matter at issue to the assistant secretary of the navy. On his return from the Pacific Coast about April 10, committee leaving for home.

March 26 I left for Philadelphia to attend meeting of Lodge No. 19, of whose members are employed in the navy yard. On my ar-

rival there visited the yard in order to notify some of the members of Lodge No. 19 as per instructions of the International office.

Brother Higgs, late corresponding secretary of Lodge No. 19, called on me at hotel, also another member whose name I have forgotten, and in company with them left for meeting.

Meeting was called to order by Brother Goodfellow, president of Lodge No. 19, who explained the object of meeting, as well as conditions in the navy yards. A pretty fair attendance showed up considering the extreme cold weather, at least to the writer from the Sunny South. There were several good speakers present, namely: Brother Hitche, representative of the American Federation of Labor; Brother Roach, representative of the Moulders Union of North America; Brother Keenan, representative of the International Associations of Machinists of Philadelphia. Brother Ritche was chosen as permanent chairman of meeting, which he accepted, assuring all present that he considered it a pleasure as well as a duty on his part to assist in every way possible to build up the membership of locals whose craftsmen take no interest in the welfare of themselves, or their fellow workers, and thanked the officers and members of Lodge No. 19 for honor conferred.

Brother Ritche made a good practical address on the trades union movement and the absolute necessity of it to protect fair working conditions and wage in this age of financial combinations. Organized for the express purpose of defeating the legitimate efforts of organized labor, and closing his remarks with an appeal to all present to use every possible effort, not only in the interest of the Brotherhood of Boiler Makers and Iron Shipbuilders and Helpers of America, but all crafts in the city of brotherly love.

Brothers Roach and Keenan both made forcible addresses on the object of labor movement, giving practical reasons of the imperative necessity of organization among the wage earners in order to cope with the organized opposition of capital against their every interest. The meeting was a success and I desire to thank the officers and members of lodge No. 19 for consideration shown while in their city, and trust it's only a question of a short time when the boiler makers, iron shipbuilders and helpers employed in the government navy yards and arsenals will have a district lodge with a representative in Washington, D. C., to guard their interests and adjust grievances when necessary to do so. It can be done if the necessary co-operation of all lodges are given.

A federation of all crafts in navy yards and arsenals is an absolute necessity to secure legislation of a general character, otherwise it's impossible, as local efforts have not been successful in the past. Local federations should be organized in all government navy yards and arsenals, then in a

convention of delegates representing local federation, a national naval federation of trades can be organized on a permanent basis under the jurisdiction of their respective internationals, and the American Federation of Labor. There are several reasons why a naval federation of trades is necessary, in fact all employes know it from the past experience.

While in Philadelphia I received orders from Vice-President Hinzman to get in touch with Brother Napier, business agent of Lodge No. 341, relative to the struck job at Marcus Hook, Pa., and in company with Brother Napier went there, was introduced to Brother Carter in Chester and the other brothers then on strike at Marcus Hook, and talked over the strike situation there. Before leaving Philadelphia reported the strike situation to the International president.

I regretted very much to leave Philadelphia before having an opportunity of visiting the navy yard, but owing to an arranged meeting with the general manager of the Newport News Shipbuilding Co., on March 30, was compelled to do so. Meeting was held as arranged, Bro. McArthur of Lodge 55 with me, and was assured that settlement made with the committee would be carried out, therefore, will be in a better position to give a full and complete history of settlement of strike, cause of same and results, in a future issue of the Journal, as future developments may change the situation satisfactorily I hope.

March 30 I left on an evening boat for Baltimore to confer with the members of Lodge No. 193, also to assist in every way possible in building up their membership. Met Brothers Chaney and Gontrom, old members of the Brotherhood in the city of Baltimore. Afterwards had a conference with Brother Shandley, president of No. 193, on general conditions in Baltimore. Called on Brother Ickelberger, representative of the American Federation of Labor, to discuss matters of general interest to our Brotherhood and both of us were of one opinion as to what should be done to effect an organization of our craftsmen there, which was forwarded to President Franklin by night letter for his approval. Telegram was sent after Brother Shandley and I visited the tank jobs at Fairfield, now under construction by the Bartlett and Hayward Co., and the Novelty Iron Works of Baltimore.

April 7, attended an open meeting of Lodge No. 193; a fairly good attendance showed up from both jobs, which I believe will bring good results later on as several by a show of hands expressed a desire of becoming members at next regular meeting, as many of our craftsmen in Baltimore now realize that there must be an organization there, as conditions are going from bad to worse. No agreement to work under, no co-operation whatever, nothing but the privilege of competing one against the other.

When I look back at the position of the Brotherhood several years ago in the city of Baltimore and the present conditions, I must confess that I couldn't believe such a change would ever come about. At one time the Banner City of the Brotherhood in the East, working under an agreement and a fair wage, but matters have gone wrong, due to lack of an organization. No interest whatever unless to forge a chain for the purpose of making absolute slaves of our craftsmen in the interest of grasping corporations that recognize no principle or condition in the interest of human rights.

April 8, left Baltimore for Norfolk, Va., by order of the International president, to attend an arranged meeting between the officials of the Seaboard Air Line Railroad and the executive board of the federated trades on the above system, on a grievance pending since October, 1914, at the company's shops, Savannah, Ga. On reaching Norfolk found that meeting was postponed from April 12 to the 19 inst., during that time visited Newport News as well as attending to several matters in Portsmouth and Norfolk which needed attention.

April 19, the arranged meeting between the Seaboard officials and the federated executive board was held. After a two days' conference the grievance was adjusted satisfactorily. Brother Garvey represented the federated district. Brother Jewell, chairman of the boiler makers on Seaboard Air Line system, was also present as member of the executive board.

April 13, a telegram was received from Senator Martin of Virginia, dated Washington, D. C., representing the boiler makers of the Norfolk navy yards to send their committee there, as a meeting was arranged for them with the assistant secretary of the navy at 10:30 a. m., April 14. The committee was Brothers Thomas and Calvert, also the writer, arrived in Washington on date as requested, called on Senator Martin to explain nature of grievance; however, the senator informed the committee that owing to Lincoln Memorial holiday all government departments were closed until the following day. We afterwards called on Brother Berres, secretary-treasurer of the metal trades department, and knowing from past experience around Washington, that he is always ready to help when called on, we extended him an invitation to be with the committee when meeting Mr. Roosevelt the following morning, which he kindly agreed to do.

The following morning in company with Senator Martin, Congressman Holland, also Brother Berres, representing the metal trades department, and a committee from Lodge No. 57, Brothers Thomas and Calvert, met in conference the assistant secretary of the navy yard, also Captain Bryan, director United States navy yards, and am pleased to report that the controversy between the industrial manager and the boiler makers at the Norfolk navy yard have been

adjusted satisfactorily through the navy department. Therefore in consideration of adjustment the members of Lodge No. 57 desire to express their sincere appreciation through the columns of the Journal to their many friends who assisted them in adjusting a rather complicated situation.

On returning from Washington, D. C., visited the P. I. W. and Des Moines Bridge and Iron Co.'s jobs in company with the business agent of Lodge No. 428. Both jobs unfair, refused to recognize the Brotherhood, but our members obeyed the order of the International president, refusing to scab on their brothers in the oil fields of Oklahoma and other places where strike is on for fair conditions and recognition of the Brotherhood and again organized capital, whose object is to debase and crush the labor movement.

The strike of the boiler makers against the Roper Lumber Co., at New Bern, N. C., has not been settled yet, although every effort has been made to adjust it with the general manager and superintendent of the company on various occasions.

Just think, in this age of modern civilization that any corporation would insist on increasing the hours of labor from No. 9 to No. 11 without any compensation and further claim such was done from a humanitarian standpoint in order to keep the men employed because of depressed business conditions in the lumber industry, see, yet the company got away with it, as such conditions have been accepted by the employes of the company, with the exception of the machinists and boiler makers, who are still out.

April 17, a federation of navy yard trades was organized at Portsmouth, Va.; by-laws were adopted and local officers elected. A copy of the by-laws will be mailed to each International president of the affiliated trades for their approval and when approved every effort will be made to organize a national federation of navy yards and arsenals under the jurisdiction of their respective internationals and the American Federation of Labor.

Lodge No. 428 held a smoker and social good time on April 30, at the Red Men's Hall, Berkley, Va. An invitation was extended to the members of Lodges No. 57 and 298, which was accepted and quite a large number were present. Brother Callahan and his committee did everything possible to make the occasion one of pleasure for the members of the visiting lodges.

Brother Shultz of Lodge No. 57 made the principal address of the evening which was very much appreciated on account of his many years of experience as a member of the Brotherhood in this and other sections of the country, and when closing his remarks urged closer co-operation among the members as well as a careful study of the many problems that confront our craftsmen at this particular time, when co-opera-

tion, education and constitutional discipline should be the watchword of the movement, and urged all present to join in singing the opening Ode of the Brotherhood, which was complied with, all standing.

Several other brothers responded after which all left for their homes, satisfied with an evening of pleasure and wishing Lodge No. 428 every success in the future.

In my last report for Journal in connection with late banquet of Lodge No. 450, Washington, D. C., I failed, through an oversight on my part, to give proper credit to Brother J. W. Kimmerling as a member of the committee on speakers, who was untiring in his efforts in securing prominent speakers on that occasion; in fact the active work of all the committees and co-operation of the entire membership of Lodge No. 450 made a success of their 9th anniversary as a lodge of the Brotherhood of Boiler Makers, Iron Shipbuilders and Helpers of America.

Yours fraternally,

THOS. NOLAN, I. V. P.

REPORT OF INTERNATIONAL VICE-PRESIDENT MERRIGAN.

To the Officers and Members of the Brotherhood:

At the conclusion of my last report, I stated that I had visited Lodges 379, 378 and 398. Lodge 379, McAdam Junction, was holding its membership intact. Short time prevailed there as at all other points on the system. I found that this lodge had not been paying any district lodge per capita for some time, and instructed the members to see to it that they make a start the following month, as it was imperative that all lodges on the system pay per capita to District Lodge No. 30. I was requested by the members to have a number of due stamps redeemed by the I. S. T., as they were purchased in advance and had been left by former Secretary Brother Moore, who had recently started in another field of labor.

While in Moncton, I had a special meeting with the members of Lodge No. 378. This meeting was well attended by both boiler makers and helpers. Relations there were harmonious as in the past. Working hours had been shortened for a few weeks. Our members employed on the Intercolonial are not experiencing such trying times as their brothers on other railroads. The usual force of employes is maintained.

From Moncton, I went to Riviere-du-Loup to meet with the members of Lodge No. 398. Had a special meeting and informed the members of the changes to our constitution enacted at the last convention. There were a few matters which the lodge desired that I investigated in regard to members at other points east of there. Former president of the local lodge had been recently promoted to foreman of the back shop, Brother P. Laperriere.

I arrived in Quebec the following day and arranged for a meeting with the members of Lodge No. 601 for that evening. I had had a request from Lodge No. 601 to call there, as there was a dispute existing among the members in regard to some work that was being performed outside of the shop. After a thorough explanation in regard to such matters, the members were satisfied that they were unable to take any action in such matters. Brother Thompson, president of the local lodge, had been off work, owing to blood poisoning in one of his arms, and was out of town. Members employed by the C. N. R. were working about 45 hours per week.

I left Quebec late that night, arriving the following day in Montreal, and attended regular meeting of Lodge No. 134 that evening, which was fairly well attended. One of the many matters which come before the meeting was the shortage in the accounts of the late financial secretary, George McFetrich. After some discussion, I was requested to investigate the matter, as the lodge had received a communication from International President Franklin, advising that I would take the matter in hand. Committees were endeavoring to reach McFetrich, between meetings, but without avail. I ascertained the facts in connection with the shortage of the late financial secretary's accounts from the special committee and later made arrangements with a local attorney to take action against the late financial secretary, and left the matter in the hands of the attorney.

As I had received a message from International President Franklin, advising that the Executive Council would convene on October 12, I had to leave town the day following, arriving at headquarters for the 12th.

The Executive Council convened on the 12th and concluded their work on the 26th. Owing to the proceedings of the Executive Council being printed and published in pamphlet form for the benefit of our members, it is hardly necessary for me to go into detail at this time. However, pursuant to the last convention, your Executive Council was called upon to make such changes in compliance with the constitution which consumed some extra time apart from the regular routine of business. We believe the work performed in connection with the supplies of the Brotherhood has met with the approval of the membership. The usual number of grievances had to be dealt with, which come from different lodges throughout our organization and other sources. We feel confident that our decisions upon the various matters brought to our attention were in the best interest of the rank and file, notwithstanding criticism to the contrary.

Before leaving headquarters on the 27th, I had an understanding with International

President Franklin in connection with my work in this territory, explaining what I deemed advisable to be done in the interest of our organization. On the 27th I left headquarters, arriving at Montreal on the 29th. Owing to the falling off in the membership in Lodge No. 134, I deemed it advisable to remain in Montreal for some time. I endeavored to reach as many delinquents as possible through the mail, and by visiting them personally at their homes and others at their places of employment, which proved effective. At the same time I took up the matter of the shortage found in the books of the late financial secretary of Lodge No. 134 and tried to bring him to account for same through the local court. Every legitimate course was taken in this matter to locate McFetrich, but to no avail. Early in the month of December we were informed that McFetrich had left the country some time previous, but we were unable to ascertain his whereabouts.

Later I received a phone message from the president of Lodge 604 to come to Joliet, as the audit committee had found a shortage in the accounts of their financial secretary, who in the meantime had left town for a few weeks, but later he returned to the old folks at home for shelter. It was after his return to Joliet that I was requested to visit there, and endeavor to have him make good the shortage in his accounts. With the assistance of the local president I met him and talked the matter over with him with the result that he would replace the amount that he appropriated for his pleasure, within six months.

On December 7 I left Montreal, to attend an open meeting of the metal trades employed at Sherbrooke, where Brother Geo. Brunet, A. F. of L. organizer, was holding special meetings. Brothers Arcand and McLelland of the Carpenters and Machinists, respectively, were also present. The meetings were addressed in both the English and French languages, as there was a fairly large attendance. While in Sherbrooke, I was in a position to ascertain what business Lodge 370 was doing. After I had called a special meeting of the boiler makers and helpers, I learned that the few that are employed at our trade there were not sufficiently interested in the labor movement to continue to conduct meetings and safeguard their interests, at least for the time being, as they could not see their way clear to pay dues owing to the short hours they were working, and the few that were interested were not sufficient to constitute a quorum. However, these men will see the necessity of organization later when they are in need. After I was through at Sherbrooke, I returned to Montreal to take up some unfinished work.

On December 14th, I left for Riviere-du-Loup, to investigate a grievance which was brought to my attention by one of the members of Lodge 398, employed at Chaudiere Junction. The aggrieved brother, an-

other member and myself arrived at Riviere-du-Loup on the night of the 17th and after a special meeting of organized labor was held, we held a special meeting of Lodge 398, to investigate the grievance. At a meeting of Lodge 398, a few months previous, the members in attendance saw fit to notify the aggrieved brother that he had been suspended and that he could consider himself no longer a member of the Brotherhood. No reason had been advanced other than the members had learned through another employe that the aggrieved brother had commented unfavorably of some work that had been performed at Riviere-du-Loup, when it arrived at one of the divisional points. At the meeting it was found that there had been some talk at one of the regular meetings of Lodge 398, regarding what one of the members had heard from a traveling employe, and on the strength of this information, the secretary had been instructed to notify the aggrieved brother that he had been suspended as a result of this information. Further investigation showed that the brother had not been suspended, and that the letter which was forwarded was meant to be a warning. Communications from Lodge 398, are written in the French language, and the aggrieved brother being English, some confusion existed owing to the phraseology of the communication. However, the grievance was amicably settled, and the members present regretted that the matter had caused any annoyance. I returned the day following and stopped at Chaudiere Junction, and had a talk with three helpers who were eligible for membership in our organization and had them fill in applications and forward same to the secretary of Lodge 398, afterwards returning to Montreal, remaining there until January 6th, during which time with other work I endeavored to interest some shipbuilders who were employed at the Canadian Vickers Company, in our organization. Most of them were members of the society of Boiler Makers and Shipbuilders of Great Britain. I arranged for a special meeting, and later I was informed that they were unable to attend as there was to be a banquet under the auspices of the Canadian Vickers football team, and that all of them had previously bought tickets and regretted that they did not have the date in mind while talking over the matter of holding a meeting, but would be glad to take up the subject at a later date.

As I had a request from Lodge 417, to visit North Bay, at my earliest convenience, I left Montreal January 7th, arriving at North Bay that evening, so as to be in attendance at their regular meeting on the 8th. I met several of the officers and members the day following and was informed that they had changed the dates of their meetings, and that the next regular meeting would be held on the 11th, and was requested to call on several delinquent members in the meantime. On the 11th, I

addressed the regular meeting of Lodge 417, which was very well attended by the boiler makers and helpers employed at North Bay, from the T. & N. O. and the C. P. R. shops. The meeting was not altogether a closed one. Every member delinquent and non-members were invited to attend. At the adjournment the officers and members were pleased at the attendance, satisfied that my visit to North Bay would make those employed at the trade more enthusiastic in the labor movement.

I left North Bay, after the adjournment of the meeting to go to St. Thomas, as I had received a communication while at North Bay from International President Franklin advising that I go there and ascertain the grievance of Lodge 413. I arrived at St. Thomas on the 12th, and attended the regular meeting of Lodge 413 that night. After hearing the nature of the grievance I had a special committee appointed to meet the following evening so as to get to the cause of the grievance. At the meeting it was learned that the members of Lodge 413 employed by the Pere Marquette Railway at St. Thomas on date of December 3rd, saw fit to present to the superintendent of motive power, a revised schedule of working conditions and also requesting an increase in wages all around of one cent per hour. A reply was received from the company to the effect that the company did not consider such would be to the best interests of the company, to enter into any signed agreements with the various shop crafts at the present time, and that they did not consider it necessary to have any signed document in order to treat their employes just and fair, which they proposed to do. And also wished to notify them that their present schedule in effect at that time, would become null and void on and after January 1, 1915. Lodge 413 had previously decided to place the matter before the Department of Labor at Ottawa, and the secretary had written to the department for a few blank forms so as to enable them to make application for a Board of Conciliation if necessary. A reply was received from the Minister of Labor requesting information as to the cause of their grievance, and at the same time advancing the idea that he did not think that WE would be able to continue wages during these trying times as in times of prosperity, and inclosed several blank forms. After we had discussed the grievance for some time it was decided that I should go to Ottawa, and take the matter before the Minister of Labor. A communication which I desired in connection with this grievance was at headquarters, and I requested that same be forwarded to me to Ottawa, so that I would have it when I arrived there. I left St. Thomas, the following afternoon, arriving at Ottawa the following morning. I had an interview with the Minister of Labor, regarding the grievance, and could not receive any definite assurance that he would personally use his influence in having the agreement restored

to the employes of the Pere Marquette Railway at St. Thomas. Although I had a long talk with the minister, regarding the grievance. While in Ottawa, a rumor was afloat that submarines were to be built at Montreal, at the Canadian Vickers Company plant for Great Britain, and as I had to call at the Labor Department in the course of a few days, I went to Montreal on the 16th, remaining there until the 21st, during which time I got in touch with some of the officers and members of Lodge 134, so as to ascertain whether the rumor was authentic or not. The rumor proved to be true, and a large number of our members who were unemployed were seeking employment. The number of under-water boats to be built could not be learned definitely. However, it was generally understood that the job would not be completed much before the month of June. The contract for the under-water boats was given to the Fore River Shipbuilding Company, or in other words to the Schwab interests. A large number of men experts in the building of such boats were dispatched from Quincy, Mass., and others from San Francisco, Calif., to complete certain operations.

While I was in Montreal I received a communication from headquarters advising that the letter I desired in connection with the grievance at St. Thomas, could not be located at the time of writing, but if found later, same would be forwarded to me.

On the 22nd I left for Ottawa, to take up some other matters with the Department of Labor, and also called on our members employed at the C. P. R. roundhouse. At the later place I met with one of our members who informed me that he had a grievance and desired to know to whom the matter could be referred to. I heard the grievance of this member and forwarded the same to the secretary of Lodge No. 134, instructing that the lodge take immediate action, which I learned later had been complied with and that the matter had been taken before the lodge and later before the meeting of the System Federation.

On the 23rd I left for Trenton, arriving there that evening, and remained there until the 25th. I met with the members employed at the C. N. R., who are members of Lodge No. 548, and discussed the advisability of instituting a lodge at Trenton, so as to bring the members employed on the eastern division closer. All were in favor of the measure and had been seriously considering during the time I was off the road, and since the reduction of force and the short time being worked, they had decided to hold the idea over until a more opportune time. I also called at the new roundhouse of the C. P. R., where there are two men employed. Both of them were delinquent, but had not lost interest in our organization entirely, and assured me that they would be reinstated as early as possible.

On the 26th I left for St. Thomas, arriving

there same day, and attended the regular meeting of Lodge No. 413. Reported regarding my interview with the Minister of Labor, and the assurance which I had received from him. The following evening I met with the special committee and drafted a letter, and forwarded same to the superintendent M. P., of the Pere Marquette Ry. Later I received a communication from the chairman of the committee, advising that a reply had been received from the superintendent M. P., and the members of Lodge No. 413 had decided to hold the matter in abeyance until times were more prosperous.

After meeting with the committee, we proceeded to the local meeting of the Trades and Labor Council, and I had the honor of installing the newly elected officers for the ensuing term. The Trades and Labor Council of St. Thomas, hold interesting meetings, as I had witnessed the business transacted on other occasions while in St. Thomas. The delegates from Lodge No. 413 attend regularly and hold office in the local council.

On the 28th I left for Edmonton, Alberta, stopping off at Winnipeg for a few hours for train connections, and met with the president of Lodge No. 451, to ascertain what action had been taken in regards to the request of our members who made application for a charter at Edmonton, some of whom were members of Lodge No. 451, and also desired to be granted a certain jurisdiction. I was informed that Lodge No. 451 had conceded the request of our members at Edmonton, and that the information had been forwarded to the secretary pro tem. I left Winnipeg that evening, arriving at Edmonton the following night. On February 1st, I met with some of the members who had made application for the charter, and learned that there would be a meeting that night, as they had expected I would arrive on that date. I attended the meeting that night, installed the officers and instructed all present what would be expected of each and every member were they to expect the results that could be obtained through organization, and the aims of our brotherhood. After many matters had been discussed in regard to the welfare of the union, the meeting adjourned with the assurance that each member would do his part towards the building of their local lodge and the brotherhood in general.

From the 2nd to the 4th I was in Edmonton. As I had made an appointment with the newly elected secretary, to familiarize him with the office he had accepted, and the work in connection with said office. I also called on some of our members employed at the G. T. P. at West Edmonton, and before leaving I had meetings with other members employed by the Edmonton, Dunvegan and British Columbia Ry., who had made application for a board of conciliation to the Department of Labor at Ottawa.

On the 5th I left for Winnipeg to attend the annual meeting of District Lodge No. 30,

arriving there on the morning of the 7th. The meeting convened Monday afternoon, the 8th, and adjourned Saturday the 13th. Meeting was called to order by Brother Geo. Chadburn, president District Lodge No. 30. Credentials were received from the following lodges: Nos. 126, 134, 417 and 392. The following delegates represented the lodges respectively: C. Davis, J. W. Johnstone, M. J. Frawley, J. Chapman and J. J. Chambers. Reports of officers were heard and commented upon. The report of the president in part referred to his trip to Montreal, to take over the books and supplies of District Lodge No. 30, from the late secretary-treasurer, Geo. McFetrich. It was found that McFetrich had appropriated the funds of the district lodge to the amount of \$300.00 for his pleasure, and in some instances forged the name of the president, so as to enable him to draw the money from the bank. McFetrich was not bonded, and the district lodge was the losers. The report of the delegates regarding organization was favorable. All reported slackness of trade and that there were a number of unemployed members as a consequence. The finances of the district lodge were ascertained. Brother Chadburn also submitted his report as secretary-treasurer pro tem, from the time he had taken over the books from McFetrich to date. The by-laws of the district were revised so as to be made more explicit for the members, and to render more financial assistance to the lodges affiliated than in the past. Communication from the secretary of the System Federation was read, seeking the opinion of District Lodge No. 30, as to the advisability of holding a convention of the System Federation. Brother Chadburn, who represented district 30 on western lines, and the sole representative of the boiler makers and helpers, stated that he had replied to the communication to the effect that owing to the prevailing industrial conditions throughout the country he had arrived at the opinion that it would be useless expenditure of money and that little could be accomplished. As there was no convention of the System Federation held it is evident that the other crafts affiliated had also arrived at the opinion that little could be accomplished. The decision of Brother Chadburn was approved by the delegates in attendance.

The election to the offices of president and vice-president had to be submitted to the lodges affiliated with District Lodge No. 30, as none of the delegates in attendance desired to accept either office. Brother Geo. Chadburn was nominated and elected to the office of secretary-treasurer.

The meeting decided that the next convention would be held in the city of Winnipeg.

After the adjournment of the district convention, I returned to Edmonton, arriving Monday morning, the 15th. As a Board of Conciliation had been applied for and granted, to investigate the dispute between the E. D. & B. O. Railway and the em-

ployes, I was requested to assist our members employed on that road, at the meetings held by the board. After the board had been appointed the first meeting was to be held January 25th. Later, owing to all members of the board being unable to be present on the latter date, February 15, was decided upon. Again the first meeting was postponed subject to call, and it became necessary for me to keep in touch with our attorney and board representative and committees. We had been disappointed several times as to the date the board would hold its first meeting. We held several committee meetings preparatory to the board holding its first meeting, so as to be in readiness. Finally we had our initial meeting and several other meetings were held up to and including the meeting held March 13th, when the Board of Conciliation was transformed into one of arbitration, after having failed to reach a satisfactory settlement. During the course of the Board of Conciliation, the members of the board recommended the general manager and myself meet with a view of arriving at a satisfactory settlement. We met on two different occasions, but were unable to agree, and reported back to the board. On March 13th, the board had reached what was thought to be a basis for an agreement. The general manager of the McArthur Construction Company was asked if the company would consent to the changes dating back to November 1st, and he refused. The board then asked if it altered its work from that of conciliation to arbitration, would both parties agree. A reply was received in the affirmative, and the members of the board decided on March 18th, for the date of the first hearing and several meetings were held concluding on March 22d. To date the board has not submitted its award, although I expect a copy of same when made and will submit same to our editor for publication in the columns of the Journal. The cause of this dispute arose on November 2d, last, when the company posted notice that the rates of pay would be reduced, effective November 1st. On the notice boiler makers were to be reduced from forty-seven and one-half cents per hour to thirty-five cents per hour, and helpers from thirty cents per hour to twenty-two and one-half cents per hour. And all others in proportion. Upon protests from the organized members of the various crafts employed, a board of conciliation was appointed. W. MacAdams, representing the men; O. M. Biggar, the company, and Mr. Justice Hyndman, as chairman. The running trades were also in dispute, and had applied for a separate board. The employes on the construction of the Hudson Bay Railway were also in dispute with the McArthur Construction Company owing to a reduction in wages. As the latter was a government contract the matter was immediately taken up with the government with a view of having it enforce the fair wage clause which is inserted in such con-
