

Addendum #3

- **Question #1: Are you looking for a specific set of software development language skills?**

Answer: Python, TypeScript and JavaScript are particularly important to support work in the Hyperledger Aries community such as Aries Cloud Agent Python, Aries Framework JavaScript and Aries Mobile Agent React Native. However, other languages may be required such as Rust for Hyperledger Indy.

- **Question #2: Would the Ministry be open to suggestions of different languages or frameworks?**

Answer: The Ministry has a significant investment in Aries Cloud Agent Python and Aries Framework JavaScript, but is committed to interoperability between Aries agents of different frameworks, such as Aries Framework Go, for example.

- **Question #3: Is there an estimate of what percentage of time is required onsite?**

Answer: Please refer to section 3.4 Location of Work in the RFP. The proponents are expected to be available during office hours in Pacific Standard Time (PST).
