

# ZERO - G

ZERO - G MC FOUR-ETHNIC

Loops are mostly 4-bar plus 2-bar lengths, or 2-bars plus 1-bar. Some are a full 8 bars long, to make the most of the ever-increasing amounts of memory provided by the new generation of samplers coming onto the market. Thus you are able to capture the full human feel of the loop. However, there is always a 2-bar plus 1-bar version of each 8 bar/4-bar loop in case your sampler has a smaller memory.

Samples with pitched instruments, such as flutes, have suggested keys that you can use them in. Some of these pitched loops will not, of course, quite be in concert pitch but can be fine-tuned on your sampler.

It was thought that giving tempo/BPM settings would be irrelevant as the tempo can be altered (within a reasonable range) to suit your track by tuning up or down in pitch. As with the Zero - G Datafile CDs (which contain over 350 loops) no BPMs were given in an effort to encourage the user to select loops according to their suitability to the mood of the track rather than be limited to those loops that happen to be exactly the right tempo already.

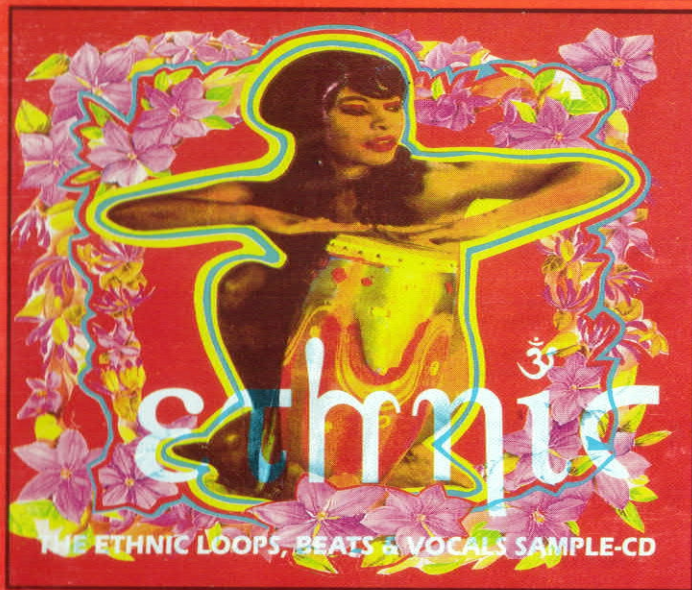

All sounds are recorded in mono to allow one channel to be connected to your sampler input and the other to your mixer etc for monitoring purposes.

## THE ETHNIC LOOPS, BEATS & VOCALS SAMPLE-CD PRODUCED BY THE PARADISE ORGANISATION
