Teacher and School Superintendent

VOLUME I
of the
NEW AMERICAN HISTORY AND GOVERNMENT SERIES
Each Volume a Complete Unit

(Copyright, 1919, A. R. McCook.)

This volume, which is the first in the New American History and Government Series, is prepared especially for the use of pupils in rural and grade schools. All teachers and students in high schools and colleges should have Volume II of the series—Teachers and Students' American History and Government.

In addition to complete outlines Volume II contains valuable historical documents and has groups of topics for special study and lists of suggestive and research questions covering the whole period of American history. It is both a guide and a reference and will prove invaluable to all teachers of American history and government and to pupils doing advanced work in these subjects.

Volume III of the series is the New American Government and Politics. It will prove a valuable addition to the library of the teacher or student.

Volume IV is the New American History, Government and Politics. It should be in every historical library—public or private—as it is invaluable for general reference and study. (In preparation.)

Address the author or the publishers of this volume in regard to this New American History and Government series.

History is the study of the life of a people.

"History is the biography of a society."

"History is the essence of innumerable biographies."

"Through the ages one increasing purpose runs."

"The present is the fruit of the past and the germs of the future."

"History knows not if, and might have been is a form of words unwritten in her book of phrases."—Ridpath.

EUROPE BEFORE THE DISCOVERY OF AMERICA

Peoples supposed to have visited America before 1492:

Chinese, Egyptians.

Phoenicians and Greeks.

Northmen, 1000.

Events hindering further visits:

Invasions of Goths, Vandals and Huns, 350 to 476.

Establishment of new nations.

Conquest among nations.

Lack of geographical knowledge.

Causes leading to a revival of interest in new lands:

Commercial ambition.

Religious zeal.

The crusades.

The renaissance.

What ancient Europe sent to the East:

Metals, wood, pitch, woolen cloth, linen, black lead, wine and glassware.

What ancient Europe brought from the East:

Silks, cotton cloth and other fine dry goods.

Dye woods and drugs.

Precious stones and ivory.

Spices and perfumes.

Cities which controlled trade with the East:

Venice, by way of the Mediterranean, the Red Sea and the Indian ocean.

Genoa, by way of Bosphorus and Black Sea, and then by caravan to the East.

Antioch, by way of Euphrates valley and Persian gulf.

What changed trade routes:

In 1453 the Turks captured Constantinople and refused to let the ships of other nations pass through the Bosphorus. This closed Genoa's route, gave Venice a monopoly and made a new route desirable.

New routes tried:

Passage around Africa by Diaz, a Portuguese sailor, who succeeded in sailing around the south cape, which he named Cape of Storms, but the name was changed to Cape of Good Hope by King John of Portugal.

Columbus' plan:

To sail west until he reached China or India.

"The great canon of history is its continuity."

History is the story of the evolution of society.

"America is the land of the future where, in the ages that lie before us, the burden of the world's history shall be revealed." —Hegel.

COLUMBUS

Birth—

Genoa, Italy, about 1446.

Parentage—

His parents were poor but ambitious and industrious. His father was a wool comber.

Education—

Attended the University of Pavia for a short time, where he paid special attention to mathematics, geography, astronomy and navigation; the sciences most nearly related to seafaring.

Read extensively and was always a student.

Marriage—

Married the daughter of a renowned navigator, governor of one of the Madeira islands.

He was thus brought into association with explorers and discoverers and gained much useful information, charts and maps.

Character—

Resolute, energetic and persevering.

Devotedly pious and very sensitive.

Important Events in Life—

Went to sea at age of fourteen.

Sailed much upon the Mediterranean and visited England, Iceland, coast of Guinea and Madeira islands.

Lived for a while at Lisbon, where he supported himself by making charts and maps.

Discovered America.

Incentives for Discovery—

Religious zeal.

Desire for a new route to India.

Acquisition of wealth and territory.

To prove the truth of his theory that the earth was round.

Attempts to Secure Aid—

Applied to King John of Portugal; to the kings of Spain and France; to his native city, Genoa, and to England.

Finally appealed to Ferdinand and Isabella of Spain and was successful.

Hindrances—

Defective geographical knowledge.

Ignorance and superstition of the people.

Incompetent sailors and poorly constructed ships.

Columbus was poor and much money was required to fit out an expedition.

Death and Burial—

Died in 1506, at Valladolid, Spain, where he was buried.

Remains were afterward taken to Seville, then to Santo Domingo, Hayti; later to Havana, Cuba, and finally (1899) back to Seville.

"The literature of a people reflects the purpose of the age."

THE ABORIGINAL PERIOD

Unknown to 1492

The Aboriginal American

Name—

Indian, given to the inhabitants of North and South America by Columbus, who supposed that the New World was a part of India, hence the name Indian.

Origin—

Uncertain—however, most of the tribes had traditions of an early immigration from some other country.
Theories, Asiatic immigration by way of Behring strait, descent from Esquimos, Chinese origin and American origin. The last named is probably correct.

Number—

Between two and three hundred thousand at the time of the discovery.

Manner of Living—

Were generally in the hunting and fishing stage, but they frequently carried on some crude agriculture, raising Indian corn, pumpkins, squash, beans and tobacco. The dog was the only domestic animal. Made some pottery, stone pipes, arrow heads, snow shoes, moccasins, birch bark canoes and wampum, which was used for money.

Clothing consisted of furs and skins of animals.

Indians of the north and east lived in huts and tents, but those of the southwest had stone buildings, of which ruins are still to be found.

Believed in a division of labor, the men did the hunting and fishing, the women did the other work.

Tools and Weapons—

Tools were few and of the rudest kind. Weapons consisted of bows and arrows, spears, flint hatchets and clubs.

Personal Appearance—

Copper color, eyes black and deep set, straight black hair with little or no beard and high cheek bones. The women let their hair grow, but the men cut all but a little tuft called the scalp lock. In size, general appearance and manners the difference in the different tribes was marked.

Traits of Character—

Living an outdoor life and depending not so much upon what they raised as upon the produce of their fishing and the chase, they became expert in woodcraft and were good hunters and fishers. In war they were deceitful, cunning, cruel, treacherous and revengeful, but possessed of wonderful self-control, and showed neither pleasure nor pain.

They were lazy, improvident and inveterate gamblers. Were grave, often morose, but grateful for favors. Good or bad treatment was always remembered.

Social Customs—

Personally the Indian had but little liberty. He was bound to the customs of his fathers. These customs regulated his marriage, his place in council and the way he painted his face. He had to prove that he was worthy of being a warrior before he was admitted to all of their proceedings.

The families living together in one house made up the Indian clan. All families belonging to the clan were supposed to be descended from the same female ancestor. From two or three to twenty or more clans made up a tribe, in which each clan was distinguished by some special badge or token.

All property except weapons and trinkets was held in common by the clan.

Progress and Education—

No progress was made. Like the Chinese the son lived like the father. To be skillful hunters and brave warriors was the greatest ambition. Education consisted of learning to throw the tomahawk, shoot with a bow and arrow and to spear fish. Books and papers were unknown.

Religion—

The Indian believed in a future life. The Great Spirit was his God. His heaven was a happy hunting ground. He worshipped dead ancestors, but did not worship idols. He believed that not only beasts, birds and reptiles, but also lakes, rivers and waterfalls had spirits that could help or harm him. Dancing was an important part of most of his religious exercises. Religious rites were performed by medicine men.

Government—

The Indian government may be called a pure democracy. Each clan chose its own sachem, a civil magistrate, whom they could depose at will. Each clan also had a number of war chiefs.

The tribe was governed by a council composed of the sachems of the different clans which made up the tribe. Each tribe also had a chief, but he had little real power. All important matters were settled by a council of the whole tribe. The Indian's idea of justice was that whoever suffered a wrong should avenge it.

CONNECTICUT

At Hartford, 1636—

As early as 1633 traders from the Plymouth colony established a trading post at Windsor. In 1635 John Winthrop, Jr., built a fort at Saybrook. The same year the foundations of Hartford were laid. The next year, 1636, the Rev. Thomas Hooker and his congregation of about one hundred made their way through the wilderness and settled at Hartford. Most of the immigrants were from Massachusetts. They were dissatisfied with the narrow spirit of those in control there and they were also attracted by the fertile valleys of the Connecticut and the prospects of securing valuable trade with the Indians.

NEW YORK

At New Amsterdam, 1623—

By a company of thrifty and honest Dutch settlers, who came to make a home in a land free from religious persecution. The object of the company was to take advantage of the valuable fur trade with the Indians and to establish a foothold for Holland in the New World.

In 1609 the Dutch East India Company sent Henry Hudson to discover a passage through America to the Indies. He discovered the Hudson river and returned to Europe. The next year an expedition was sent out to trade with the Indians. In 1614 the company established a trading post on the southern part of Manhattan island and erected Fort Nassau just below the present site of Albany.

In 1621 the Dutch West India Company was formed and they immediately took steps to secure the Indian fur trade. In 1623 they shipped a number of Walloons to New Netherlands. Part of them landed at New Amsterdam and the rest went up the river to Fort Orange, now Albany.

NEW JERSEY

At Elizabethtown, 1665—

By a small body of Englishmen under the leadership of Philip Carteret, who came out as governor. They were soon joined by emigrants from New England and some of the other colonies. The object of the proprietors was to acquire territory: of the colonists, to found homes.

Authority—

When, in 1664, New Netherlands came into the possession of the English, the Duke of York, who had been granted the territory by his brother, Charles II, sold the land between the Hudson and the Delaware to Lord Berkeley and Sir George Carteret. The land was also purchased from the Indians.

Government—

Proprietary,	1665-1702
Under control of New York,	1702-1738
Separate royal province,	1738-1776

With the beginning of the first French and English war, 1689, the early period of American history ends and the middle period begins and continues one hundred years, to 1789, when the Constitution of the United States was adopted.

King William's war was the beginning of the great struggle between England and France to decide which was to be the master of North America. The struggle began in 1689 and ended in 1763. It may be divided into two periods: That from 1689 to 1748, when the struggle was for possession of New France and Acadia. And from 1748 to 1763, when the struggle was not only for New France, but for Louisiana as well.

A REVIEW OF COLONIAL AMERICA

The New England Colonies—

Massachusetts, New Hampshire, Connecticut, Rhode Island.

The Middle Colonies—

New York, Pennsylvania, Delaware, New Jersey.

The Southern Colonies—

Virginia, Maryland, North Carolina, South Carolina, Georgia.

INDUSTRIAL

Occupations

1. Lumbering. I. The New England Colonies
 - a. The land was covered with large trees and as a result lumbering soon became important.
 2. Shipbuilding.
 - a. A great number of large trees made this an extensive industry.
 3. Fishing.
 - a. Salmon, cod and mackerel were caught in large numbers.
 - b. Whaling was also important.
 4. Commerce.
 - a. Sent flour, meat, horses, cattle, fish, oysters, onions, salt and barrel staves to the West Indies, for which they received sugar, molasses, cotton, wool and Spanish dollars. These dollars were used to pay England for her goods.

Note: Boston employed about six hundred ships in her foreign trade and at least one thousand in her coast trade and her fisheries.
 5. Manufacturing.
 - a. Manufacturing was generally forbidden by England, but lumber was sawed, leather tanned, rum distilled from molasses and paper and hats were made.
 6. Agriculture.
 - a. Owing to the character of the soil and the climate agriculture was not carried on extensively.
- II. The Middle Colonies
1. Agriculture. Cattle and grain were produced in large quantities.
 2. Commerce.
 - a. Large quantities of sawed lumber, meat, flour and other farm products were exported to Europe and to the West Indies. b. The fur trade was also extensive.
 3. Manufacturing.
 - a. Considerable quantities of paper and iron were manufactured, but the restrictions of England prevented their flourishing.
- III. The Southern Colonies
1. Agriculture.
 - a. Large quantities of tobacco, rice, indigo, tar and turpentine were produced and sent to England in exchange for manufactured goods.
 2. Commerce.
 - a. The products of the plantations were sent to Europe in exchange for hardware, crockery, household utensils, clothing, furniture and various articles of luxury.
 3. Manufacturing.
 - a. There was no manufacturing of importance. Articles of common use were made on the plantations, usually by the "indented servants."

SOCIAL

The New England Colonies

1. Society.

Even in democratic New England distinctions of dress were observed to distinguish the different ranks of society. The people were strict in morals. Only the gentry were addressed as Mr. and Mrs. The clergy were included in this class. Others above the rank of servants were called Goodman and Goodwife.

2. Labor.

Slavery existed to a greater or lesser extent in all the colonies, but it was dying out in the North because it was economically unprofitable. However, there seems to have been no widespread sentiment against it in New England until after the Revolution. The "indentured servants" or persons bound to service for a term of years to pay their expenses from the Old World, were an important element in most of the colonies, but they were less in New England than in some other parts of the country.

The Middle Colonies.

1. Society.

The manners of New York were essentially Dutch during colonial days. Because agriculture was the principal industry, most of the people lived on farms. The great patroons along the Hudson maintained the customs of the best society of Europe. Philadelphia was the largest and most metropolitan city in the colonies.

2. Labor.

The Quakers of Pennsylvania, who found it difficult to reconcile their religious principles with the ownership of human beings, were more opposed to slavery than were any of the other colonists. On the other hand, slavery flourished in Delaware. The "intended servants" and "apprentices" were numerous in the Middle Colonies, especially in Pennsylvania. They usually belonged to a good class of immigrants and often became independent farmers at the end of their time of service and merged into the white population.

The Southern Colonies

1. Society.

The Southern colonists, instead of living in towns and villages, as at the North, had large plantations and were surrounded by many servants and slaves, who performed all the labor, while the master gave himself up to social and political life. His great estate was really a little empire. (The landgraves, who received their titles under the Grand Model, established the only bona fide nobility ever recognized in America.)

2. Labor.

All labor was performed by servants or slaves. The slaves numbered from 30 to 60 per cent of the population. The industries of the South were much more suited to slavery than were those of the North and as a result slavery grew rapidly. (In addition to the negro slaves there were large numbers of the "indentured servants." The latter included not only those who served of their own will, but also many felons and convicts who had been sent from England. Boys and young women were often kidnaped in Europe and sent to America as servants.)

PREVIEW

The times that tried men's souls really began long before Old World Englishmen in red coats met New World Englishmen in homespuns on the martial slopes of Bunker Hill. And it continued long after the cannonading at Yorktown had ceased to echo through America.

From the day that the oppression of George and North forced the colonists to look only to themselves for relief until independence was finally won in a long and terrible revolution and made secure by the political philosophy that all men are equal it was a time that tried the souls of the truest and noblest. It was, in fact, a crucial period when men were separated from dress, when the line was drawn between fundamental democracy and arrogant aristocracy, when the Old World fiction of the divine right of kings was weighed in the balance and found wanting.

Old things passed away, old constitutions were transformed and new ones were created. Long strides were taken in the direction of human freedom. A declaration that governments derive their just power from the consent of the governed was made and maintained and crystallized in a federal constitution.

Ancient tyrannies were startled. Old World despots trembled on quaking thrones as the New World democracy broke away from the artificial reverence which a prostrate humanity had too long shown to the powers which had usurped government. America crossed the final threshold which led from the ignorance and superstition of the Middle Ages to the enlightenment of the New. A nation was born, and with it a new society and a new man.

"American history is a record of a continuous process of union."

STEPS LEADING TO UNION

Union of Connecticut Towns

1639

Was the first definite step toward union.

Delegates were present from Hartford, Windsor and Wethersfield.

Adopted the "oldest truly political constitution in America."

The New England Confederation

1643

Colonies of Massachusetts Bay, New Plymouth, Connecticut and New Haven entered into a league "for mutual strength in all our future concerns."

Attended by two commissioners from each colony.

Held annual meetings.

Discussed questions of peace, war and Indian relations.

Possessed only advisory powers.

Dissolved in 1684.

Confederation Between 1690 and 1754

A meeting in New York in 1690 of commissioners from Massachusetts, Virginia, Plymouth, Connecticut and New York "to fix upon such methods as should be judged most suitable to provide for the general defense and security, and for subduing the common enemy" was the first of about a dozen such intercolonial conferences.

As a result of these meetings social and religious prejudices were weakened and a sentiment for union was stimulated.

Note: In 1697 William Penn presented to the Board of Trade a plan of union for the colonies which, though not adopted, is of interest, for it used the word congress for the first time in connection with American affairs.

The plans presented for the following fifty years were largely fashioned after this plan.

The Albany Congress

1754

Assembled at the direction of the Lords of Trade.

Was composed of twenty-five of the leading men from seven colonies.

Made a treaty with the Indians.

Adopted a unanimous resolution that "a union of all the colonies is at present absolutely necessary for security and defense."

Adopted Franklin's "Albany" Plan of Union.

This plan provided for the permanent federation of all the colonies.

Did not secure the ratification of a single colony and was disapproved by the English government.

Note: Franklin said: "The assemblies all thought there was too much prerogative and in England it was thought to have too much of the democratic."

Was an important step toward union.

Stamp Act Congress
1765

Met in response to an invitation issued by the Massachusetts House of Representatives, principally to take action against the Stamp Act.

Was attended by twenty-eight delegates representing nine colonies. (Colonies not represented were Virginia, North Carolina, New Hampshire and Georgia.)

Met in New York and remained in session two weeks.

Measures—

A petition to the king. A memorial to the House of Lords.

An appeal to the Commons.

A declaration of rights—

States the rights of the colonists to be the same as those of natural born subjects of England.

Note: Christopher Gasden of South Carolina asserted: "There ought to be no New England man, no New Yorker, known on the continent; but all of us Americans."

Stamp act was repealed the next year.

First Continental Congress

September and October, 1774

1774

The English government continued her policy of coercion and in 1774 passed the repressive acts.

Again Massachusetts, under the leadership of Samuel Adams, called for a congress of all the colonies and hastened the meeting through its committees of correspondence.

Delegates from all the colonies except Georgia assembled at Philadelphia, Sept. 5, 1774, and remained in session until Oct. 26.

Measures:

A non-intercourse agreement.

An appeal to the people of Great Britain.

An address to the people of Canada.

A petition to the king.

A declaration of rights:

Laid claims to liberties and immunities of Englishmen, including a "Right of Representation . . . in all cases of taxation and internal policy subject only to the negative of their sovereign," and enumerated what they declared were "infringements and violations of the rights of the colonists."

Insisted upon the right of trial by jury.

Protested against the keeping of a standing army in any colony without the consent of the legislature.

Second Continental Congress

1775-1781

Measures—

Sent a petition to the king.

Took control of military affairs.

Elected Washington commander-in-chief of the army.

Provided for a national currency.

Established a treasury department.

Organized a general postoffice.

Opened American ports to all nations.

Appointed a committee to formulate ideas of independence and one to devise a form of confederation.

Adopted Declaration of Independence, July 4, 1776.

Sent a committee to France. Adopted general war measures.

Adopts Articles of Confederation, Nov. 15, 1777.

Note: Articles were not adopted by the states until March 1, 1781.

Insisted upon the right of trial by jury.

Protested against the keeping of a standing army in any colony without the consent of the legislature.

Congress of the Confederation

March 1, 1781, to March 2, 1789

Held annual sessions. Each state sent not less than two nor more than seven delegates, who were elected by the state legislatures for a term of one year, but they could be recalled at any time. No one could serve for more than three years in six. The delegates were paid by the states and each state had one vote.

Powers of the Congress—

Declare war and make treaties and alliances.

Establish rules governing captures on land and water.

Grant letters of marque and reprisal in times of peace.

Send and receive ambassadors.

Appoint courts for trial of piracies and felonies on the high seas.

Decide, on appeal, disputes between the states concerning boundaries and jurisdiction.

Regulate the value of coins struck by Congress or by the states.

Fix the standard of weights and measures.

Regulate trade and manage all affairs with the Indians, not members of states.

Establish and regulate postoffices.

Limitations of Congress—

Defective organization.

Lacked power to raise revenue and regulate commerce.

Could not enforce order, was practically little more than an advisory body.

Work Accomplished—

Was the general governing body during the time that the Articles of Confederation were in force.

Negotiated the peace treaty with England.

Adopted the Ordinance of 1787.

It "Resolved,"

"That, in the opinion of Congress, it is expedient that, on the second Monday in May next, a convention of delegates, who shall have been appointed by the several states, be held at Philadelphia, for the sole and express purpose of revising the Articles of Confederation and reporting to Congress and the several legislatures such alterations and provisions therein as shall, when agreed to in Congress, and confirmed by the state, render the federal Constitution adequate to the exigencies of government and preservation of the Union."

Also, "Resolved" (Sept. 13, 1788):

"That, the first Wednesday in January next be the day for appointing electors in the several states which before the said day shall have ratified constitution; that the first Wednesday in February next be the day for them to assemble in their respective states and vote for a President; and that the first Wednesday in March next be the time, and the present seat of Congress (New York) the place, for commencing the proceedings under the said constitution."

"Thirteen sovereignties pulling against each other and all tugging at the federal head will soon bring ruin on the whole." --Washington.

WAR OF 1812

"The Second War for Independence."

The Plan of the Americans Was—

(1) An army under Hull was to move from Detroit and invade Canada from the west. (2) An invasion was to be made at the center. An army under General Van Rensselaer was to cross Niagara river, take Queenstown and join Hull. The two armies were then to capture York, now Toronto, and go eastward toward Montreal. (3) An army under Dearborn was to go by way of Lake Champlain and meet the troops under Hull and Van Rensselaer before Montreal, where the three armies were to unite for an attack on Montreal and Quebec and thus complete the conquest of Canada.

But the plan of the Americans proved to be a dismal failure. Hull was driven from Canada and surrendered his army and the whole of the Northwest at Detroit. Van Rensselaer was defeated at Queenstown and did not even get a foothold in Canada. Dearborn stopped after reaching the northern boundary of New York and the year of 1812 came to an end without accomplishing anything.

Causes

Remote—

- England's injustice.
- Growth of a national spirit.

Immediate—

- Dispute over treaty of 1783.

Said President Wilson in his war message:

The present German submarine warfare against commerce is a war against all mankind. * * * The challenge is to all. * * * Neutrality is no longer feasible or desirable, when the peace of the world is involved and the freedom of its peoples, and when the menace to that peace and freedom lies in the existence of autocratic governments, backed by organized force which is controlled wholly by their will, not the will of their people. * * * We have no quarrel with the German people. * * * A steadfast concert for peace can never be maintained except by a partnership of democratic nations. * * * No autocratic government could be trusted to keep faith with it. * * * Only free peoples can prefer the interests of mankind to any narrow interests of their own. * * *

We are now about to accept the gage of battle with the natural foe of liberty. * * * We are glad to fight for the ultimate peace of the world and for the liberation of its peoples, the German people included. * * *

The world must be made safe for democracy. We have no selfish ends. We desire no conquest, no dominion. We seek no indemnities for ourselves, no national compensation for the sacrifice we shall freely make.

It is a fearful thing to lead this great, peaceful country into war, into the most terrible and disastrous of all wars, civilization itself seeming to be in the balance.

But the right is more precious than peace and we shall fight for the thing we have always carried nearest our hearts—for democracy, for the right of those who submit to authority to have a voice in their own governments, for the rights and liberties of small nations, for a universal dominion of right by such a concert of free peoples as shall bring peace and safety to all nations. * * *

To such a task we can dedicate our lives and our fortunes, everything that we are and everything that we have, with the pride of those who know that the day has come when America is privileged to spend her blood and her might for the principles that gave her birth and happiness and for the peace which she has treasured. God helping her, she can do no other.

"Is it, O man, with such discordant noises,
With such accursed instruments as these,
Thou drownest Nature's sweet and kindly voices,
And jarrest the Celestial harmonies?"

"Were half the power that fills the world with terror,
Were half the wealth bestowed on camps and courts,
Given to redeem the human mind from error,
There were no need of arsenals and forts

"Down the dark future, through long generations,
The echoing sounds grow fainter and then cease;
And like a bell, with solemn, sweet vibrations,
I hear once more the voice of Christ say, 'Peace!'"

"Peace and no longer from its brazen portals
The blast of War's great organ shakes the skies!
But beautiful as songs of the immortals,
The holy melodies of love arise."

"There will come that day when the world will say: This American that we thought was full of contrary counsels now speaks with the great volume of the heart's accord; and the great heart of America has behind it the supreme moral force of righteousness and of hope for the liberty of mankind."

—President Wilson.

AMERICA

My country, 'tis of thee. Sweet land of liberty,
Of thee I sing.
Land where my fathers died, Land of the pilgrim's pride,
From every mountain side let freedom ring.

My native country, thee, Land of the noble free,
Thy name I love.
I love thy rocks and rills, Thy woods and templed hills;
My heart with rapture thrills like that above.

Let music swell the breeze and ring from all the trees
Sweet freedom's song.
Let mortal tongues awake, let all that breathe partake.
Let rocks their silence break,—Thy sound prolong.

Our fathers' God, to Thee, Author of liberty,
To Thee we sing.
Long may our land be bright, with freedom's holy light.
Protect us by Thy might, Great God, our king.

"In the beauty of the lilies,
Christ was born across the sea,
With a glory in His bosom
That transfigures you and me.
As He died to make men holy'
Let us LIVE to make men free.

THE PRESENT CRISIS

Then to side with truth is noble when we share her wretched crust,
Ere her cause bring fame and profit, and 'tis prosperous to be just;
Then it is the brave men chooses, while the coward stands aside,
Doubting in his abject spirit, till his Lord is crucified.
And the multitude make virtue of the faith they had denied.

'Tis as easy to be heroes as to sit the idle slaves
Of a legendary virtue carved upon our fathers' graves,
Worshippers of light ancestral make the present light a crime;—
Was the Mayflower launched by cowards, steered by men behind their time?
Turn those tracks toward Past or Future, that make Plymouth Rock sublime?

They were men of present valor, stalwart old iconoclasts,
Unconvinced by axe or gibbet that all virtue was the Past's;
But we make their truth our falsehood, thinking that hath made us free,
Hoarding it in mouldy parchments, while our tender spirits flee
The rude grasp of that great Impulse which drove them across the sea.

They have rights who dare maintain them; we are traitors to our sires,
Smothering in their holy ashes Freedom's new-lit altar-fires;
Shall we make their creed our jailor? Shall we, in our haste to slay,
From the tombs of the old prophets steal the funeral lamps away
To light up the martyr-fagots round the prophets of today?

New occasions teach new duties; Time makes ancient good uncouth;
They must upward still, and onward, who would keep abreast of Truth;
Lo, before us gleam her camp-fires! we ourselves must Pilgrims be,
Launch our Mayflower, and steer boldly through the desperate winter sea,
Nor attempt the Future's portal with the Past's blood-rusted key.

—Lowell.

ABRAHAM LINCOLN

“I am not bound to win, but I am bound to be true. I am not bound to succeed, but I am bound to live up to what light I have. I must stand with anybody that stands right, stand with him while he is right, and part from him when he goes wrong.”

The Immortal Declaration of Independence

JULY 4, 1776

WHEN in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the Powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain inalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience has shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security.
